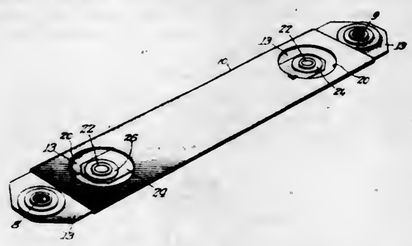
1,389,310. GARMENT-HANGER. THEODORE KAUFER, New York, N. Y. Filed Dec. 3, 1920. Serial No. 428,002. 11 Claims. (Cl. 211—13.)

1. In a garment hanger, the combination with a shoulder member having depending portions near the ends thereof, of a flexible collar supporting member engaging said depending portions and extending across between them for supporting other garments below the shoulder

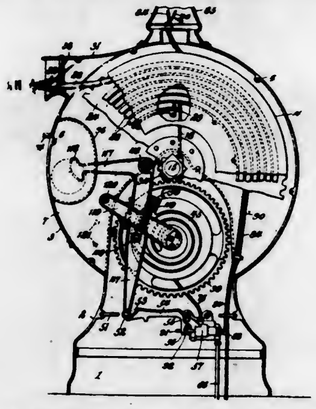


member, said flexible member also extending above the shoulder member, and means for supporting the hanger from the upwardly extending portion of the flexible member.

1,389,311. GRINDING-MACHINE. CONRAD KNOTH, Hillside, N. J., assignor to Hyatt Bearings Division, General Motors Corporation, Harrison, N. J., a Corporation of New York. Filed Aug. 10, 1920. Serial No. 402,682. 6 Claims. (Cl. 64—24.)

3. In a grinding machine, the combination, with a spindle, of a carriage, a tubular nozzle affixed to the carriage and inclosing the said spindle, and half-bearings fitted inside the nozzle at opposite sides of the spindle, the bearings upon one side of the spindle being fixed rigidly in the nozzle and the opposed bearings being provided with springs to press them and the spindle toward the fixed bearing.

1,389,312. ELECTRIC HEATER. EDWIN N. LIGHTFOOT, New York, N. Y., assignor to the Cutler-Hammer Mfg. Co., Milwaukee, Wis., a Corporation of Wisconsin. Filed Mar. 3, 1920. Serial No. 362,991. 11 Claims. (Cl. 219—67.)



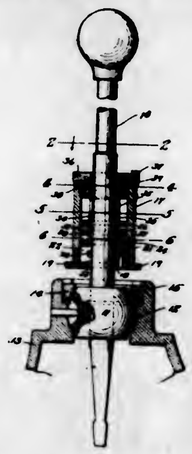
1. An electric heater having in combination a resistor, an insulating strip on each side of the resistor, one of the strips being provided with an aperture, a pair of sheet metal plates forming an inclosure for the insulated resistor and having alined apertures opposite the aperture in the insulating strip, and a hollow terminal rivet connected with the resistor and extending through the apertures of the insulating strip and the adjacent plate, the other insulating strip extending across the aperture in the adjacent plate to form an insulating window therefor.

1,389,313. TIE-BAR FOR ROLLER-BEARING CAGES. CHARLES S. LOCKWOOD, Newark, N. J., assignor to Hyatt Roller Bearing Division, United Motors Corporation, Harrison, N. J., a Corporation of New York. Filed Sept. 16, 1920. Serial No. 410,700. 4 Claims. (Cl. 64—62.)

1. A roller-bearing cage having mortises therethrough and tie-bars each formed with two similar members having tenons to jointly engage the opposite mortises in the heads, the inner portions of the members being disposed radially to the center of the cage and forming a tangential contact with the adjacent sides of the rolls, and the outer portions of the members bent tangentially to the rolls upon the outer half of the same.

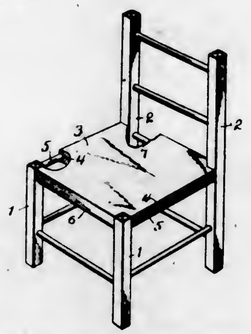
1,389,314. HOSE-REEL. JOSEPH B. MCMULLIN, Oskaloosa, Iowa, assignor to Western Manufacturing Co., Oskaloosa, Iowa, a Corporation of Iowa. Filed Aug. 13, 1919. Serial No. 317,294. 16 Claims. (Cl. 299—78.)

1. In a hose reel structure, a hose reel provided with a hub having gear teeth thereon with a circumferential groove in the gear teeth, a spindle carrying the hub, a spring drum with a gear wheel thereon engaging the gear teeth, and a shield overlying the gear teeth and provided with a tongue entering the groove in the gear teeth to hold the hub on the spindle.



1,389,315. FINGER-RING-CASTING PATTERN. DE WITT T. MOATS, Indianapolis, Ind. Filed Dec. 15, 1920. Serial No. 430,895. 8 Claims. (Cl. 22—158.)

1. A flexible top half ring pattern.

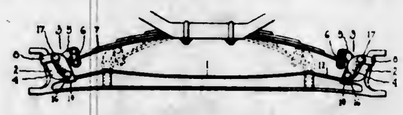


1,389,316. GEAR-SHIFT-LEVER LOCK FOR AUTOMOBILES. CHARLES W. MUELLER, St. Louis, Mo. Filed Feb. 28, 1919. Serial No. 279,845. 2 Claims. (Cl. 70—128.)

1. The combination of a fixed member, a lever fulcrumed therein, a lock mounted on said lever and comprising a housing slidingly mounted on said lever and held against rotation with respect to said lever, means on said housing for engaging said member to prevent movement of the lever, adjustable rings in the housing coöperating with the lever to permit longitudinal movement of the housing on the lever into and out of locking engagement therewith, a rotatable member on said housing

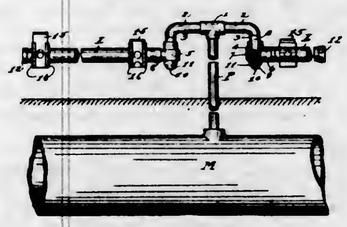
for manipulatively operating said rings, detaining means for yieldingly holding said member in rotatable adjusted position, and means for raising said housing when said disks are arranged to permit longitudinal movement thereof, said means also preventing said housing from returning to a locking position until it is forced into such locking position.

1,389,317. CHAIR. JOHN B. NOGGLE, Kansas City, Mo. Filed Nov. 8, 1920. Serial No. 422,434. 4 Claims. (Cl. 155—178.)



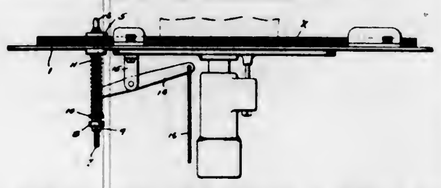
1. A chair having legs, a board seat and a rung supported by the legs and extending through the seat transversely with the grain of the board and holding the latter from vertical flexure in either direction, substantially as set forth.

1,389,318. SPRING-SUSPENSION ATTACHMENT FOR MOTOR-VEHICLES. LOUIS OBRECHT, Mount Clemens, Mich. Filed Sept. 27, 1920. Serial No. 413,135. 3 Claims. (Cl. 267—54.)



1. A spring attachment for motor vehicles having an axle formed with a laterally extending yoke arm adjacent each end thereof, said attachment including spring perches and a semi-elliptic spring connected at its ends

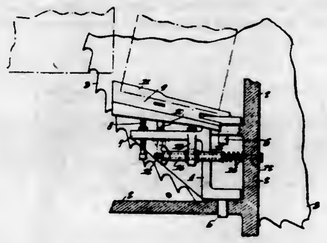
to said perches, each perch comprising a member formed to seat within the meeting angles of said axle and its yoke arms and to engage one side of the adjacent yoke



arm and axle, a clamping member to engage the other side of the yoke arm and axle, and means for securing the clamping member to said seated member to clamp said arm and axle therebetween.

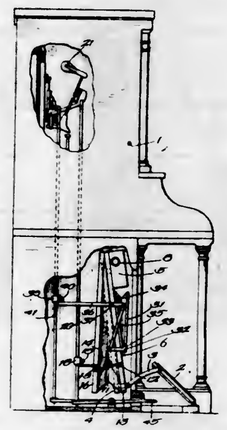
1,389,319. IRRIGATING DEVICE. GEORGE E. QUIGLEY, Yorba Linda, Calif. Filed June 25, 1920. Serial No. 393,447. 5 Claims. (Cl. 61—12.)

1. An irrigating system including a water main, a vertical pipe communicating therewith and extended above the surface of the ground, oppositely directed pipes stationarily held on the upper end of said pipe, swivel members held on the ends of said stationary pipes, and horizontal pipes connected with said swivel members and adapted for movement in a substantial arc about the axis of said stationary pipes, said horizontal pipes having apertures therein for discharging the water therefrom.



1,389,320. CLAMP FOR CLOTH-MACHINES. BARNETT RUBINSTEIN, St. Louis, Mo. Filed June 16, 1919. Serial No. 304,680. 1 Claim. (Cl. 164—79.)

In a cloth clamp, the combination of a work table, a clamping bar, a centrally arranged handle thereon, rods carried by the ends of the bar and extending through the work table, springs coöperating with the rods and tending to force the bar toward the table, a bar connecting the lower ends of said rods, a foot-operated lever, and a link connecting said foot-operated lever and the center of said connecting bar.

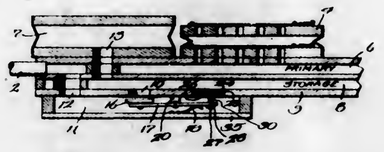


1,389,321. SHINGLE-MACHINE TABLE. HENRY SCHAAKE, Vancouver, British Columbia, Canada. Filed Aug. 4, 1920. Serial No. 401,249. 6 Claims. (Cl. 143—132.)

1. A table for a shingle cutting machine, said table comprising a bracket pivotally mounted in the frame of the machine to turn to and from the plane of the saw plate, a table top adjustably mounted on the bracket with one edge close to the plane of the saw plate, means for securing the top in any desired position of adjustment,

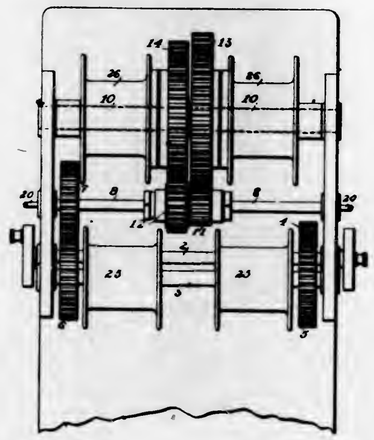
means limiting movement of the table top toward the plane of the saw plate, and means tending to hold it against that limit.

1,389,322. PUMPING SYSTEM FOR PLAYER-PIANOS. RAY W. SCOTT, New York, N. Y., assignor, by direct and mesne assignments, of two-fifths to Scott Player Action Co., Racine, Wis., a Corporation of Illinois, and three-fifths to The Northern Trust Company, Chicago, Ill., a Corporation of Illinois, trustee. Filed Sept. 12, 1919. Serial No. 323,319. 2 Claims. (Cl. 84—37.)



1. A player piano action in which a soft pedal stick rises to shorten the throw of the hammers, a pumping system having a storage reservoir, one wall of which is movable, a lifting lever which at one end underlies a portion of the pedal stick for lifting it, said lever having a stationary fulcrum at the other end and having a cam surface in it between its ends whereby the motion of the pedal stick is increased in comparison with the motion of the cam, and a controlling element actuated by the movable wall of the reservoir and adapted to actuate said cam for raising and lowering the lever and pedal stick in accordance with the movement of the movable wall of the reservoir.

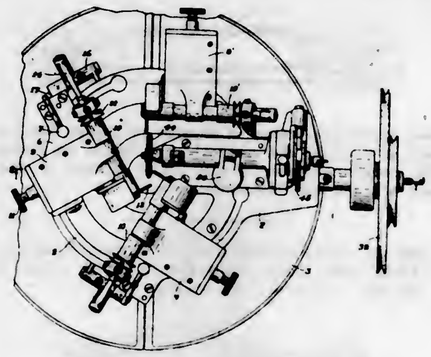
1,389,323. PUMPING SYSTEM FOR PLAYER-PIANOS. RAY W. SCOTT, New York, N. Y., assignor, by direct and mesne assignments, of two-fifths to Scott Player Action Co., Racine, Wis., a Corporation of Illinois, and three-fifths to The Northern Trust Company, Chicago, Ill., a Corporation of Illinois, trustee. Filed Sept. 18, 1919. Serial No. 324,379. 12 Claims. (Cl. 84—40.)



1. A pumping system for player actions having an exhaust pump, a storage chamber having a wall separating

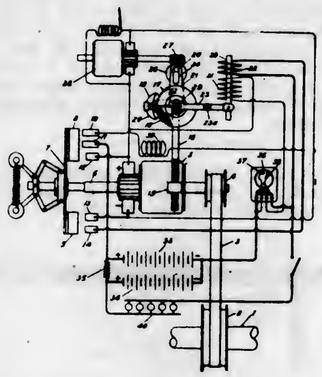
it from said pump, the wall having a port passing through it, a tube communicating with the player action for actuating it, said tube communicating with the pump and communicating with the storage chamber through said port, a valve for controlling said port whereby when the valve

is closed the tension in the duct will be generated directly from the exhaust pump and when said valve is open the tension in said duct will be modified by the degree of tension in said storage chamber, and a diaphragm responsive to sudden changes of tension in said exhaust pump for controlling the position of said valve.



1,389,324. LOGGING-ENGINE. CHARLES M. STEVENSON, Vancouver, British Columbia, Canada. Filed Feb. 8, 1921. Serial No. 443,402. 5 Claims. (Cl. 254—185.)

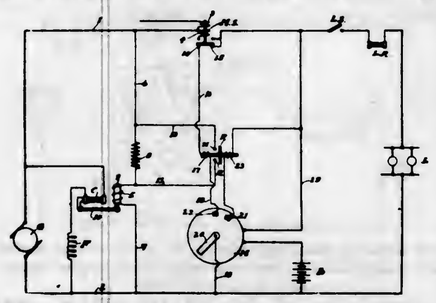
1. In a log hauling engine having haul-back drums and independent main-line drums mounted on separate shafts, means including a shaft distinct from the haul-back drums and the main line drums and intermediate shafts for driving the shaft of the haul-back drums, an intermediate shaft located between the haul-back shaft and the main-line shaft, means for driving the intermediate shaft from the haul-back shaft, and means for driving the main-line shaft from the intermediate shaft, said driving means including mechanism for driving the main line shaft at different speeds.



1,389,325. CUTTER-GRINDING MACHINE. JOHN J. THACHER, Wethersfield, Conn., assignor to Pratt & Whitney Company, New York, N. Y., a Corporation of New Jersey. Filed Oct. 21, 1919. Serial No. 332,323. 25 Claims. (Cl. 51—33.)

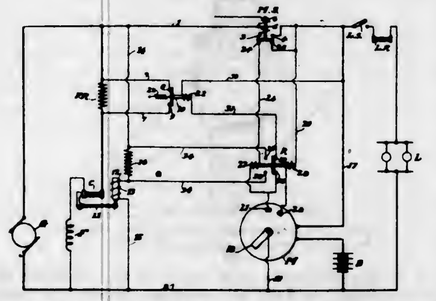
1. A cutter grinding machine comprising the combination of a rotary work support, a plurality of rotatable spindles each adapted to receive a grinding wheel thereon to dress the work, a support for each spindle, means permitting adjustment of each spindle support angularly relative to the work support, a member pivoted to each spindle support and having an arm directly engaging the

spindle, and mechanism for operating each member about its pivot to longitudinally reciprocate the spindles.



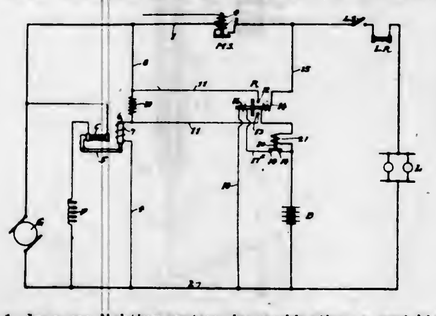
1,389,326. SYSTEM OF ELECTRICAL DISTRIBUTION. WILLIAM A. TURBAYNE, Niagara Falls, N. Y., assignor to U. S. Light & Heat Corporation, Niagara Falls, N. Y., a Corporation of New York. Filed June 15, 1916. Serial No. 103,744. 6 Claims. (Cl. 171—313.)

4. A system of electrical distribution, a generator, a pair of storage batteries, like terminals of which are connected through a common lead to one side of said generator, an integrating meter in said lead measuring the net charge and discharge of both batteries, and means responsive to said meter to cause said generator to produce a substantially constant voltage.



1,389,327. SYSTEM OF ELECTRICAL DISTRIBUTION. LEONARD A. WATSON, Brooklyn, N. Y., assignor to The Safety Car Heating and Lighting Company, New York, N. Y., a Corporation of New Jersey. Filed Sept. 19, 1919. Serial No. 325,001. 14 Claims. (Cl. 171—313.)

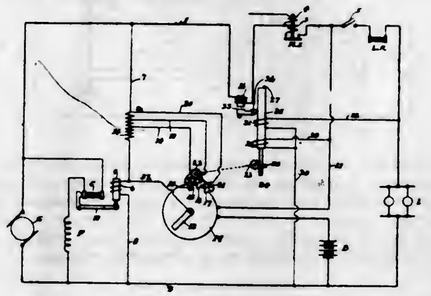
2. In a system of the character described, in combination, a variable speed generator, a battery adapted for connection to be charged thereby, electro-responsive means to regulate the generator voltage during the times of closed circuit connection between the battery and the generator, and automatic means operable to affect said electro-responsive means but only at an interval of regu-



lating ineffectiveness of the latter succeeding a major charge to said battery.

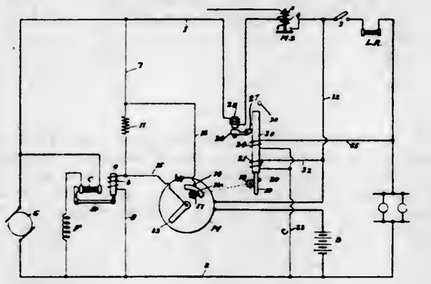
1,389,328. SYSTEM OF ELECTRICAL DISTRIBUTION. LEONARD A. WATSON, Brooklyn, N. Y., assignor to The Safety Car Heating and Lighting Company, New York, N. Y., a Corporation of New Jersey. Filed Sept. 19, 1919. Serial No. 325,002. 9 Claims. (Cl. 171—313.)

8. In an electrical system of distribution, in combination, a variable speed generator, a battery adapted for connection to be charged thereby, a regulator for said generator effective during battery charging, automatic means responsive to generator voltage and actuated upon a predetermined diminishment of such voltage under certain conditions to affect said regulator, and means to effect said diminishment of generator voltage at the completion of battery charging.



1,389,329. SYSTEM OF ELECTRICAL DISTRIBUTION. LEONARD A. WATSON, Brooklyn, N. Y., assignor to The Safety Car Heating and Lighting Company, New York, N. Y., a Corporation of New Jersey. Filed Sept. 19, 1919. Serial No. 325,003. 5 Claims. (Cl. 171—313.)

1. In a car lighting system, in combination, a variable speed generator, a battery adapted for connection to be

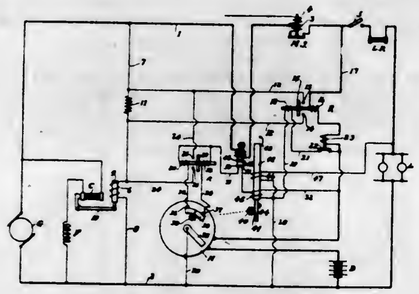


charged thereby, a regulator for said generator including a voltage responsive coil connected across the generator mains, an element of fixed resistance in series with said coil and automatic means responsive to battery charging current and operable upon the deliverance of said current in excess of a predetermined amount to shunt said resistance and operable upon the deliverance of battery charging current less than a predetermined lower amount to open the shunt about said resistance.

1,389,330. SYSTEM OF ELECTRICAL DISTRIBUTION. LEONARD A. WATSON, Brooklyn, N. Y., assignor to The Safety Car Heating and Lighting Company, New York, N. Y., a Corporation of New Jersey. Filed Sept. 19, 1919. Serial No. 325,004. 11 Claims. (Cl. 171—313.)

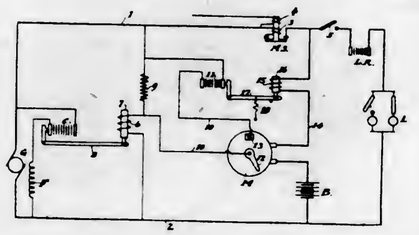
1. In a car lighting system, in combination, a variable speed generator, a battery adapted for connection to be charged thereby, an electro-responsive regulator for the generator, and automatic means to affect said regulator for reducing the generator voltage after battery charging to a variable valve dependent on the condition of said battery.

1,389,331. SYSTEM OF ELECTRICAL DISTRIBUTION. LEONARD A. WATSON, Brooklyn, N. Y., assignor to The Safety Car Heating and Lighting Company, New York, N. Y., a Corporation of New Jersey. Filed Sept. 19, 1919. Serial No. 325,005. 6 Claims. (Cl. 171—313.)



1. In a car lighting system, in combination, a variable speed generator, a battery adapted for connection to be charged thereby, electro-responsive regulating means for governing the generator voltage, and automatic means including an ampere hour meter to affect said regulator after a variable amount of measured current has been delivered to said battery for reducing the subsequent standard of voltage regulation.

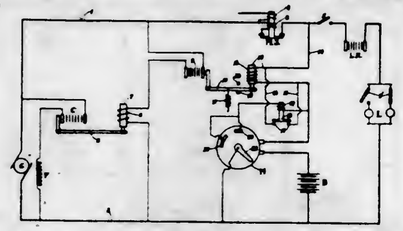
1,389,332. SYSTEM OF ELECTRICAL DISTRIBUTION. LEONARD A. WATSON, Brooklyn, N. Y., assignor to The Safety Car Heating and Lighting Company, New York, N. Y., a Corporation of New Jersey. Filed Sept. 19, 1919. Serial No. 325,006. 7 Claims. (Cl. 171—313.)



2. In combination, a variable speed generator, a storage battery adapted for connection to be charged thereby, a

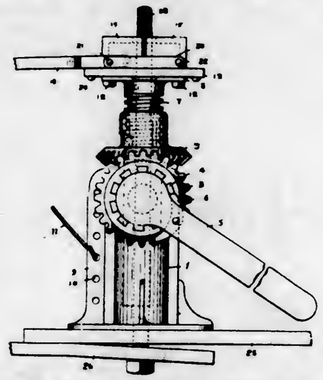
regulator for said generator including a voltage-responsive coil tending when effective to maintain relative constancy of generator voltage as against speed changes and as against gradual changes in counter E. M. F. of the battery, automatic means influenced by the amount of charg-

ing current for affecting said regulator under certain conditions to determine the effectiveness of said coil, and means to affect said regulator at a time after substantial battery charging to determine the effectiveness of said coil dependent on the voltage of said battery and on a predetermined diminishment of generator voltage.



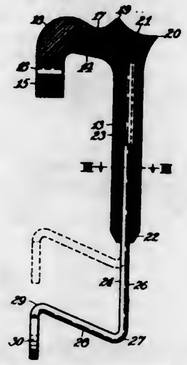
1,389,333. SYSTEM OF ELECTRICAL DISTRIBUTION. LEONARD A. WATSON, Brooklyn, N. Y., assignor to The Safety Car Heating and Lighting Company, New York, N. Y., a Corporation of New Jersey. Filed Sept. 19, 1919. Serial No. 325,008. 3 Claims. (Cl. 171—313.)

1. In combination, a variable speed generator, a battery adapted for connection to be charged thereby, a regulator including a voltage coil tending when effective to maintain substantial constancy of generator voltage as against speed changes and as against gradual changes in the counter E. M. F. of the battery, a meter indicative of the state of battery charge by current measurement and adapted, after substantial battery charging, to affect said regulator for reducing the value of generator voltage constancy to be thereafter maintained, and means including a current coil connected in the battery branch to affect said regulator after the action of said meter.



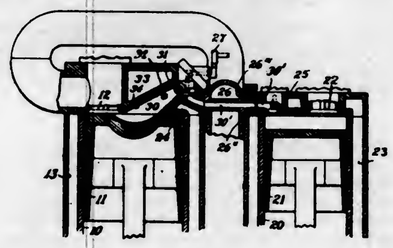
1,389,334. SYSTEM OF ELECTRICAL DISTRIBUTION. LEONARD A. WATSON, Brooklyn, N. Y., assignor to The Safety Car Heating and Lighting Company, New York, N. Y., a Corporation of New Jersey. Filed Sept. 19, 1919. Serial No. 325,010. 5 Claims. (Cl. 171—313.)

1. In combination, a variable speed generator, a battery adapted for connection to be charged thereby, a regulator including a voltage coil tending when effective to maintain constancy of generator voltage as against speed changes and as against gradual changes in counter E. M. F. of said battery, a variable resistance in the circuit of said coil, a series coil in the battery branch adapted to control said resistance, and means including an ampere



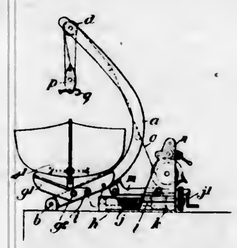
hour meter to render said series coil ineffective to control said resistance under certain conditions of battery charge.

1,389,335. PULLING AND HOLDING DEVICE. JOHN A. WATTERWORTH, Duluth, Minn. Filed Mar. 2, 1920. Serial No. 362,799. 4 Claims. (Cl. 29—84.)



1. In combination, a jack screw of the character described having an axial bore entirely through the screw thereof, a threaded bolt through the entire length of the jack screw and extending thereabove, a bed plate pivotally carried upon the upper end of the screw of the jack and a split nut adjustably carried upon the bed plate and means whereby the bolt may be engaged or disengaged manually by the split nut.

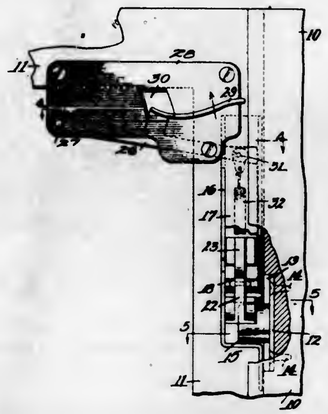
1,389,336. ADJUSTABLE HANDLE FOR PERCOLATORS. ROY D. WICKERSHAM, Perry township, Marion county, Ind. Filed May 25, 1921. Serial No. 472,479. 3 Claims. (Cl. 16—119.)



1. An adjustable handle comprising a non-metallic main part having a bore therein, the main part having a lateral arm provided on its end with a lug, and a metallic part comprising a rod longitudinally adjustable in the bore in the main part and having an arm thereon provided with an anchor plate.

1,389,337. INTERNAL-COMBUSTION ENGINE. MERL R. WOLFARD, Cambridge, Mass. Filed Mar. 22, 1916. Serial No. 85,758. 32 Claims. (Cl. 123—68.)

1. In an internal combustion engine, the combination of a cylinder; a mixing and combustion passage leading thereto; means to introduce the main charges of air and fuel into the passage gradually with progressive combustion during flow toward and into said cylinder; and a piston whose head is close to the head of the cylinder during said flow; there being a recess in one of said heads providing a space located to receive delivery of said passage which is greater than the space elsewhere between the close-together heads.

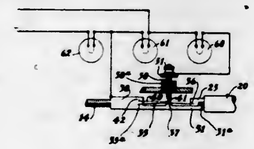


1,389,338. SHIP'S DAVIT. ROBERT HILLS ALEXANDER, Willington Quay, and THOMAS GRAHAM, Sunderland, England. Filed Feb. 20, 1920. Serial No. 360,082. Renewed July 23, 1921. Serial No. 487,132. 3 Claims. (Cl. 9—22.)

1. In a ship's davit the combination of a single curved davit arm broadened in each direction internally toward its pivotal axis, its curvature being such that when inboard, the pivotal axis is exterior of the vertical plane containing the longitudinal center line of the boat and the extremity of the arm in said vertical plane two laterally widely spaced bearings attached to the ship's deck carrying said pivotal axis, and lifting tackle for the boat carried by the extremity of the arm.

1,389,339. LOCK. CARL ERIC ANDERSON, Worcester, Mass. Filed Mar. 3, 1919. Serial No. 280,298. 5 Claims. (Cl. 292—198.)

1. A lock having, in combination, a striker, a casing, a latch pivoted therein, a locking member, and yielding means tending continuously to move said latch from operative to inoperative position and to advance said locking member to operative position, said locking member being held in inoperative position by said latch when the latter is in inoperative position, and when released, being movable directly toward said latch and being effective



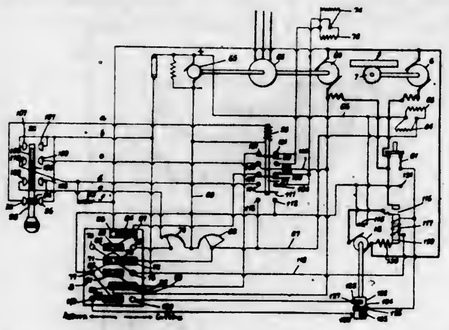
to advance said latch toward full operative position and to positively lock said latch in every advanced position thereof.

1,389,340. METHOD OF TREATING EXCELSIOR. BENJAMIN R. BEALL, Kansas City, Mo. Filed June 11, 1920. Serial No. 388,374. 6 Claims. (Cl. 167—3.)

1. The method of treating excelsior which consists in applying to the excelsior a substance capable of preventing development of must and mold and subjecting the excelsior to a packing pressure.

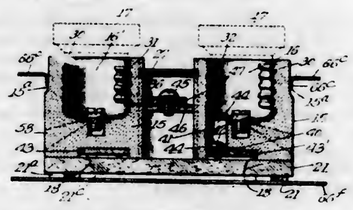
5. A packing material consisting of excelsior treated with a sulfite of soda in a dry state capable of preventing development of must and mold.

1,389,341. LINEAR-MEASURING MACHINE. BRYANT H. BLOOD, Hartford, Conn., assignor to Pratt & Whitney Company, New York, N. Y., a Corporation of New Jersey. Filed Jan. 31, 1920. Serial No. 355,466. 30 Claims. (Cl. 33—125.)



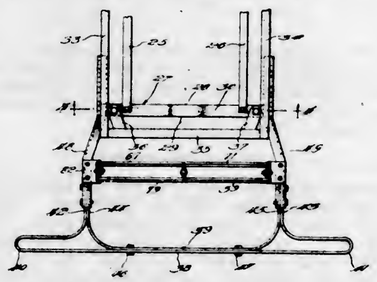
3. A measuring machine tailstock comprising in combination a longitudinally movable plunger, resilient means resisting movement of said plunger in one direction, and means deflected by movement of said plunger in said direction to open or close an electric circuit.

1,389,342. PLANER AND SYSTEM OF MOTOR CONTROL THEREFOR. HAROLD L. BLOOD, Plainfield, N. J., assignor to Niles-Bement-Pond Company, Jersey City, N. J., a Corporation of New Jersey. Filed Mar. 15, 1917. Serial No. 154,927. 22 Claims. (Cl. 172—240.)



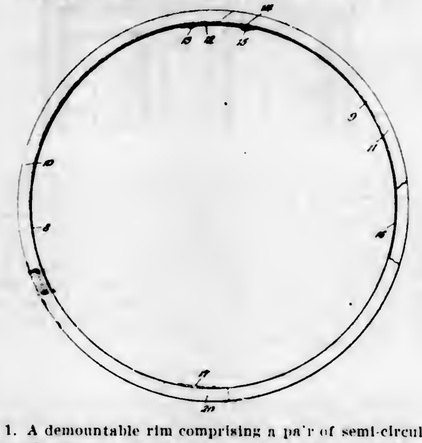
1. The combination of a reciprocating table, a reversing electric motor connected with the table, an automatic table actuated switch normally serving to successively reverse the motor and cause it to drive the table successively in opposite directions, a manually operable switch supplemental

to the table actuated switch for controlling and reversing the motor, and a relay switch automatically operable upon



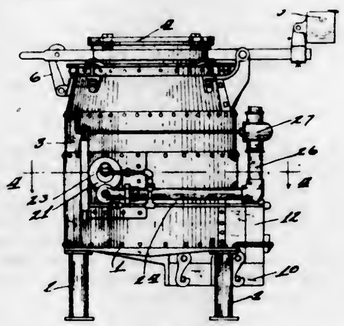
movement of the supplemental switch to an operative position and serving to render the table actuated switch inoperative.

1,389,343. PANEL-BOARD STRUCTURE AND BRANCH-BLOCK UNITS. JOHN CUTHBERT and JULIAN J. NIELSEN, Chicago, Ill.; said Cuthbert assignor of his right to John Cuthbert Company, Chicago, Ill., a Corporation. Filed May 18, 1916. Serial No. 98,305. 3 Claims. (Cl. 173—342.)



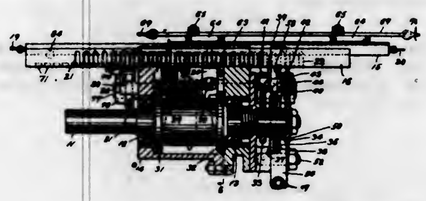
1. A receptacle for screw threaded plugs comprising a body of molded insulating material having a screw threaded recess therein, the threads of the recess being molded in the body and extending around less than half of the circumference of the recess, and a conducting terminal embedded in and held by the body within the recess opposite the threaded portion thereof and having threads corresponding to the threads molded in the body.

1,389,344. BUMPER-BAR AND SUPPORT THEREFOR. JOSEPH DI SALVO, Chicago, Ill. Filed Sept. 27, 1920. Serial No. 412,954. 7 Claims. (Cl. 293—55.)



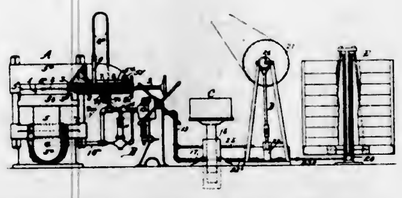
4. The combination with the side rails and the back cross end channel member of a chassis frame, of a pair of rearwardly extending supporting arms adjacent to the ends of said cross channel member, a bumper bar in conjunction with the rear ends of said supporting arms, and means for securing said supporting arms rigid with respect to the cross end member, said means including angle bars each having one arm in engagement with a flange of the cross end member and having another arm in engagement with and secured to the aforesaid supporting arms, whereby said supporting arms are secured against movement with respect to the cross end member by the engagement of the angle bars with the channel flanges, substantially as described.

1,389,345. DEMOUNTABLE RIM. THOMAS EDGAR DUNBAR, Lakeland, Fla., assignor of one-half to H. Crevasse and John L. Hogan, Lakeland, Fla. Filed May 29, 1920. Serial No. 385,281. 7 Claims. (Cl. 301—31.)



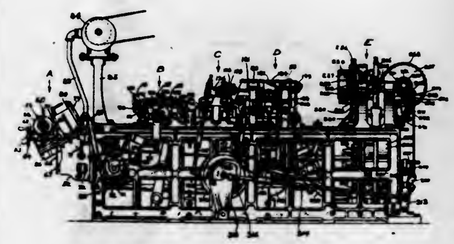
1. A demountable rim comprising a pair of semi-circular flanged segments, a latch holding the segments together at one joint, flattened eyes provided upon the segments at the diametrically opposite joint, and a key passed through the alined eyes and locking the segments together, said key being readily withdrawn from one side of the rim.

1,389,346. STEEL-FURNACE. ALFRED FISHER, Chicago, Ill. Filed Feb. 24, 1920. Serial No. 360,679. 6 Claims. (Cl. 263—11.)



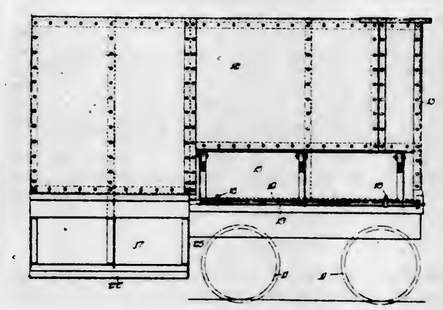
1. In a furnace of the class described a combustion chamber floor having a concave annular bottom groove affording a crucible support, a cylindrical intermediate combustion chamber portion having vertical walls extending from the top of the crucible support to a point slightly above the upper end of a crucible placed on said support, and a conical upper section above the cylindrical portion adapted to choke the blast-flames and concentrate the same in said cylindrical portion of the combustion chamber around the crucible.

1,389,347. CONTROL DEVICE APPLICABLE TO AIRCRAFT, MARINE STEERING-GEAR, AND OTHER APPARATUS. WILLIAM CHARLES GARDINER, Barnstaple, England. Filed Apr. 1, 1920. Serial No. 370,440. 7 Claims. (Cl. 244—29.)



1. In apparatus for transmitting motion in either direction alternately at will, a combined automatic power-relay and hunting-gear comprising a motion-transmitting element movable to and fro and so coupled to the load to be moved as to be capable of transmitting motion thereto in a corresponding direction; a prime mover and a connection therefrom to said element whereby to permit of the latter receiving motion from the prime mover in either direction alternatively; a manually-operable controlling-member movable at will in either of two directions alternatively; a second motion-transmitting element movable in a general direction corresponding to that of the first member and so coupled to the controlling-member as to move to and fro as one with the latter; a yielding connection between the two motion-transmitting elements such that motion will be transmitted from the second to the first element without lost motion between them so long only as the resistance due to the load does not exceed a predetermined value; and means whereby, when such resistance exceeds the predetermined value and said connection consequently yields under the manual effort transmitted through it, the resulting displacement of the second element relatively to the first due to lost motion between them is caused to bring the prime mover into operation to move the first element in a direction and to an extent corresponding to the direction and extent of the motion manually imparted to the controlling-member.

1,389,348. APPARATUS FOR CALIBRATING AND JUSTIFYING PARTS OF WIND MUSICAL INSTRUMENTS. EDWARD J. GULICK, Elkhart, Ind., assignor to C. G. Conn., Ltd., Elkhart, Ind., a Corporation of Indiana. Filed June 2, 1919. Serial No. 301,211. 10 Claims. (Cl. 113—44.)

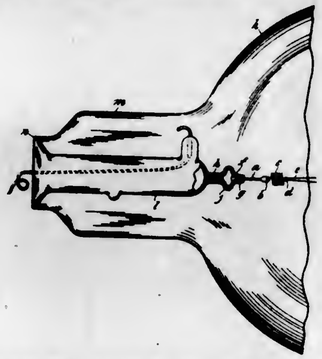


1. In a hydraulic die-pressing system, the combination of a pair of separable dies adapted to receive and confine a work-piece between them, a die conduit adapted to supply fluid pressure medium to said dies, a holding press comprising a ram and a coacting head between which said dies are clamped, a conduit for supplying pressure medium to said ram, controlling valves connected to the respective conduits, a low pressure source and a high pressure source, each supplying both said conduits, and a pressure-reducing valve interposed between the ram conduit and the source of high pressure.

1,389,349. MACHINE FOR FORMING CAN-BODIES. CHARLES F. HAKE, Jr., and ANTON MILL, Sr., Cincinnati, Ohio; said Mill assignor to said Hake. Filed Oct. 14, 1919. Serial No. 330,564. 15 Claims. (Cl. 113—11.)

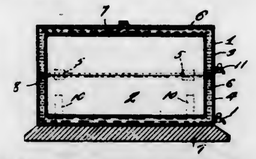
1. In a can-body forming machine the combination of a feeding mechanism adapted to feed two sheets of metal side by side in a longitudinal direction, a mechanism adapted to bend a flange upon each longitudinal edge of the sheets, a mechanism adapted to interlock the adjacent flanges, a mechanism adapted to roll the sheets thus interlocked into a cylindrical form and a mechanism adapted to interlock the flanges made adjacent by thus rolling the interlocked sheets.

1,389,350. DUMP-CAR. HARRY S. HART, Chicago, Ill. Filed Apr. 7, 1919. Serial No. 288,049. 4 Claims. (Cl. 105—251.)



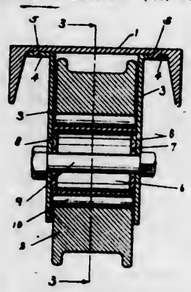
1. A car of the class described, having high girder sides carrying the load, the floor over the trucks comprising a stationary horizontal flat portion, the floor intermediate the trucks being at a lower level than the floor portions over the trucks, side dump doors formed within the area of the girder sides and associated with the floor portions over the trucks, and floor dump doors intermediate the trucks whereby the load may be dumped.

1,389,351. MEANS FOR SUPPORTING ELECTRODES IN IONIC TUBES. CHARLES HOWARD HARVEY, London, England, assignor, by mesne assignments, to The General Electric Company, Ltd., London, England. Filed May 7, 1918. Serial No. 232,999. 3 Claims. (Cl. 250—27.)



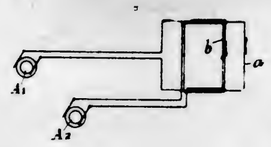
2. In an ionic tube, the combination of a tubular socket of glass fixed within said ionic tube, a shoulder at the outer end of said socket, an anchor-wire passing through said socket and slidable therein, a knob on the

anchor-wire engaging said shoulder, a filament and a spring having its one end connected with said filament



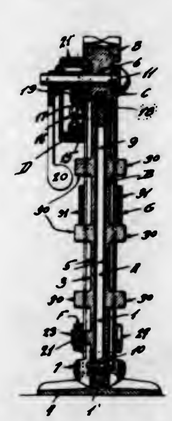
and its other end connected with said anchor-wire and exerting a stress whereby said knob is drawn against said shoulder.

1,389,352. BREAD-RAISER. LULA B. HAWKINS, Council Bluffs, Iowa. Filed July 13, 1920. Serial No. 395,882. 1 Claim. (Cl. 126—281.)



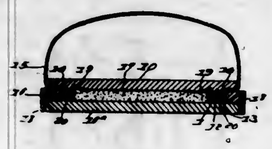
A dough raiser comprising a cylindrical body member, said cylindrical body member being formed from two semi-circular sections longitudinally hinged together, a water chamber extending around the outer and end walls of the semi-circular section thereby forming a water chamber extending around the entire body member and ends thereof when the semicircular sections are closed, means for supplying water to the water chambers of each section, means for draining water from the water chambers of each section and a supporting base for supporting the cylindrical body member.

1,389,353. DRY-KILN TRUCK. CHARLES A. HENDERSHOTT, Grand Rapids, Mich. Filed Apr. 29, 1921. Serial No. 465,570. 4 Claims. (Cl. 105—160.5.)



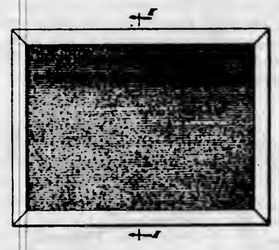
1. In a dry kiln truck, the combination of a body formed of channel iron disposed facing downwardly, a wheel, angled wheel hangers disposed within the body, to embrace said wheel and their horizontal arms against and secured to the under side of the web thereof, a tubular bearing member supporting disk secured on the inner sides of said hangers to receive the ends of the bearing member, a bolt disposed through said hangers and bearing member clamping the hangers upon the ends of said bearing member, and bearing rollers for said wheel, said hanger members constituting end thrust members for said rollers.

1,389,354. METHOD OF AND MEANS FOR INCREASING POWER FACTOR. CARL HERING, Philadelphia, Pa. Filed June 18, 1914. Serial No. 845,773. 7 Claims. (Cl. 172—246.



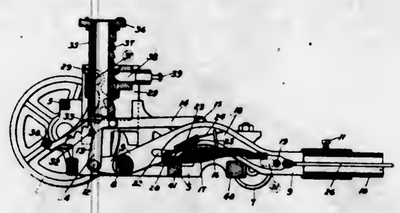
2. The combination with a source of alternating current, of an inductive loop in circuit with said source, and means for overcoming the inductance produced by said loop comprising a balancing coil or winding disposed in close proximity to said loop, and means for passing through said balancing coil or winding an alternating current of such phase relation with respect to the current in said loop and of such magnitude that said balancing coil is overexcited whereby the inductance of said loop is slightly overbalanced.

1,389,355. LIFTING-JACK. JAMES L. HEROLD, St. Louis, Mo. Filed Aug. 16, 1920. Serial No. 403,970. 15 Claims. (Cl. 254—109.)



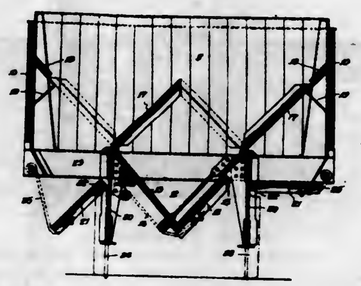
1. In a lifting jack, a stationary column provided with a pair of racks, a movable column, an operating lever pivoted to said movable column, a pair of pawls adapted to engage said racks, fulcrum members connecting said pawls to said operating lever, yieldable engaging means tending to engage said pawls with said racks, yieldable disengaging means, including spring members, adapted to disengage said pawls from said racks, a reversing device whereby said yieldable engaging means is released from said pawls to permit effective operation of said yieldable disengaging means, and a stop device whereby movements of said pawls are limited when they are actuated by said yieldable disengaging means.

1,389,356. SHOE. MEYER S. HESS, Baltimore, Md. Filed Apr. 27, 1920. Serial No. 376,954. 13 Claims. (Cl. 36—22.)



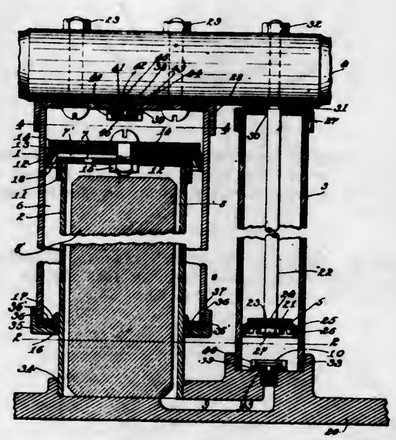
1. A shoe insole having in connection with its web or lip a reinforcing strip marginally attached to the web and the adjacent surface of the insole in spanning relation with the inner angle formed thereby for tensioning by the upper securing stitches.

1,389,357. SCREEN FOR EXHIBITING MOVING PICTURES. FREDERICK W. HOCHSTETTER, New York, N. Y., assignor to H. P. Patents and Processes Company, Inc., a Corporation of New York. Filed Apr. 8, 1919. Serial No. 288,469. 4 Claims. (Cl. 88—24.)



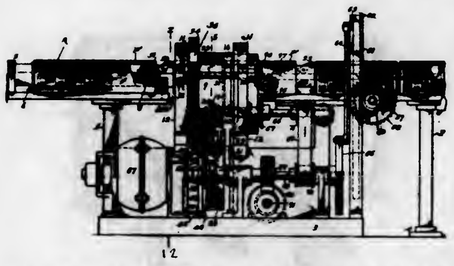
1. A screen for exhibiting moving pictures, in the form of a plate made of transparent gelatinous material, an alkali and an acid mixed in the material for converting the transparency of the material to a translucency, and a material for clarifying the translucency of the plate when of a pronounced opaqueness.

1,389,358. JACK. ARTHUR C. HOPKINS, Minneapolis, Minn. Filed Mar. 18, 1921. Serial No. 453,447. 12 Claims. (Cl. 254—2.)



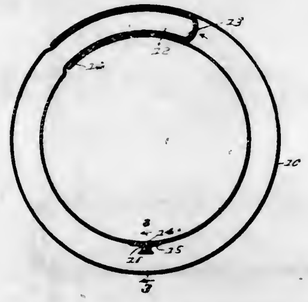
1. A jack consisting of a portable frame, a lifting member vertically slidable in the frame, a notched cam member pivotally secured to the lifting member, a lever, comprising a handle at one end, pivotally mounted in the frame, means at the other end of the lever for engaging the cam member, and lugs fixed in the frame, said lugs and engaging means being adapted to alternatively engage the cam member.

1,389,359. DUMP-CAR. WILLIAM J. HOSCEIT, Chicago, Ill., assignor to Rodger Ballast Car Company, Chicago, Ill., a Corporation of Maine. Filed June 12, 1920. Serial No. 388,400. 3 Claims. (Cl. 105—243.)



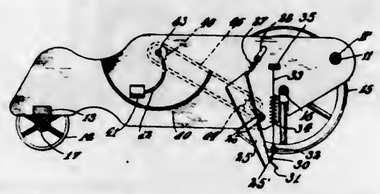
1. In a dump car having a longitudinal sill, sides, ends and a bottom, a portion of the bottom comprising a swinging dump door hinged at a point intermediate the depth of said sill for increasing the carrying capacity of the car and for controlling the flow of dumpable material to a given point beyond a track rail for a given door opening.

1,389,360. AIR-PUMP. WALTER M. INGRAM, Baltimore, Md. Filed Aug. 6, 1919. Serial No. 315,638. 4 Claims. (Cl. 230—27.)



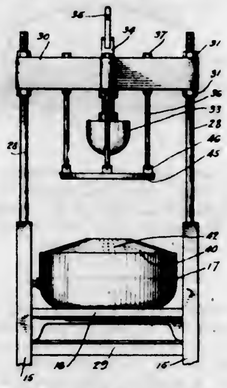
1. An air pump having a moving member and a fixed member, a low pressure cylinder and a high pressure piston mounted on one of said members, a plunger adapted to enter the low pressure cylinder and a high pressure cylinder coöperating with the high pressure piston on the other of said members, the plunger having a considerable clearance in the cylinder forming an annular space which serves as an intermediate compression chamber and a passage connecting the compression ends of the intermediate compression chamber and the high pressure cylinder.

1,389,361. METHOD AND APPARATUS FOR PLATE COOLING AND FINISHING. ROBERT T. JOHNSTON, Scotch Plains, N. J., assignor to R. Hoe and Co., New York, N. Y., a Corporation of New York. Filed Sept. 6, 1918. Serial No. 252,887. 59 Claims. (Cl. 29—21.)



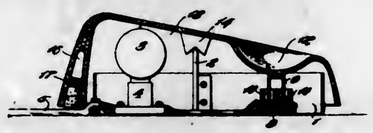
1. The combination of a cooling bath and a finishing mechanism arranged to act in that order on a plate, and means for effecting the relative movement of a plate and said elements for such action.

1,389,362. INNER TUBE FOR TIRES. REECE JONES, Tulsa, Okla. Filed Sept. 25, 1919. Serial No. 326,278. 5 Claims. (Cl. 152—13.)



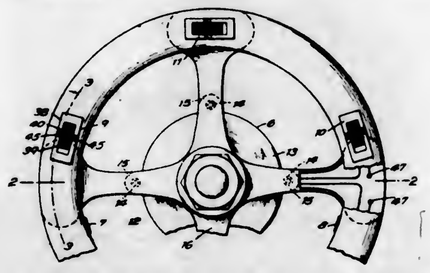
4. An inflatable inner tube having closed telescopically connected terminals relatively movable by internal air pressure to increase the circumference or effective length of the tube.

1,389,363. POTATO-PLANTER. ARCHIP KARPENKO, New York, N. Y. Filed Dec. 30, 1919. Serial No. 348,300. 1 Claim. (Cl. 111—89.)



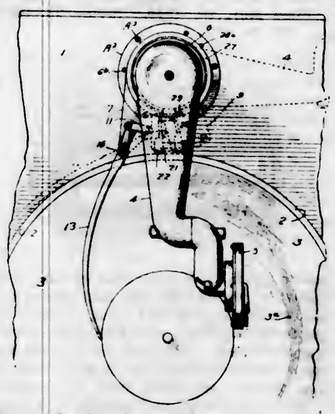
In a potato planter of the character described, embodying a crank shaft, a plurality of funnel elements, tension springs secured with one of their ends to said funnel elements and with the other to said crank shaft, doors for normally closing the lower ends of said funnel elements, angular arms secured to said doors, and wires embodying tension springs, secured to said doors and to the front of the planter for keeping said elements in their proper inclined positions.

1,389,364. PROCESS AND APPARATUS FOR MAKING NATURAL-EDGE BEAVER HATS. JOHN L. KAUFMAN, Brooklyn, N. Y. Filed May 31, 1921. Serial No. 474,037. 11 Claims. (Cl. 223—31.)



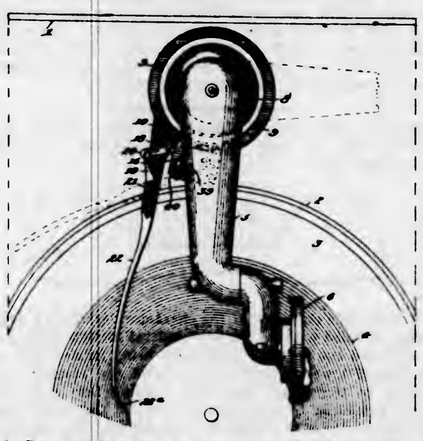
1. A device for forming hats comprising, in combination with a press, a chamber carried therein, means for heating and cooling said chamber, a perforate forming die on said chamber shaped to the peripheral and surface contour desired for the finished hat brim, means for locating said die, and means for adjustably clamping the exterior margin of hat brims on said die.

1,389,365. ADVERTISING CHANGE-TRAY. MORRIS KLINE, Cleveland, Ohio. Filed Aug. 5, 1918. Serial No. 248,273. 5 Claims. (Cl. 194—9.)



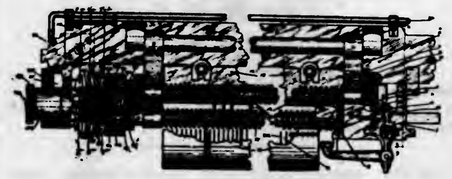
1. In a device of the character set forth, the combination of a base, a change tray pivotally supported thereby, and bearing an advertisement, an electrical illuminating device carried by the base for lighting the advertisement, a switch supported by the base and adapted to be closed by the tilting of the change tray under the weight of a coin, and a circuit including the illuminating device and switch.

1,389,366. AUTOMOBILE SIGNAL-CONTROLLING MECHANISM. CHARLES C. LODER, Cincinnati, Ohio. Filed June 30, 1917. Serial No. 177,986. 2 Claims. (Cl. 200—59.)



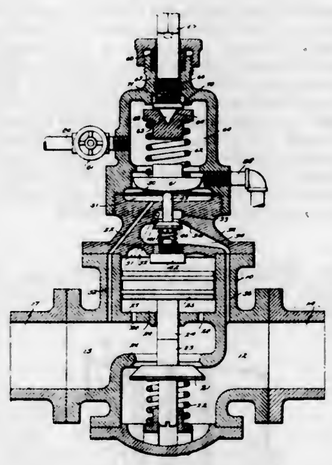
1. A contact device for automobile signal controlling mechanisms adapted to be located on a steering wheel in position to be accessible to the shifting movement of the thumbs of the operator, said device consisting of a casing, contacts within the casing and a shifting block located within the casing, adapted to be shifted by the operator's thumbs, in directions substantially concentric with the periphery of the wheel, whereby the contacts may be engaged and disengaged.

1,389,367. STOP MECHANISM. JOSEPH W. LUCIER, Kankakee, Ill., assignor of one-half to Harry L. Topping, Kankakee, Ill. Filed May 8, 1920. Serial No. 379,854. 25 Claims. (Cl. 192—116.)



10. Stop mechanism for sound-reproducing devices having a turn-table and tone-arm, said mechanism comprising a plurality of components, one component including an actuating member associated with the tone-arm, another component including a support also associated with the tone-arm, locking means associated with the support, brake-mechanism associated with the turn-table and movably mounted on the support, a limit-setting member disposed on the support, a connection between the limit-setting member and the brake mechanism whereby movement of the limit-setting member positions the brake mechanism, and a trip member associated with the brake mechanism and positioned in the path of the actuating member.

1,389,368. PHONOGRAPH-STOP. JOSEPH W. LUCIER, Kankakee, Ill. Filed Oct. 8, 1920. Serial No. 415,597. 26 Claims. (Cl. 192—116.)

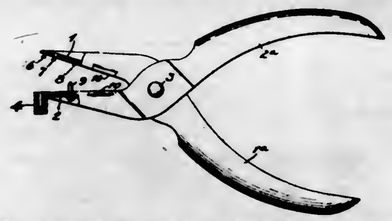


1. Stop mechanism for sound-reproducing devices including a supporting-structure, a pointer shiftable in relation thereto, a brake-mechanism juxtaposed to and settable by the pointer, and means independent of the pointer for setting the brake-mechanism irrespective of the position of the pointer.

1,389,369. TYPOGRAPHICAL MACHINE. GEORGE E. MARLATT, Pasadena, Calif. Filed Mar. 17, 1921. Serial No. 452,964. 12 Claims. (Cl. 199—43.)

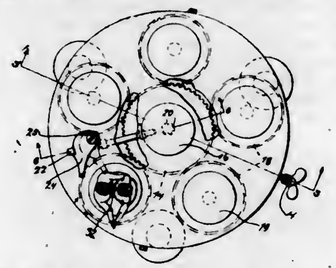
1. In a typographical machine, in combination, the matrix-distributer screws, a matrix-lifting member for lifting the matrices into engagement with said screws, a cam for controlling the action of said matrix-lifting member, and means for effecting such relative speed between said distributer screws and said cam as will cause a matrix to be engaged by said screws at alternate rotations of the screws.

1,389,370. COMBINED PRESSURE REGULATING AND GOVERNING APPARATUS. JULES P. METZGER, Carlstadt, N. J., assignor to The Leslie Co., Lyndhurst, N. J., a Corporation of New Jersey. Filed Jan. 14, 1920. Serial No. 351,355. 4 Claims. (Cl. 103—91.)



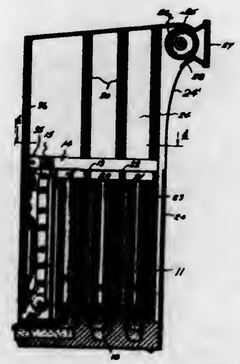
1. A pressure regulator, comprising a main controlling valve for controlling the pressure of a fluid passing through the regulator, a diaphragm exposed at one side to the said fluid pressure, a chamber at the other side of the diaphragm and connected with another source of pressure supply, and a spring setting device in the said chamber engaging the said other side of the diaphragm.

1,389,371. PLIERS. REINHARDT F. METZGER, Brooklyn, N. Y. Filed May 10, 1921. Serial No. 468,217. 2 Claims. (Cl. 81—3.)



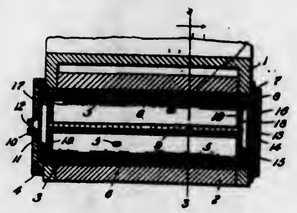
1. A riveting tool comprising, a pair of jaws with means for moving the same toward and away from each other, a

socket carried by one of said jaws, the other jaw having an opening therein facing said socket, one of said jaws



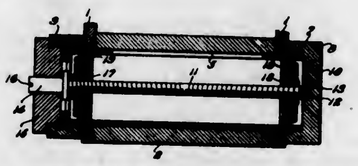
having an opening facing a solid part of the opposite jaw, a punch on one of said jaws, and an opening on the other facing said punch.

1,389,372. MECHANICAL TOY. JOSEPH MITERA, Plainfield, N. J. Filed Jan. 15, 1921. Serial No. 437,402. 1 Claim. (Cl. 46—40.)



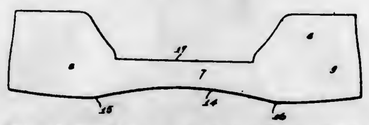
A mechanical toy comprising a circular casing, a spring actuated clock work mechanism therein, a central vertical sleeve driven thereby, a plurality of like sleeves spaced concentric therewith, said concentric sleeves being geared to the central sleeve, figural couples carried by all of said sleeves above said casing, a rod slidable in said casing, one end of said rod being engageable in recesses in said central sleeve, means for normally causing such engagement, a lug on said rod projecting above said casing, and a manually operable cam pivoted on said casing adapted to engage said lug to withdraw it from the mentioned recesses thereby permitting rotation of said couples.

1,389,373. REAR-END AUTOMOBILE-SIGNAL. GEORGE G. MOAIN, Holyoke, Mass. Filed Nov. 27, 1918. Serial No. 264,331. 2 Claims. (Cl. 177—329.)



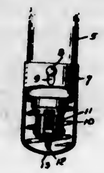
1. In a signaling device for automobiles, the combination with a casing, of a vertically movable signal in the casing, a frame in the casing, a horisontal arm on the frame, projecting over the signal, whereby the frame is compelled to move vertically when the signal is moved vertically, a depending arm on the frame, a wall in said casing guiding the vertical movement of the arm, and a plurality of switches in said casing located in the path of movement of the arm and successively operated by said arm.

1,389,374. LUBRICATING SPRING-BOLT. HARRY M. NAUGLE, Canton, Ohio, assignor to The Alloy Parts Manufacturing Company, Canton, Ohio, a Corporation of Ohio. Filed Mar. 20, 1919. Serial No. 283,855. 2 Claims. (Cl. 64—27.)



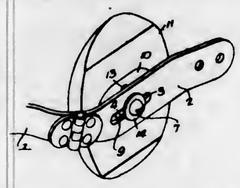
2. A hollow bearing bolt having an aperture through its side and provided with an integral wall closing one end, a removable disk closing the other end of the bolt, an integral head formed upon one end of the bolt, screw threads upon the opposite end of the bolt for the reception of a nut, a screw threaded shaft journaled in said wall and disk and a plunger upon said shaft for compressing a lubricant within the bolt and forcing it through said aperture.

1,389,375. LUBRICATING-BOLT. HARRY M. NAUGLE, Canton, Ohio, assignor to The Alloy Parts Manufacturing Company, Canton, Ohio, a Corporation of Ohio. Filed July 23, 1919. Serial No. 312,794. 7 Claims. (Cl. 64—27.)



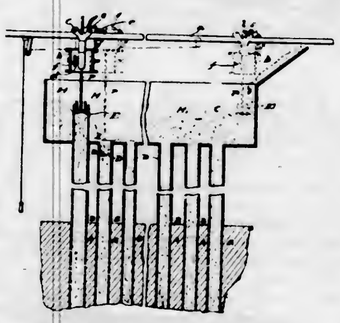
4. A hollow bearing bolt having a longitudinal aperture through its side and provided with screw threaded extremities, caps mounted upon said screw threaded extremities inclosing each end of the bolt, a threaded shaft journaled in said caps and a plunger mounted upon said threaded shaft to compress a lubricant within the bolt.

1,389,376. MOCCASIN. ALFRED F. OBIE, Lisbon, Me. Filed Feb. 8, 1921. Serial No. 443,407. 1 Claim. (Cl. 36—11.)



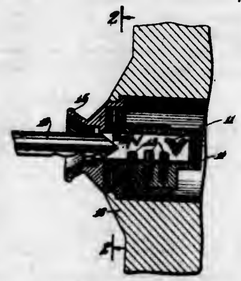
For use in a moccasin of the character described a vamp blank provided with a restricted central section and a pair of enlarged end sections, said vamp being formed with an arc-shaped lower edge extending from one enlarged end section to the other, said edge merging into a reverse curve extending to the respective ends of the vamp while the upper edge of the vamp is cut down centrally for forming the restricted section and formed so that the said upper edge will be straight when the vamp is spread out.

1,389,377. CHECK-PROTECTOR. JOHN JOSEPH O'BRIEN, Brooklyn, N. Y. Filed June 1, 1921. Serial No. 474,193. 5 Claims. (Cl. 101—30.)



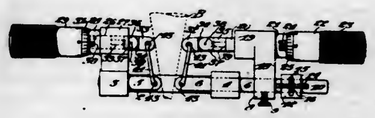
1. A protector including a means presenting a mounting, a cap slidably secured to said mounting and means within said cap and projectable beyond the same for permitting of the forming of indentations upon a piece of paper.

1,389,378. TRUSS-FIXTURE. WILLIAM D. PATTON, Philadelphia, Pa., assignor to William H. Horn & Brother Incorporated, Philadelphia, Pa., a Corporation of Pennsylvania. Filed Feb. 2, 1920. Serial No. 355,747. 9 Claims. (Cl. 128—124.)



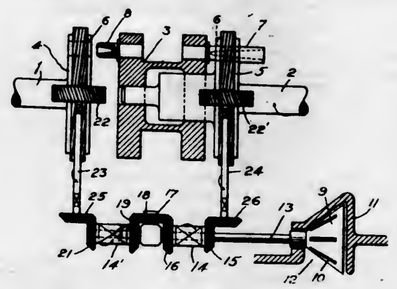
1. The combination of a truss frame having an elongated serrated slot, a truss pad having a toothed projection formed to non-rotatably engage the serrations of such slot and means for clamping said parts together.

1,389,379. METHOD AND APPARATUS FOR PRODUCING A REGULAR PROGRESSION OF MATERIALS IN VERTICAL OVENS. JULIEN PIETERS, Paris, France, assignor to Societe du Four Vertical Continu, Paris, France. Filed Mar. 18, 1919. Serial No. 283,430. 2 Claims. (Cl. 202—5.)



2. In an apparatus described, the combination with a battery of retorts, a reservoir, a plurality of hoppers leading from the bottom of the reservoir to the retorts, and a push plate for forcing the material in the hoppers, of a tubular member having a section corresponding to the section of the hoppers and arranged in the reservoir over a hopper to form an extension thereof, said member being adapted to contain the material of the hopper and in which the push plate works.

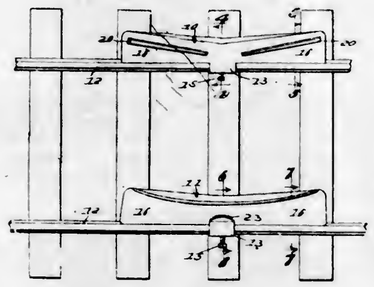
1,389,380. LOCK. HERMAN RAAB, New York, N. Y. Filed Mar. 1, 1920. Serial No. 362,463. 4 Claims. (Cl. 70—53.)



1. In a lock, a key plug, a key actuated tumbler or tumblers for securing said key plug, permutation elements and a locking pin controlling engagement of the key and key plug independently of the tumbler or tumblers, said locking pin being under control of the permutation elements aforesaid.

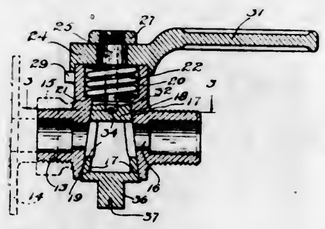
1,389,381. TAPER-GAGING CALIPER. FRANKLIN G. RENTON, Providence, R. I. Filed Oct. 27, 1919. Serial No. 333,675. 12 Claims. (Cl. 33—163.)

1. In an instrument for measuring tapered pieces having opposite angular faces, the combination of two pairs of elements for gaging the work at a plurality of points spaced at a predetermined distance apart, said gaging-elements formed with rounded ends to adapt them to contact with the angular faces at opposite points in a single plane, and means for adjusting the gaging-elements against the work while maintaining a constant spaced relation therebetween.



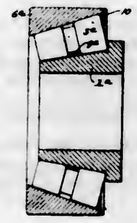
1,389,382. SYNCHRONISM-INDICATOR. JOHN P. RIGSBY, Edgewood, Pa., assignor to Westinghouse Electric & Manufacturing Company, a Corporation of Pennsylvania. Filed June 15, 1918. Serial No. 240,261. 5 Claims. (Cl. 235—103.5.)

3. A device for indicating synchronous movement of independently rotating shafts, comprising a rotary indicator responsive to relative rotary movement of the said shafts, an indicator shaft, driving gears therefor mounted axially



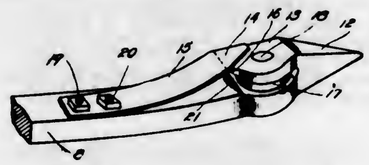
thereof, a supporting cage pivoted axially of the indicator shaft for oscillatory movement, gear means for driving the indicator, carried by the cage, so that it will operatively engage the said driving gears and mesh therewith during oscillation of the cage, adapted to be moved into and out of operative engagement with the said rotary shafts when the cage is oscillated, and means for holding the gear means in operative and inoperative positions.

1,389,383. RERAILER. THEODORE RIVARD, Newport, Vt. Filed July 21, 1919. Serial No. 312,332. 1 Claim. (Cl. 104—265.)



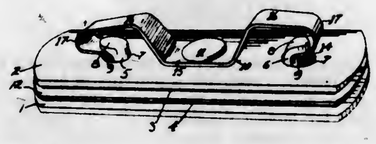
A rerailer consisting of a duality of elements for location respectively adjacent the inner and outer sides of opposite rails, the one being formed with a tread surface inclining upwardly from the extremities to the center and inclining downward and laterally away from the rail tread, said element on its inclined portions being provided with diagonally disposed guide ribs and having at its apex a crown higher than and inclined toward the rail tread, the other element inclining upwardly from its extremities toward the center with its tread surface inclining downwardly in a lateral direction toward the plane of the rail and being depressed in a plane near the inside surface of the rail tread, said other element having its tread surface provided with a guard rib extending substantially throughout the length thereof.

1,389,384. AIR-COCK. WALTER M. ROBINSON, Arlington, Mass., assignor to Victory Equipment Corporation, Boston, Mass., a Corporation of Massachusetts. Filed Jan. 10, 1918. Serial No. 211,293. 3 Claims. (Cl. 251—112.)



1. An air valve comprising a casing provided with interally projecting coupling members and having a frustoconical seat and a bonnet which provides a spring chamber above the smaller end of said seat, a plug in said seat having an unobstructed frusto-conical contour and having a shouldered stem at its smaller end extending through said spring chamber and having its larger end solid and closing the larger end of said seat, a cap seated against the shoulder on said stem and having an annular flange overlapping the bonnet, a handle extending from said cap, a nut on said stem clamping the cap against said shoulder, and a spring located in said chamber and having one end bearing against the bottom of said chamber and its upper end bearing against said cap and acting to hold said plug in constant close bearing relation to said seat.

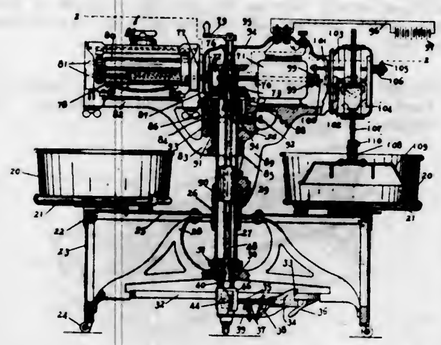
1,389,385. ROLLER-BEARING. CLARENCE E. ROBSON, Philadelphia, Pa. Filed Feb. 25, 1919. Serial No. 279,059. 2 Claims. (Cl. 64—62.)



1. A roller bearing assembly comprising a conical raceway; a series of conical rollers arranged substantially close together on said raceway and annularly grooved between their ends; thin, narrow annular retaining means adapted to seat in the grooves of the rollers and maintain them in position on the raceway without interference with their accommodating themselves to the bearing surfaces; and a split retaining ring for keeping the assembled rollers in place removably seated in a groove in the end of said raceway whence the rollers could otherwise be removed.

1,389,386. BALING-WIRE NEEDLE. WILLIAM A. SEYMOUR, Leavenworth, Kans. Filed Aug. 30, 1920. Serial No. 406,816. 2 Claims. (Cl. 100—20.)

1. A wire-engaging needle for baling machines comprising a swinging bar having a wire-engaging, hooked end, and a yielding guard carried by the bar, the guard having a free end overlapping the hooked end to retain the wire in engagement with the hooked end.

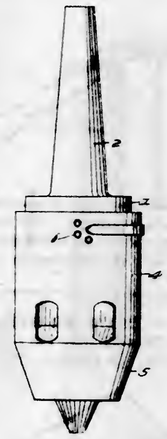


1,389,387. SAFETY-RAZOR-BLADE HOLDER. GEORGE W. SHUGERS, Los Angeles, Calif. Filed Apr. 19, 1920. Serial No. 375,167. 8 Claims. (Cl. 206—16.)

8. A safety razor blade holder comprising an apertured upper member, a studded lower member, and a U-shaped strip pivotally fixed to said apertured member

and having outwardly extending limbs provided with return bends which are adapted to engage the studs of said studded member to resiliently hold said members together.

1,389,388. LAUNDRYING-MACHINE. JOHN H. SIMAT and ALVIN H. SIMAT, Omaha, Nebr. Original application filed Mar. 8, 1920, Serial No. 364,062. Divided and this application filed June 7, 1920. Serial No. 387,211. 4 Claims. (Cl. 68—52.)



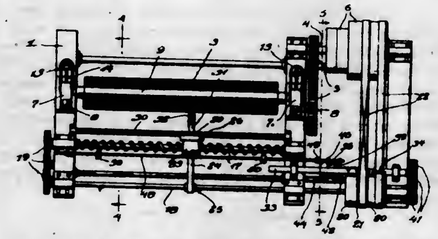
1. A laundrying machine comprising a framework, a hollow support passing centrally up through said frame, a wringer frame swinging about said hollow support, a hollow motor frame also swinging about said support, a motor in said motor frame, gearing driven by said motor, a slidable clutch sleeve associated with and driven by said gearing, a pair of opposed gears normally idle but adapted to be alternately coupled with said clutch sleeve, a shaft passing up through said hollow support and having a part engaging with the lower end of said clutch sleeve whereby to raise and lower the same, a treadle adjustably mounted on said framework, means at the upper end of said shaft above the motor casing for moving the shaft and said treadle in a circular direction, means associated with and operated by said treadle for shifting the shaft longitudinally in the hollow support, and wringer rolls in said wringer frame driven by said gears.

1,389,389. FOOD PRODUCT AND PROCESS OF MAKING SAME. CLARENCE H. SIMPSON, Front Royal, Va. Filed Oct. 28, 1919. Serial No. 333,889. 2 Claims. (Cl. 99—11.)

2. The process of obtaining a food product from fruits, consisting in cooking the fruits, expressing the juice from the cooked fruits, mixing the juiceless residue with liquid to form a semi-liquid mass, discarding from this mass the non-meaty portions so as to retain only the meaty pulp and liquid, adding fruit juice to the meaty pulp and liquid, and boiling the pulp and liquid together with the added fruit juice.

1,389,390. COUNTERSINK-GAGE. HARRY D. SPARLING, Walden, N. Y. Filed July 25, 1919. Serial No. 313,334. 1 Claim. (Cl. 77—73.5.)

The combination with a countersink, having a peripheral slot formed therearound, of a gage member in surrounding relation to the countersink, the gage member being formed with a plurality of holes on diametrically opposite sides formed at varying distances from the working edge, the oppositely disposed holes being arranged in pairs, and a clip member embracing the gage and

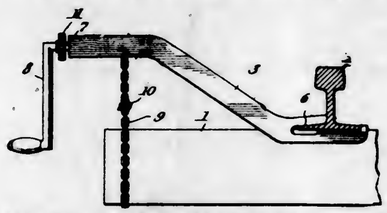


having teats or lugs formed on its ends, which teats or lugs enter the holes and engage in said slot for the purpose specified.

1,389,391. FLOOR-WAX. JOSEPH P. STEIDLE, Wilkes-Barre, Pa. Filed Aug. 4, 1920. Serial No. 401,221. 1 Claim. (Cl. 87—19.)

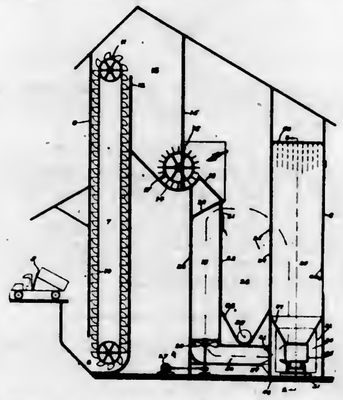
A wax powder for coating dancing floors, comprising substantially 10 pounds of corn meal, 20 ounces of wax, 2 pounds of paraffin or parawax, and one pound each of borax, boric acid and soapstone.

1,389,392. YARN-WINDING MACHINE. LOUIS STOCKER, Stithton, Ky. Filed July 24, 1920. Serial No. 398,617. 5 Claims. (Cl. 19—27.)



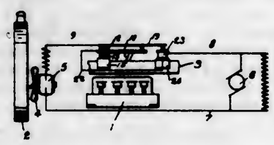
4. A yarn winding machine comprising a reciprocating member, a rotatable wheel carried thereby and having openings therein through which the yarn passes, an annular rack connected with said wheel, a rack bar with which the annular rack engages in the reciprocation of said member, an arm connected with said member and having a guiding eye therein and means for reciprocating said member, such means including a belt driven shaft, and belt shifting means actuated by the movement of the reciprocating member.

1,389,393. ELEVATOR AND HOLDER FOR RAILWAY SLEEPERS OR TIES. HERMAN C. STOLLE, Davenport, Iowa. Filed July 30, 1920. Serial No. 399,980. 3 Claims. (Cl. 254—43.)



1. A railway tie elevator and holder comprising a main frame having a portion adapted to rest a considerable

distance above a railway tie, and also having a portion shaped to receive and bearing against the bottom and one side of a rail base and against the opposite side of the

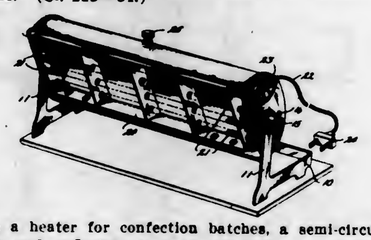


rail web, and means carried by the elevated portion of said frame and adapted to be connected to a tie whereby the tie may be raised and secured in raised position.

1,389,394. FUEL-RECLAIMING APPARATUS. SAMUEL A. STONEBACK, Philadelphia, Pa. Filed Dec. 9, 1920. Serial No. 429,326. 8 Claims. (Cl. 83—54.)

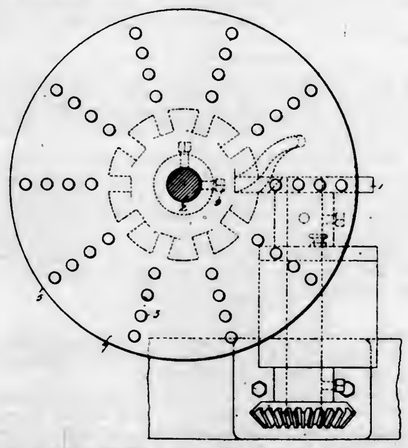
1. A device of the character described including means providing two upright compartments separated by a partition having an opening; means positioned to allow the discharge of material, containing ashes mixed with heavier fuel, down one of said compartments; and means providing an opening for directing a current of air transversely across said fuel compartment in a substantially horizontal path at right angles to the vertical path of said falling material and then directly through said first opening into the other compartment; substantially as described.

1,389,395. COOLING DEVICE FOR EXPLOSIVE-ENGINES. HARVE R. STUART, Springfield, Ohio. Filed Oct. 6, 1916. Serial No. 124,157. 6 Claims. (Cl. 123—171.)



1. In a cooling system for explosive engines, the combination of a fan, a driving member for said fan, clutch devices between said driving member and fan, electrically operated devices for operating said clutch devices, and thermostatic means for controlling said electrically operated devices to start and stop said fan.

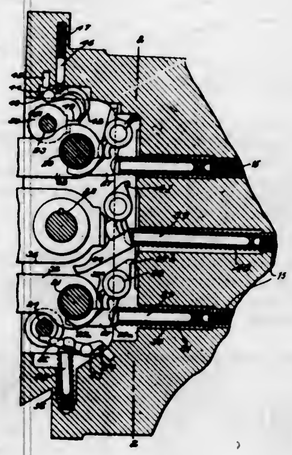
1,389,396. RAILWAY-CAR. WILLIAM W. SYLVESTER, Oakland, Calif., assignor to Merle B. Moon, San Francisco, Calif. Filed Oct. 14, 1920. Serial No. 416,950. 5 Claims. (Cl. 105—350.)



2. A combined tank and box car in which the box is arranged wholly between upright end portions of the tank, which portions are substantially as high as the box part.

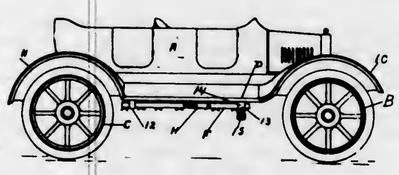
1,389,397. HEATER. LOUIS A. TACTIKOS, Greenwich, Conn. Filed Jan. 23, 1920. Serial No. 353,510. 5 Claims. (Cl. 219—34.)

1. In a heater for confection batches, a semi-circular housing and reflector, a rectangular frame supported within the mouth of said housing, heating coils carried by said frame, means for adjustably supporting the housing to permit of the projection of the heat rays therefrom in various angular directions, said means comprising a base having spaced uprights provided with alined apertures, trunnions extending from the end walls of said housing and received by said apertures, and means carried by one of the trunnions adapted to co-act with one of the uprights for retaining the housing in its adjusted positions.



1,389,398. JACQUARD-DRUM. GEORGE C. L. TISCH, Elizabeth, N. J., assignor to Tisch Machine & Tool & Die Works, Inc., Elizabeth, N. J., a Corporation of New Jersey. Filed May 18, 1920. Serial No. 382,426. 3 Claims. (Cl. 66—12.)

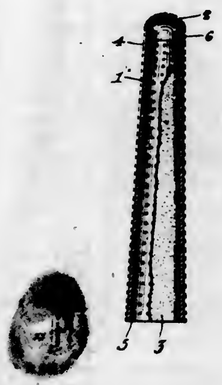
1. A jacquard drum comprising a body and a plurality of spaced wheels, each wheel having a plurality of series



of radiating pin receiving apertures, the apertures in one wheel being in line with the apertures in the adjacent wheel.

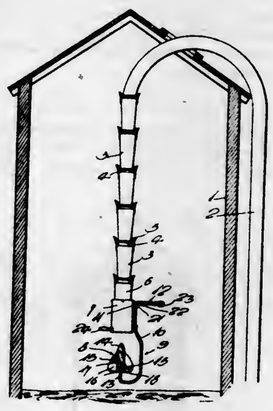
1,389,399. FEED-SCREW SUPPORT FOR MACHINE-TOOLS. ALFRED TROSCH, Rochester, N. Y., assignor to Arthur H. Ingle, Rochester, N. Y. Filed Dec. 19, 1919. Serial No. 346,065. 8 Claims. (Cl. 90—37.)

1. A machine tool, comprising a cross rail, a tool holding saddle movably mounted thereon, a shaft operatively engaged with said saddle and journaled at its ends in said cross rail, and an intermediate support for said shaft equipped for clearance with respect thereto on the passage of the saddle.



1,389,400. AUTOMOBILE-SKID. LEIGHTON L. TUFTS, Middleton, Mass. Filed June 25, 1921. Serial No. 480,488. 6 Claims. (Cl. 238—14.)

5. A portable skid for motor vehicles made up of rigid parallel channeled metal side bars and rigid metal cross bars channeled at the top and bottom extending crosswise of the side bars and rigidly fixed thereto.

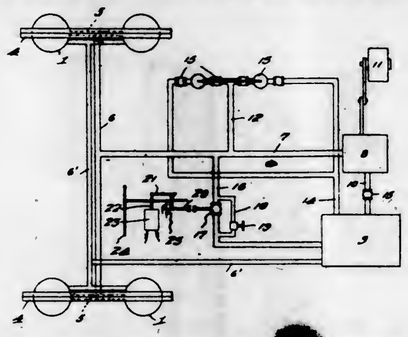


1,389,401. FIBROUS FILTERING-FILM. CHARLES H. VAN NOSTRAND, Orange, and HERMAN E. SCHULSE, Jersey City, N. J.; said Schulse assignor to said Van Nostrand. Filed May 28, 1918. Serial No. 236,995. 3 Claims. (Cl. 210—204.)

1. As an article of manufacture, a filtering film section composed of a filtering film tapering in form, made of fibrous filtering material compressed so as to be of even porosity throughout, and an outer and inner perforated support of the same tapering form, the film and its two

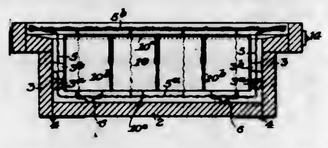
supports adapted to nest upon one another to form a tight joint at the base.

1,389,402. ENSILAGE-DISTRIBUTER. JOHN G. VOGEL, Hampton, Iowa. Filed Mar. 25, 1920. Serial No. 368,554. 6 Claims. (Cl. 193—19.)



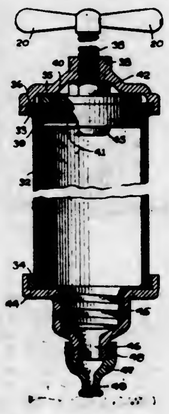
1. In an apparatus of the class described, the combination with a silo, of a flexible ensilage discharge pipe depending into the silo, and a rotatably mounted distributer suspended below and in alinement with the mouth of the pipe so that the ensilage and air current issuing from the pipe will strike and rotate it, this being the sole means of imparting rotary movement to the distributer.

1,389,403. VEHICLE ELEVATING AND SUPPORTING DEVICES. WILLIAM LOUIS WAGNER, Norfolk, Va. Filed Feb. 28, 1920. Serial No. 362,077. 6 Claims. (Cl. 138—9.)



1. An apparatus of the class described comprising lift-

ing jacks for holding the vehicle with its wheels off the floor, means for supplying fluid to said packs to lift the

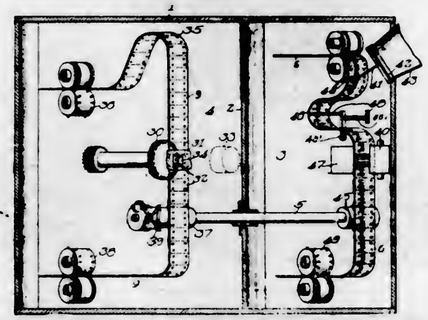


same and electrically operated mea releasing the fluid from the jacks.

1,389,404. REINFORCED CONC CONSTRUCTION. BARCLAY WHITE, Lansdowne, Pa. Filed June 18, 1918. Serial No. 240,616. 5 Claims. (Cl. 72—66.)

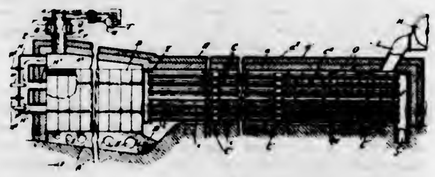
3. As a new article of manufacture, a hollow concrete member having integral top, bottom, and side walls, a fibrous supporting shell within the hollow concrete member, and vertically disposed supporting means arranged within said fibrous shell.

1,389,405. REFILLABLE LUBRICATING-CUP. HERBERT H. WILLIAMS, Brooklyn, N. Y. Filed Mar. 10, 1920. Serial No. 364,617. 8 Claims. (Cl. 184—38.)



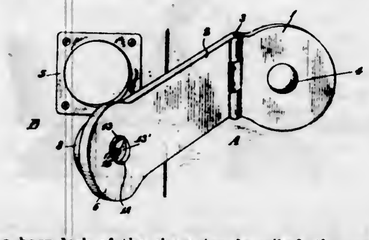
5. In a device of the class described, in combination, a main casing having at its lower end a substantially cylindrical opening, a removable cap mounted at the upper end of said casing, said cap being provided with an internally threaded portion, a container for insertion into said casing having at its upper end a threaded portion for engagement with said threaded portion of said cap and having at its lower end a tubular extension for engagement with said cylindrical opening in said casing, a piston mounted upon said removable cap and having a diameter substantially equal to the inside diameter of said container, and means for advancing said piston into said container.

1,389,406. COTTER-PIN EXTRACTOR. JAMES L. WILLIAMS, Pemberville, Ohio. Filed Feb. 10, 1921. Serial No. 443,848. 2 Claims. (Cl. 81—3.)



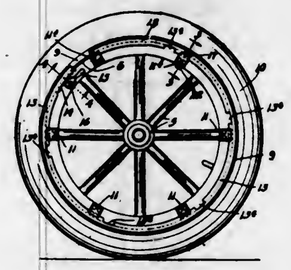
1. A cotter pin extractor including a pair of jaws, the free terminals of which complement each other to embrace the head of the pin, the proximate faces of said jaws being equipped with ribs extending longitudinally of the jaws to grip and retain the cotter pin therebetween when the jaws are operated.

1,389,407. MEANS FOR COÖRDINATING SOUND AND MOTION-PICTURE RECORDS. WILLIAM ERASTUS WILLIAMS, Chicago, Ill. Filed July 10, 1913. Serial No. 778,258. 1 Claim. (Cl. 88—16.2.)



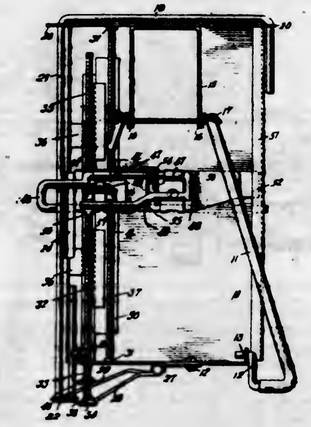
A talking picture apparatus including means for producing a film carrying a sound record a separate film carrying a picture record, and means for placing, simultaneously with the making of the sound and picture records, a series of corresponding identification marks along the marginal traction edges of the films throughout their length, whereby the said two films may be mechanically united at any point throughout their length for synchronous reproduction.

1,389,408. TUNNEL-KILN AIR-HEATER. LOUIS WILPUTTE, New Rochelle, N. Y., assignor to American Dressler Tunnel Kilns, Inc., New York, N. Y., a Corporation of New York. Filed Nov. 20, 1919. Serial No. 339,518. 5 Claims. (Cl. 126—104.)



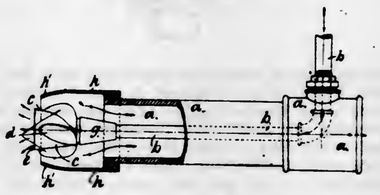
1. Air heating means comprising in combination, a structure built of refractory material and formed with a plurality of parallel combustion chambers and channels extending transversely to said chambers, a group of spaced apart pipes connected to and forming extensions of the combustion chambers, a housing inclosing said structure and pipes and closely surrounding the group of pipes but shaped to form a passage at one side of said structure which is in communication with the inter-pipe space, and a second passage at the opposite side of said structure out of direct communication with said inter-pipe space but connected to the other passage by said channels, said housing being formed with an air inlet at its end remote from said structure and an air outlet leading from said second passage, and means for supplying fuel and air to said combustion chambers.

1,389,409. LOCK. STANLEY J. WITKOWSKI, Detroit, Mich. Filed Oct. 15, 1919. Serial No. 330,843. 1 Claim. (Cl. 70—5.)



In a hasp lock of the character described, the combination with a plate adapted to be secured to a housing and having a central opening for the passage of a fastening means, of a hasp hingedly connected to said plate, having an enlarged substantially circular head and a keeper with a flanged casing carried by said head and provided with angularly disposed channels and having a central opening adapted to be engaged by the end pin of a key, notched locking bolts slidably disposed in said channels and passing through the sides of said casing, the notches of said locking bolts adapted to be engaged by the opposite edges of a key upon the rotation thereof for projecting said bolts in opposite directions through the walls of said casing into engagement with the keeper.

1,389,410. DEMOUNTABLE-RIM FASTENER. PAUL O. WITTE, Minneapolis, Minn. Filed July 9, 1920. Serial No. 394,993. 6 Claims. (Cl. 301—27.)

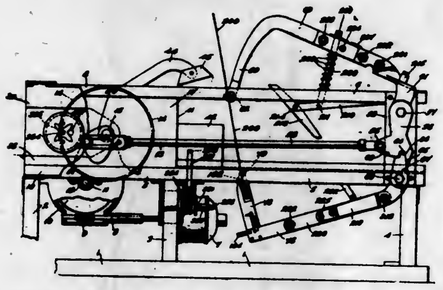


1. The combination with a wheel felly and a demountable rim, of spaced retaining lugs secured to said felly provided with laterally offset outwardly projecting ends, a laterally removable split fastening ring having a vertical body flange adapted to engage behind the said offset projecting ends of said lugs and provided with a flange adapted to engage with the adjacent flange of the demountable rim, under a wedging action when expanded to its limit, and means for expanding and locking said ring in its rim-clamping position, substantially as described.

1,389,411. COPY-HOLDER. ALBERT N. WOODRUFF, New York, N. Y. Filed July 29, 1920. Serial No. 399,672. 4 Claims. (Cl. 120—34.)

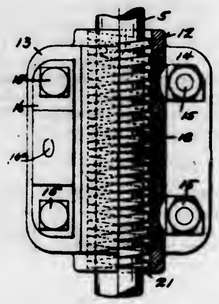
4. A device of the character described comprising a writing bed, a rod rigidly carried by said bed, a second rod reciprocatively mounted on the bed, a plurality of pawls mounted on the carriage and adapted to engage said rods to prevent movement of the carriage longitudinally of the bed, a line indicator pivotally mounted on the carriage and projecting to the front of the writing bed, and means comprising an extension of the line indicator said extension lying adjacent the pawls in such a manner that as the line indicator is rocked about its pivotal points, said extension will engage the pawls and cause their disengagement from their respective rods to permit of free movement of the carriage longitudinally of the writing bed in either direction.

1,389,412. LIQUID-FUEL BURNER. DUDLEY WRIGHT, Bankfield, Ulverston, England. Filed Jan. 8, 1917. Serial No. 141,136. 6 Claims. (Cl. 158—77.)



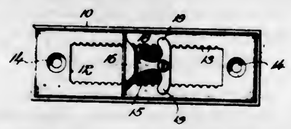
1. In a liquid fuel burner, an air conduit; a fuel atomizing receptacle of tapering configuration, so disposed in relation to said air conduit that its larger end projects beyond the discharge end of said air conduit; serrations formed at the larger end of said receptacle; a fuel supply pipe adapted to deliver fuel to the interior of said receptacle; and means whereby said receptacle may be rotated by gaseous pressure for the purpose of atomizing the fuel.

1,389,413. WIRE-TYING MACHINE. PARVIN WRIGHT, Chicago, Ill. Filed Feb. 7, 1920. Serial No. 356,978. 40 Claims. (Cl. 100—31.)



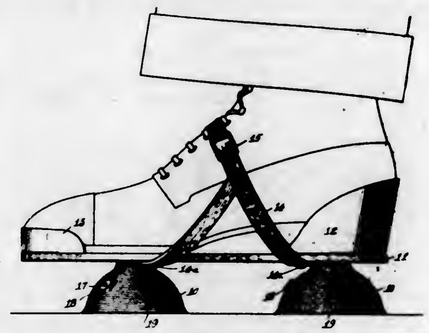
1. In a wire tying machine the combination of means to place a wire across the path of a package to be wired; means to cause the wire to partially encircle said package; means comprising an adjustable pair of opposing needle

arms to cause the wire to completely encircle said package; and means to twist parallel disposed bight portions of said wire together after said package is completely encircled, substantially as described.



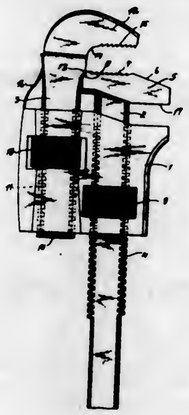
40. In a wire tying machine the combination of means to encircle a box with wire having parallel bights located parallel to the box and comprising a wire twisting means; means to swing said twisting means to and from the bights of wire to be twisted; and power means for actuating said twisting means, substantially as described.

1,389,414. BORE-HOLE PUMP. JOHN A. YEATMAN, Oakland, Calif., assignor to United Iron Works, Oakland, Calif., a Corporation of California. Filed Mar. 13, 1919. Serial No. 282,310. 1 Claim. (Cl. 64—48.)



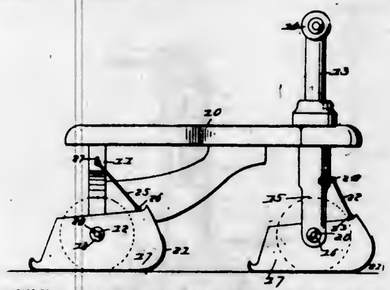
The combination with a bore hole pump and a drop pipe through which the water pumped passes, of a drive shaft for said pump disposed within said pipe, bearing shells surrounding said shaft, helical bearing members having spaced convolutions arranged in said shells and surrounding said shaft, diametrically disposed angle irons arranged longitudinally in said pipe, and means securing said bearing shells to said angle irons.

1,389,415. SHADE-BRACKET. ALEXANDER ZEBROWSKI, Stamford, Conn. Filed Feb. 9, 1921. Serial No. 443,735. 4 Claims. (Cl. 156—24.)



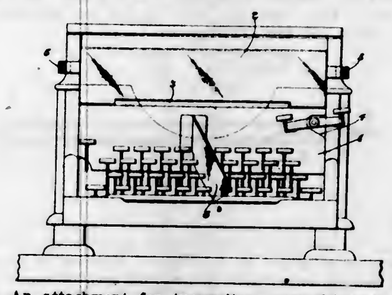
3. A shade bracket comprising a base plate having an opening formed therein, opposite side walls of said opening being relatively divergently beveled from front to rear of the plate, said side walls being provided with spaced notches, and a shade hanger element slidably associated with said base plate and including an inherently resilient member normally engaging certain of said notches whereby the element is prevented from sliding and disengageable from said notches by pressure thereon.

1,389,416. NON-SLIP DEVICE. JOSÉ GARZA ZERTUCHE, Mexico, Mexico. Filed Aug. 13, 1920. Serial No. 403,248. 5 Claims. (Cl. 36—59.)



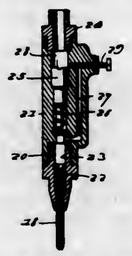
1. As an article of manufacture, a non-slip device comprising a resilient suction cup, and an article carrying said cup and adapted to secure it in position, said cup having a vent opening and said article presenting a surface into contact with which the vented portion of the cup moves when collapsed, for the closing of said vent opening.

1,389,417. MULTIPLE WRENCH. TONY ZUKOWSKI, Bristol, Conn. Filed Aug. 23, 1920. Serial No. 405,426. 3 Claims. (Cl. 81—176.)



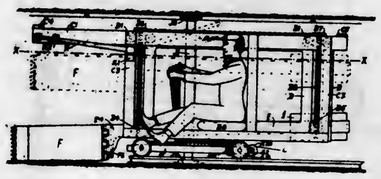
1. A device of the class described comprising a frame, a pair of threaded stems slidable therein, one of said stems being provided with a jaw having its lower edge flat and its upper edge serrated, the other of said stems having a serrated jaw adapted to coact with said first-named serrated jaw, a spring normally urging one of said stems toward the other, there being a hump on the side of one of said stems adapted to contact with the edge of said jaw on the other of said stems when said jaws are tightened.

1,389,418. CHILD'S COASTER. PAUL A. ARNER, Allentown, Pa. Filed Sept. 14, 1920. Serial No. 410,088. 1 Claim. (Cl. 208—165.)



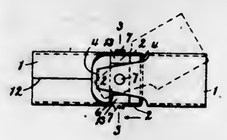
A child's coaster consisting of a frame having a platform or seat, a depending rear hanger and a steering post provided at its lower end with a fork, said hanger and fork having transverse spindle portions, runners having bearings for the reception of said spindles and flexible anchoring means consisting of straps attached at their lower extremities to the forward ends of the runners and provided at their free ends with cotter pins for removable engagement with sockets in said frame.

1,389,419. ATTACHMENT FOR TYPEWRITERS. ELLA E. BRIGGS, St. Louis, Mo. Filed Dec. 29, 1920. Serial No. 433,830. 4 Claims. (Cl. 197—105.)



1. An attachment for typewriters, comprising a supporting member arranged to bear against the frame of the machine above and behind the keyboard, releasable spring clips supported by said member, and arranged to engage the frame of the machine, and a partition supported by said supporting member extending obliquely downwardly and forwardly between the rows of keys.

1,389,420. WHEEL-FLANGE OILER. WILLIAM T. D. CAMPAIGNE, Spooner, Wis. Filed Oct. 21, 1919. Serial No. 332,210. 2 Claims. (Cl. 184—3.)

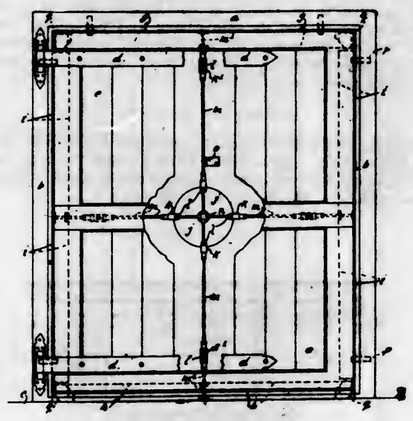


2. A wheel flange oiler having a nozzle provided with an extensible discharge tip having a follower head, a casing with which the discharge tip is removably connected, the said casing being provided with a longitudinal bore, a spring actuated piston valve housed in said bore, the casing being formed with a by-pass communicating with the bore at opposite ends of the piston valve and adapted to be closed at one end by said valve, a needle valve carried by said casing and controlling the said by-pass, and means for communicating fluid pressure to the casing to actuate the valve to open said by-pass as herein shown and specified.

1,389,421. POWER-SHOVEL FOR USE IN MINES TO LOAD COAL AND ORE INTO CARS. CLYDE S. CORRIGAN, Norwood, Ohio. Filed July 15, 1920. Serial No. 396,391. 16 Claims. (Cl. 37—14.)

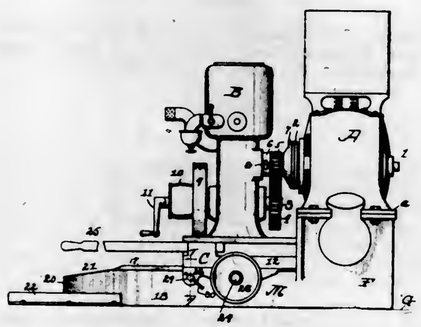
1. In a power shovel the combination of a frame adapted to turn on a vertical hub, a shovel mechanism adapted to move horizontally and vertically within said frame, a substantially vertical hub centrally positioned and pivotally attached within said frame and shovel mechanism, jack means within said hub adapted to make rigid connection with a mine roof and floor, whereby said hub may be used as a fulcrum against which said shovel mechanism may exert force to perform work.

1,389,422. UNIVERSAL JOINT. GEORGE V. CURTIS, West Springfield, Mass. Filed Dec. 17, 1920. Serial No. 431,319. 12 Claims. (Cl. 64—102.)



12. As an improved article of manufacture, a universal joint comprising shaft couplers, each having arms connected by cross-pieces, which arms extend inwardly beyond the plane of the outer ends of the arms on the other coupler, and an intermediate member articulated to all of said arms, said couplers being constructed to enable the arm- and cross-piece-forming parts of one to be interengaged with the corresponding parts of the other, before being bent to form.

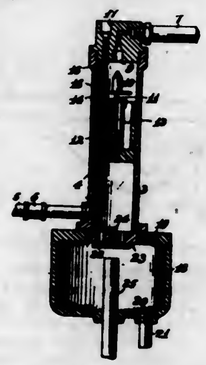
1,389,423. REFRIGERATOR-DOOR. ALBERT CHARLES DAVIS, Bootle, England. Filed Feb. 24, 1919. Serial No. 279,023. 1 Claim. (Cl. 20—16.)



The combination with a doorway and door therefor, of corner pieces fitted in said doorway, battens carried by the edges of said door, said battens having the ends

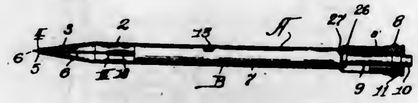
thereof cut away so as to overlap and beveled so as to engage the corner pieces of said doorway, and means

carried by said door adapted for simultaneously moving said battens to engage walls of said doorway and the corner pieces thereof.



1,389,424. POWER-PLANT MOUNTING. FRANK H. DE BRUN, Chicago, Ill., assignor to The Necedah Manufacturing Corporation, Necedah, Wis., a Corporation of Wisconsin. Filed July 29, 1920. Serial No. 399,957. 6 Claims. (Cl. 248—30.)

1. The combination with a stationary member provided with a carriage mounting, of an engine carriage adapted to support the engine independently of said stationary member and also adapted to be supported upon said mounting, and means for locking the carriage and the stationary member together.

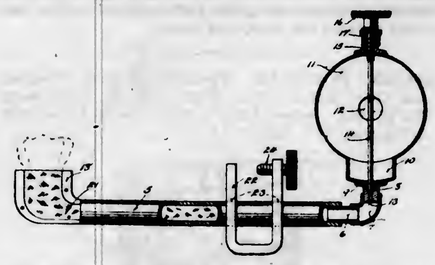


1,389,425. SUCTION-FEED. THOMAS A. EDISON, Jr., Burlington, N. J. Filed Jan. 14, 1918. Serial No. 211,887. 13 Claims. (Cl. 158—36.)

1. In suction feeds for liquid fuel, the combination of a fuel tank or receptacle into which successive charges of the liquid fuel are to be drawn by the suction of the engine, and means actuated by suction whose action is determined by the height of the liquid in the re-

ceptacle for entirely cutting off the suction with a snap action and breaking the partial vacuum to allow the charge to recede, substantially as set forth.

1,389,426. PENCIL. HOWARD L. FISCHER, St. Paul, Minn. Filed Dec. 17, 1918. Serial No. 267,206. 7 Claims. (Cl. 120—17.)

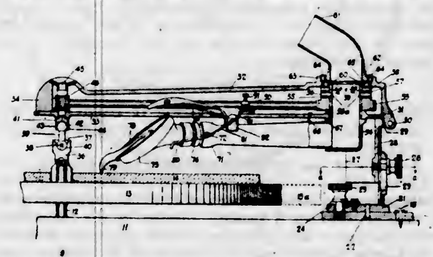


5. In a pencil having a lead ejecting means, a releasing means for said lead ejecting means to allow the ejecting means to be moved in a backward direction, a slidable lead holding socket connected to said ejecting means and means for automatically setting and rigidly holding, against backward movement, said socket in receiving position to receive a new marking lead when said ejecting means is set in extreme backward position, said holding means diminishing in holding power, as said ejecting means is moved in a forward direction in said pencil, so that when said lead holding socket engages the inner surface of said pencil barrel, said ejecting means can slide in said socket with only a slight degree of friction or holding force from said holding means bearing against said ejecting means, said ejecting means forming an abutment for the rear end of the marking lead held in the socket to rigidly hold the lead against backward movement when held in writing position.

1,389,427. KINDLING-BURNER. CHARLES FLINT, Menominee, Mich. Filed Sept. 2, 1919. Serial No. 321,152. 1 Claim. (Cl. 158—10.)

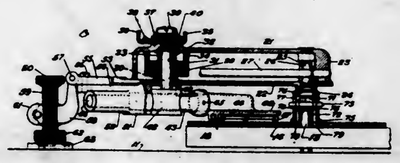
A burner of the class described comprising a tubular shank member, a laterally disposed burner head carried at one end of the shank member and having a long narrow slot for receiving a flat wick, wick packing disposed in said burner head and extending into the adjacent portion of the shank member, one side of the burner head being removable to permit the work to be readily inserted, a supply tank carried by and upstanding from the other end of the shank member, means for controlling flow of liquid from said supply tank, said shank member

being oval in cross section, a U-shaped bracket member provided with apertures in the intermediate portions of



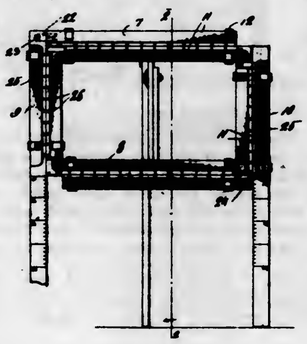
its legs which snugly receive the shank member, and a clamping screw threaded in the end portion of one of the legs of the bracket member.

1,389,428. CABLE-PUMP. GEORGE GARTLING, Los Angeles, Calif. Filed Aug. 18, 1919. Serial No. 318,401. 8 Claims. (Cl. 103—6.)



1. In a pump of the character described, an endless cable, pins in said cable and buckets secured over said pins.

1,389,429. RECORDING AND REPRODUCING ATTACHMENT FOR PHONOGRAPHS. WILLARD H. GILMAN, New York, N. Y., assignor, by mesne assignments, to John A. McVickar, New York, N. Y. Filed Mar. 8, 1920. Serial No. 364,317. 8 Claims. (Cl. 274—13.)

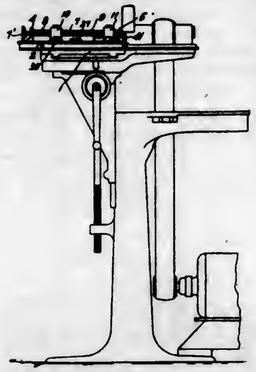


1. In a phonograph attachment a turntable mounted for rotation, a mechanism secured to the case of said phonograph and extending over said turntable, said mechanism operably connected with the stem of said turntable and driving a horizontal gear, a vertical voice tube centered in said gear and held in engagement therewith by spring friction, said voice tube having a horizontal arm terminating in a diaphragm head, substantially as described.

1,389,430. RECORDING AND REPRODUCING MECHANISM FOR PHONOGRAPHS. WILLARD H. GILMAN, New York, N. Y., assignor, by mesne assignments, to John A. McVickar, New York, N. Y. Filed Oct. 13, 1919, Serial No. 330,464. Renewed July 19, 1921. Serial No. 485,847. 18 Claims. (Cl. 274—13.)

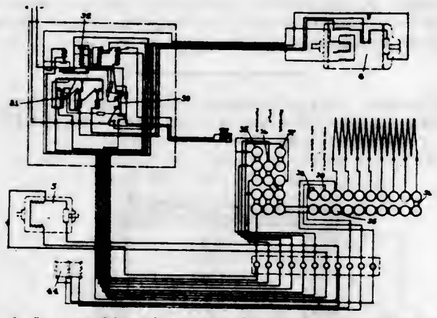
2. In a mechanism of the class described, the combination with a phonograph turntable of a vertical shaft and a friction clutch, said shaft driven from the stem of said turntable through said friction clutch, a tone arm carried by said vertical shaft across the face of said turntable and means for releasing said friction clutch by the movement of said tone arm.

1,389,431. CURTAIN-STRETCHER. JOSEPH BARRY, Sharon, Pa. Filed May 7, 1920. Serial No. 379,576. 7 Claims. (Cl. 45—24.)



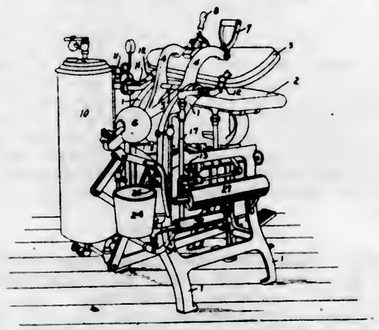
1. A curtain stretcher comprising a frame including longitudinally adjustable longitudinal and transverse members, each member consisting of a pair of bars longitudinally adjustable, said members being pivotally connected together at a pair of diagonally disposed corners of the frame, and said members being detachably connected together at the other pair of diagonally disposed corners, whereby the coacting longitudinal members may be disposed beside their coacting transverse members when folded.

1,389,432. AUTOMATIC GAGE. OSCEOLA DE LOS BRAINARD, Great Falls, Mont. Filed June 4, 1920. Serial No. 386,657. 11 Claims. (Cl. 29—69.)



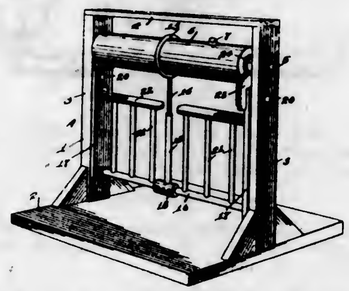
1. A device of the character described, comprising a copy support, means registering with the column lines of a copy on the support, a saw, means for projecting slugs

beyond the support for engagement with the saw, and means compelling the movement of the slugs a distance



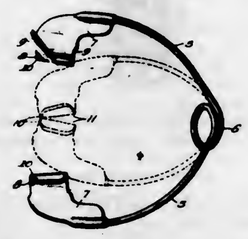
from their center to saw line exactly half the distance of movement imparted to the column registering means.

1,389,433. DRIVING MECHANISM FOR AUTOMATIC MACHINES. JOHN P. BROPHY, Cleveland, Ohio. Filed Oct. 19, 1916. Serial No. 126,543. 7 Claims. (Cl. 172—239.)



1. In a machine of the class described, the combination of a constant speed cam shaft, a spindle, a variable speed motor, a mechanical two-speed transmission means connecting said motor and said spindle, and means operable by said cam shaft and adapted to automatically engage either of the two speeds in said transmission means.

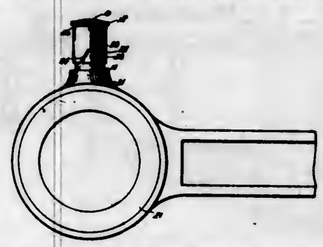
1,389,434. STEAM-CONDENSER FOR CLOTHES-PRESSES. JACOB BUFF, Jersey City, N. J. Filed Apr. 19, 1919. Serial No. 291,395. 3 Claims. (Cl. 68—9.)



1. In a clothes press, the combination with a buck, a pressing head, a boiler, means for supplying steam from the boiler to the buck and pressing head, and a suction pipe connected with the buck, of a condenser, a connection between the condenser and suction pipe, a pump, a connection between the pump and condenser, and a connection between the pump and boiler.

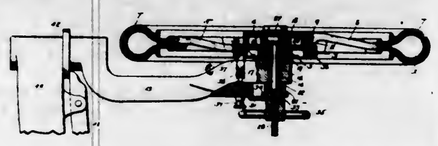
1,389,435. HOG-OILER. CHARLEY BURNETT, Washington Court House, Ohio. Filed Sept. 15, 1919, Serial No. 323,931. Renewed Feb. 1, 1921. Serial No. 441,676. 3 Claims. (Cl. 119—157.)

3. A stock oiler comprising a supporting structure, a fluid containing tank tiltably mounted in connection with said structure, a rubbing frame pivotally connected with said structure beneath said tank, means actuated by the oscillation of said frame to impart relatively multiplied rotative movements to said tank, a member surrounding said tank and defining a supplemental fluid receiving chamber having communication with the interior of said tank, the upper portion of said member having a fluid discharge port formed therein, and a telescopic spout structure coöperatively carried by said tank and frame and situated to receive the contents of said chamber by way of said port upon the tilting of said tank.



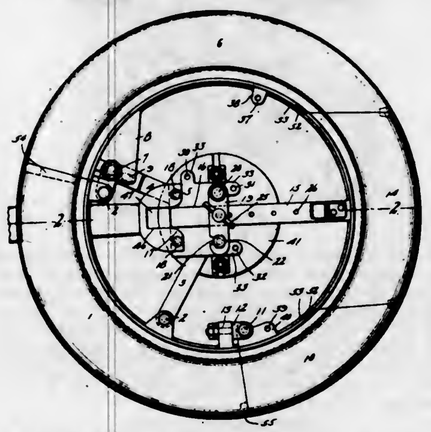
1,389,436. RETRACTOR. WILLIAM J. CAMERON, Chicago, Ill. Filed Apr. 28, 1919. Serial No. 293,300. 3 Claims. (Cl. 128—17.)

1. A dental retractor comprising two arms normally resiliently diverging and bowed to one side whereby when the retractor is positioned in the mouth of the patient the said arms will lie substantially snugly against the cheek of the patient thereby leaving the mouth of the patient unobstructed.



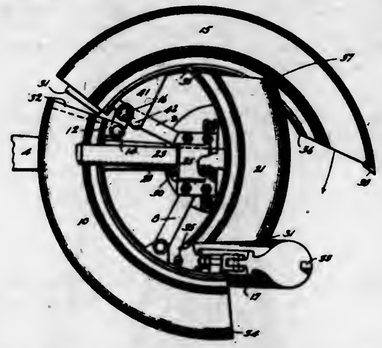
1,389,437. GREASE-CUP. THOMAS C. DAVENPORT, New Haven, Conn. Filed July 2, 1920. Serial No. 393,617. 1 Claim. (Cl. 184—45.)

A device of the character described comprising in combination with a connecting rod, a grease receptacle formed integral with the connecting rod and communicating with a bearing through a passage formed in the connecting rod, a cover for said grease receptacle, said cover comprising a sheet metal member formed with an integral head of larger diameter than the diameter of the cover, a closing plate adapted to be placed within the cover and formed with a reduced portion adapted to be received within the open end of the grease receptacle, a coil spring secured at one end to said closing plate and having its other end lying within the groove formed by the enlarged head portion of the cover, said spring being maintained



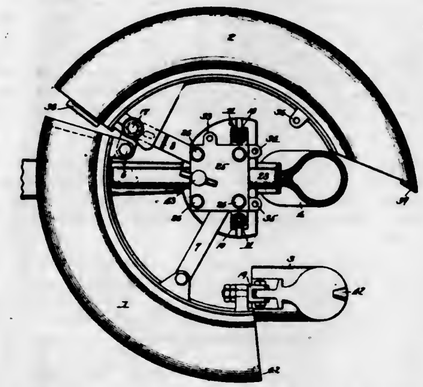
under pressure to retain the reduced portion of the closure plate within the open upper end of the grease receptacle, and means for securing said cover in position upon the grease receptacle.

1,389,438. COLLAPSIBLE CORE AND CHUCK. PETER DE MATTIA, Clifton, N. J. Filed June 8, 1920. Serial No. 387,413. 14 Claims. (Cl. 154—9.)



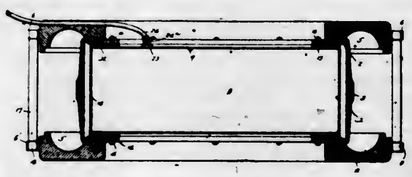
1. A collapsible core comprising a plurality of segmental core sections, independent supports for each section, and pivotal connections between the core sections and their supports permitting movement of the core sections into and out of operative continuity in a direction transverse to the plane of the core sections out of said plane.

1,389,439. COLLAPSIBLE CORE. PETER DE MATTIA, Clifton, N. J. Filed June 8, 1920. Serial No. 387,414. 5 Claims. (Cl. 154—9.)



1. A collapsible core comprising a plurality of segmental sections, one of said sections being a key section, a shank carried by said key section, a chuck supporting said sections, a guideway in said chuck to receive the shank of the key section, and a brace bar spanning the guideway at its rear end.

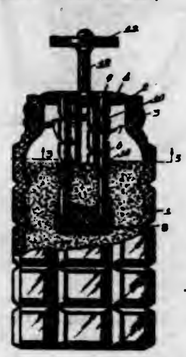
1,389,440. COLLAPSIBLE CORE. BARTHOLD DE MATTIA, Clifton, N. J. Filed June 8, 1920. Serial No. 387,415. 4 Claims. (Cl. 154—9.)



1. A collapsible core comprising a plurality of segmental sections, one of said sections being a key section, and means to impart to the key section a radial movement into and out of a position of operative continuity obliquely to the plane thereof.

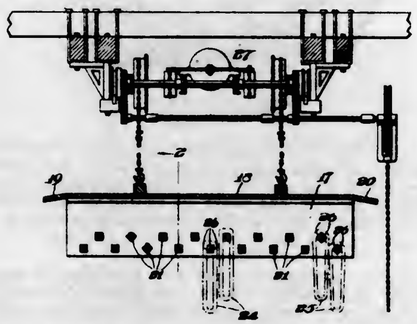
1,389,441. COLLAPSIBLE CORE. BARTHOLD DE MATTIA, Clifton, N. J. Filed June 8, 1920. Serial No. 387,416. 5 Claims. (Cl. 154—9.)

1. A collapsible core comprising a plurality of segmental sections, including a key section, means for moving the key section into and out of operative continuity in the plane of the core, and means for moving the key section when retracted about a radial axis so as to position it in a plane at right angles to the plane of the core.



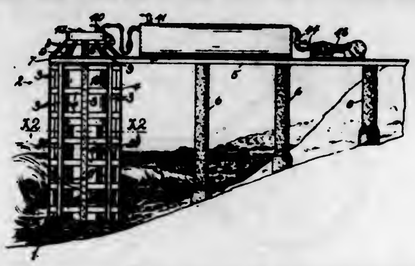
1,389,442. APPARATUS FOR AND PROCESS OF MAKING PNEUMATIC TIRES. BARTHOLD DE MATTIA, Clifton, N. J. Filed Sept. 17, 1920. Serial No. 410,920. 19 Claims. (Cl. 18—19.)

1. In an apparatus for manufacturing pneumatic tires, an expanding device comprising opposed heads and an



elastic wall hermetically connected thereto, the heads being freely movable toward and from each other, and means for admitting and confining a fluid charge within said expanding device, said fluid charge filling the chamber while the heads are moved away from each other and of sufficient volume to expand the elastic wall when the heads are moved toward each other.

1,389,443. CONDIMENT-HOLDER. DAVID FREEDLINE, Brooklyn, N. Y. Filed Sept. 7, 1920. Serial No. 408,625. 3 Claims. (Cl. 65—45.)

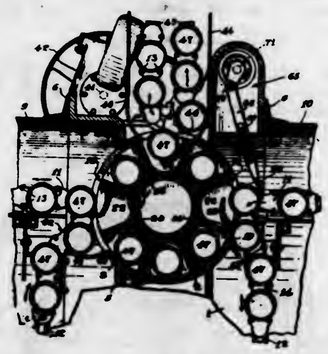


1. The combination with a condiment holder, and a perforated cover thereon, of an ejector comprising rods located in the perforations of the cover, said rods having a staggered arrangement of condiment receiving pockets therein, an agitator secured to the inner ends of the rods and constituting a weight, and a disk spaced above the cover and limiting the outward movement of the ejector.

1,389,444. DYEING-MACHINE. JAMES A. GRUNDY, Philadelphia, Pa., assignor to John Bromley & Sons, Incorporated, Philadelphia, Pa., a Corporation of Pennsylvania. Filed Mar. 25, 1921. Serial No. 455,421. 5 Claims. (Cl. 8—19.)

1. A machine for dyeing yarns and the like, comprising in combination an open topped container, rectangular in contour, for dye liquor, an interior tank of equal width but lesser length mounted within and below the plane of the open top of said container and in spaced relation thereto at each end and at base, said interior tank having a perforated bottom wall, perforated tubular means within said container arranged to apply fluid pressure to circulate the contained dye liquor, and vertically movable means to suspend yarns and the like in said interior tank, said means including parts adapted, when in lowered position, to rest on the edges of said container and close the same without closure of the interior tank relatively thereto.

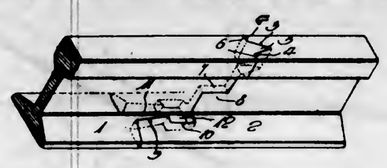
1,389,445. OCEAN COMPRESSED-AIR POWER. CHARLES N. HAHN, Lima, Ohio. Filed Nov. 3, 1920. Serial No. 421,569. 24 Claims. (Cl. 230—82.)



1. In an apparatus of the class described, a base, a cage secured to said base, a stationary cylinder secured to said cage, a reciprocating cylinder mounted in said cage, and telescoping with said stationary cylinder, and means for applying a liquid seal between the reciprocating cylinder and both sides of the stationary cylinder.

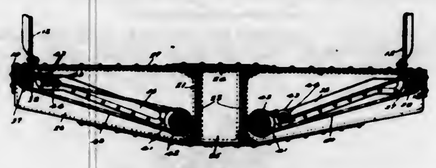
1,389,446. ALLOY. HENRY HECHT, New York, and David G. Black, Brooklyn, N. Y., assignors to Alloys & Products, Inc., New York, N. Y., a Corporation of New York. Filed June 12, 1920. Serial No. 388,589. 4 Claims. (Cl. 75—1.)

1. An alloy containing copper, 25 to 40 per cent.; nickel, 20 to 40 per cent.; chromium, 6 to 12 per cent.; and iron, 25 to 40 per cent.



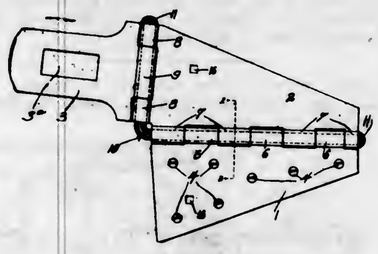
1,389,447. CONTAINER-TRANSFER FOR PRESSURE COOKERS AND COOLERS. AXEL JOHNSON, Oakland, Calif. Filed June 2, 1920. Serial No. 385,940. 26 Claims. (Cl. 126—272.)

1. In combination with a pair of endless conveyers and an endless article feed conveyer arranged with portions of said conveyers, lying adjacent to each other, a mechanism interposed in coöperative relation with said conveyers for receiving an article from said feed conveyer and for delivering the same to one of said pair of conveyers and for receiving the article delivered to said conveyer and for subsequently delivering the same to the other of said pair of conveyers.



1,389,448. RAIL-JOINT. HARRY O. KAMMERDEINER, Echo, Pa. Filed Jan. 18, 1921. Serial No. 438,244. 4 Claims. (Cl. 238—235.)

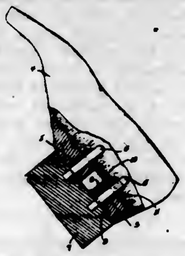
4. A rail joint comprising adjoining rail ends having interlocking treads and their web portions meeting in edge contact, the base portion of one rail end having a longitudinally extending downwardly tapered passage leading to an enlarged pocket and the second rail end having its



base provided with side wings fitting into and filling said pocket, and a longitudinally extending downwardly tapered rib fitting into said passage.

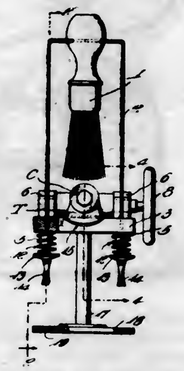
1,389,449. DUMPING-DOOR ACTUATOR. ANDREW KUBIK, Michigan City, Ind. Filed Sept. 28, 1920. Serial No. 413,360. 1 Claim. (Cl. 105—298.)

A car comprising a bottom having a plurality of spaced openings upon each side of its longitudinal center, hinged doors for closing the openings, a transversely movable shaft located below the doors at each side of the longitudinal center line and engageable with the doors, semicircular clamping plates secured upon the shafts, combined clamping and connecting ears extending from said plates upon opposite sides of the shafts, chains movable transversely beneath the car and having their opposite ends connected to said ears and means for operating the chains to move the shafts and actuate the doors.



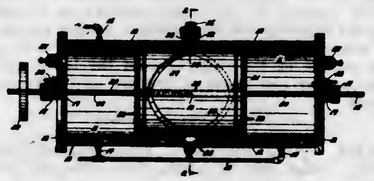
1,389,450. HASP. LEO KULES, Mount Washington, Pa. Filed Nov. 19, 1920. Serial No. 425,170. 5 Claims. (Cl. 292—282.)

1. In a hasp, a base plate, a body plate at one side of the base plate, a securing plate at one end of said body plate, the securing plate and the body plate, and the body plate and the base plate, being provided with interengaging sleeves, and a single pintle rod secured through all of said sleeves.



1,389,451. SHOE-LAST. WILLIAM P. MCLAUGHLIN, Bristol, R. I., assignor to National India Rubber Company, a Corporation of Rhode Island. Filed Dec. 20, 1919. Serial No. 346,364. 3 Claims. (Cl. 12—139.)

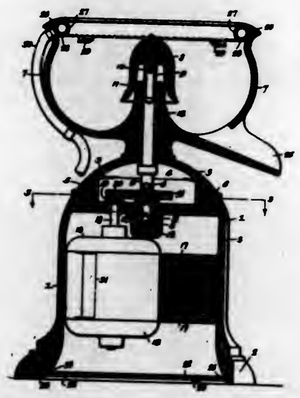
1. The combination with a hollow last having a bore through its wall, and a socket member projecting through the bore into the interior of the last and having yielding pin engaging members, of a last support having a pin



of uniform diameter throughout adapted to be yieldingly engaged by said members.

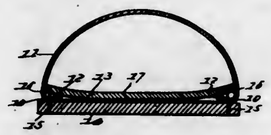
1,389,452. SQUEEZER FOR COLLAPSIBLE TUBES. THOMAS HARRIS MARTIN, Columbus, Ohio. Filed Feb. 5, 1920. Serial No. 356,539. 4 Claims. (Cl. 221—60.)

1. In a device for compressing and forcing the entire contents from a collapsible tube, a support including a horizontal plate provided with a substantially flat upper face and with oppositely disposed apertures, bearing blocks including hollow internally screw-threaded shanks extending through said apertures, headed adjusting screws threaded in said shanks, coiled springs surrounding said screws and shanks between the plate and heads of the screws, permitting yielding of the bearing blocks, a combined pressure and feed roller carried by said bearing blocks, means for connecting the tube to the roller, and means for imparting rotation to said roller.



1,389,453. INTERNAL-COMBUSTION MOTOR. PAUL F. MOORE, Carneys Point, N. J. Filed Dec. 2, 1919. Serial No. 341,908. 1 Claim. (Cl. 123—61.)

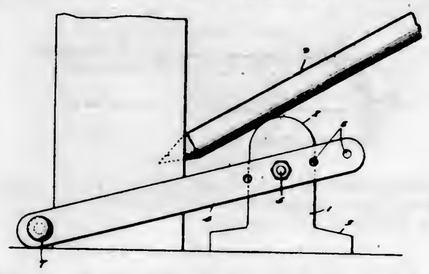
In an internal combustion engine, a cylinder, a rotatable shaft passing through the cylinder and having a squared portion co-extensive with the length of the



cylinder, a gas inlet adjacent each end of the cylinder, a gas outlet arranged centrally of the cylinder, a piston mounted to reciprocate within the cylinder and having a squared longitudinally disposed bore through which the squared portion of the shaft passes, said piston having a continuous spiral-like channel formed in the periphery thereof and extending in close proximity to the ends of the piston, a tubular projection formed on the cylinder midway thereof, a pin arranged within the projection and extended within the cylinder, a roller carried by the inner end of the pin and operating in said channel to cause the piston to rotate within the cylinder, and said pin having a longitudinal oil passage for lubricating the parts as described.

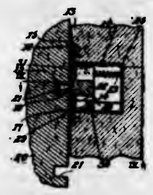
1,389,454. CITRUS-JUICE EXTRACTOR. WILLIAM M. MURPHY, Glenside, Pa. Filed Sept. 6, 1919. Serial No. 322,102. 2 Claims. (Cl. 100—49.)

2. In a juice extractor having a base; a bowl mounted on the base; an extractor head located in the bowl; and means for rotating said head; the combination of a water supply pipe near the upper edge of the bowl for supplying water to the bowl.



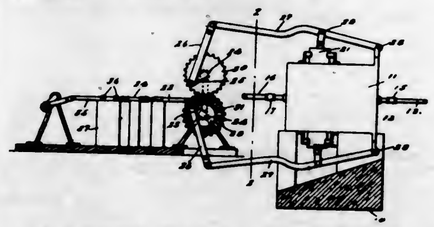
1,389,455. SHOE. HYMAN MUSKIN, Baltimore, Md. Filed Feb. 5, 1920. Serial No. 356,375. 2 Claims. (Cl. 12—142.)

1. The method of constructing a shoe which consists in stitching the marginal edge of the vamp to a flexible lining or stay, turning the camp, applying a sole to the exterior surface of the lining or stay in overlapping marginal relation with the adjacent portion of the vamp and stitching the marginal portion of the sole to the vamp outside of the seam between the latter and said lining or stay and inside of the rise of the vamp from the sole.



1,389,456. POST-PULLER. NELS PETERSON, Delano, Calif. Filed Apr. 6, 1920. Serial No. 371,571. 1 Claim. (Cl. 254—31.)

A device of the class described comprising a fulcrum member having a body part and a rounded upper end, a base being wider and longer than said body part, arms adjustably connected to each end of the body part, a bolt connecting the latter to the said arms, the former

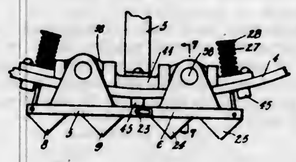


engaging openings formed in said arms, a sleeve carried by the outer ends of the arms for spacing the latter, means for connecting said outer ends together.

1,389,457. AUTOMATIC SAFETY WINDOW AND SCREEN LOCK. JOHN D. PILTZ, Detroit, Mich. Filed Sept. 25, 1920. Serial No. 412,687. 3 Claims. (Cl. 292—15.)

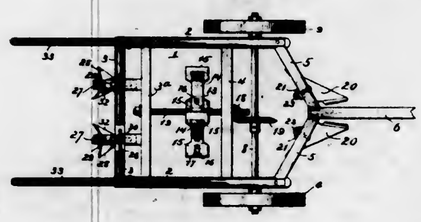
1. A sash locking means including a casing adapted to be countersunk in a window frame, a spring projected follower reciprocable in said casing and having a pair of bolts extending outwardly therefrom, anti-friction rollers journaled upon the free ends of said bolts, a cover plate for the casing having slots through which said bolts slidably project, guiding pins rigidly attached to the back of the casing and slidably extending through said follower, said follower being provided with longitudinal grooves in the upper and lower faces thereof, and longitudinal ribs projecting inwardly from the casing and slidably fitting in said grooves.

1,389,458. WATER-PUMP. ROBERT L. PURNELL, Red Level, Ala. Filed June 18, 1920. Serial No. 389,921. 2 Claims. (Cl. 103—62.)



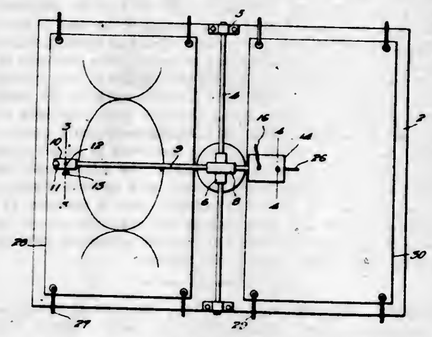
1. In a pumping mechanism including a plurality of cylinders and pistons operating therein, operating means comprising a lever for each piston pivoted at one end and pivotally connected with the piston intermediate its ends, a pair of superimposed shafts having a plurality of corresponding crank portions connected with the other end of the respective levers, gear connections between said shafts whereby to effect simultaneous rotation thereof in opposite directions, and means for imparting step by step rotation to one of the shafts.

1,389,459. BELT-BUCKLE. SAMUEL ROSENTHAL, New York, and SAMUEL D. BRIGHTMAN, Brooklyn, N. Y. Filed Dec. 29, 1920. Serial No. 433,894. 2 Claims. (Cl. 24—194.)



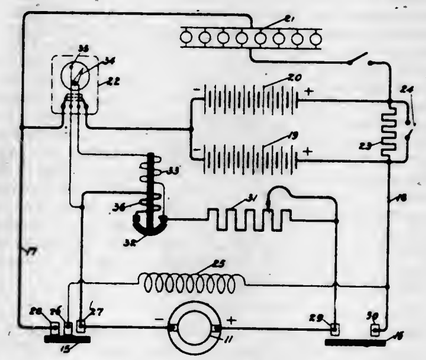
1. In a belt buckle, a plate, flanges at the sides of the plate, guards extending inwardly from the flanges, lugs carried by one end of the guards, said flanges having longitudinal slots therein, a plate slidable in the slots, means for clamping one end of a belt to the slidable plate, means for clamping the other end of the belt against the first-mentioned plate and coiled springs connecting the lugs and the second-mentioned plate and located between the guard and the belt.

1,389,460. TRACTION-WHEEL. GEORGE H. SCANLAN, New York, N. Y. Filed Apr. 24, 1920. Serial No. 376,280. 3 Claims. (Cl. 305—13.)



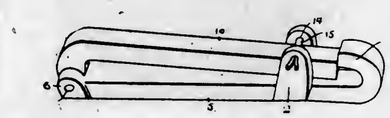
1. A device of the character described comprising a rim, a plurality of tread sections, a sliding and pivotal connection between each pair of tread sections, means for pivotally connecting said tread sections to said rim so as to swing in two directions at right angles to each other, and resilient means for resisting said swinging movement.

1,389,461. COMBINED COTTON CHOPPER AND CULTIVATOR. JAMES HENRY SMITH, Saline, La. Filed June 30, 1920. Serial No. 393,054. 4 Claims. (Cl. 97—46.)



1. An implement of the character described comprising a wheeled frame having converging forward portions, forward plows adjustably connected with the respective converging portions of the frame, said plows being reversely disposed relative to each other, plows spaced apart at the rear end of the frame, and means adjustably connecting said last mentioned plows with the rear end of the frame in a manner to permit adjustments of said plows in directions at right angles to each other.

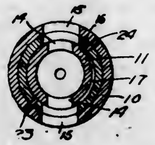
1,389,462. WOOD-CARVING DEVICE. EARL RUSSELL SPREADBURY, Saugus, Mass. Filed Apr. 10, 1920. Serial No. 372,830. 4 Claims. (Cl. 90—13.1.)



1. A base, a transverse shaft thereon, a slide on the shaft, a socket swiveled to the slide, a rod passing through the socket, a stylus on one end of the rod, and a motor driven chuck on the other end of the rod.

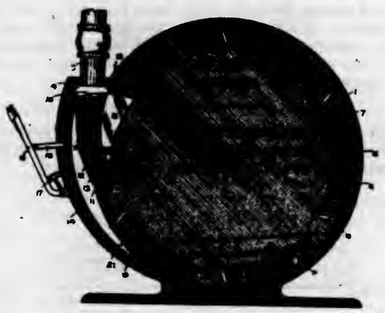
1,389,463. SYSTEM OF ELECTRICAL DISTRIBUTION. WILLIAM A. TURBAYNE, Niagara Falls, N. Y., assignor to U. S. Light & Heat Corporation, Niagara Falls, N. Y., a Corporation of New York. Filed Nov. 15, 1915, Serial No. 61,588. Renewed Jan. 7, 1921. Serial No. 435,760. 18 Claims. (Cl. 171—314.)

9. In a system of electrical distribution, a generator, a pair of storage batteries and a lamp circuit, one of which batteries is adapted to regulate the lamp circuit while the other battery is being charged, and means responsive to the total state of charge of both batteries for controlling the output of said generator.



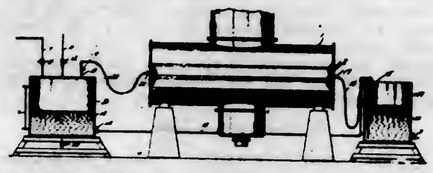
1,389,464. CHAIN-FASTENER. JOHN M. WATKINS and FRED ANDERSON, Montrose, Colo. Filed May 3, 1919. Serial No. 294,618. 1 Claim. (Cl. 24—241.)

A connecting link for chains comprising a body having a beak at one end with its terminal squared, the other



end thereof being bifurcated and the furcations provided with a pair of laterally extending apertured ears on the same side of said body as said beak, having another pair of laterally spaced apertured ears extending in the same direction as said first mentioned pair at a point adjacent the beak but spaced therefrom, a guard having a facewise extending rightangular connecting and spacing finger at one end fitting between and pivoted to the end ears of said body member to hold said pivoted guard end spaced laterally from said body, said guard overlying the body with its free end squared and lying in close proximity to the end of said beak and of a thickness slightly greater than the space between said body and beak to insure closing of the beak when the free end of the guard rests on said body, said guard lying between said apertured securing ears when in operative position, and a fastener extending through said ears outside said guard to secure the parts in operative position and provide separated link engaging loops at the ends of the member.

1,389,465. TRAIN-LINE VALVE. CHARLES H. WEAVER, Beaumont, Tex. Filed Feb. 14, 1920. Serial No. 358,603. 1 Claim. (Cl. 251—94.)



A cut out cock for a pneumatic train brake system comprising a body having a pair of ports arranged in its opposite sides and having a pair of bleed ports disposed diagonally in its sides adjacent to said ports aforesaid, a hollow rotatable cone-shaped plug having a pair of ports arranged in its opposite sides and having a pair of bleed ports disposed diagonally in its sides adjacent to said ports aforesaid, a hollow rotatable cone-shaped plug having a pair of ports arranged in its opposite sides adapted to be brought into registry with the ports in the body and having a pocket formed in its outer wall intermediate its ports and adapted to connect one of said bleed ports with the adjacent port in the body, a bushing secured to the bottom of said body, a coil spring carried by said bushing and engaging the base of said plug, a lug formed upon the reduced end of said plug, stop lugs disposed on opposite sides of said body and an operating handle carried by the lug on said plug having depending lugs adapted to engage said stop lugs aforesaid.

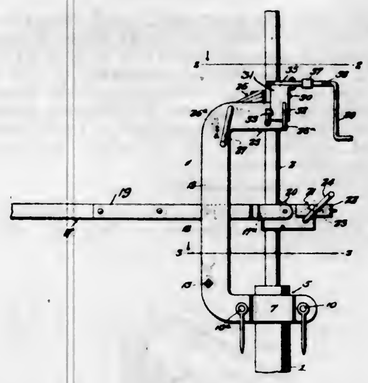
1,389,466. ENGINE. GLENN P. WHITE, Ashtabula Harbor, Ohio. Filed June 30, 1920. Serial No. 393,046. 1 Claim. (Cl. 121—95.)

In a rotary engine the combination with a stator having an eccentric extension on the periphery thereof provided with a pressure inlet and an exhaust port adjacent the respective ends thereof, and a gate movably mounted in the extension, of a rotor having peripheral recesses, pistons pivotally mounted within the recesses, yielding means for successively projecting the pistons into the extension to receive the pressure from the inlet, each of said pistons having a vent extending therethrough, and means for shifting the gate against the rotor to hold the pistons against movement from their recesses while passing the extension.

1,389,467. TUBE-CLEANING APPARATUS. JOHN H. WHITE and EDWARD J. FRANKLIN, Hayden, Ariz. Filed July 14, 1920. Serial No. 396,218. 6 Claims. (Cl. 122—379.)

1. An apparatus of the character stated, comprising a supply tank containing a cleaning agent, a receiving tank, means for directing the cleaning agent into one end of a tube, means for connecting the other end of said tube with said receiving tank, said receiving tank constituting a suction or partial vacuum chamber to cause the cleaning agent to move from the supply tank through the tube and into the receiving tank, and means for directing the return of said cleaning agent from the receiving tank into the supply tank.

1,389,468. SAFETY PNEUMATIC WRENCH. WILLIAM R. WHITE, Bristol, Pa. Filed July 28, 1920. Serial No. 399,525. 5 Claims. (Cl. 81—55.)



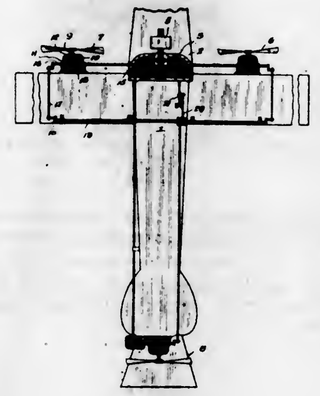
1. A safety tool of the class described including a motor having a casing, a relatively stationary hollow housing rigidly connected with the motor casing and coöperating with the same to form a rigid support and provided with a socket arranged to engage and hold a washer, a rotary wrench socket arranged within the housing and adapted to receive a nut and connected with and actuated by the motor.

1,389,469. ROD-PULLER. WALTER WILCOX and CHARLEY LA DUKE, Oconto, Nebr. Filed Dec. 17, 1920. Serial No. 431,446. 8 Claims. (Cl. 254—31.)

4. A device of the class described comprising a frame having a support engaging clamp at one end and carrying a rod receiving loop with a dog mounted to coöperate

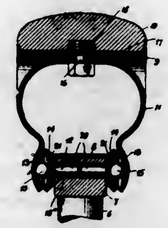
therewith to clamp between them a rod to be lifted, and lever carried rod gripping means to coöperate with said frame carried means, the two sets of gripping means op-

erating on opposite sides of the rod to be gripped, said means operating alternately to grip and release the rod to be lifted.



1,389,470. DEMOUNTABLE WHEEL-RIM. FRED WILDHABER and AL L. WARREN, Nowata, Okla. Filed Nov. 27, 1920. Serial No. 426,769. 1 Claim. (Cl. 301—35.)

In a demountable rim, a pair of laterally separable rim sections, one of said sections having a portion formed to provide a laterally opening circumferentially extending channel adapted to receive a complemental portion of the other of said sections, locking pins carried by the channeled rim section and arranged to bridge the channel thereof at spaced intervals around the same, bayonet slots formed in the other said sections and adapted for engagement with the said locking pins, and a headed end on one of the locking pins extending inwardly of the rim and adapted to act as a driver.

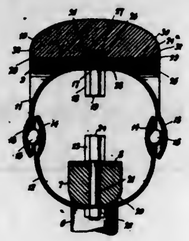


1,389,471. AEROPLANE DRIVING MECHANISM. PHILIP ADLER, Madison, Wis., assignor of one-half to Chris. Uebersetzig, Madison, Wis. Filed Aug. 31, 1920. Serial No. 407,202. 1 Claim. (Cl. 244—25.)

Aeroplane driving mechanism comprising a main drive shaft, a pair of front propellers, a rear propeller, individual drive connections from said shaft to each of said front propellers and to said rear propeller, a swingingly mounted frame supporting each propeller, a crank arm connected to each frame, a single operating shaft extending transversely of the aeroplane, crank arms connected thereto, links connecting the crank arms of the operating

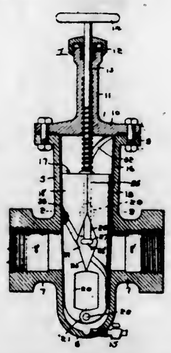
shaft to the crank arms of the frames, and a single lever for giving movement to said operating shaft.

1,389,472. VEHICLE-WHEEL. WILLIAM N. ALLAN, San Antonio, Tex. Filed Feb. 21, 1920, Serial No. 360,425. Renewed Jan. 31, 1921. Serial No. 441,455. 4 Claims. (Cl. 152—8.)



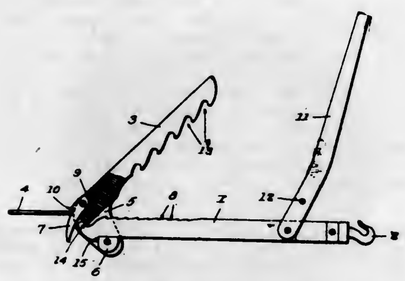
4. The combination of a felly having transversely extending openings therethrough, a spring band extending around the felly and spaced therefrom, rigid units comprising stems removably inserted in reverse positions in the openings of the felly and having outer terminal sockets, spring units connected to the said band and having sockets at the free extremities overlapping the terminal sockets of the rigid units, and anti-frictional devices interposed between and engaging the sockets of the spring and rigid units and holding the same in relative reciprocating association.

1,389,473. VEHICLE-WHEEL. WILLIAM N. ALLAN, San Antonio, Tex. Filed Feb. 21, 1920, Serial No. 360,423. Renewed Jan. 31, 1921. Serial No. 441,456. 12 Claims. (Cl. 152—8.)



5. A tire comprising opposing spring units having overlapping freely movable extremities, the one spring unit of each group being primarily contracted and the other spring unit of the same group being normally bowed, the con-

tracted unit being expanded to dispose its extremities outside of the extremities of the normally bowed units, and

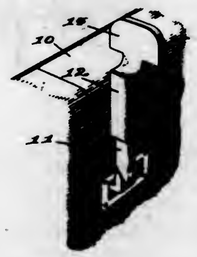


anti-frictional connecting means interposed between and engaging the overlapping extremities of the spring units.

1,389,474. VALVE STRUCTURE. JALMER ANDERSON, Burkburnett, Tex. Filed July 1, 1920. Serial No. 393,332. 5 Claims. (Cl. 251—4.)

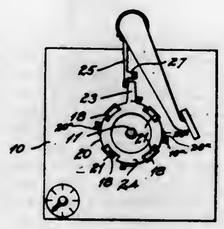
1. A valve structure comprising a valve casing, a valve body mounted for movement vertically of said casing, means for producing rotary movement of the valve body incident to the longitudinal movement thereof, adjusting means for the valve body, and means associated with the adjusting means for effecting expansion of the valve body incident to the alternate opening and closing movements thereof.

1,389,475. CABLE-TIGHTENER. ANSLEY BARNES, Waterville, Me. Filed June 14, 1920. Serial No. 388,879. 3 Claims. (Cl. 254—68.)



1. A tool of the class described comprising a rack bar provided with means for connection to the wire to be stretched, being also provided at one end with a shoulder, an arm pivotally and slidably mounted on the bar and engageable at its pivoted end with said shoulder to permit initial slack in the wire to be partially taken up when the arm is swung downwardly on its pivot, means for sliding said arm on the bar, and a pawl carried by the arm and engageable with the teeth on said bar.

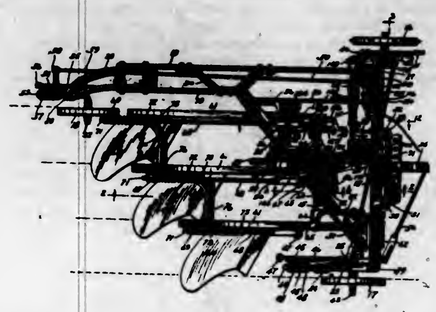
1,389,476. WELDING CAST-IRON. JACK CHURCHWARD, New York, N. Y., assignor to Wilson Welder & Metals Company, Inc., a Corporation of New York. Filed Oct. 27, 1920. Serial No. 419,905. 40 Claims. (Cl. 219—4.)



1. A process of welding commercial cast iron showing the structure of unannealed iron which includes welding to the iron a layer of metal adapted to absorb carbon from the iron sufficiently to substantially inhibit the formation of free cementite.

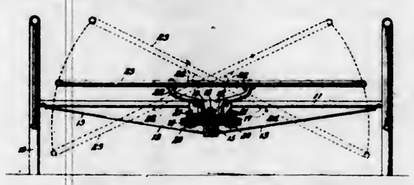
1,389,477. EXTENSION FOR HANDLES. ARCHIBALD C. BEEMAN, Oklahoma, Okla. Filed Oct. 20, 1919. Serial No. 331,820. 2 Claims. (Cl. 292—349.)

1. A handle extension comprising a hand-hold disconnectible from the handle and detachably engageable therewith, and a resilient filler insertible in the hand-hold and frictionally engaging the walls thereof and adapted to frictionally engage over the end of the handle, the end of the hand-hold being widened to form a finger hold.



1,389,478. TALKING-MACHINE. JOBBY BELPEDIO, Bridgeport, Conn. Filed Sept. 16, 1919. Serial No. 324,113. 5 Claims. (Cl. 274—9.)

1. In a device of the class described, a turn table adapted to support a record tablet, a tone arm and means actuated by the movement of the tone arm to raise the tablet clear of the table.



1,389,479. GANG-PLOW. JOHN A. BERGREN, Lake Park, Minn. Filed July 29, 1920. Serial No. 399,850. 13 Claims. (Cl. 97—70.)

1. In a gang plow, the combination with a truck frame, of a plurality of plows having their beams pivotally attached to the truck frame, plow-lifting devices including a rock shaft, automatic locks for holding the rock-shaft

with the plows either raised or lowered, and a lever for oscillating the rock-shaft and having automatic trips for releasing the automatic locks.

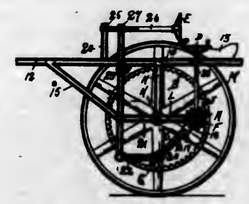
1,389,480. ATTACHMENT FOR HOSPITAL-BEDS. FRANK BEAMAN, Oregon, Wis. Filed Jan. 28, 1921. Serial No. 440,683. 6 Claims. (Cl. 5—12.)

1. In a bed, the combination of brackets secured to and depending from the side rails of the bedstead, a transverse rod journaled in said brackets, a turntable mounted upon the rod and supported below said side rails, a bed-spring mounted on the turntable and rotatable therewith, said bed-spring being supported above said side rails and thereby adapted to be tilted between and rotated above the side rails.

1,389,481. SHAKING DEVICE FOR CLEANING FILTERS. WILHELM FRIEDRICH LUDWIG BETH, Lübeck, Germany. Filed Oct. 27, 1919. Serial No. 333,843. 4 Claims. (Cl. 183—58.)

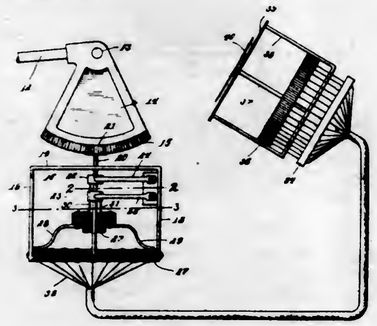
1. In a filter shaking device, in combination, a double-armed lever, a filter supported by one arm of said lever, a rotary cam adapted to act on the other arm of said lever, a support for the filter-carrying lever arm, and means for alternately bringing the filter-carrying lever arm into operative contact with said support and the other lever arm into operative contact with said cam.

1,389,482. AIR OR GAS FILTER. WILHELM FRIEDRICH LUDWIG BETH, Lübeck, Germany. Filed Mar. 8, 1921. Serial No. 450,633. 6 Claims. (Cl. 183—73.)



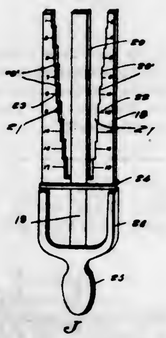
1. In a filtering apparatus, an upright filtering bag formed at the inner side of its upper end with a rolled flange embracing a stiff ring and so reducing the inner diameter, a disk engaging the flange from below, and means for supporting said disk.

1,389,483. ROTARY PLOWSHARE. RENNIE E. BILLINGSLEY, San Antonio, Tex. Filed Feb. 2, 1920. Serial No. 355,752. 2 Claims. (Cl. 97—52.)



2. An implement of the class described comprising a strip having a cutting edge and twisted longitudinally and curved laterally to provide an unobstructed interior and with an attaching head at one end and an earth penetrating point at the other end.

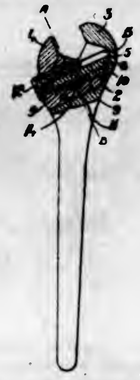
1,389,484. ROTARY PLOW. RENNIE E. BILLINGSLEY, San Antonio, Tex. Filed Feb. 2, 1920. Serial No. 355,753. 5 Claims. (Cl. 97—52.)



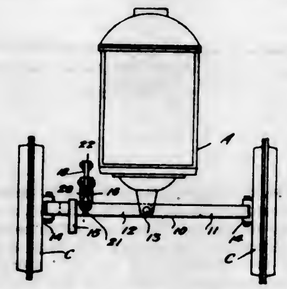
1. In an apparatus of the class described, a supporting frame mounted upon an axle with traction wheels carried by the axle, a plurality of arms swinging upon said axle, a plurality of bars swinging at one end thereof relative to said arms and adapted to support plow elements, means for causing the arms to swing upon the axle to control the angle of cut of the plow elements, and means for elevating and depressing the plow element carrying terminals of the bars.

1,389,485. CIRCUIT-CONTROLLER FOR LIQUID-GAGES. JENNIE GOULD BLAISDELL, West Somerville, Mass. Filed Feb. 1, 1918. Serial No. 214,954. 1 Claim. (Cl. 200—11.)

A device of the class described comprising a base of insulating material, an annular series of stationary contacts carried by the base, a U-shaped frame mounted on the base and having a connecting portion overhanging said base and provided with an opening, a shaft extending through said opening and rotatably mounted on said base, a pair of spaced rings mounted on said shaft, conductors supported by said frame and engaging said rings, an insulating block mounted on said shaft, a pair of oppositely directed spring arms secured to said block and having their terminal portions extending angularly for engaging said stationary contacts, and means electrically connecting said spring arms and said rings.



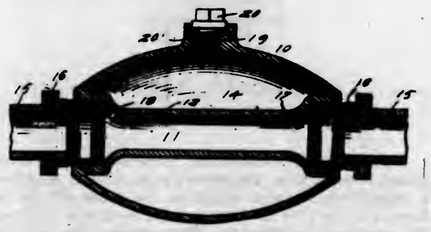
1,389,486. WIRE AND DRILL GAGE. JOSEPH BREWER, New York, N. Y. Filed Feb. 12, 1920. Serial No. 358,179. 4 Claims. (Cl. 33—168.)



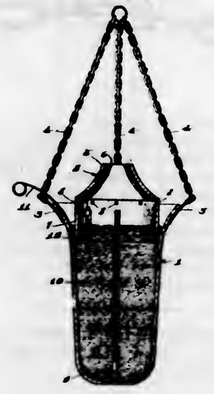
1. A measuring instrument comprising a pair of flat bodies, each having a plurality of shoulders formed along one of its longitudinal edges and arranged in step formation and terminating short of one end of the body, a strip positioned between said bodies and coöperating with the shoulders in defining slots of different widths throughout their lengths, and means securing the bodies and strips together.

1,389,487. ADJUSTABLE WRENCH. GUNNAR ELIAS CASSEL, Stockholm, Sweden, assignor to Arthur Leffler, Djursholm, Sweden. Filed July 27, 1920. Serial No. 399,247. 2 Claims. (Cl. 81—149.)

1. An adjustable wrench comprising in combination a shank, a rigid jaw integral with said shank, said rigid jaw being formed with an oblique guide-way, a movable jaw having a wedge-shaped recess and mounted to slide in said oblique guideway, a member rigidly attached to the rigid jaw and having a step formed surface inclined relatively to the direction of said guide-way, a movable wedge having a step formed contact surface bearing against said first-mentioned step formed surface, said wedge further engaging the wedge-shaped recess.

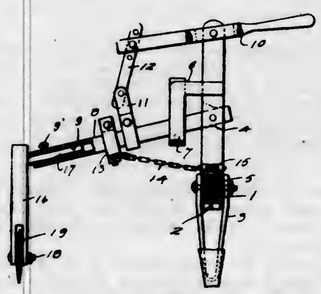


1,389,488. ATTACHMENT FOR TRACTORS. JOSEPH JOHN CHOLICK, Rio Honde, Tex. Filed May 24, 1920. Serial No. 383,982. 3 Claims. (Cl. 180—82.)



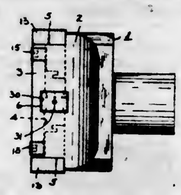
1. In combination with the clutch lever of a tractor, lever means connected therewith and with the front axle whereby upon backward rearing of the tractor the clutch lever will be moved to disengaged position, the front axle being formed of pivotally connected sections, and said lever means being connected with and moved by movement of the sections.

1,389,489. AUTOMATIC OILER. JAMES C. COFFEE, Webb City, Mo. Filed Aug. 20, 1920. Serial No. 404,771. 1 Claim. (Cl. 184—55.)



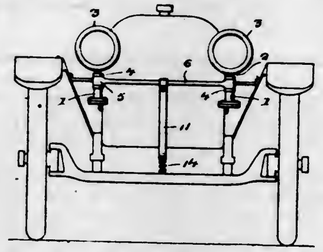
An automatic oiler comprising a hollow lubricant containing casing having oppositely arranged ports, a tubular wall arranged in the casing to form a passage and having its ends flared and internally screw threaded and formed integrally with the casing about said ports, said wall adjacent one end having a vent opening, a nozzle carried by said wall adjacent its other end and having one end disposed in the passage and its other end in communication with the interior of the casing, and bushings threaded in the ends of the wall and having pipe sections of an air line threaded therein.

1,389,490. SANCTUARY-LAMP. GEORGE L. COOK and JOSEPH F. SCHMIDEK, Syracuse, N. Y., assignors to Mack-Miller Candle Company, Syracuse, N. Y., a Corporation of New York. Filed June 9, 1919. Serial No. 302,678. 4 Claims. (Cl. 67—36.)



1. A lamp comprising an elongated transparent fuel receptacle, a wick supported in the receptacle, and a cap seated in the upper part of the receptacle and extending above the upper end of the wick and having air holes, substantially as and for the purpose described.

1,389,491. ROW-MARKER. JACOB S. COONS, Taylorsville, N. C. Filed June 23, 1920. Serial No. 391,106. 2 Claims. (Cl. 97—83.)



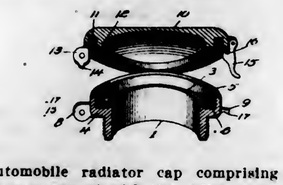
1. In combination with a supporting beam, a post thereon, marking means suspended from the post, a lever on the post operable to raise said means above the beam, and said post being turnable on a substantially vertical axis so that the marking means may be moved across the beam and disposed on either side thereof by swinging the lever laterally while in a raised position.

1,389,492. ADJUSTABLE REAMER AND BORING-TOOL. JOHN M. DAVIS, Cleveland, Ohio. Filed July 14, 1919. Serial No. 310,654. 3 Claims. (Cl. 77—58.)

1. In a device of the character described, the combination of a holder having shoulders at the sides, said holder having a transverse aperture and a vertical opening, an interiorly threaded adjusting nut mounted in such opening in alinement with the aperture, holding members adjustably mounted in such aperture and having threaded ends adapted to engage in said nut, said holding member having tongue and grooved outer ends, cutting blades having enlarged outer ends having tongue and grooved inner ends adapted to engage with said holding members, said cutting blades being mounted in such aperture and extending outwardly of the same in contact with said shoulders on the holder, and means for locking said cutting blades securely against said shoulders in adjusted positions.

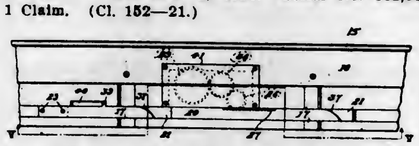
1,389,493. DIRIGIBLE HEADLIGHT. ROBERT E. DAVIS, El Paso, Tex. Filed Aug. 21, 1920. Serial No. 405,073. 2 Claims. (Cl. 240—62.)

1. In combination with an automobile and its headlamps, a post for each lamp having a screw threaded lower end, a screw threaded socket for receiving said screw threaded end of each post, ears on each post, a cross rod pivotally connected with the ears for connecting the posts together, an L-shaped rod having its upper end connected with the cross rod and having an elongated tapered slot in its other end, a clip adjustably carried by the connecting rod of the steering mechanism, a post on the clip engaging the slot and a spring connecting the clip with the L-shaped rod.



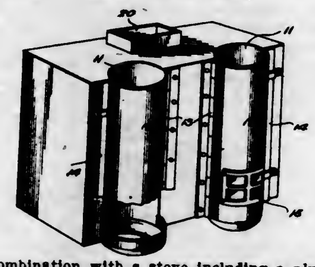
1,389,494. RAILWAY SIGNAL-TORPEDO. FRANK DUTCHER, Versailles, Pa., assignor to Central Railway Signal Company, Pittsburg, Pa., a Corporation of New Jersey. Filed Dec. 27, 1920. Serial No. 433,371. 6 Claims. (Cl. 246—487.)

1. The combination with a case of a railway signal torpedo and rail attaching member at one side thereof,



of a string passed under the rail-attaching member at points adjacent the edge of the case and across the opposite side of the case, and a clamping member for holding the string in its wrapped position.

1,389,495. AUTOMOBILE-RADIATOR CAP. WILLIAM M. ERWIN and WILLIAM F. STRETCH, Hanford, Calif. Filed Dec. 30, 1920. Serial No. 434,016. 1 Claim. (Cl. 220—32.)

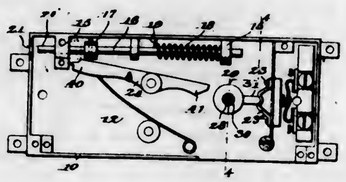


An automobile radiator cap comprising a threaded sleeve for engagement with the radiator neck, and having a flange L-shaped in cross section on its outer face below its upper edge, the long arm of said flange upstanding and being concentric with said edge and extending in a plane above it, a gasket seat being formed between said edge and said upstanding flange portion, a lid shaped to fit said flanged sleeve end and having an annular groove to receive the upstanding edge of said sleeve and a rib to fit in said gasket seat, said lid and sleeve being hingedly connected and the sleeve provided with a cam catch and the lid with a coöperating hook shaped latch whereby the latch is thrown off center when engaged with said catch to prevent its accidental release.

1,389,496. TIRE-RIM FOR VEHICLES. CIRIL FAK, Bush, Ill. Filed Mar. 2, 1920. Serial No. 362,845. 1 Claim. (Cl. 152—21.)

In combination with a felly having an innular groove and transverse slots intersecting said groove with a relatively short longitudinal groove adjacent the annular groove, a rim section removably mounted upon the periphery of the felly overlying said slots and grooves, inwardly projecting lugs upon said rim section having correspondingly curved sides, a locking ring for said rim section slidable within the annular groove of the felly, said ring having transverse passages provided with curved side walls adapted for engaging the curved faces of the lugs during the sliding movement of the ring in its locking position, and a pin carried by said ring and movable within the relatively short slot for limiting the movement of the ring.

1,389,497. ATTACHMENT FOR OIL-STOVES. HENRY FERR, Mason City, Iowa. Filed Nov. 29, 1920. Serial No. 427,082. 1 Claim. (Cl. 126—53.)



The combination with a stove including a plurality of burners, of an annulus surrounding the upper end of said burners, a rectangular tank carried by said stove and provided with a plurality of semi-circular depressions, oppositely curved doors and forming flues therewith and hingedly secured to one edge of each depression, engaging said annulus and provided with a plurality of openings, laterally extending longitudinal flanges formed integrally with the outer edge of said doors and means for retaining said doors in closed position.

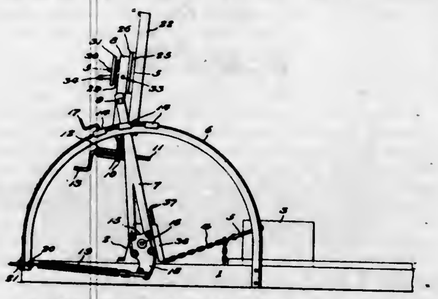
1,389,498. CHAIN-FASTENER. MICHAEL A. FRIDGEN, Vining, Minn. Filed Apr. 25, 1921. Serial No. 464,137. 1 Claim. (Cl. 24—232.)

A chain fastener comprising a link plate having a relatively long longitudinally directed slot opening through one end and a relatively short branching slot closed at the ends and communicating intermediate the ends with the longitudinally directed slot, and coacting locking disks pivoted to the link plate and obstructing the inlet to the branch slot, said disks each having a radially directed slot adapted to provide for the entrance of a chain link into the slots of the link plate when the slots of the locking disks are in registering position.

1,389,499. AUTOMOBILE-LOCK. STEPHAN G. GERLACH, Stratford, Conn. Filed Jan. 26, 1920. Serial No. 354,310. 4 Claims. (Cl. 70—18.)

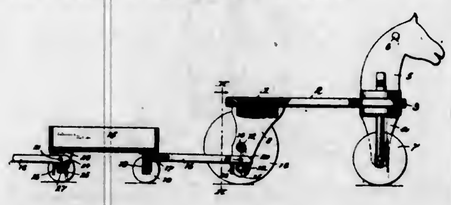
1. In a combination-lock, a spring actuated bolt having an arm, a key actuated spring pressed dog which engages said arm for normally holding said bolt retracted, a key which when properly manipulated actuates said dog to release said bolt to an active position, and means for holding said bolt in a neutral position.

1,389,500. MOTION-PICTURE REEL. EDWARD H. GOODRICH and HENRY C. MARTINELLI, Springfield, Mass. Filed June 25, 1920. Serial No. 391,655. 4 Claims. (Cl. 242—70.)



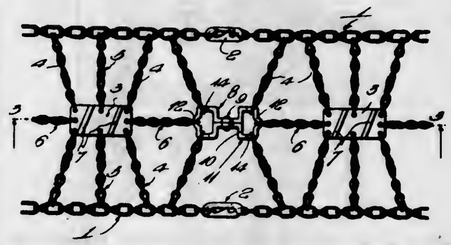
4. In a reel, the combination of a hub portion having a bore with a reduced extension therein; a leaf spring secured to said hub portion for holding one end of the material to be wound upon said reel; a pin slidably mounted beneath said material holding spring; a plunger slidably mounted in said bore of said hub portion including an inclined face adapted to engage said pin to raise said leaf spring to non-material engaging position, a reduced portion adapted to slide in the reduced portion of said bore, and a stop plate adapted to engage said pin to hold the plunger in said hub portion; and a coil spring

mounted upon the reduced portion of said plunger and adapted to engage the inner end of the enlarged portion



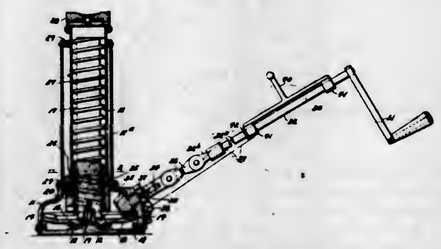
of said bore and said stop plate, to hold the inclined face out of engagement with said pin.

1,389,501. DRILL-SHARPENER. JOHN B. GORMAN and JAMES A. FERTIG, Wentworth, Mo. Filed Dec. 6, 1919. Serial No. 343,060. 3 Claims. (Cl. 76—5.)



1. A device of the class described comprising a case, an anvil carried thereby, a segment carried by the base, a main frame having its lower part pivoted to the anvil, means for adjustably connecting said main frame with the segment, a cradle frame pivotally connected with the main frame, a cradle for the hammer, and means for adjusting the same laterally in the cradle frame.

1,389,502. TOY VEHICLE. WARREN T. GREEN, St. Louis, Mo., assignor to The Mengel Company, Louisville, Ky., a Corporation of New Jersey. Filed Dec. 6, 1920. Serial No. 428,529. 4 Claims. (Cl. 280—33.2.)

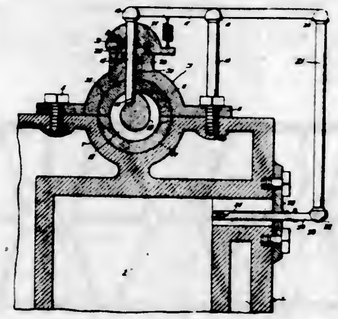


1. In combination with a toy vehicle having two spaced elements extending across the rear portion thereof; a second vehicle; a tongue connected to said second vehicle; a pair of spaced fingers extending outwardly from one face of the tongue and adapted to engage one of the spaced elements aforesaid; and a spacer rod extending laterally from each side of the tongue.

1,389,503. TIRE-CHAIN. CHARLES S. HAMILTON, Cumberland, Md. Filed Mar. 10, 1921. Serial No. 451,103. 1 Claim. (Cl. 152—14.)

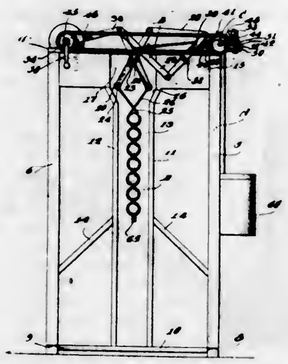
A tire chain comprising a pair of circumferential side chains, a plurality of circumferentially spaced substantially rectangular plates provided on the outer faces with antiskid ribs, transverse relatively short divergent tread chains connected with the opposite longitudinal edges of said plates and with links of said side chains, and central tread chains arranged between the divergent chains, these chains being connected with the approximate centers of said plates and also connected with said side chains, and other tread chains allined with and connecting and spacing said plates with one another.

1,389,504. LIFTING-JACK. JEROME G. HARRISON, Philadelphia, Pa. Filed July 18, 1919. Serial No. 311,724. 2 Claims. (Cl. 254—103.)



1. In a jack the combination with a base and a gear revolubly supported in the base, of a screw carried by the gear and revoluble therewith, a nut encircling the screw, antifriction elements carried by the nut and movable into and out of rolling contact with the threads of the screw when the nut is advanced or retracted on the screw, an upright carried by the nut, a shoe on the upright, a housing extending upwardly from said base, a handle, a pinion journaled in the base and meshing with said gear, pawl and ratchet mechanism on the gear and associated with the handle for locking the gear against reverse movement and means on the handle for moving said pawl and ratchet mechanism into and out of operating position.

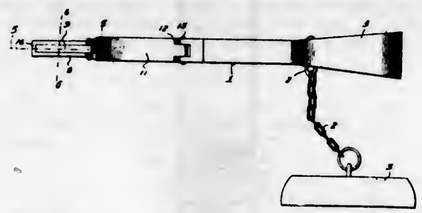
1,389,505. ENGINE. EDWIN C. HAY, Montgomery, Ala. Filed June 14, 1919. Serial No. 304,205. 3 Claims. (Cl. 123—152.)



1. An internal combustion engine including a plurality of cylinders having combined intake and exhaust ports, a shaft having a plurality of spaced ports adapted for reg-

istration with the combined intake and exhaust ports of said cylinders, said shaft being provided with a plurality of grooves having spiral bottom walls thereby forming a plurality of cams, having lobes provided with radial shoulders, said shoulders being disposed obliquely with re-

lation to the axis of said shaft, plungers engaged with the spiral bottom walls of said grooves, igniting devices associated with said plungers, and means whereby said plungers may be moved together longitudinally of said shaft whereby the spark of said igniting device may be retarded or advanced to the desired extent.

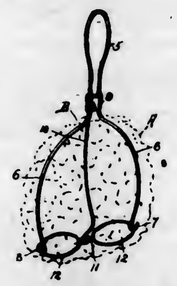


1,389,506. MACHINE FOR PREPARING SEED-CORN FOR DRYING. HARRY J. HEADRICK and SAMUEL A. PALMER, Miller, S. D. Filed Apr. 19, 1921. Serial No 462,771. 6 Claims. (Cl. 139—32.)

1. A machine for binding seed corn together for drying comprising a frame including a pair of oppositely disposed legs, feet connecting the lower terminals of the legs together, a longitudinally extending top board carried by the legs, a centrally positioned vertically disposed guide carried by the frame, a pair of cross levers pivotally secured to each opposite side of the top board, a cross shaft, rotatably carried by the top board, a pair of spaced levers secured intermediate their ends to the cross shaft, means operatively connecting the opposite ends of the levers to the upper ends of the pairs of cross levers, an operating shaft, means for operating the shaft, means operatively connecting the shaft with the cross levers, the pairs of cross levers being disposed in said guide adjacent to the upper end thereof.

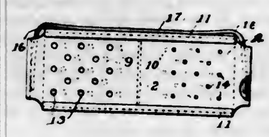
1,389,507. SANITARY COW-TAIL HOLDER. STEPHEN H. HIPKINS, Auburn, Wash. Filed Feb. 7, 1919. Serial No. 275,579. 1 Claim. (Cl. 119—105.)

A cow tail holder comprising pivoted handles, integral jaws on the pivoted ends of the handles and one of said jaws having an elongated slot extending into its respective handle, said slot adapted to wholly receive the other jaw when moved therein and the latter named jaw having a serrated face, said handles extending from their pivots



in diverging planes and having openings in their free ends, pivot pins in said openings, a tension member including diverging arms having bearings at their ends to receive said pins, and a substantially circular tension portion connecting said arms.

1,389,508. PERCOLATOR-STAND. LESLIE R. HODGE, Los Angeles, Calif. Filed May 19, 1921. Serial No. 470,813. 1 Claim. (Cl. 65—53.)

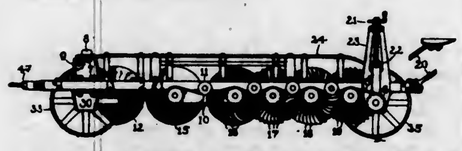


A detachable percolator or urn stand comprising a substantially isosceles traingular plate having an arm extending from one edge thereof midway its ends, said plate having sockets in the two corners nearest said arm, and another in the free end of said arm to receive the legs of the article to be supported, the other corner of said plate having an enlarged recess in its upper face, and a removable drip cup mounted in said recess and having a foraminous closure at its upper end to support a cup in position to receive the contents of the urn.

1,389,509. SPONGE-HOLDER. JOSEPH E. S. JAMES, Philadelphia, Pa. Filed June 5, 1920, Serial No. 386,719. Renewed May 7, 1921. Serial No. 467,735. 2 Claims. (Cl. 15—59.)

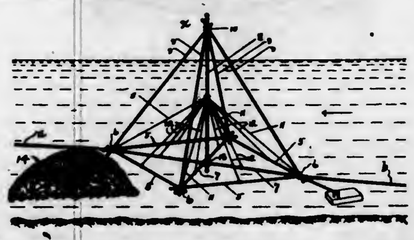
1. A device of the character described, comprising a single length of wire bent to provide opposed resilient arms, a closed eye on one arm, an open eye on the other arm, a double looped bridge member loosely engaged with the closed eye and adapted for detachable engagement with the open eye.

1,389,510. SHAKER. CLARENCE E. JOHNSON, Kankakee, Ill. Filed Mar. 2, 1920, Serial No. 362,837. Renewed July 5, 1921. Serial No. 482,562. 2 Claims. (Cl. 65—45.)



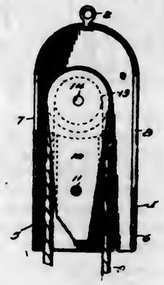
1. A shaker comprising a receptacle having a set of holes in its top communicating with a salt compartment, a second set of holes communicating with a pepper compartment, the bottom of the receptacle being raised and provided with flanged salt and pepper openings, stoppers for the openings and a slide slidably supported by the top of the receptacle for opening and closing the said holes and having depending flanges and a single leaf spring secured to the side of the receptacle and having its ends bent to yieldably engage said flanges.

1,389,511. PROCESS OF TREATING LEAD ALLOYS. JAMES O. JOHNSTONE, East Chicago, Ind. Filed Aug. 9, 1920. Serial No. 402,223. 3 Claims. (Cl. 75—18.)



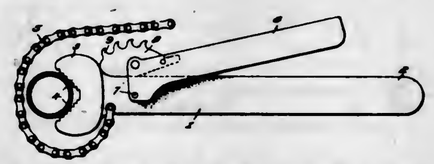
1. In the treatment of bullion containing lead and at least one of the metals antimony, silver and bismuth, the herein described improvement which comprises treating the said bullion in a comminuted state with a solution containing lead nitrate, until a substantial proportion of the said lead nitrate has been converted into basic lead nitrite, and separating the slimes containing the antimony, silver and bismuth content of the bullion from the solution containing lead nitrite.

1,389,512. HARROW. MATHIAS E. JUOPPERI, Astoria, Oreg. Filed Feb. 13, 1920. Serial No. 358,481. 2 Claims. (Cl. 55—85.)



1. A harrow including a rectangular frame, a vertically extended frame secured to said harrow frame, a vertically arranged yoke straddling a wheel and supporting a shaft whose ends extend into vertical slots of the vertically extended frame, a vertical feed bar communicating with said yoke and passing through the upper portion of said vertical frame and a hand wheel surmounting said feed bar whereby said bar may be rotated to raise said yoke and included wheel within said vertical frame.

1,389,513. SILT-ACCUMULATOR. HENRY F. KELLNER, Silver Lake, Kans. Filed Mar. 25, 1921. Serial No. 455,521. 4 Claims. (Cl. 61—3.)

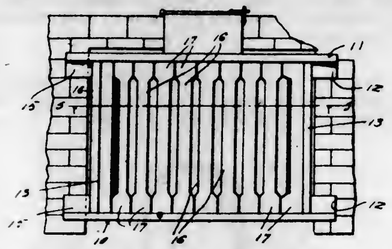


1. In a silt accumulator, a rectangular base including rigid, elongated members connected at their ends and cross-strips disposed diagonally with reference to and connected with said rigid elongated members, a standard secured to the cross-strips at the intersecting parts thereof, rigid, elongated members connected at their lower ends with the base at the corners thereof and connected at their upper ends with the standard, and a plurality of strands connected with the rigid, elongated members of the base and connected with the standard midway between the ends thereof.

1,389,514. AUTOMATIC LOCK-PULLEY. CHARLES A. KESTELL, Detroit, Mich. Filed May 31, 1921. Serial No. 473,957. 5 Claims. (Cl. 254—191.)

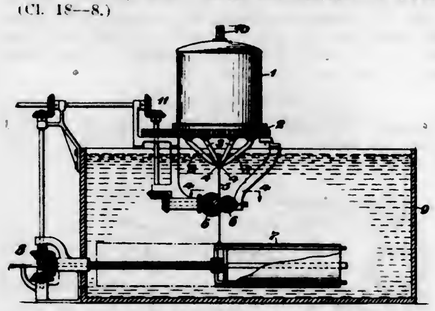
1. In a hoisting apparatus, a supporting structure, a lever fulcrumed therein, a pulley carried by said lever and adapted to have a cable trained thereover, one end of said lever being positioned for clamping engagement with said structure to lock the cable between them when said lever is moved in one direction and released when moved in the other direction.

1,389,515. WRENCH. ALEX KIKTA, Flint, Mich. Filed Mar. 21, 1921. Serial No. 454,115. 1 Claim. (Cl. 81—66.)



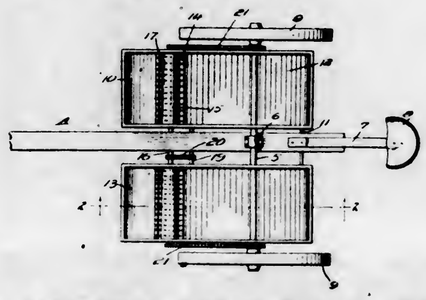
A wrench of the class described comprising an elongated body member provided at one end with a hand grip and at its other end with an enlarged head equipped with a forwardly and longitudinally opening V-shaped, serrated, object engaging jaw, a lever inverted U-shape in cross section straddling one edge of said body member and fulcrumed at one end to said member adjacent said head, a rack secured to the front end of said lever with the outer edge of said rack curved longitudinally and provided with a plurality of longitudinally spaced hook-like teeth, said rack having a cam like inner edge to engage the edge of said body member when the lever is swung into closed position, and an object encircling chain pivotally secured at one end to said body member adjacent the head thereof on which said lever is mounted, said chain being adapted to extend around the object to be gripped and to be engaged with said rack, whereby the closing of the lever will operate to pull the chain taut and force the object encircled thereby into biting engagement with the jaw of the body member.

1,389,516. VENTILATED GRATE FOR FIREPLACES. JAMES M. KILLEN, Reids, La. Filed June 15, 1920. Serial No. 389,165. 2 Claims. (Cl. 126—164.)



1. A fireplace grate construction having a frame consisting of longitudinal front and rear bars provided with

inwardly directed flanges at their lower edges, side bars joined to said front and rear bars adjacent the ends of the latter and having inwardly directed flanges at their lower edges, grate bars resting upon said front and rear bars and having their ends enlarged to space the main portions of said grate bars from one another and provide

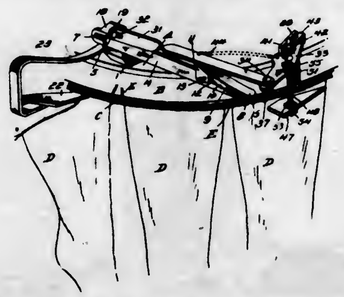


ventilating spaces therebetween, and an ash pit depending from said frame, said ash pit being closed at its inner end and provided at its outer end with an extension for penetration of a wall within which the fire place grate is mounted so that the air drafts may be obtained from exteriorly of the building and the contents of the ash pit removed therefrom from the exterior of the building.

1,389,517. METHOD AND MEANS OF PRODUCING ARTIFICIAL SILK. ISIDOR KITSEE, Philadelphia, Pa. Filed Dec. 20, 1919. Serial No. 346,420. 8 Claims. (Cl. 18—8.)

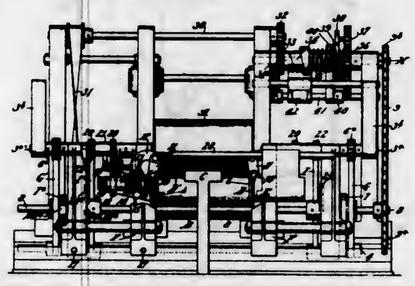
1. In the art of producing artificial silk the improvement which consists in exerting a pressure on the produced thread during the time that said thread is carried through the coagulating bath.

1,389,518. MANURE-SPREADER. WILLIAM C. LEMINGER, Sullivan, Ind. Filed Mar. 26, 1920. Serial No. 369,024. 2 Claims. (Cl. 275.2.)



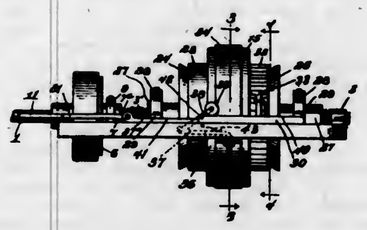
2. In a machine of the character described comprising a draft beam, an axle carried by said beam, ground wheels keyed to the axle, containers having forward discharge openings therein positioned on each side of the draft beam, said axle extending through the said containers, friction rollers and endless conveyers carried thereby, said containers constituting bottoms for the containers, transverse shafts journaled in the sides of the containers, distributing rollers carried by said transverse shafts forwardly of the conveyers, gearing between the axle and transverse shafts, and additional gearing interposed between the friction rollers and said transverse shafts whereby motion is communicated to the endless conveyers and said discharge rollers by the travel of the machine.

1,389,519. EXPANDING REAMER. GEORGE LENHART, Eufaula, Okla. Filed Sept. 20, 1919. Serial No. 325,122. 8 Claims. (Cl. 77—75.)



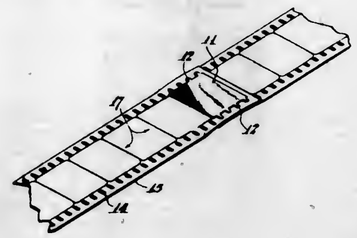
1. In a reamer, a slotted stem, blades having tapered ends and fitting in the slots of the stem, and adjusting means within the stem for the blades, said adjusting means including blocks movable longitudinally of and within the stem and having wings extending into said slots for supporting the blades in adjusted position and for preventing rotation of said blocks within the stem.

1,389,520. ATTACHMENT FOR MACHINES FOR SEWING LOOPED FABRICS. ELMER C. LOCHHEAD and LESTER PAUL BREWER, Effingham, Ill. Filed Mar. 23, 1920. Serial No. 368,040½. 13 Claims. (Cl. 112—25.)



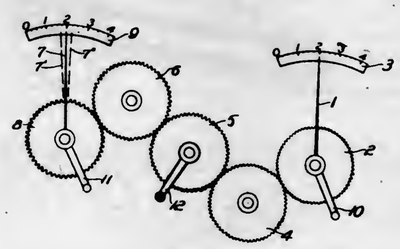
1. In a machine for sewing looped fabrics, the combination with a ring support having an impaling pin carrying ring rotarily mounted thereon, of a thread cutting mechanism mounted on said support and comprising a seam engaging nose extending beyond the perimeter of said ring, a cutter carried by said nose, and means for directing the seam toward said nose whereby the nose will extend under the thread to be cut and guide it against said cutter.

1,389,521. PLATE-LIFTING MECHANISM FOR ROLLING-MACHINES. THOMAS MCCABE, Yorkville, Ohio. Filed June 17, 1919. Serial No. 304,825. 34 Claims. (Cl. 80—47.)



16. A plate lifting mechanism for rolling machines, comprising plate lifters arranged at the rear of the rolls of the machine on opposite sides of a table or support that receives the plates as they are discharged from the rolls, vertically-movable carriers to which said plate lifters are connected, a pair of rock shafts associated with each carrier and provided with devices that are pivotally connected to said carrier, counterweights secured to said rock shafts, an oscillating actuating member for each carrier provided with racks that mesh with pinions on said rock shafts, a cam shaft provided with cams, one of which coöperates with one of said actuating members to rock both actuating members in one direction and the other of which coöperates with the other actuating member to rock both of said actuating members in the opposite direction, and means for swinging said plate lifters relatively to their carriers comprising cams on said cam shaft, oscillating members coöperating with said cams, and racks on said oscillating members connected by trains of gearing directly to said plate lifters.

1,389,522. MOTOR-STARTER. IRVIN J. MAHA, Sleepy Eye, Minn. Filed Jan. 4, 1919. Serial No. 269,613. 6 Claims. (Cl. 185—41.)



6. In a device of the class described, an engine shaft, a starter shaft, a clutch mechanism between said shafts, a two-part motor casing, the parts thereof being mounted for independent rotation on said starter shaft and with respect one part to the other, a coiled power spring within said motor casing and connecting the parts thereof, a clutch mechanism coöperative with each part of said motor casing and said starter shaft, a pawl and ratchet mechanism for holding one of the parts of said motor casing against retrograde movement during the rewinding of said coiled power spring, a brake band encircling the other of said parts of said motor casing for holding the part against rotation during the rewinding of said coiled power spring and releasing the said part for the uncoiling of said power spring, levers for actuating said last mentioned clutch mechanisms, a bar connecting said levers and operable for alternately connecting and disconnecting the parts of said motor casing to said starter shaft through said clutch mechanisms, said bar having one of its faces formed to provide plane surfaces one of a greater height than the other and interconnected by an inclined surface at a point intermediate the opposite ends of the same, a bell-crank lever connected to one end of said brake band, and a roller journaled on the free end of said bell-crank lever and bearing on the plane surfaces of said bar, said bell-crank lever being actuated by said bar for the operation of said brake band simultaneously and correspondingly with the operation of said last mentioned clutch mechanisms.

1,389,523. FILM-PATCH. RAYMOND C. MERCER, Los Angeles, Calif. Filed June 1, 1920. Serial No. 385,784. 3 Claims. (Cl. 88—19.5.)

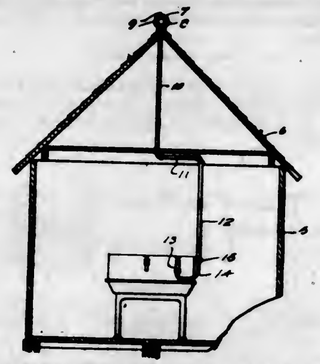
1. A film patch for connecting the overlapped ends of perforated motion picture film comprising a member having a flat body and projections of substantially uniform width formed on said body arranged to extend substantially in the same plane as the body portion through corresponding perforations along the edges of the overlapped ends of the film.

1,389,524. WEAR-COMPENSATING GEARING FOR INSTRUMENTS. ROBERT V. MORSE, Ithaca, N. Y., assignor to Morse Instrument Company, Inc., Ithaca, N. Y., a Corporation of New York. Filed Oct. 2, 1918. Serial No. 256,513. 5 Claims. (Cl. 74—7.)

1. In a wear compensating gearing, the combination of a power applying means, gear trains extending from the power applying means to different points of action, said gear trains being so arranged that the wear between the power applying means and the different points of action is substantially the same, and a wear compensating adjustment in one of the trains whereby two trains may be brought into precise adjustment.

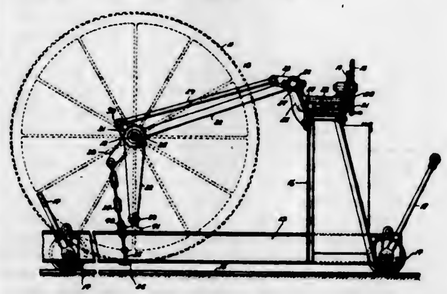
1,389,525. SURGICAL APPLIANCE. JOHN K. MOSBY, Wiggins, Miss. Filed Feb. 21, 1920. Serial No. 360,373. 1 Claim. (Cl. 128—85.)

A surgical appliance of the class described comprising a splint formed of a flat strip of material adapted to extend from a point above the waist of a patient to a point below the foot and being provided with transversely spaced longitudinally disposed pairs of openings at a point adjacent the knee and waist respectively and longitudinally spaced openings at the lower end of said splint beyond the foot, adjusting strips passing through the knee and waist openings, a cuff adapted to be removably secured to the ankle of the patient, a loop having its ends secured to each side of said cuff and adapted to extend beneath the foot of the patient and an adjusting strap passing through said loop and through openings in the opposite end of said splint.



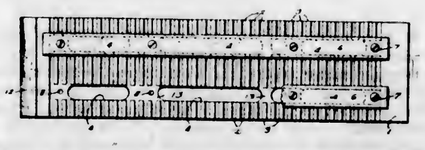
1,389,526. PEANUT-HARVESTER. GEORGE L. NEWTON, Machen, Ga. Filed May 21, 1920. Serial No. 383,111. 8 Claims. (Cl. 55—137.)

6. A peanut harvester provided with means for extracting peanuts from the ground while the harvester is traveling over the ground, and including an endless conveyer with its supporting surface made up of series of rotatable disks traveling both rotatively and linearly.



1,389,527. FIRE-EXTINGUISHER. MARGARET E. OATES, Victoria, British Columbia, Canada. Filed Mar. 29, 1919. Serial No. 286,053. 1 Claim. (Cl. 169—5.)

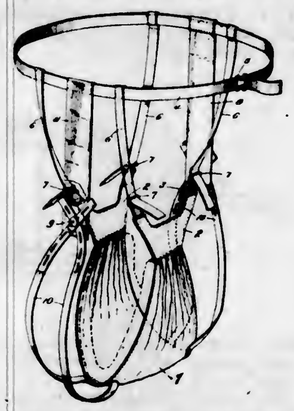
A fire extinguisher as an attachment for a building having a gable roof and a source of water supply, comprising a discharge member, means straddling the roof at the apex to mount said member, a pipe depending from the member, an angularly disposed pipe connected to said pipe and forming an attaching portion, and a pipe depending from said portion and having its inlet disposed adjacent



a discharge valve in the said source, and a flexible hose on the last pipe applicable to said valve.

1,389,528. TRACK-GRINDING MACHINE. HENRY PERAZZOLI, Philadelphia, Pa. Filed Apr. 4, 1919, Serial No. 287,424. Renewed July 11, 1921. Serial No. 483,950. 3 Claims. (Cl. 51—178.)

1. In a track grinding apparatus, the combination with a grinding frame and a carriage, said carriage including a cross shaft and wheels, of a supporting frame in the grinding frame, a bell-crank lever journaled on the cross shaft of the carriage, a connection between the bell-crank lever and the grinding frame, a cross shaft on the supporting frame, a bell-crank lever on the last mentioned cross shaft, a link connecting the mentioned bell-crank levers, a supporting member depending from the bell-crank lever on the shaft of the carriage and in movable engagement with the grinding frame, an operating wheel on the supporting frame and a screw operable by said operating wheel and having connection with the bell-crank lever on the cross shaft of the supporting frame.



1,389,529. GRATE-BAR. LESTER C. PERKINS and ROBERT F. MCKINNEY, Mechanicsville, N. Y. Filed Apr. 26, 1920. Serial No. 376,696. 4 Claims. (Cl. 126—163.)

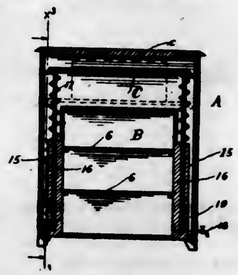
1. A grate comprising a body portion having its upper face corrugated throughout the greater portion of its area,

said body portion being provided with alined air openings, and a relatively long flat baffle plate arranged on the body portion and covering said air openings.

1,389,530. NAPKIN. MARY POST, Norwalk, Iowa. Filed Feb. 24, 1919, Serial No. 278,663. Renewed Mar. 19, 1921. Serial No. 453,711. 1 Claim. (Cl. 128—289.)

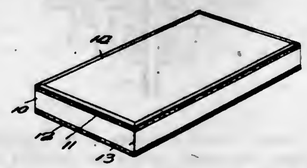
A device of the class described, comprising a belt, front and rear straps depending from said belt, a pair of side straps depending from the belt, a holder, pads on the ends of the holder, means for connecting the pads to the front and rear straps and a strap having its center connected with each side of the holder, midway its ends, and adapted to pass around the thigh, and means for connecting said last-mentioned straps with the side straps.

1,389,531. MALE URINAL-BAG. FREDERICK F. RICHE, Troy, N. Y. Filed July 29, 1919. Serial No. 313,999. 1 Claim. (Cl. 128—295.)



A male urinal bag of the class described comprising a soft compressible rubber shield, a thin rubber bag detachably attached to said shield, a pair of spaced projecting tabs provided on the inner edge of said shield, a rubber ring being secured to the bag proper which forms a housing for said ring, a pair of straps secured to said spaced projecting tabs for attaching said bag to the user, a boss-like protuberance formed on one face of said shield, the outer face thereof being arranged at a downward angle, a peripheral continuous groove being arranged in parallel relation to said outer face of said boss, and an annular lip being provided on said boss.

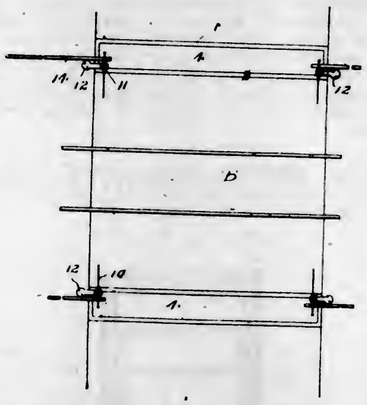
1,389,532. VEHICLE-LIFT. CHARLES B. ROBERTS, Berkeley, Calif. Filed Feb. 12, 1921. Serial No. 444,428. 2 Claims. (Cl. 254—91.)



1. In a device of the character described, parallel tracks, means for securing said tracks one to the other at one end, removable means for securing said tracks to each other at their opposite ends, pivoted braces substantially midway of said tracks, a shaft mounted between said tracks, a spool mounted on said shaft, pivoted braces secured to said tracks and abutting said spool, means for rotating said spool, and means for holding said tracks in an inclined position for the purpose of moving a vehicle thereon.

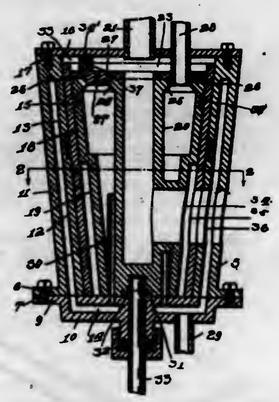
1,389,533. WEIGHING-REFRIGERATOR. ARCHIE R. SACKETT, San Pedro, Calif. Filed Dec. 16, 1919. Serial No. 345,365. 1 Claim. (Cl. 265—65.)

A refrigerator, comprising a main casing, a commodity casing within the main casing, a spring-supported movable ice tray within the main casing and above the commodity casing, and indicating means disposed exteriorly of the main casing and operatively connected with the ice tray and whereby the weight of ice imposed upon such ice tray may be determined; said indicating means including a graduated dial exteriorly of the main casing, a shaft projecting through the center of said dial and through the casing, a pointer on said shaft for play over the graduations of the dial, a drum mounted on said shaft within the refrigerator casing, and a cord attached to said drum and wound upon the same and having an end joined with the ice tray; said ice tray being provided with a plurality of downwardly directed legs, housing members within the refrigerator for receiving said legs, coil expansion springs surrounding said legs disposed between the ice tray and the tops of the housing members; said housing members tending to direct the movement of the ice tray and the said spring members being adapted to receive the weight of the ice tray and ice placed thereon.



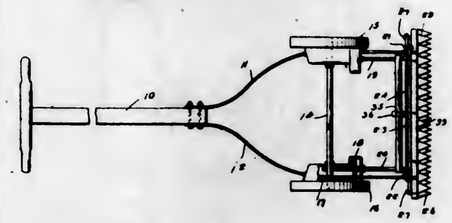
1,389,534. RAZOR-HONE. EDWARD J. SAWTELLE, Berwick, Me. Filed Apr. 26, 1919. Serial No. 292,857. 1 Claim. (Cl. 51—212.)

A hone of the class described comprising a rigid supporting body having opposite rectilinear faces, a thin plate



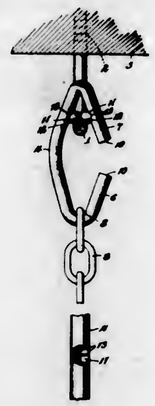
of sheet metal of uniform thickness and capable of serving as a sharpening element for edge tools mounted on each of said faces and being sufficiently thin to yield slightly to the pressure applied during the sharpening operation, and yieldable pads of uniform thickness throughout disposed between the plates and the body and presenting a uniform yieldable resistance to the pressure on the plates.

1,389,535. RAILROAD-CROSSING APPARATUS. CHARLES SCHWARTZEN, Kenosha, Wis. Filed May 28, 1920. Serial No. 384,966. 2 Claims. (Cl. 39—5.)



1. A railroad gate comprising a trough embedded in the ground, a gate swingingly supported within the trough and consisting of a top and bottom arranged at an incline to each other so that when the gate is in normal position the top will form the top of the trough and when in operative position said bottom will form the top of the trough, a cable for moving the gate to its operative position, and a spring for returning the gate to its inoperative position.

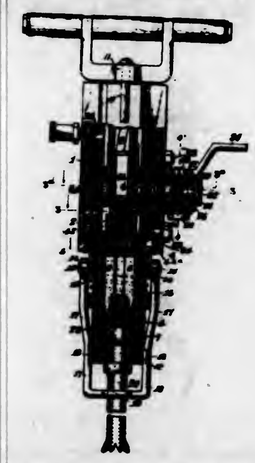
1,389,536. ROTARY VALVE. THOMAS F. SCOLLARD, Warsaw, Ind. Filed June 22, 1920. Serial No. 390,741. 2 Claims. (Cl. 123—177.)



1. In a rotary valve, a casing, a valve member positioned within the casing, means for rotating the valve member, a sleeve interposed between the valve member and casing, means for supplying a cooling fluid to the interior of the valve member, a sleeve disposed within the valve member, said sleeve adapted to retain a portion of the cooling fluid within the valve member, a cover covering the upper portion of the valve member, means to permit movement of the valve member with relation to the cover, and a discharge pipe for carrying off the cooling fluid.

1,389,537. LAWN-MOWER. FRANCIS M. SHERMAN, Lewisport, Ky. Filed Mar. 24, 1920. Serial No. 368,310. 1 Claim. (Cl. 56—259.)

In a lawn mower, a frame comprising side members having spaced elements at their forward ends, the upper elements being arched, spaced upper and lower plates secured to the respective frame elements, knives disposed between the plates and having corresponding slots, fastenings connecting the plates and passing through the slots of the knives, longitudinal shafts having forward cranks, and pitmen connecting the cranks with the respective knives.



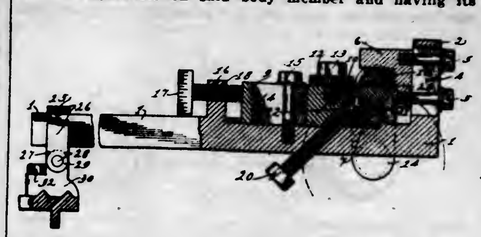
1,389,538. SWING OR HAMMOCK HANGER. WILLSON BERNARD TAYLOR, Uniontown, Pa. Filed May 14, 1921. Serial No. 469,527. 4 Claims. (Cl. 248—64.)

1. A ball bearing hanger, comprising a member having a hook at one end, the arms of said hook having on the inner side opposed concave seats, and a pair of balls mounted partially within said seats and projecting therefrom and contacting with each other.

1,389,539. ROCK-DRILL. THOMAS TURNER, Ottumwa, Iowa, assignor to Hardsocg Wonder Drill Company, Ottumwa, Iowa. Filed Apr. 4, 1918. Serial No. 226,754. 6 Claims. (Cl. 121—10.)

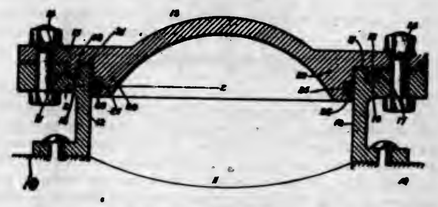
1. A pneumatic drill having a piston responsive to air under pressure, a drill bit with an air duct leading through it and discharging at the cutting end of the drill bit, a main duct for directing live air to the piston of the drill, a branch duct connected to the first named duct and leading to the drill bit, and a manually operable valve for controlling the flow of air to the piston and to the bit, said valve being solid axially and having a main through transverse port enlarged at one end to communicate with the inlet end of the main duct, and a branch transverse port leading off from the first named port in acute angular

relation to the wide end thereof, the branch port having communication with the branch duct, said valve being operable to bring the first named port into coincidence with the main duct to direct live air to the piston, or to bring the branch port into coincidence with the branch duct to direct live air to the drill bit, or to bring both ports into coincidence with both ducts simultaneously to direct live air to both the piston and the drill, and in the latter case with the flow of air to the piston reduced.



1,389,540. NAIL-STAPLE FOR BARBED WIRE. GEORGE WASHINGTON, Anderson, Tex., assignor of one-fourth to Lymus Smith, Anderson, Tex. Filed Nov. 5, 1920. Serial No. 422,022. 5 Claims. (Cl. 85—13.)

5. A fence wire fastener consisting of wood penetrating shanks disposed in substantially right angular relation and respectively provided with alined impact heads, one of said shanks being provided at an intermediate portion of its length with a lateral projection disposed at the opposite side from the other shank to serve as a stop to limit the penetration of the first named shank and as an impact head to seat the post engaging portion thereof.



1,389,541. CRANK-PIN-TURNING TOOL. ALEXANDER WEBER, Los Angeles, Calif., assignor to Sawyer-Weber Tool Manufacturing Company, a Corporation of California. Filed Feb. 10, 1920. Serial No. 357,721. 9 Claims. (Cl. 82—4.)

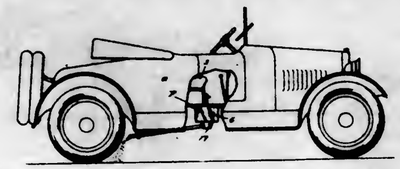
1. A crank pin turning device including a body member, a block adjustable thereon and having angularly disposed bearing plates for engagement with the work, a tool adjustable on said body member and having its

cutting edge disposed in a plane cutting the axis of the work, and means for confining the work between said body and said block.

1,389,542. LEAKPROOF JOINT. HILLIARD W. WERELEY, Bayonne, N. J. Filed Mar. 25, 1919. Serial No. 284,973. 1 Claim. (Cl. 220—46.)

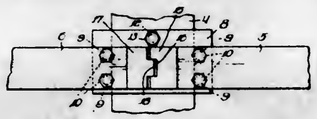
In a leak-proof joint, two joint members detachably connected with each other, one of the said members having an annular shoulder and an annular tongue, the said shoulder fitting into the other member and the latter having an annular groove into which extends the said tongue, a non-metallic packing on the bottom of the said groove and engaged by the end of said tongue, a packing interposed between the said members intermediate the said shoulder and the said tongue, the said shoulder being provided with an annular groove, and a resilient metallic packing ring in the said shoulder groove and bearing against the inner face of the other joint member.

1,389,543. COLLAPSIBLE HEAD-WALL FORM. GEORGE F. ZAUN, San Bernardino, Calif. Filed June 1, 1920. Serial No. 385,736. 10 Claims. (Cl. 25—131.5.)



1. A mold for culverts, including a head wall provided with angularly disposed wing members at each end thereof; each of said wing members and the head wall comprising two spacedly arranged wall members formed of independent longitudinal sections arranged one above the other; detachable means for maintaining the sections of said walls in locked alinement, and means joining the wing members with one of the walls of the head wall for maintaining the former members in position.

1,389,544. SAND-BOX. EDITH BUTLER, Mercer, Pa. Filed May 19, 1921. Serial No. 470,805. 3 Claims. (Cl. 291—36.)

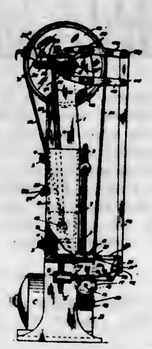


1. An automobile attachment of the class described comprising a sand box adapted to be secured beneath the flooring of a motor vehicle in proximity to the

driver's seat, an actuating rod extending through the flooring of the vehicle and valves in the bottom of said box operable by said rod for releasing the sand, and

chutes communicating with said box whereby a stream of sand may be distributed in front of the driving wheels of the automobile.

1,389,545. TRACK-JOINT. WALTER E. CLICK, Elkhart, Ind., assignor to the Godfrey Conveyor Company, Elkhart, Ind., a Corporation of Indiana. Filed June 25, 1921. Serial No. 480,286. 5 Claims. (Cl. 104—109.)

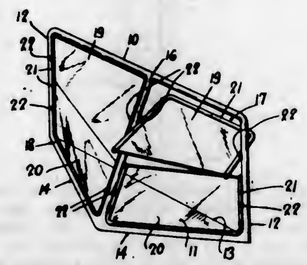


1. A track joining and securing construction comprising in association with two adjacent track ends and a transverse supporting member, a plate located between the track and member, a second plate located on the opposite side of the member, a bolt on one side of the member passing through a track and both plates, a similar bolt on the opposite side of the member passing through the adjacent track, and an additional bolt passing through the plates and the supporting member.

1,389,546. METHOD OF REMOVING WATER OF CRYSTALLIZATION FROM MAGNESIUM CHLORID. HERBERT H. DOW, Midland, Mich., assignor to The Dow Chemical Company, Midland, Mich., a Corporation of Michigan. Filed Sept. 24, 1919. Serial No. 325,870. 8 Claims. (Cl. 23—13.)

1. In a method of removing water of crystallization from normal magnesium chlorid containing six molecules of water, the step which consists in interfusing therewith partially dehydrated magnesium chlorid, substantially as described.

1,389,547. LIQUID-MEASURING PUMP. ERNST EGER, Detroit, Mich., assignor to Morgan & Wright, a Corporation of Michigan. Filed June 18, 1919. Serial No. 305,154. 5 Claims. (Cl. 103—85.)



1. A pump comprising a cylinder and a piston therein, adjustable means for reciprocating the piston to vary the stroke of the piston, and adjustable connections between the piston and the means for reciprocating the piston.

1,389,548. PUMP AND SIMILAR APPARATUS. ERNST EGER, Detroit, Mich., assignor to Morgan & Wright, a Corporation of Michigan. Original application filed June 18, 1919. Serial No. 305,154. Divided and this application filed Mar. 22, 1921. Serial No. 454,432. 2 Claims. (Cl. 103—66.)

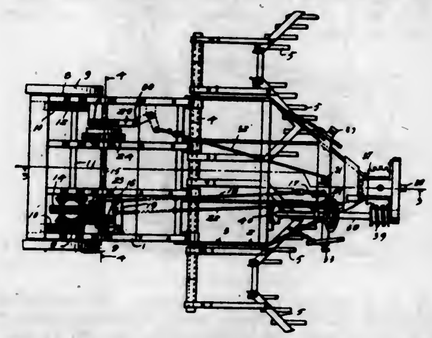
1. In apparatus of the character described, a chamber, a piston within the said chamber, inlet and outlet valves communicating with the said chamber, means for operating the said piston, a valve operating lever provided with connections with the valves whereby a movement of the lever will open the inlet valve and close the discharge valve or vice versa, and operative connections between the said valve operating lever and the piston operating means comprising a cam, lever arms adapted for alternate actuation in reverse directions by said cam, and a link connecting said arms with the valve operating lever.

1,389,549. WINDSHIELD. REYNO L. HARDIN, Blackwell, Okla. Filed Feb. 16, 1918. Serial No. 217,654. 1 Claim. (Cl. 296—84.)

A windshield for vehicles, comprising a straight upper bar adapted to be located transversely of the front edge of the vehicle top, perpendicularly arranged parallel side bars depending from the upper bar, a lower bar provided with an angular bend at a point approximately central of its ends, said bend projecting forwardly of the bottom end of the side bars and a central connecting bar disposed transversely of the frame and extending from the upper bar to the straight apex of the angular bend of the lower bar, dividing the frame into separate sections an upper and lower transparent panel pivotally mounted in each section.

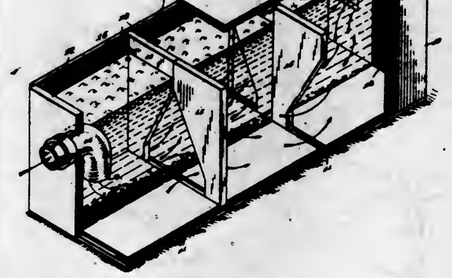
1,389,550. SAND-SHIELD FOR OIL-WELLS. FRED M. HARE, Kiefer, Okla. Filed Dec. 14, 1920. Serial No. 430,687. 2 Claims. (Cl. 103—64.)

1. The combination with the apertured anchor section of oil well tubing, of a sand-shield open at its lower end and provided with an aperture adjacent to said lower end and also provided with an upper reduced end portion snugly receiving and connected to the anchor section and adapted to maintain the major portion of the shield in spaced relation about the anchor section.



1,389,551. ADVERTISING OR DISPLAY NOVELTY. PAUL M. HENNEGAN, Cincinnati, Ohio, assignor to Frank D. Spotswood, Lexington, Ky. Filed Oct. 31, 1919. Serial No. 334,789. 1 Claim. (Cl. 40—126.)

In an advertising or display novelty of the character described, an independent dummy figure having a word space thereon, and a movable part attached to said dummy, capable of being moved off of said word space to expose the same and capable of being moved onto said word space to hide the same, a slitted part on the dummy and a tongue on the movable part, coacting to lock the movable part on the dummy, when in normal position.

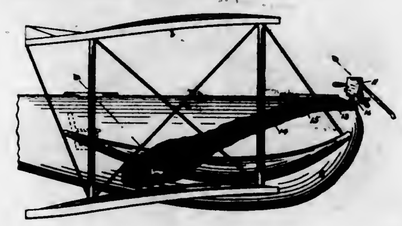


1,389,552. AGRICULTURAL TRACTOR. BENJAMIN HOLLOWELL, deceased, by Edna E. Von Stein, administratrix, Chester, W. Va. Filed July 7, 1920. Serial No. 394,577. 2 Claims. (Cl. 180—27.)

1. A tractor comprising a frame having a forward relatively low portion and a rear elevated portion, wheels journaled at the forward low portion of the frame, an engine mounted upon the low portion of the frame, means operatively connecting the engine with the wheels, a dirigible wheel located under the rear elevated portion of the frame, and means carried at the rear edge of the

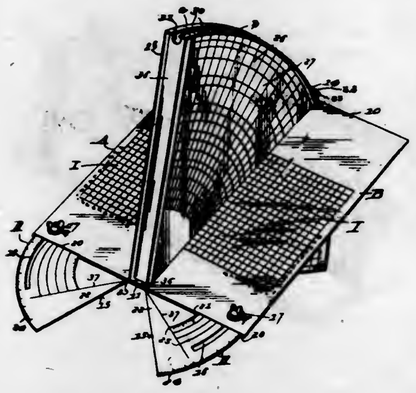
lower forward portion of the frame for attachment with implements whereby the implements may operate under the rear elevated portion of the frame.

1,389,553. EXPANSIBLE SEPTIC TANK. MAX R. HYMAN, Indianapolis, Ind. Filed Mar. 14, 1921. Serial No. 451,995. 2 Claims. (Cl. 210—6.)



1. A septic tank formed from an interchangeable series of slab elements comprising separate top, bottom and side elements, each of said elements having a rabbet formed along each edge of one face and of substantially one half the thickness of the slab, and a two part partition, one corner of each part being absent, substantially as shown and described.

1,389,554. MOWING-MACHINE ATTACHMENT. GUSTAV JOHNSON, Duluth, Minn. Filed Feb. 3, 1921. Serial No. 442,115. 2 Claims. (Cl. 56—194.)



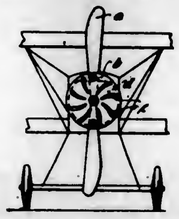
1. The combination with the cutter bar of a mowing machine of the character described, of an apron inclined rearwardly from beyond the bar, the lower edge being attached thereto and the upper corners of the apron supported upon arms rigidly carried by the cutter bar.

1,389,555. TARGET-FOLLOWING BOMB-SIGHT. BERNARD L. SMITH, Washington, D. C., EDWARD H. BARRY, Newton, Mass., and ARTHUR H. BOETTCHER, Chicago, Ill., assignors to the Government of the United States. Filed Mar. 11, 1918. Serial No. 221,838. 17 Claims. (Cl. 177—351.)

6. In a sighting device for aircraft, in combination, universally movable sighting means, indicating means including a movable arm automatically operated by movement of said sighting means in one plane, and a series of signaling elements carried by said arm operated singly by the movement of said sighting means in another plane.

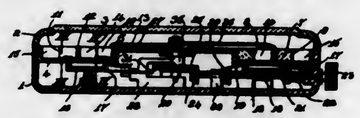
1,389,556. IMPLEMENT FOR MARKING ROOF-RAFTER CUTS. WARNER A. WINN, Clarksville, Tenn., assignor to Winn Company, Clarksville, Tenn., a Corporation of Tennessee. Filed Aug. 7, 1920. Serial No. 401,845. 9 Claims. (Cl. 33—90.)

1. An instrument of the character described including a relatively flat plate adapted to be applied against one edge face of a rafter, and an approximately sector-shaped member disposed in a plane at right angles to the plane of the plate and having two edges disposed at right angles and pivotally engaged with the plate at the intersection of the edges, said member being thereby adjustable relative to the plate, the two faces of the sector-shaped member having thereon radial lines designating pitches and there being pitch scales associated with said radial lines, the outer curved edge of the sector-shaped member being graduated and there being an index member carried upon the plate with which said graduations are to be read.



1,389,557. JOINT-CLOSURE. JOHANNES BENJAMIN EEN, Voss, Norway. Filed Feb. 18, 1920. Serial No. 359,535. 1 Claim. (Cl. 20—4.)

The combination with a wall formed of a plurality of boards placed in edge-abutting relation of a joint closing member between contiguous edges, said member comprising a paper tube, and a layer of glue on diametrically opposite exterior sides of said member for fastening it

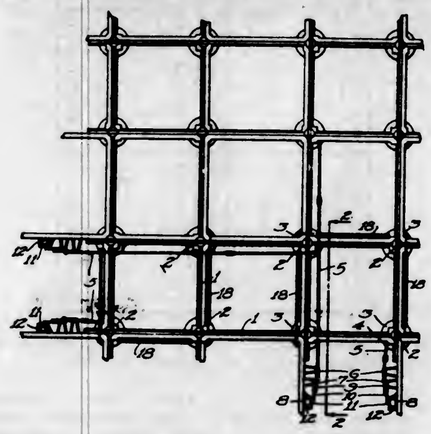


directly to said edges, said glue also forming a seal between the sides of the closing member and the contiguous edges of the boards.

1,389,558. ROTATABLE ARMOR-PLATE FOR THE PROTECTION OF THE COOLERS OF FLYING-MACHINES. ANTHONY HERMAN GERARD FOKKER, Amsterdam, Netherlands. Filed Sept. 1, 1920. Serial No. 407,541. 1 Claim. (Cl. 89—36.)

In a flying machine, a cooler, a propeller contiguous to and spaced from the cooler, and an armor plate secured to the propeller for rotation therewith and also arranged contiguous to and in front of the cooler, said armor plate having openings.

1,389,559. CODING AND DECODING DEVICE. JAMES PAUL GRIFFITHS, Durban, South Africa. Filed Mar. 19, 1921. Serial No. 453,744. 5 Claims. (Cl. 35—13.)



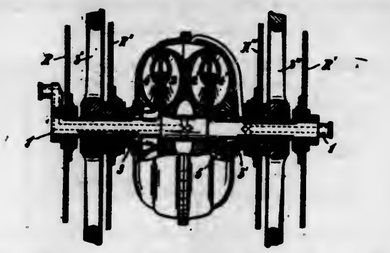
1. A coding and decoding device comprising in combination a circular case, an annular plate secured within said case and having a row of partitioned spaces, a central disk, having a row of partitioned spaces arranged concentrically with the spaces in said plate, character bearing blocks fitting in said spaces, said plate having a circular channel surrounding each row of partitioned spaces into which channels any of said blocks may be slid temporarily for the purpose of changing the ordinary arrangement of the blocks, means for preventing displacement of said blocks, a spindle and supports therefor mounted in said case, indicating pointers secured to said spindle, means for moving said pointers simultaneously over said blocks and means for altering the angular distance apart of said pointers.

1,389,560. RAILWAY-CROSSING. CLIFFORD V. HOUK and THOMAS W. BERRY, San Diego, Calif.; said Berry assignor of one-third of his right to said Houk. Filed May 27, 1920. Serial No. 384,581. 4 Claims. (Cl. 246—273.)

1. A railway crossing, including a rail frame work, a revoluble member positioned at each rail intersection, compound lever and connecting means in connection with four of said revoluble members adapted to be engaged by the flange of the vehicle wheel as it approaches said crossing for separately and progressively revolving four of said

revoluble members simultaneously a portion of a revolution and latch means in connection with said revoluble member operated by a portion only of said lever mecha-

nism for supporting said revoluble member in a certain position and for releasing the same upon the approach of a vehicle.

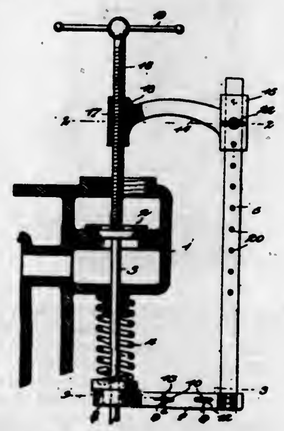


1,389,561. DEPOSIT-BOOK. GEORGE H. KENT, Watertown, Mass.; Bertha G. Kent, administratrix of said George H. Kent, deceased. Filed July 24, 1916. Serial No. 110,880. 6 Claims. (Cl. 283—52.)

1. A deposit book of the character described, comprising a plurality of coupons, each of which is provided on one face with means indicative of a deposit to be made and on the same face with a space associated with said means, and each succeeding coupon being also provided on the said face with means indicative of the preceding coupon and with a space associated with the last mentioned means for data to indicate that the prior coupon has been paid when said space has been validated.

1,389,562. VEHICLE, MORE PARTICULARLY A LOCOMOTIVE, WITH COMBUSTION-ENGINE AND LIQUID DRIVING-GEAR. HEINRICH SCHNEIDER, Baden, Switzerland. Filed June 4, 1920, Serial No. 386,591. Renewed June 27, 1921. Serial No. 480,906. 10 Claims. (Cl. 105—130.) (Granted under the provisions of the act of Mar. 3, 1921, 41 Stat. L., 1313.)

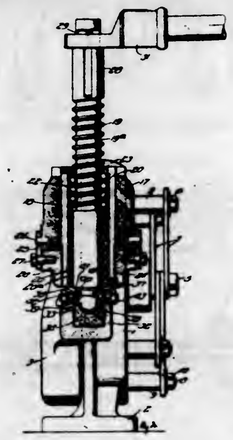
10. In vehicles, with liquid driving-gear comprising rotating primary and secondary parts mounted on the driving-shaft the feature that said liquid driving gear presents



two working chambers symmetrically adapted to each other.

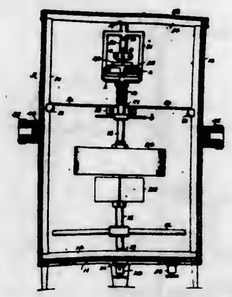
1,389,563. TAR-BURNER. WENZEL BOEHM, Swissvale, HOWARD S. COREY, Munhall, and LEO A. LAMBING, Pittsburgh, Pa. Filed Dec. 7, 1920. Serial No. 428,972. 6 Claims. (Cl. 158—75.)

2. The combination with the burner tube of a liquid fuel burner, of a mixer member intermediate its ends, said mixer member comprising a cylindrical body portion, said body portion being cut away to form recesses in each end a central diaphragm portion, said recessed portions being adapted to receive the burner tube, and said diaphragm having a concave rear wall and having a plurality of tubular passages formed therein, and a nozzle screw threaded on the forward end of said burner tube.



1,389,564. VALVE-LIFTER. BERNARD C. BURNEN, New York, N. Y. Filed June 29, 1920. Serial No. 392,717. 2 Claims. (Cl. 29—86.3.)

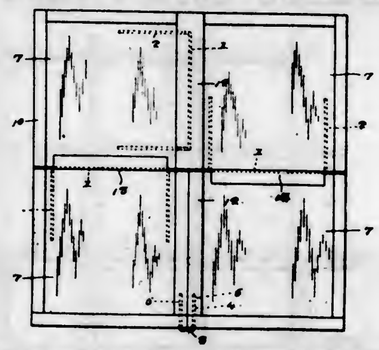
1. A valve stem lifter including a bar, a block slidable on said bar, means for adjustably locking said block on said bar, an internally threaded sleeve carried by said



block, a screw carried by said sleeve, arms pivoted to said bar, jaws formed on said arms, and means for expanding and locking said arms, as and for the purpose set forth.

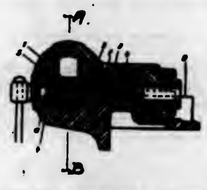
1,389,565. MACHINE ELEMENT. JOHN JENSEN, Rockford, Ill., assignor to Whitney Metal Tool Company, Rockford, Ill., a Corporation of Illinois. Filed Oct. 4, 1918. Serial No. 256,783. 2 Claims. (Cl. 74—40.)

1. In a device of the class described, two members having a telescoping relation with each other, and balls engaging both members to provide the equivalent of a screw threaded connection between them, one of said members having a spiral groove receiving the balls in fitting engagement, the substantially circular cross section of the groove being relieved or cut away adjacent the edges of the groove.



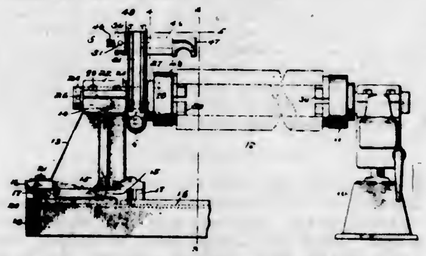
1,389,566. MAGNETIC FIRING MECHANISM FOR SUBMARINE MINES. HUDSON MAXIM, Hopatcong borough, N. J. Filed Dec. 7, 1917. Serial No. 205,917. 12 Claims. (Cl. 175—265.)

1. An orientating magnetic needle, a sensitive needle mounted therewith, and a third magnetic needle affected by the movement of the sensitive needle with respect to the orientating needle.



1,389,567. TABLE-PAD. WILLIAM H. NIEDERLUECKE, St. Louis, Mo. Filed June 11, 1921. Serial No. 476,726. 2 Claims. (Cl. 65—53.)

1. A foldable table pad comprising sections, U-shaped hinge members and flexible strips hingedly connecting the said sections, said U-shaped members having arms socketed in the edge portions of sections, and barrels connected



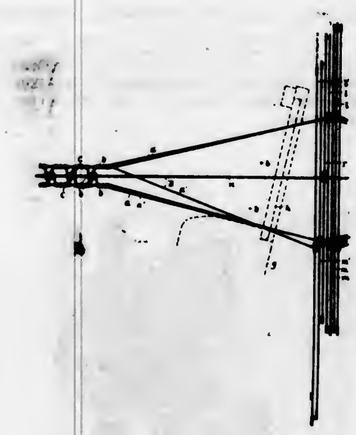
to the opposed edges of other sections and receiving the longitudinal portions of the U-shaped members.

1,389,568. VISE. CONRAD THYSSEN, Aachen, Germany, assignor to Rheinische Metallwarenfabrik Gebr. Schumacher G. M. B. H., Aachen, Germany. Filed Apr. 11, 1921. Serial No. 460,475. 1 Claim. (Cl. 81—33.)

In a vise comprising a stationary front jaw and a relatively movable rear jaw, a central longitudinal bushing formed by the front jaw, a guiding sleeve rigidly mounted in the rear jaw and shiftably extending into the bore of said bushing, an adjusting screw rotatably mounted in the front jaw, internal threads in the said sleeve adapted to match the threads of the adjusting screw, said bushing projecting for a relatively large extent below the movable jaw so as to be covered by the same, downwardly directed longitudinal wings formed at both sides of the movable jaw, the lower edges of said wings gliding on and covering corresponding smooth supporting faces formed at both sides of the rear portion of the stationary front jaw, and said coöperating faces adapted to aid in the guiding of the movable jaw and acting to prevent the latter from rotation when being adjusted.

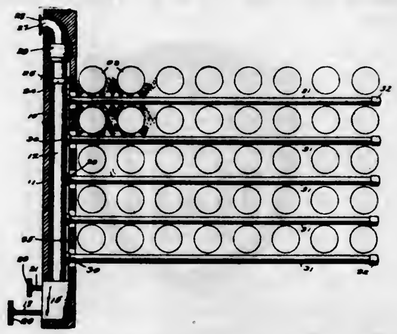
1,389,569. DRILLING-JIG. JOHN F. FETTERLY, Altoona, Pa. Filed Dec. 18, 1919. Serial No. 345,865. 11 Claims. (Cl. 77—62.) (Filed under the act of Mar. 3, 1883, 22 Stat. L., 625.)

1. In a drilling mechanism, the combination with a work support, of an arm mounted on the work support and adjustable circumferentially around its support, and a tool guiding member mounted on the arm.



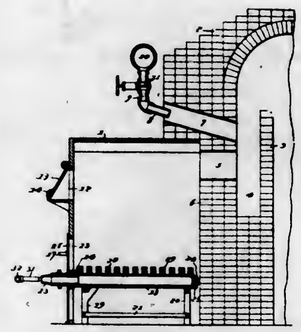
REISSUES.

15,183. ANTISKID TIRE-CHAIN. WILLIAM GRIES, Newark, N. J. Filed Sept. 25, 1916. Serial No. 412,872. Original No. 1,207,540, dated Dec. 5, 1916, Serial No. 871,773, filed Nov. 12, 1914. 5 Claims. (Cl. 152—14.)



1. In a device of the class described, a plurality of tread chain units, each having a retaining ring at each end and an intermediate noose ring for receiving one of said retaining rings to form a noose to encircle the tire, and a common flexible retaining chain adapted after the nooses have been formed by the several chain units to pass through the retaining rings of each of the latter to hold the same in position, and means for adjusting the operative length of the common chain.

15,184. WEAVING OF PILE FABRICS. GEORG KOCH, Darmstadt, Germany, assignor to Ernest Cadgene and Olav Berg, Paterson, N. J. Filed Nov. 3, 1920. Serial No. 421,595. Original No. 1,305,373, dated June 3, 1919, Serial No. 270,300, filed Jan. 9, 1919. 3 Claims. (Cl. 139—71.)



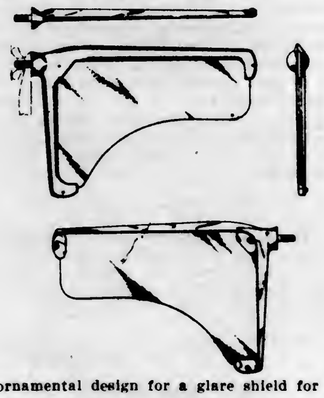
1. A pile weaving loom including, in combination, instrumentalities to support and advance the warp longitudinally in a given plane, a set of impressionable filamentous weft-supporting bodies having free ends projecting in the direction of advance of said warp, every such body in the set being arranged in approximately the same plane substantially parallel with the first plane, means to form a succession of sheds in the warp and also form other sheds of some of the warp and said bodies, and means to pass filling through the first-named sheds at the side of said bodies corresponding to the first plane and also through said other sheds at the opposite side of said bodies, said bodies being held against forward movement.

15,185. SOOT-BLOWER. WILLIAM M. MCNEILL, Logansport, Ind., assignor of one-half to Billie M. Sheffey, Rosiclare, Ill. Filed June 29, 1921. Serial No. 481,702. Original No. 1,373,750, dated Apr. 5, 1921, Serial No. 313,164, filed July 25, 1919. 6 Claims. (Cl. 122—392.)

1. In a device of the type described, a tubular member, means for supplying fluid pressure to said tubular member, said tubular member being capable of reciprocation and oscillation, a plurality of tubes having openings formed therein, said tubes communicating at one end with said tubular member, means for oscillating said tubular member comprising a casing having an opening formed therein, an extension formed in the lower end of said tubular member extending through said opening, a gear carried by said extension, a shaft mounted within the casing provided with a gear meshing with the gear on said extensions, and means for actuating said shaft, and means for reciprocating said tubular member embodying a rack formed upon said extension and a shaft rotatable within said casing and provided with a gear meshing with said rack.

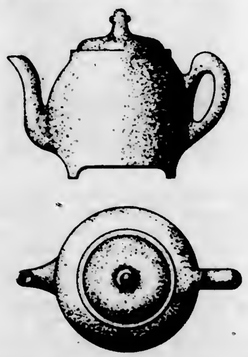
15,186. KILN AND THE METHOD OF OPERATING THE SAME. LOIS M. UNDERWOOD, Dayton, Ohio. Filed Mar. 10, 1921. Serial No. 451,287. Original No. 1,337,298, dated Apr. 20, 1920, Serial No. 281,613, filed Mar. 10, 1919. 16 Claims. (Cl. 25—152.)

1. In a kiln provided with a stationary furnace and gas producer chamber, and a conduit forming a passageway from said chamber to the combustion chamber of the kiln, and an auxiliary air conduit through which additional air is supplied to the combustion chamber, a portable grate including a series of hollow tilting bars with nozzles through which steam and air are injected into said bars, a series of twyers mounted on each bar and having air passages communicating with the interior of said bars, and an individual steam injecting nozzle extended into the nozzle of each of said bars, substantially as described.



DESIGNS.

58,695. BADGE, PIN, EMBLEM, CHARM, OR SIMILAR ARTICLE. ARMIN C. H. AREND, Cincinnati, Ohio. Filed Mar. 24, 1921. Serial No. 455,167. Term of patent 14 years.

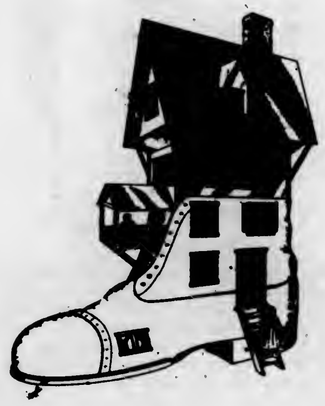


The ornamental design for a badge, pin, emblem, charm or similar article, as shown.

58,696. GLARE-SHIELD FOR VEHICLES. JOHN D. BANKS, Colwyn, Pa., assignor to Victory Manufacturing Co., of Audubon, N. J. Filed Apr. 28, 1921. Serial No. 465,234. Term of patent 14 years.

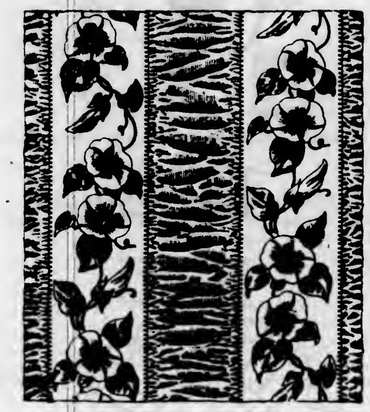
The ornamental design for a glare shield for vehicles, as shown.

58,697. TEA OR COFFEE POT. WILLIAM JOSEPH BARING, Richmond, Calif. Filed Jan. 21, 1921. Serial No. 439,032. Term of patent 14 years.



The ornamental design for a tea or coffee pot, as shown.

58,698. MOTORMETER. PETER F. BEAULIEU, Bend, Oreg., assignor of one-half to E. C. Landingham, Bend, Oreg. Filed Apr. 28, 1921. Serial No. 465,228. Term of patent 7 years.



The ornamental design for a motormeter substantially as shown.

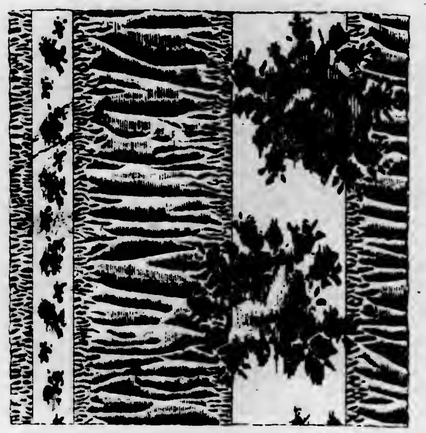
58,699. TOY. FAYETTE A. BILLMEYER, Pittsburgh, Pa. Filed Mar. 21, 1921. Serial No. 454,297. Term of patent 14 years.

The ornamental design for a toy, as shown.

58,700. TEXTILE FABRIC OR SIMILAR ARTICLE. LUCIEN BIVA, White Plains, N. Y., assignor to Titus Blatter & Company, New York, N. Y., a Corporation of New York. Filed Apr. 5, 1921. Serial No. 458,769. Term of patent 7 years.

The ornamental design for textile fabric or similar article substantially as shown.

58,701. TEXTILE FABRIC OR SIMILAR ARTICLE. LUCIEN BIVA, White Plains, N. Y., assignor to Titus Blatter & Company, New York, N. Y., a Corporation of New York. Filed Apr. 5, 1921. Serial No. 458,770. Term of patent 7 years.

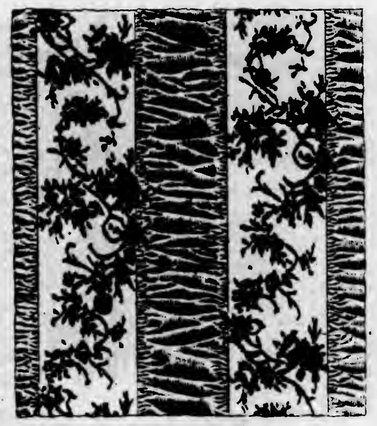


The ornamental design for textile fabric or similar article substantially as shown.

58,702. TEXTILE FABRIC OR SIMILAR ARTICLE. LUCIEN BIVA, White Plains, N. Y., assignor to Titus Blatter & Company, New York, N. Y., a Corporation of New York. Filed Apr. 5, 1921. Serial No. 458,771. Term of patent 7 years.

The ornamental design for textile fabric or similar article substantially as shown.

58,703. TEXTILE FABRIC OR SIMILAR ARTICLE. LUCIEN BIVA, White Plains, N. Y., assignor to Titus Blatter & Company, New York, N. Y., a Corporation of New York. Filed Apr. 5, 1921. Serial No. 458,772. Term of patent 7 years.

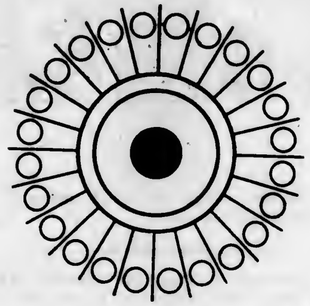


The ornamental design for textile fabric or similar article substantially as shown.

58,704. TEXTILE FABRIC OR SIMILAR ARTICLE. LUCIEN BIVA, White Plains, N. Y., assignor to Titus Blatter & Company, New York, N. Y., a Corporation of New York. Filed Apr. 5, 1921. Serial No. 458,773. Term of patent 7 years.

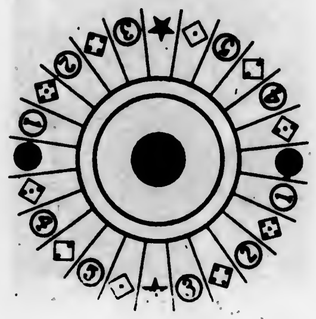
The ornamental design for textile fabric or similar article substantially as shown.

58,705. TEXTILE FABRIC OR SIMILAR ARTICLE. LUCIEN BIVA, White Plains, N. Y., assignor to Titus Blatter & Company, New York, N. Y., a Corporation of New York. Filed Apr. 5, 1921. Serial No. 458,774. Term of patent 7 years.



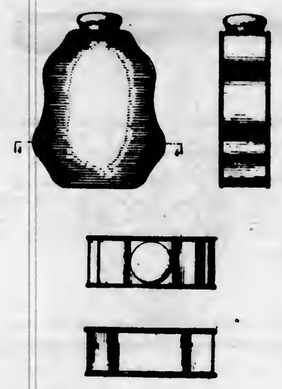
The ornamental design for textile fabric or similar article substantially as shown.

58,706. MEMORIAL BUTTON. GEORGE H. BOEGER and JOHN L. CAMPBELL, Minneapolis, Minn. Filed Apr. 2, 1919. Serial No. 287,079. Term of patent 14 years.



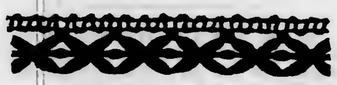
The ornamental design for a memorial button as shown.

58,707. GAME-DIAL OR SIMILAR ARTICLE. EDMUND BRUDER, Chicago, Ill. Filed June 2, 1921. Serial No. 474,570. Term of patent 7 years.



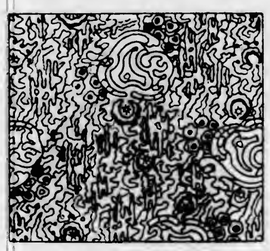
The ornamental design for a game dial or similar article as shown.

58,708. GAME-DIAL OR SIMILAR ARTICLE. EDMUND BRUDER, Chicago, Ill. Filed June 2, 1921. Serial No. 474,571. Term of patent 7 years.



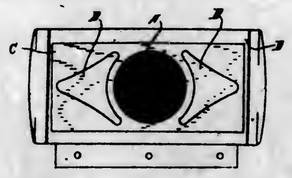
The ornamental design for a game dial or similar article as shown.

58,709. POWDER-CONTAINER. ALFRED E. BRUNS, Brooklyn, N. Y. Filed Apr. 8, 1920. Serial No. 372,367. Term of patent 14 years.



The ornamental design for a powder container as shown.

58,710. LACE. HENRY S. BROMLEY, Philadelphia, Pa., assignor to North American Lace Company, Philadelphia, Pa., a Corporation of Pennsylvania. Filed Apr. 9, 1921. Serial No. 460,073. Term of patent 14 years.

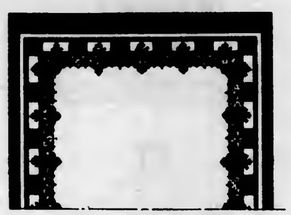


The ornamental design for lace, substantially as shown.

58,711. TEXTILE FABRIC. JAMES H. BUNTING, New York, N. Y., assignor to Susquehanna Silk Mills, New York, N. Y., a Corporation of New York. Filed Feb. 3, 1921. Serial No. 442,306. Term of patent 3½ years.

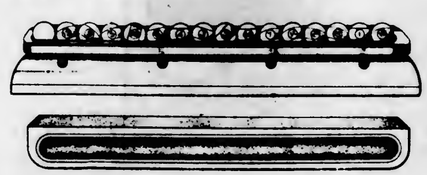
The ornamental design for a textile fabric, as shown.

58,712. TAIL-LIGHT FOR VEHICLES. VEL I. CILLEY, Grand Rapids, Mich. Filed Oct. 2, 1920. Serial No. 414,374. Term of patent 14 years.



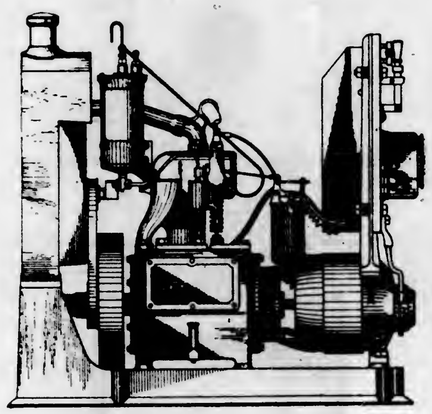
The ornamental design for a tail light for vehicles, substantially as shown and described.

58,713. GRASS RUG. ALBERT F. CLEMENTS, Oshkosh, Wis., assignor to Waite Grass Carpet Company, Oshkosh, Wis., a Corporation of Wisconsin. Filed Mar. 10, 1921. Serial No. 451,312. Term of patent 3½ years.

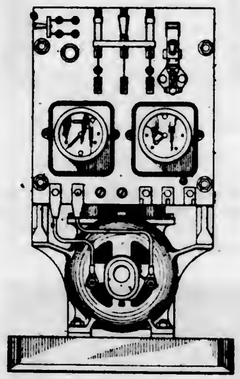


The ornamental design for a grass rug, substantially as shown.

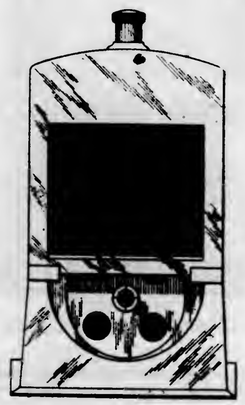
58,714. GRASS RUG. ALBERT F. CLEMENTS, Oshkosh, Wis., assignor to Waite Grass Carpet Company, Oshkosh, Wis., a Corporation of Wisconsin. Filed Mar. 10, 1921. Serial No. 451,313. Term of patent 3½ years.



The ornamental design for a grass rug, substantially as shown.



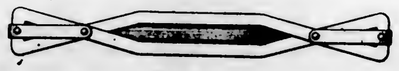
58,715. BILLIARD-TABLE RAIL. WILLIAM CONAMA, Rochester, Minn. Filed Nov. 15, 1920. Serial No. 424,311. Term of patent 14 years.



The ornamental design for a billiard table rail, as shown.

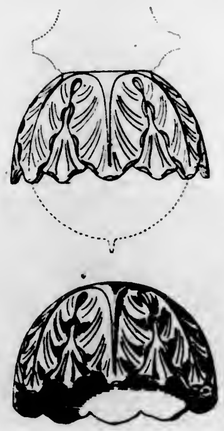
58,716. ELECTRIC AUTOMATIC PLANT. MARK CONSTANT COSGRAY, Sandusky, Ohio, assignor to The Matthews Engineering Company, Sandusky, Ohio, a Corporation of Ohio. Filed Oct. 1, 1920. Serial No. 414,124. Term of patent 14 years.

The ornamental design for an electric automatic plant, as shown.



58,717. COBBLER'S TOOL. GASPARO COSTANTINO, Niagara Falls, Ontario, Canada. Filed Mar. 27, 1920. Serial No. 369,446. Term of patent 14 years.

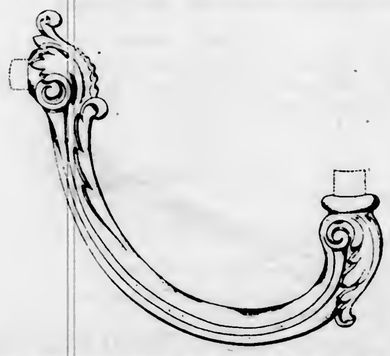
The ornamental design for a cobbler's tool as shown.



58,718. AUTOMOBILE-BUMPER. WILLIAM G. COX, Cleveland, Ohio, assignor to Cox Brass Manufacturing Company, Albany, N. Y., a Corporation of New York. Filed May 10, 1921. Serial No. 468,426. Term of patent 7 years.

The ornamental design for an automobile bumper, as shown.

58,719. SHADE FOR LIGHTING-FIXTURES. THURE DAHL, New York, N. Y., assignor to Lightolier Company, a Corporation of New York. Filed Dec. 30, 1920. Serial No. 434,152. Term of patent 7 years.

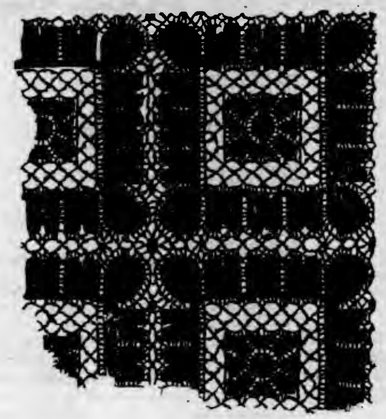


The ornamental design for a shade for lighting fixtures as shown.

58,720. BRACKET-BACK FOR LIGHTING-FIXTURES. THURE DAHL, New York, N. Y., assignor to Lightolier Company, a Corporation of New York. Filed Dec. 30, 1920. Serial No. 434,153. Term of patent 3½ years.

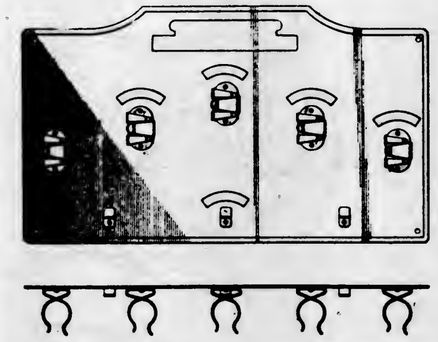
The ornamental design for a bracket back for lighting fixtures as shown.

58,721. BRACKET-ARM FOR LIGHTING-FIXTURES. THURE DAHL, New York, N. Y., assignor to Lightolier Company, a Corporation of New York. Filed Dec. 30, 1920. Serial No. 434,154. Term of patent 3½ years.



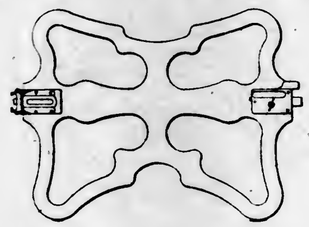
The ornamental design for a bracket arm for lighting fixtures as shown.

58,722. CANDLE-CUP FOR LIGHTING-FIXTURES. THURE DAHL, New York, N. Y., assignor to Lightolier Company, a Corporation of New York. Filed Dec. 30, 1920. Serial No. 434,155. Term of patent 3½ years.



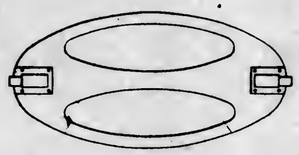
The ornamental design for a candle cup for lighting fixtures as shown.

58,723. LACE. MARC H. DAUDY, Philadelphia, Pa., assignor to North American Lace Company, Philadelphia, Pa., a Corporation of Pennsylvania. Filed Mar. 19, 1921. Serial No. 453,751. Term of patent 3½ years.



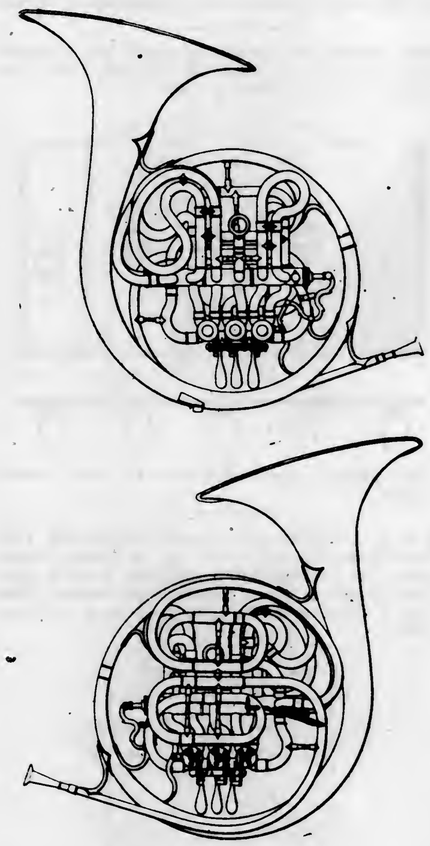
The ornamental design for lace, substantially as shown.

58,724. BRUSH AND BROOM HOLDER. MAY F. DENIS, East Orange, N. J. Filed Jan. 25, 1921. Serial No. 439,863. Term of patent 3½ years.



The ornamental design for a brush and broom holder, as shown.

58,725. BUTTERFLY GARMENT-RETAINER FOR WARDROBE-TRUNKS. WILLIAM W. DODGE, Mishawaka, Ind., assignor to National Veneer Products Company, Mishawaka, Ind., a Corporation of Indiana. Filed Aug. 2, 1920. Serial No. 400,877. Term of patent 14 years.



The ornamental design for a butterfly garment retainer for wardrobe trunks, as shown.

58,726. OVAL GARMENT-RETAINER FOR WARDROBE-TRUNKS. WILLIAM W. DODGE, Mishawaka, Ind., assignor to National Veneer Products Company, Mishawaka, Ind., a Corporation of Indiana. Filed Aug. 2, 1920. Serial No. 400,880. Term of patent 14 years.

The ornamental design for an oval garment retainer for wardrobe trunks, as shown.

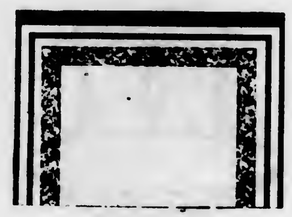
58,727. DOUBLE HORN. ORA DOTSON, Elkhart, Ind., assignor to C. G. Conn, Ltd., Elkhart, Ind., a Corporation. Filed May 23, 1921. Serial No. 471,978. Term of patent 14 years.

The ornamental design for a double horn, as shown.

58,728. SPIKE. AUGUST DUDA, Staunton, Ill. Filed Mar. 15. 1921. Serial No. 452,546. Term of patent 7 years.

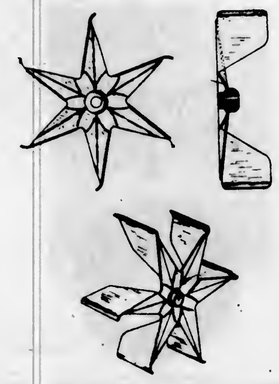
The ornamental design for a spike as shown.

58,729. LINK. AUGUST DUDA, Staunton, Ill. Filed Mar. 15, 1921. Serial No. 452,547. Term of patent 7 years.



The ornamental design for a link as shown.

58,730. STRANDED LINK. AUGUST DUDA, Staunton, Ill. Filed Mar. 15, 1921. Serial No. 452,548. Term of patent 7 years.

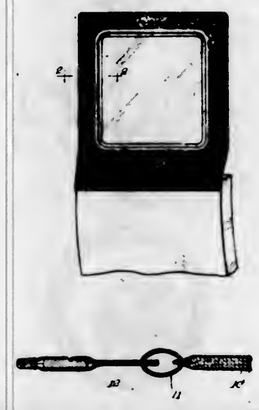


The ornamental design for a stranded link as shown.

58,731. GRASS RUG. GUSTAVE M. FAUSER, New York, N. Y., assignor to Waite Grass Carpet Company, Oskosh, Wis., a Corporation of Wisconsin. Filed Feb. 28, 1921. Serial No. 448,602. Term of patent 3½ years.

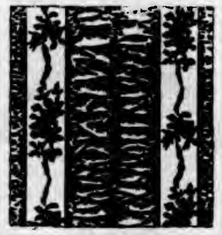
The ornamental design for a grass rug, substantially as shown.

58,732. FAN. EGBERT R. FIELD, Detroit, Mich., assignor to Eureka Vacuum Cleaner Company, Detroit, Mich., a Corporation of Michigan. Filed Mar. 12, 1921. Serial No. 451,832. Term of patent 14 years.



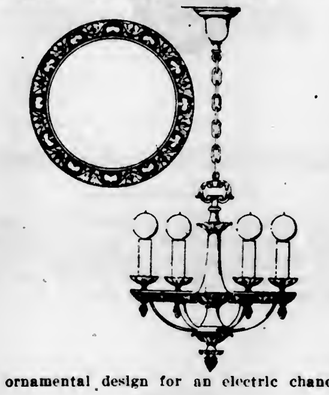
The ornamental design for a fan, substantially as shown.

58,733. COLLAR-FASTENER. WALTER E. FIELD, Providence, R. I. Filed Jan. 12, 1921. Serial No. 486,840. Term of patent 3½ years.



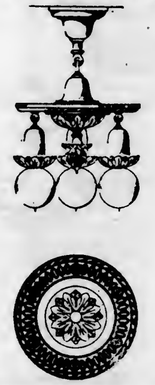
The ornamental design for a collar fastener as shown.

58,734. AUTOMOBILE-DOOR. JOSEPH JAMES FOLEY, Chicago, Ill. Filed Mar. 14, 1921. Serial No. 452,332. Term of patent 14 years.



The ornamental design for an automobile door substantially as shown and described.

58,735. TEXTILE FABRIC OR ARTICLE OF SIMILAR NATURE. ALFRED FRATI, New York, N. Y., assignor to Titus Blatter & Company, New York, N. Y., a Corporation of New York. Filed Apr. 5, 1921. Serial No. 458,764. Term of patent 7 years.

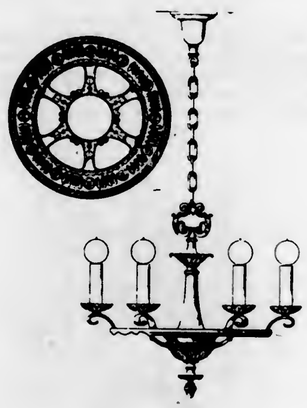


The ornamental design for textile fabric or article of similar nature substantially as shown.

58,736. ELECTRIC CHANDELIER. FREDERICK A. FREIICHS, Philadelphia, Pa., assignor to The Horn & Brannen Manufacturing Co., Philadelphia, Pa., a Corporation of Pennsylvania. Filed Jan. 22, 1921. Serial No. 439,290. Term of patent 3½ years.

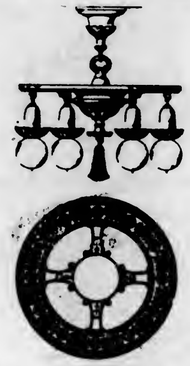
The ornamental design for an electric chandelier, as shown.

58,737. ELECTRIC CEILING-FIXTURE. FREDERICK A. FREIICHS, Philadelphia, Pa., assignor to The Horn & Brannen Manufacturing Co., Philadelphia, Pa., a Corporation of Pennsylvania. Filed Jan. 22, 1921. Serial No. 439,291. Term of patent 3½ years.



The ornamental design for an electric ceiling fixture, as shown.

58,738. ELECTRIC CHANDELIER. FREDERICK A. FRERICHS, Philadelphia, Pa., assignor to The Horn & Brannen Manufacturing Co., Philadelphia, Pa., a Corporation of Pennsylvania. Filed Jan. 22, 1921. Serial No. 439,292. Term of patent 3½ years.



The ornamental design for an electric chandelier.

58,739. ELECTRIC CHANDELIER. FREDERICK A. FRERICHS, Philadelphia, Pa., assignor to The Horn & Brannen Manufacturing Co., Philadelhpia, Pa., a Corporation of Pennsylvania. Filed Jan. 22, 1921. Serial No. 439,293. Term of patent 3½ years.

The ornamental design for an electric chandelier, as shown.

58,740. ELECTRIC CEILING-FIXTURE. FREDERICK A. FRERICHS, Philadelphia, Pa., assignor to The Horn & Brannen Manufacturing Co., Philadelphia, Pa., a Corporation of Pennsylvania. Filed Jan. 22, 1921. Serial No. 439,294. Term of patent 3½ years.

The ornamental design for an electric ceiling fixture, as shown.

58,741. ELECTRIC WALL-BRACKET. FREDERICK A. FRERICHS, Philadelphia, Pa., assignor to The Horn & Brannen Manufacturing Co., Philadelphia, Pa., a Corporation of Pennsylvania. Filed Jan. 22, 1921. Serial No. 439,295. Term of patent 3½ years.

The ornamental design for an electric wall bracket, as shown.

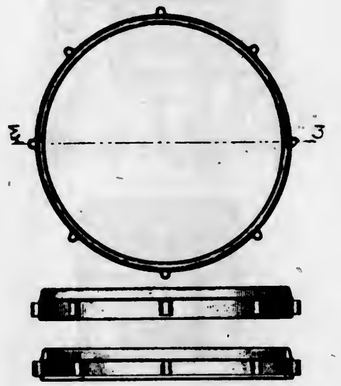
58,742. ELECTRIC CEILING-FIXTURE. FREDERICK A. FRERICHS, Philadelphia, Pa., assignor to The Horn & Brannen Manufacturing Co., Philadelphia, Pa., a Corporation of Pennsylvania. Filed Jan. 22, 1921. Serial No. 439,296. Term of patent 3½ years.

The ornamental design for an electric ceiling fixture, as shown.

58,743. COTTON FABRIC FOR TENTS AND THE LIKE. WILLIAM S. FRIEDLANDER, Passaic, N. J., assignor to Tate Electrolytic Textile Processes, Incorporated, New York, N. Y., a Corporation of New York. Filed Mar. 26, 1921. Serial No. 455,996. Term of patent 14 years.

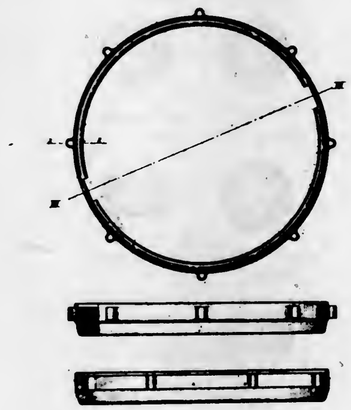
The ornamental design for cotton fabric for tents and the like substantially as shown.

58,744. COLLAR-FASTENER. STANLEY L. GEDNEY, Maplewood, N. J. Filed Feb. 16, 1921. Serial No. 445,563. Term of patent 14 years.



The ornamental design for a collar fastener substantially as shown.

58,745. FAVOR. ELKAN GOSLINER, San Francisco, Calif. Filed Apr. 13, 1921. Serial No. 461,100. Term of patent 14 years.

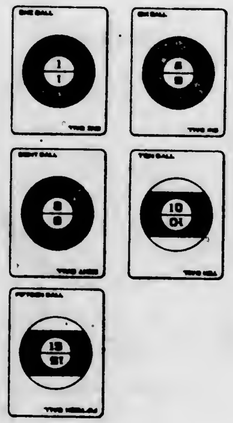


The ornamental design for a favor, as shown.

58,746. DRUM-HOOP. EDWARD J. GULICK, Elkhart, Ind., assignor to C. G. Conn, Ltd., Elkhart, Ind., a Corporation of Indiana. Filed Mar. 14, 1921. Serial No. 452,310. Term of patent 14 years.

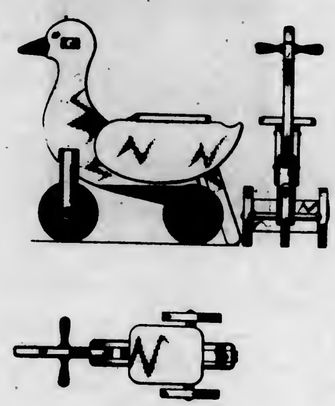
The ornamental design for a drum hoop, as shown.

58,747. DRUM-HOOP. EDWARD J. GULICK, Elkhart, Ind., assignor to C. G. Conn, Ltd., Elkhart, Ind., a Corporation of Indiana. Filed Mar. 12, 1921. Serial No. 451,821. Term of patent 14 years.



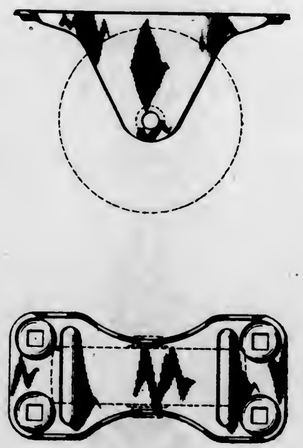
The ornamental design for a drum hoop, as shown.

58,748. PHONOGRAPH-CABINET. EDWARD F. HARPER, Philadelphia, Pa. Filed May 14, 1921. Serial No. 469,581. Term of patent 7 years.



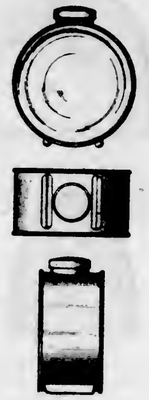
The ornamental design for a phonograph cabinet, as shown.

58,749. PACK OF GAME-CARDS. LOUIS H. HARTMAN, Pittsburgh, Pa., assignor of one-half to Charles A. Copeland, Pittsburgh, Pa. Filed Apr. 27, 1921. Serial No. 465,002. Term of patent 14 years.



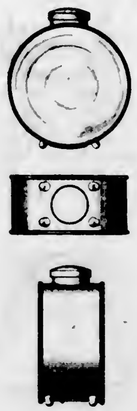
The ornamental design for a pack of game cards, as shown.

58,750. KIDDIE-CAR. HENRY CONRAD HEBIG, Hempstead, N. Y., assignor to William P. Hammond, Maplewood, N. J. Filed May 26, 1921. Serial No. 472,906. Term of patent 14 years.



The ornamental design for a kiddie car, as shown.

58,751. TRUCK-CASTER. WALTER F. HEROLD, Newark, N. J., assignor to The Bassick Company, Bridgeport, Conn., a Corporation of Connecticut. Filed Mar. 23, 1921. Serial No. 454,913. Term of patent 14 years.

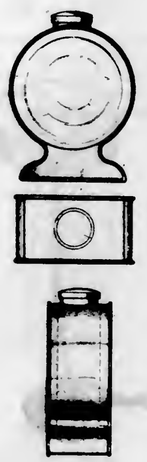


The ornamental design for a truck caster as shown.

58,752. TALCUM-POWDER BOX. EDMUND HOFFMAN, Brooklyn, N. Y., assignor to American Can Company, New York, N. Y., a Corporation of New Jersey. Filed Jan. 7, 1921. Serial No. 435,743. Term of patent 14 years.

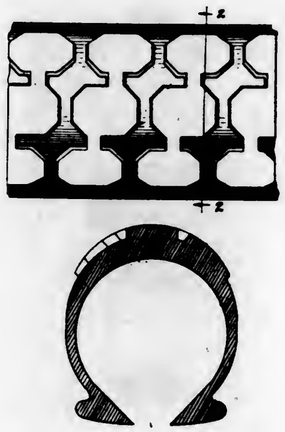
The ornamental design for a talcum powder box, as shown.

58,753. TALCUM-POWDER BOX. EDMUND HOFFMAN, Brooklyn, N. Y., assignor to American Can Company, New York, N. Y., a Corporation of New Jersey. Filed Jan. 7, 1921. Serial No. 435,744. Term of patent 7 years.



The ornamental design for a talcum powder box, as shown.

58,754. TALCUM-POWDER BOX. EDMUND HOFFMAN, Brooklyn, N. Y., assignor to American Can Company, New York, N. Y., a Corporation of New Jersey. Filed Jan. 7, 1921. Serial No. 435,745. Term of patent 14 years.

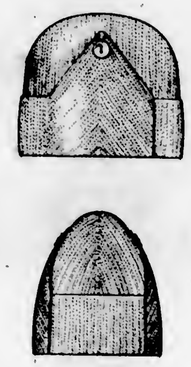


The ornamental design for a talcum powder box, as shown.

58,755. TALCUM-POWDER BOX. EDMUND HOFFMAN, Brooklyn, N. Y., assignor to American Can Company, New York, N. Y., a Corporation of New Jersey. Filed Jan. 7, 1921. Serial No. 435,746. Term of patent 7 years.

The ornamental design for a talcum powder box, as shown.

58,756. TIRE-TREAD OR SIMILAR ARTICLE. RALPH W. HUTCHENS, Eau Claire, Wis. Filed Apr. 1, 1921. Serial No. 457,828. Term of patent 14 years.

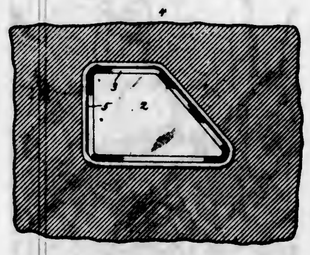


The ornamental design for a tire tread or similar article as shown and described.

58,757. SEWER'S ELECTRIC-LIGHT STAND. SIDNEY M. ISRAEL, Richmond Hill, N. Y. Filed Dec. 30, 1920. Serial No. 434,149. Term of patent 3½ years.

The ornamental design for a sewer's electric light stand, as shown.

58,758. KNITTED CAP. DAVID KARGER, Milwaukee, Wis. Filed May 21, 1921. Serial No. 471,501. Term of patent 14 years.

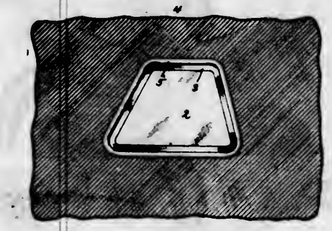


The ornamental design for a knitted cap, as shown.

58,759. GLASS VASE OR SIMILAR ARTICLE. BROR JOHNSON, Glassport, Pa., assignor to United States Glass Company, Pittsburgh, Pa., a Corporation of Pennsylvania. Filed Oct. 13, 1919. Serial No. 330,500. Term of patent 7 years.

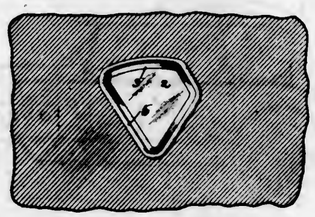
The ornamental design for a glass vase or similar article as shown.

58,760. CURTAIN-WINDOW FOR VEHICLES. WILLIAM R. JOHNSTON, Chicago, Ill., assignor to Wm. R. Johnston Mfg. Co., Chicago, Ill., a Corporation of Illinois. Filed July 23, 1920. Serial No. 398,584. Term of patent 7 years.



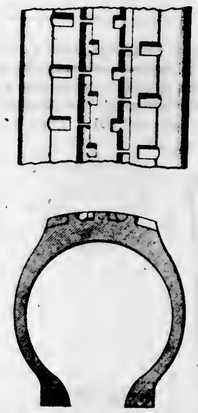
The ornamental design for a curtain window for vehicles as described and shown.

58,761. CURTAIN-WINDOW FOR VEHICLES. WILLIAM R. JOHNSTON, Chicago, Ill., assignor to Wm. R. Johnston Mfg. Co., Chicago, Ill., a Corporation of Illinois. Filed July 23, 1920. Serial No. 398,585. Term of patent 7 years.



The ornamental design for a curtain window for vehicles as described and shown.

58,762. CURTAIN-WINDOW FOR VEHICLES. WILLIAM R. JOHNSTON, Chicago, Ill., assignor to Wm. R. Johnston Mfg. Co., Chicago, Ill., a Corporation of Illinois. Filed July 23, 1920. Serial No. 398,586. Term of patent 7 years.

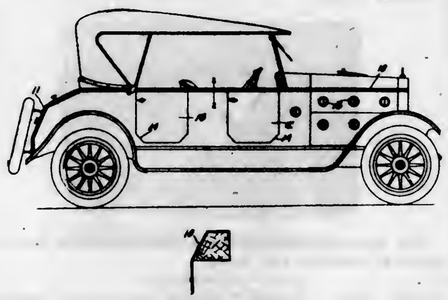


The ornamental design for a curtain window for vehicles as described and shown.

58,763. CURTAIN-WINDOW FOR VEHICLES. WILLIAM R. JOHNSTON, Chicago, Ill., assignor to Wm. R. Johnston Mfg. Co., Chicago, Ill., a Corporation of Illinois. Filed July 23, 1920. Serial No. 398,587. Term of patent 7 years.

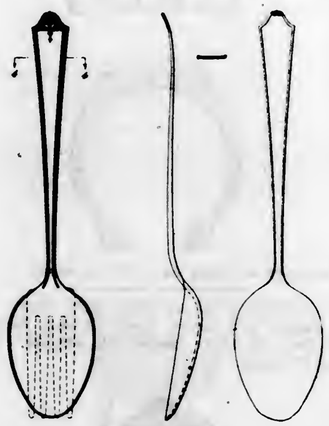
The ornamental design for a curtain window for vehicles as described and shown.

58,764. TIRE. WALTER P. KEITH, Akron, Ohio, assignor to The Goodyear Tire & Rubber Company, Akron, Ohio, a Corporation of Ohio. Filed Mar. 18, 1921. Serial No. 453,407. Term of patent 14 years.



The ornamental design for a tire as shown.

58,765. CASING FOR AN ELECTRIC FAN. HAROLD RAY KELSEY and RALPH JOHN KELSEY, Pound, Wis. Filed Jan. 19, 1921. Serial No. 438,454. Term of patent 3½ years.



The ornamental design for a casing for an electric fan as shown.

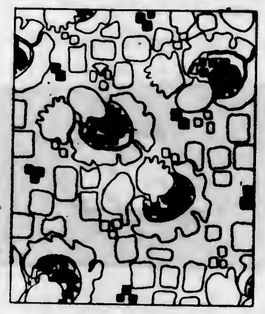
58,766. AUTOMOBILE-BODY. WILLIAM A. KING, Memphis, Tenn. Filed Apr. 12, 1920. Serial No. 373,403. Term of patent 14 years.

The new, original and ornamental design for an automobile body as shown and described.

58,767. HANDLE FOR SPOONS, FORKS, OR SIMILAR ARTICLES. ALFRED G. KINTZ, Wallingford, Conn., assignor to International Silver Company, Wallingford, Conn., a Corporation of New Jersey. Filed May 17, 1921. Serial No. 470,487. Term of patent 14 years.

The ornamental design for a handle for spoons, forks, or similar articles as shown.

58,768. COMBINED IMPLEMENT FOR STRINGED MUSICAL INSTRUMENTS. BENJAMIN F. KNELL, Philadelphia, Pa. Filed Apr. 12, 1921. Serial No. 460,820. Term of patent 14 years.



The ornamental design for a combined implement for stringed musical instruments, as shown.

58,769. TEXTILE FABRIC. ELLA KRUPICKA, New York, N. Y., assignor to Susquehanna Silk Mills, New York, N. Y., a Corporation of New York. Filed Feb. 3, 1921. Serial No. 442,300. Term of patent 3½ years.

The ornamental design for a textile fabric, as shown.

58,770. TEXTILE FABRIC. ELLA KRUPICKA, New York, N. Y., assignor to Susquehanna Silk Mills, New York, N. Y., a Corporation of New York. Filed Feb. 3, 1921. Serial No. 442,301. Term of patent 3½ years.

The ornamental design for a textile fabric, as shown.

58,771. TEXTILE FABRIC. ELLA KRUPICKA, New York, N. Y., assignor to Susquehanna Silk Mills, New York, N. Y., a Corporation of New York. Filed Feb. 3, 1921. Serial No. 442,302. Term of patent 3½ years.

The ornamental design for a textile fabric, as shown.

58,772. LACE. THYRA OLIVIA KUMALEHTO, New York, N. Y., assignor to Blanck & Company, Inc., New York, N. Y., a Corporation of New York. Filed Apr. 20, 1921. Serial No. 463,051. Term of patent 3½ years.

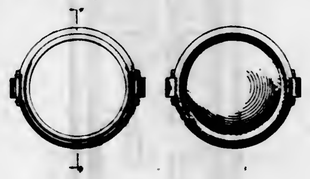
The ornamental design for lace as herein shown and described.

58,773. BUTTON. RICHARD KUNO, New York, N. Y., assignor to Rothschild-Kuno Button Works, Inc., New York, N. Y., a Corporation of New York. Filed Apr. 6, 1921. Serial No. 459,164. Term of patent 3½ years.

The ornamental design for a button, as shown.

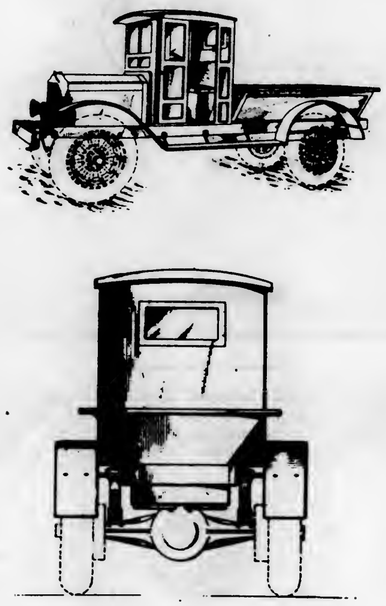
58,774. BUTTON. RICHARD KUNO, New York, N. Y., assignor to Rothschild-Kuno Button Works, Inc., New York, N. Y., a Corporation of New York. Filed Apr. 6, 1921. Serial No. 459,165. Term of patent 3½ years.

The ornamental design for a button, as shown.

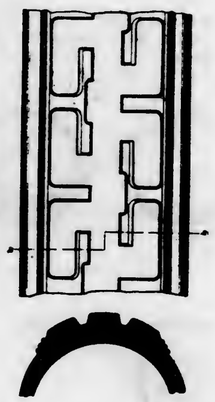


58,775. BUTTON. RICHARD KUNO, New York, N. Y., assignor to Rothschild-Kuno Button Works, Inc., New York, N. Y. a Corporation of New York. Filed Apr. 6, 1921. Serial No. 459,166. Term of patent 3½ years.

The ornamental design for a button, as shown.

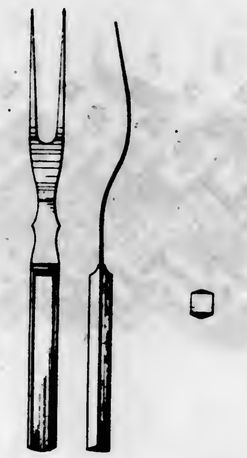


58,776. AUTOMOBILE-LAMP. LEON LAPIDUS, Brooklyn, N. Y. Filed Jan. 5, 1921. Serial No. 435,276. Term of patent 3½ years.



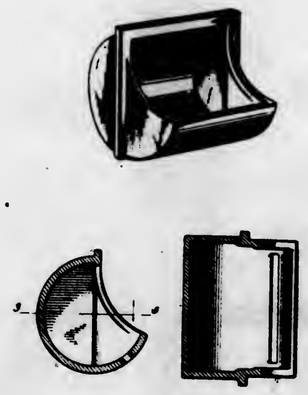
The ornamental design for an automobile lamp as shown.

58,777. BODY FOR ROAD-GRAVELERS. FENTON A. LEICHER, Luverne, Minn. Filed Feb. 8, 1921. Serial No. 443,469. Term of patent 14 years.



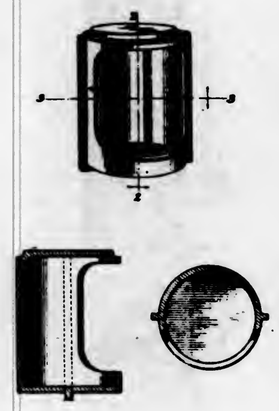
The ornamental design for a body for road gravelers, as shown.

58,778. TIRE-TREAD. ABRAHAM E. LICHTMAN, New York, N. Y. Filed Mar. 3, 1921. Serial No. 449,545. Term of patent 14 years.



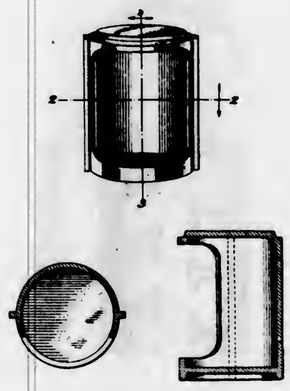
The ornamental design for a tire tread as shown.

58,779. CARVER-FORK. JOHN H. LICHERT, Evanston, Ill., assignor to Kit-Chin-Kit Corporation, Evanston, Ill., a Corporation of Illinois. Filed Mar. 5, 1920. Serial No. 363,576. Term of patent 14 years.



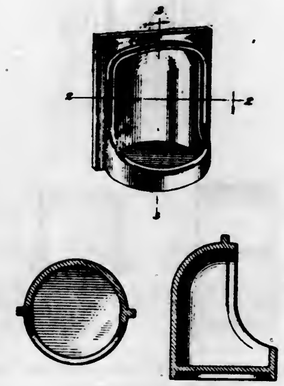
The ornamental design for a carver fork as shown.

58,780. WALL-RECEPTACLE. HARRY D. LILLIBRIDGE, Zanesville, Ohio, assignor to American Encaustic Tiling Co., Ltd., Zanesville, Ohio, a Corporation of New York. Filed Feb. 4, 1921. Serial No. 442,544. Term of patent 14 years.



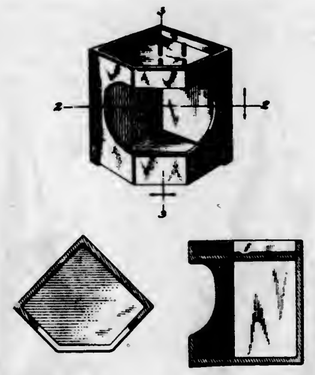
The ornamental design for a wall receptacle, as shown.

58,781. WALL-RECEPTACLE. HARRY D. LILLIBRIDGE, Zanesville, Ohio, assignor to American Encaustic Tiling Co., Ltd., Zanesville, Ohio, a Corporation of New York. Filed Feb. 4, 1921. Serial No. 442,545. Term of patent 14 years.



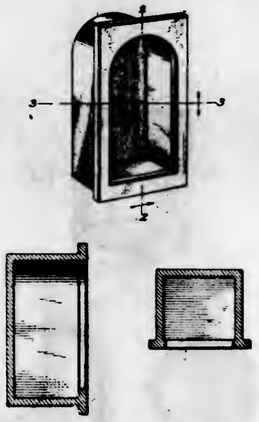
The ornamental design for a wall receptacle, as shown.

58,782. WALL-RECEPTACLE. HARRY D. LILLIBRIDGE, Zanesville, Ohio, assignor to American Encaustic Tiling Co., Ltd., Zanesville, Ohio, a Corporation of New York. Filed Feb. 4, 1921. Serial No. 442,546. Term of patent 14 years.



The ornamental design for a wall receptacle, as shown.

58,783. WALL-RECEPTACLE. HARRY D. LILLIBRIDGE, Zanesville, Ohio, assignor to American Encaustic Tiling Co., Ltd., Zanesville, Ohio, a Corporation of New York. Filed Feb. 4, 1921. Serial No. 442,547. Term of patent 14 years.



The ornamental design for a wall receptacle, as shown.

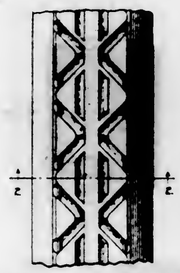
58,784. WALL CORNER-RECEPTACLE. HARRY D. LILLIBRIDGE, Zanesville, Ohio, assignor to American Encaustic Tiling Co., Ltd., Zanesville, Ohio, a Corporation of New York. Filed Feb. 4, 1921. Serial No. 442,548. Term of patent 14 years.

The ornamental design for a wall corner receptacle, as shown.

58,785. WALL-RECEPTACLE. HARRY D. LILLIBRIDGE, Zanesville, Ohio, assignor to American Encaustic Tiling Co., Ltd., Zanesville, Ohio, a Corporation of New York. Filed Feb. 4, 1921. Serial No. 442,549. Term of patent 14 years.

The ornamental design for a wall receptacle, as shown.

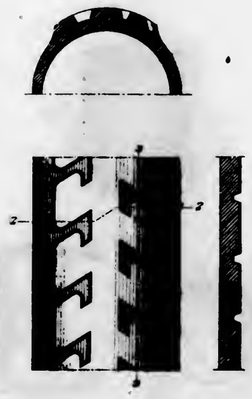
58,786. COLLAR-HOLDER. HENRY C. LLUFRIO, Providence, R. I. Filed Apr. 12, 1921. Serial No. 460,813. Term of patent 3½ years.



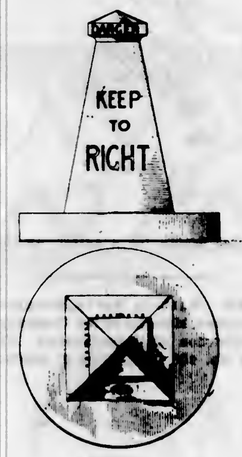
The ornamental design for a collar holder, as shown.

58,787. DOLL. ALICE NE COLA LUDWIG, Markville, Minn. Filed May 4, 1921. Serial No. 466,706. Term of patent 7 years.

The ornamental design for a doll, as shown.

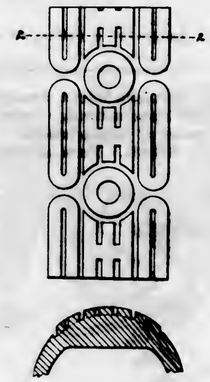


58,788. TIRE-TREAD. EDWIN F. LUMBER, Detroit, Mich., assignor to Morgan & Wright, a Corporation of Michigan. Filed Mar. 5, 1921. Serial No. 450,098. Term of patent 14 years.



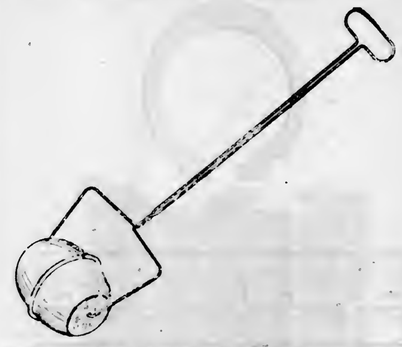
The ornamental design for a tire tread, as shown.

58,789. TIRE. ROBERT W. LYONS, Jefferson, Wis. Filed Apr. 12, 1921. Serial No. 460,809. Term of patent 7 years.



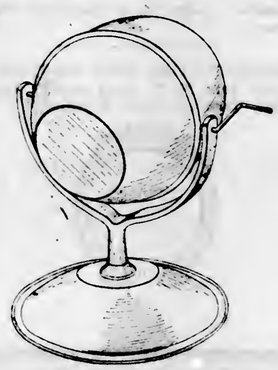
The ornamental design for a tire as shown.

58,790. STREET-LIGHTING DEVICE. HUGH J. MCGEE, Seattle, Wash. Filed Jan. 24, 1921. Serial No. 439,699. Term of patent 3½ years.



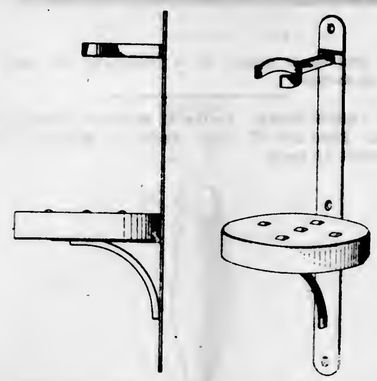
The ornamental design for a street lighting device as shown.

58,791. VEHICLE-TIRE. PATRICK J. MCHUGH, Cincinnati, Ohio. Filed Mar. 17, 1921. Serial No. 453,161. Term of patent 14 years.



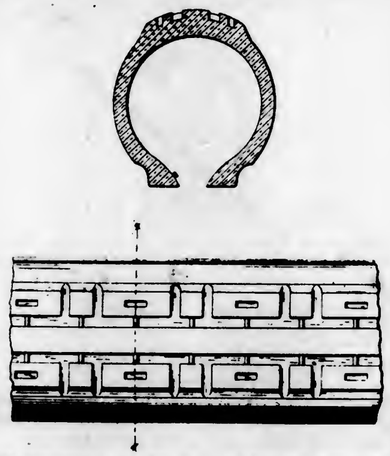
The ornamental design for a vehicle tire, as shown.

58,792. TOY. JOHN MAIER and THURMAN RICE, Canton, Ohio. Filed Apr. 29, 1921. Serial No. 465,540. Term of patent 14 years.



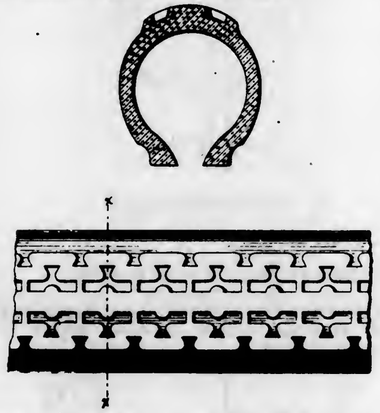
The ornamental design for a toy, as shown.

58,793. TOY. JOHN MAIER and THURMAN RICE, Canton, Ohio. Filed Apr. 29, 1921. Serial No. 465,541. Term of patent 14 years.



The ornamental design for a toy, as shown.

58,794. TELEPHONE-SUPPORT. LOUIS MAISEL, Buffalo, N. Y. Filed Jan. 22, 1920. Serial No. 353,338. Term of patent 14 years.

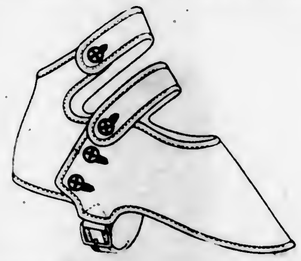


The ornamental design for a telephone support as shown.

58,795. PNEUMATIC-TIRE SHOE OR TREAD. JAMES MARTIN, New York, N. Y. Filed Feb. 10, 1921. Serial No. 444,049. Term of patent 3½ years.

The ornamental design for a pneumatic tire shoe or tread, as shown.

58,796. PNEUMATIC-TIRE SHOE OR TREAD. JAMES MARTIN, New York, N. Y. Filed Jan. 27, 1921. Serial No. 440,507. Term of patent 3½ years.



The ornamental design for a pneumatic tire shoe or tread, as shown.

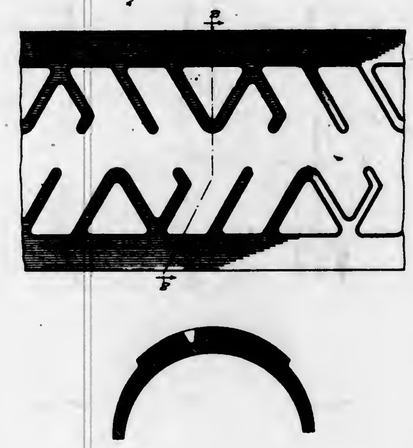
58,797. SHOE-HORN. JAMES N. MAYHEW, Minneapolis, Minn. Filed Dec. 27, 1920. Serial No. 433,491. Term of patent 14 years.

The ornamental design for a shoe horn, as shown.

58,798. GAITER. WALLACE METTS, Stoughton, Mass., assignor to Kingman Manufacturing Company, Stoughton, Mass., a Corporation of Massachusetts. Filed Mar. 28, 1921. Serial No. 456,484. Term of patent 7 years.

The ornamental design for a gaiter, as shown and described.

58,799. GAITER. WALLACE METTS, Stoughton, Mass., assignor to Kingman Manufacturing Company, Stoughton, Mass., a Corporation of Massachusetts. Filed Mar. 28, 1921. Serial No. 456,486. Term of patent 7 years.



The ornamental design for a gaiter, as shown and described.

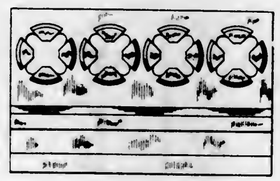
58,800. GAITER. WALLACE METTS, Stoughton, Mass., assignor to Kingman Manufacturing Company, Stoughton, Mass., a Corporation of Massachusetts. Filed Mar. 28, 1921. Serial No. 456,487. Term of patent 7 years.

The ornamental design for a gaiter, as shown and described.

58,801. TIRE-TREAD. LEROY E. MEYER, Cuyahoga Falls, Ohio, assignor to The Firestone Tire and Rubber Company, Cleveland, Ohio, a Corporation of Ohio. Filed Jan. 5, 1921. Serial No. 435,282. Term of patent 14 years.

The ornamental design for a tire tread, as shown.

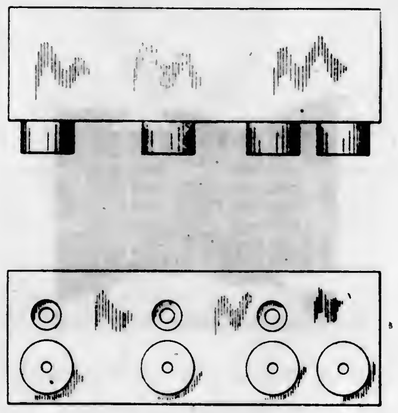
58,802. LACE. FELIX MEYER, New York, N. Y., assignor to Blanck & Company, Inc., New York, N. Y., a Corporation of New York. Filed Apr. 15, 1921. Serial No. 461,701. Term of patent 3½ years.



The ornamental design for lace as herein shown and described.

58,803. LACE. FELIX MEYER, New York, N. Y., assignor to Blanck & Company, Inc., New York, N. Y., a Corporation of New York. Filed Apr. 15, 1921. Serial No. 461,702. Term of patent 3½ years.

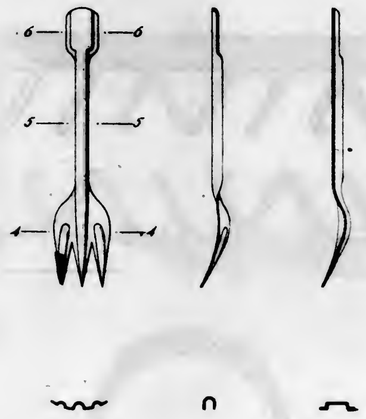
The ornamental design for lace as herein shown and described.



58,804. INSULATOR-SUPPORT FOR ELECTRICAL HEATING ELEMENTS. FREDERICK W. MOFFAT, Weston, Ontario, Canada. Filed Dec. 15, 1920. Serial No. 430,981. Term of patent 14 years.

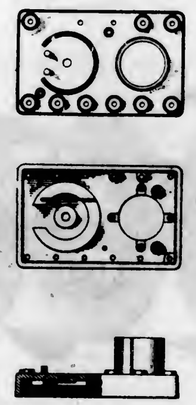
The ornamental design for an insulator support for electrical heating elements, as shown.

58,805. INSULATOR-PORCELAIN FOR ELECTRIC OVENS. FREDERICK W. MOFFAT, Weston, Ontario, Canada. Filed Dec. 15, 1920. Serial No. 430,982. Term of patent 14 years.



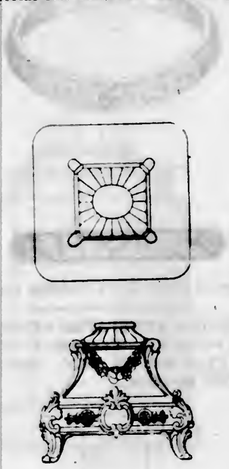
The ornamental design for an insulator porcelain for electric ovens, as shown.

58,806. INSULATOR-PORCELAIN FOR ELECTRIC OVENS. FREDERICK W. MOFFAT, Weston, Ontario, Canada. Filed Dec. 15, 1920. Serial No. 430,983. Term of patent 14 years.



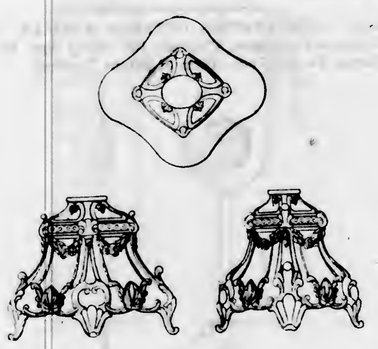
The ornamental design for an insulator porcelain for electric ovens, as shown.

58,807. PAPER FORK. GEORGE P. MALLORY, Yorklyn, Del., assignor to Sanitary Products Corporation of America, Philadelphia, Pa., a Corporation of Virginia. Filed Jan. 5, 1920. Serial No. 349,615. Term of patent 14 years.



The ornamental design for a paper fork as shown.

58,808. INSTRUMENT-MOUNT FOR RADIOPANEL. ALFRED P. MORGAN, Montclair, N. J. Filed May 23, 1921. Serial No. 471,987. Term of patent 14 years.



The ornamental design for an instrument-mount for radiopanel, as shown.

DECISIONS

OF THE

COMMISSIONER OF PATENTS

AND OF

UNITED STATES COURTS IN PATENT CASES.

DECISIONS OF THE U. S. COURTS.

U. S. Circuit Court of Appeals—Second Circuit.

SMITH-KLINE & FRENCH CO. *v.* AMERICAN DRUGGISTS SYNDICATE.

Decided April 27, 1921.

[278 Fed. Rep., 84.]

1. TRADE-MARKS AND TRADE-NAMES—RED BAND WITH INITIAL HELD NOT INFRINGED BY RED PARALLELOGRAM WITH DIFFERENT INITIALS.

Plaintiff's trade-mark for aspirin, which, as registered, consisted of a red band around the box, on which band plaintiff's initials were printed, the representation of the box being expressly disclaimed as part of the trade-mark, is not infringed by defendant's trade-mark for aspirin, which consisted of a red parallelogram on which the name of the drug was printed and above the center of which was a red half-circle containing defendant's initials.

2. SAME—COLOR OF PAPER ALONE CANNOT BE CLAIMED AS TRADE-MARK.

One cannot have a trade-mark monopoly in the color of paper alone.

3. SAME—UNFAIR COMPETITION HELD NOT SHOWN BY USE OF SOMEWHAT SIMILAR PACKAGE.

That, while plaintiff was using a flat paper box on which its red band trade-mark was placed, defendant adopted as a container for the same drug a green enameled tin box on which its red parallelogram trade-mark was placed does not show unfair competition by defendant after plaintiff had begun to use a container similar to defendant's, though there was evidence that on occasions when red band aspirin, by which name plaintiff's product had been known, was asked for, defendant's product was sold.

APPEAL from the District Court of the United States for the Eastern District of New York.

Suit by the Smith-Kline & French Company against the American Druggists Syndicate for infringement of a registered trade-mark and for unfair competition. Decree for plaintiff, and defendant appeals. Reversed.

Messrs. Hauff & Warland (*Mr. John C. Tomlinson* and *Mr. William E. Warland* of counsel) for appellant.

Mr. Julian S. Wooster (*Mr. Frank B. Fox*, *Mr. Henry N. Paul, Jr.*, and *Mr. Joseph C. Fraley* of counsel) for the appellee.

Before WARD, HOUGH, and MANTON, circuit judges.

MANTON, *Cir. J.*:

On the 19th of December, 1918, the appellee filed in the Patent Office of the United States, an application for a registered trade-mark for aspirin tablets, and on September 23, 1919, a certificate of registration, No. 126,617, was granted. The mark adopted and used was a red-colored band with initials. The representation of the box formed no part of the mark. In the affidavit, the trade-mark is said to have been used continuously since March 1, 1917. The trade-mark is applied and affixed to the packages containing the goods by placing thereon a printed label, on which the mark is shown with the initials "S. K. & F." across the red band.

On October 24, 1916, the appellant obtained a certificate of registration, No. 113,541, of its trade-mark. It was registered in the same class as the appellee's. The mark consists of a label, a semicircle; there being printed on the label the letters "A. D. S." in white. The appellant and appellee are manufacturers of and dealers in drugs and pharmaceutical supplies. Among the variety of goods which each manufactures and sells are aspirin tablets. The claim of infringement and unfair competition arises from the use of the mark on the box or package which is used by the appellant in marketing its goods. The appellant adopted its label in 1907, and has continuously used it on many of its goods ever since. The body of the label so used was in white, or a color approaching white, with the name of the article printed in the same color upon a red background, consisting in some cases of a rectangle, and in some others of a red band or stripe, and over the center of this red block was a red semicircle, upon which was printed in the same colors as the lettering on the band, the letters "A. D. S." Such labels were used on a great variety of its products, and the sales between the year 1912 and the date of the trial of this action amounted to $4,300,000, or about 2,500,000 dozen packages.

On February 27, 1917, the Bayer patent on aspirin expired, and both the appellant and appellee entered the field in the manufacture and sale of aspirin tablets. The appellee marketed its aspirin tablets in a paper box with a solid red band around it. The record is clear that, when it did so, it knew of the extensive use of the label by the appellant. It was prior to January, 1919, when the appellant decided to put aspirin on the market in small retail tin containers. It then contracted for such tin packages with the Metal Package Corporation. The trade-mark of the appellant is substantially the same as

that which has been used by it on its labels for a long period prior. The box came on the market June 5, 1919. In either March or April, 1919, the appellee decided to use a package of similar size, duplicating what had previously been adopted by the appellant in marketing its aspirin. On July 16, 1919, after the appellant had obtained its tin boxes, the appellee placed an order with a can manufacturer adopting the appellee's tin box. It placed its trade-mark thereon and then commenced the sale of its aspirin in such packages. Its claim here is that the appellant has infringed its trade-mark and that, in selling aspirin tablets in such packages with the label or mark used by the appellant thereon, it is engaged in unfair competition, resulting in damages to the appellee.

(1) We think it was error to hold that the appellant has infringed appellee's trade-mark. The trade-mark granted shows a rectangular box with a band of about one-third the width of the box, with the initials "S. K. & F." running diagonally on the band. The statement in the Patent Office contains the following: "The representation of the box forms no part of the mark." All that the trade-mark shows is a red band with the appellee's initials on it. The form of the box having been disclaimed, there is nothing to show the size or shape of the band, and the appellee has made the initials on the band an essential and integral part of such band. It is stated that—

the description and drawing presented truly represents the trade-mark sought to be registered.

The appellant's red mark is different in sufficient identifying respects. It is a solid red stripe or parallelogram, instead of a band proper. It has above the center of the band constituting a part of it a red semicircle about one-third of the length of the red background, and of a height about equal to the width of the stripe. The initials "S. K. & F." are absent. The word "aspirin" appears, and, in the semicircle, the letters "A. D. S." In no sense can it be said that the appellant's mark has a "band." The stripe of the appellant's does not go to the edge of the box. The band of the appellee goes around and encircles the box. The registered trade-mark which the appellee possesses must be limited to the specific design shown. The mere color may be impressed in a particular design and constitute a valid trade-mark, such as a circle, square, triangle, cross, or star. (*Leschen Rope Co.* v. *Broderick & Bascom Rope Co.*, 201 U. S., 166; 26 Sup. Ct., 425; 50 L. Ed., 710.) But with a parallelogram and not a band used, and without the initials of the appellee, but with prominent use of the initials of the appellant in the semicircle constructed above the parallelogram of the appellant and attached thereto, such would not constitute a use of the appellee's trade-mark. (*Schlitz Brewing Co.* v. *Houston Ice Co.*, 250 U. S., 28; 39 Sup. Ct., 401; 63 L. Ed., 822.)

(2) In the Schlitz case the manufacturer of beer claimed the exclusive right to use brown bottles with brown labels. It was held there that the adoption by a competitor may contribute to a wrongful deception, if combined with an imitative inscription, but that, where the label was dissimilar to the plaintiff's in shape, script, meaning, and mode of attachment, it could not be said to add appreciably to the deception which might arise from the brown label or bottle.

But it is true that the unlawful imitation must be what achieves the deception, even though it could do so only on the special background lawfully used.

Using a green color in soap, or on a wrapper or box of soap cannot be enjoined. (*Omega Oil* v. *Weschler*, 35 Misc. Rep., 441; 71 N. Y. Supp., 983.) One cannot have a trade-mark monopoly in the color of paper alone. (*Lalance & Grosjean Mfg. Co.* v. *Nat. Enameling & Stamping Co.*, (C. C.,) 109 Fed., 317.) The appellee's aspirin has been called the "red band" aspirin. It therefore claims the exclusive right to use the package with the red band upon it and call it "red band" aspirin. But to use this name is merely descriptive of the appellee's mark, which the appellant does not infringe.

(3) Nor do we think that this record discloses a case of unfair competition. Prior to the adoption of a metal box, the appellee used a paper package. The paper box was thinner than the tin box. It was flat, with sharp square corners. The color was white, with a red band. The appellant had a greenish white enamel on its tin box. It had rounded corners and a convex cover, and the only point of resemblance is that on both boxes there was the red color of the label or mark. But when the appellee came into the market, and adopted the tin box, it did so after the appellant's adoption of such box. The appellee accepted the original design as selected by the appellant. It was a box of the same material, same size and shape, having the same general color scheme. The lettering was in many respects identical. The appellant placed its mark upon it, which consisted of a parallelogram and a semicircle at the top connected therewith, and its initials "A. D. S." on the semicircle. The appellee adhered to its initials placed across the red band. The appellant is enjoined from the use of the tin box. There could be no confusion between the packages by the ordinary observer. If there be an imitation or attempt to imitate, we think the appellee made the attempt. With full knowledge of the appellant's use of the red color and its label, the appellee adopted a red band as a trade-mark. It then, after the appellant had entered the field in using the tin box, chose a tin box resembling closely the shape and size of the appellant's, and placed its trade-mark thereon, and proceeded in competition in the sale of aspirin tablets.

We think by no possibility could the ordinary observer be confused between the appellee's and appellant's boxes and the marks placed thereon. Whatever confusion may have resulted was brought about by the appellee's imitation and selection of the type of tin box used by the appellant. There are three incidents which are called to our attention as evidence of confusion between the containers of the appellee and appellant. The first was a decoy order, giving appellant for "red band" aspirin, and which was filled by sending the appellant's product. The second was found on exhibition, a large box, on a druggist's counter, with three containers of appellant's aspirin and six containers of appellee's therein. The third is when purchases of aspirin were made at two retail drug stores by employees of the appellee who, when they purchased, merely asked for "red band" aspirin, and were given aspirin tablets of the appellant. The circumstances which led up to each of these instances, do not justify the claim of confusion. Mere similarity is not, as a matter of law, conclusive evidence of intention to deceive. Such intent must be inferred as a matter of fact from similarity. Form, color, and general appearance may be considered. The greater the number of points of similarity, the stronger is the inference of an intentional imitation with intent to deceive. But with the well-defined marks of each of the litigants upon the red stripe across the face of each mark we think it unlikely that the ordinary observer would be mistaken or that deception was likely. (*Coats* v. *Merrick Thread Co.*, 149 U. S., 562; 13 Sup. Ct., 966; 37 L. Ed., 847.)

The appellant in its answer filed a counterclaim and asked for affirmative injunctive relief. The reasons which we have assigned for denying relief to the appellee hold with equal force as against the claim of the appellant, and for the same reasons the appellant cannot succeed.

Decree reversed.

U. S. Circuit Court of Appeals—Second Circuit.

SUPERIOR SKYLIGHT CO., INC., *v.* AUGUST KUHNLA, INC., *et al.*

Decided May 13, 1921.

[273 Fed. Rep., 482.]

1. PATENTS—ELEMENT ADDED TO AVOID ANTICIPATION CANNOT BE DROPPED TO ESTABLISH INFRINGEMENT. When an applicant for a patent to cover a new combination is compelled, by rejection or submission, to narrow his claim by the introduction of a new element, he cannot, after issue of the patent, broaden his claim by dropping such element.
2. SAME—NO. 1,009,502, FOR SKYLIGHT, NOT INFRINGED. The Goldman patent, No. 1,009,502, for a skylight, having openings to open automatically in case of fire to allow the escape of smoke, *Held* not infringed.
3. SAME—EQUIVALENT PART MUST PERFORM THE SAME FUNCTION IN SUBSTANTIALLY THE SAME MANNER. Within the rule of equivalents, the thing thought to be the equivalent must be shown to perform the same function and in substantially the same manner as the thing of which it is alleged to be the equivalent.

APPEAL from the District Court of the United States for the Eastern District of New York.

Suit in equity by the Superior Skylight Company, Incorporated, against August Kuhnla, Incorporated, and others. Decree for defendants, and complainant appeals. Affirmed.

For opinion below, see 265, Fed. 282.

Messrs. Hauff & Warland, (*Mr. William E. Warland* of counsel) for appellant.

Mr. Richard B. Cavanagh (*Mr. J. Granville Meyers*, *Mr. R. B. Cavanagh*, and *Mr. James A. Koehl* of counsel) for appellees.

Before ROGERS, HOUGH, and MANTON, Circuit Judges.

MANTON, *Cir. J.*:

Letters Patent No. 1,009,502 were issued to Barney Goldman, the assignor of the appellant. The patent is for a skylight. It is intended primarily to be used on theaters and buildings where large audiences congregate. It is so designed as to operate automatically, thereby opening a number of apertures located in the frame of the skylight. In this way the smoke and flames are drawn to the skylight, avoiding the suffocation of the people gathered in the building. The skylight is usually built to comply with the laws of localities as to size.

Claims 1 and 2 of the patent sued on are as follows:

1. A skylight comprising a frame projecting from the roof of a building and having an opening with an inclined jamb, and provided with an offset at the top of the jamb, a cover pivoted to the lower part of the jamb, means connected to the cover for securing the cover on to the jamb, and means attached to the said connection, for automatically releasing the cover to swing downwardly to its open position.
2. A skylight comprising a frame projecting from the roof of a building and having an opening with an inclined jamb, and provided with an inclined offset at the top of the jamb, a cover pivoted to the lower part of the jamb, a flexible connection operatively secured to the cover for holding the cover on to the jamb, a fusible link attached to and situated between the end of the connection and the cover, for automatically releasing the cover to swing downwardly to its open position.

The frame of the skylight has a number of apertures, and to each lower portion of the opening is pivoted a cover, which is held closed by means of one or more wire ropes or chains connected to the upper portion of the cover, and the ropes may be operated from a position below the skylight. Each of these ropes has connected thereto a link of fusible metal. When closed, the cover is positioned at an inclined angle; the idea being that when any of the ropes or chains are released, or any of the fuses melt, the cover will, by gravity, fall to an open position.

The appellee the Freel Investing Company is the owner of the Strand Theater, at Fulton street and Rockwell place, Brooklyn, and it is upon this building that the skylight which the appellant claims infringes its patent was used. The appellee August Kuhnla, Incorporated, is the manufacturer of the skylight. The appellee Edward Keough is the manager of the theater. The appellee August Kuhnla, Incorporated, manufactures under the patent issued to Joseph A. Peterman, No. 1,320,568, granted November 4, 1919, for a sash-operating mechanism. This ventilator is of the large type, with a door-opening having vertical jambs; the doors are connected by ordinary strap-hinges to the sills of the openings. When closed, the door occupies a vertical position, abutting or striking against the vertical jambs. The doors are simultaneously operated by a series of rods, all connected with a collar on an upright post. It opens very much as an umbrella. The vertical post is of metal, located centrally within the skylight, and upon the post there is a tubular collar. This tubular collar has pivotally connected therewith the inner ends of a series of heavy radiating metal rods, the outer ends of which are pivotally connected with the center or

middle portion of the respective doors. The doors are normally held closed in the vertical position when the collar is elevated and held suspended near the top of the center vertical post. There is attached a restraining-rope. When this rope is released, as by the melting of a fusible link, the collar automatically, by the weight or thrust, or both, of the rods, starts its downward travel on the post, and the pusher thrust, together with the weight, directs a positive outward pressure against the connecting doors and places them in an open position. When the doors are opened, the collar on the central post rests at the foot of the post.

(1) The defenses interposed are that there is a want of invention, because of the state of the prior art, and that there is no infringement. When application was made by the appellant for a patent originally, five claims were presented. Not any of these claims were limited to a structure wherein the opening was provided with vertical or inclined jambs, and, when the claims were allowed, it was for an inclined jamb. Further, by his second amendment, the applicant limited four of his claims for a frame projecting from the roof of the building. We must therefore consider the patent within the scope of its claim as allowed by the Patent Office. (*Minerals Separation Co.* v. *Butte Mining Co.*, 250 U. S., 336; 39 Sup. Ct., 496; 63 L. Ed., 1019.) For when an applicant for a patent to cover a new combination is compelled by rejection or submission to narrow his claim by the introduction of a new element, he cannot, after the issue of the patent, broaden his claim by dropping the element which he was compelled to include in order to secure his patent. (*Shepard* v. *Carrigan*, 116 U. S., 593; 6 Sup. Ct., 493; 29 L. Ed., 723.)

(2) We think that the appellee's structure does not infringe. The president of the appellant corporation, in testifying as to the construction and operation of its skylight, made under the patent in suit, said that on top of the curb on the roof is a frame with a series of openings; each opening has inclined jambs with a roof on, and in that jamb is a door or doors hinged at the bottom of each door. No weights are necessary. He said the opening of the inclined jamb at a 43-degree angle guards against the storm or wind preventing it from opening, and it is for this reason he provides an inclined jamb, as well as an inclined position for the doors. In testifying as to the appellee's skylight, he said that—

> The weight of the center part, as soon as that is released, being itself on a vertical line, she falls down, and that drop from falling, that opens the door; that is, the weight.

The particular skylight which is claimed to infringe, he testified, occupied the vertical position, and further:

> Q. And you found that they were intended to be opened by the weight of those rods plus that runner on that vertical standard? A. That is what I found.

In the patent in suit there are inclined jambs, and the doors are positioned in an inclined position. In the appellee's structure, there are no inclined jambs. The shutters are in a vertical position, and are started by the impulse of the weight of the rods, when the collar supporting them on the vertical post drops. The appellee's device does not have a rope control, as does the appellant's. In the appellant's device, a rope running to each door controls a series of doors, and it is when, by the melting of the fusible link, the ropes are released that the shutters drop of their own weight; this pursuant to gravity alone. The control of the appellee's structure is by rigid rods, and it is impossible to open any shutter independently, without releasing one of the rods by disconnection. It requires the weight of the rods or the thrust of the same to open the door in appellee's structure. The appellant concedes this difference, but it contends that the rigid connecting-rods of appellee's structure attain the same function and the same result as the appellant's inclined jamb, and maintains that in this sense they are the equivalent of the inclined jamb. But it is plain that the appellee's connecting-rods are not jambs in the ordinary acception of that term. They are not side posts or sides of a door or window, as the word "jamb" is defined by the dictionaries:

> A side or vertical piece of any opening or aperture in a wall, such as a door, window, or chimney, which helps to bear the lintel or other member overhead, serving to sustain or discharge the superincumbent weight of the wall.—*Century Dictionary.*

These rods are movable and slidable, and are not stationary, as a jamb is. The rods exerted a driving weight to force the vertical door outward and downward, and the appellant's inclined jambs are stationary, which act as stops to hold the appellant's door tilted outward or overbalanced, so that, when the doors are released, they will, of their own weight and without any action whatever on the part of the inclined jambs, drop down. While it is not necessary, to make out a case of infringement, that the arrangement which infringes performs the same service, still it must produce the same results in substantially the same way. (*Werner* v. *King*, 96 U. S., 218; 24 L. Ed., 613.) Where each element is one of the operated means, the identity depends, not merely upon the function performed, but the manner in which it is performed. (*U. S. Light & Heat Corp.* v. *Safety Car H. & L. Co.*, (C. C. A.,) 261 Fed. 915; *Imperial Bottle Cap & Mach. Co.* v. *Crown Cork & Seal Co.*, 139 Fed., 312; 71 C. C. A., 442.)

3. Within the rule of equivalents, the thing thought to be the equivalent must be shown to perform the same function and to do it in substantially the same manner as the thing of which it is alleged to be the equivalent. Applying this rule to the appellee's structure and its operation, we think it is clear that there was no infringement.

Decree affirmed.

ADJUDICATED PATENTS.

(U. S. C. C. A. N. J.) The Wooster patent, No. 933,011, for belting, *Held* void for anticipation. *Duryea Mfg. Co.* v. *Agrippa Mfg. Corporation*, 273 F. R., 522.

(U. S. C. C. A. N. Y.) The Goldman patent, No. 1,009,502, for skylight. *Held* not infringed. *Superior Skylight Co.* v. *August Kuhnla, Inc.*, 273 F. R., 482.

(U. S. C. C. A. N. Y.) The Knapp patent, No. 44,480, for design for candles, *Held* invalid for want of invention. *Knapp* v. *Will & Baumer Co.*, 273 F. R., 380.

(U. S. C. C. A. N. Y.) The Fuller reissue patent, No. 13,749, for paper-making machine. *Held* valid and infringed. *Tompkins-Hawley-Fuller Co. v. Holden*, 273 F. R., 424.

Adverse Decision in Interference.

PATENT No. 1,340,907.

On August 9, 1921, a decision was rendered that John E. Wuhlfeld was not the first inventor of the subject-matter covered by claim 2 of his Patent No. 1,340,907, subject, "Baffle-walls," and no appeal having been taken within the time allowed such decision has become final.

ALPHABETICAL LIST OF PATENTEES

TO WHOM

PATENTS WERE ISSUED ON THE 2D DAY OF AUGUST, 1921.

NOTE.—Arranged in accordance with the first significant character or word of the name. (In accordance with city and telephone directory practice.)

Aalborg, Christian, Pittsburgh, Pa., assignor to Westinghouse Electric & Manufacturing Company. High-voltage disconnecting-switch. No. 1,385,977; Aug. 2; v. 289; p. 3.

Abbott, Jonathan P., Painesville, Ohio. Eaves-trough hanger. No. 1,385,978; Aug. 2; v. 289; p. 3.

ALPHABETICAL LIST OF INVENTIONS

FOR WHICH

PATENTS WERE ISSUED ON THE 2D DAY OF AUGUST, 1921.

NOTE.—Arranged in accordance with the first significant character or word of the name. (In accordance with city and telephone directory practice.)

Abrasion-testing machine. G. S. Blankenhorn. No. 1,386,087; Aug. 2; v. 289; p. 25.
Accelerator, Automatic. J. H. Leitch. (Reissue.) No. 15,170; Aug. 2; v. 289; p. 122.
Adding-machine. H. C. Peters. No. 1,386,021; Aug. 2; v. 289; p. 12.
Adding-machine. H. C. Peters. No. 1,386,022; Aug. 2; v. 289; p. 12.
Aerial ropeway on the single-rope system. H. F. H. Shields. No. 1,386,282; Aug. 2; v. 289; p. 64.
Aeroplanes or dirigible aircraft. Device for cooling the motors of. H. R. Guyot. No. 1,386,493; Aug. 2; v. 289; p. 103.
Agricultural and other wheeled machines, Quick-steering mechanism for. J. J. Frawley. No. 1,386,562; Aug. 2; v. 289; p. 116.
Air-coupling, Automatic. E. L. Horton. No. 1,386,338; Aug. 2; v. 289; p. 75.
Aircraft, Alighting-gear of. H. Bolas. No. 1,386,310; Aug. 2; v. 289; p. 69.
Airplanes, Variable-pitch propeller for. C. L. Parker. No. 1,386,274; Aug. 2; v. 289; p. 62.
Ammonium chlorid, Recovering. E. Piron. No. 1,386,278; Aug. 2; v. 289; p. 63.
Amusement device. F. Stroud. No. 1,386,209; Aug. 2; v. 289; p. 49.
Ankle-stay and arch-support, Combined. A. Posner. No. 1,386,531; Aug. 2; v. 289; p. 111.
Antirattler for window-sashes. P. W. Pick. No. 1,386,024; Aug. 2; v. 289; p. 13.
Antiskidding device for vehicle-wheels. W. H. Snyder. No. 1,386,377; Aug. 2; v. 289; p. 81.
Assembling device. E. R. Berry. No. 1,386,585; Aug. 2; v. 289; p. 121.
Atomizer and vaporizer. I. H. Wilsey. No. 1,386,297; Aug. 2; v. 289; p. 66.
Attaching device. T. O. Peterson. No. 1,386,202; Aug. 2; v. 289; p. 48.
Automatic brake. R. E. Dixon. No. 1,386,242; Aug. 2; v. 289; p. 56.
Automatic lowering-machine. A. D. Heyl. No. 1,386,253; Aug. 2; v. 289; p. 58.
Automatic weighing machine. E. H. Craig. No. 1,386,319; Aug. 2; v. 289; p. 71.
Automobile-buffer, Adjustable. G. A. Lyon. No. 1,386,190; Aug. 2; v. 289; p. 46.
Automobile-buffer, Resilient. G. A. Lyon. No. 1,386,186; Aug. 2; v. 289; p. 45.
Automobile-buffer, Resilient. G. A. Lyon. No. 1,386,191; Aug. 2; v. 289; p. 46.
Automobile bumper or buffer device. G. A. Lyon. No. 1,386,189; Aug. 2; v. 289; p. 45.
Automobile chain and lock. P. H. Spoelstra. No. 1,386,442; Aug. 2; v. 289; p. 93.
Automobile control mechanism. D. C. E. Trainor. No. 1,386,213; Aug. 2; v. 289; p. 50.
Automobile-jack. S. Heymann. No. 1,386,499; Aug. 2; v. 289; p. 104.
Automobile vehicle. C. K. Edwards and A. S. Colling. No. 1,386,557; Aug. 2; v. 289; p. 115.
Automobiles, Starting mechanism for. F. Conrad. No. 1,385,983; Aug. 2; v. 289; p. 4.
Awl. J. Danielson. No. 1,386,320; Aug. 2; v. 289; p. 71.
Awning-fixture. C. H. Talley. No. 1,386,446; Aug. 2; v. 289; p. 94.
Axles, Manufacturing. R. G. Housdorfer. No. 1,385,998; Aug. 2; v. 289; p. 7.
Badge-fastener. F. J. Fehn. No. 1,386,096; Aug. 2; v. 289; p. 27.
Bag-tie. C. C. Henderson. No. 1,386,058; Aug. 2; v. 289; p. 20.
Band-brake. V. R. Carlson. No. 1,386,454; Aug. 2; v. 289; p. 96.
Bath-spray. H. F. Loomis. No. 1,386,518; Aug. 2; v. 289; p. 108.
Bathing apparatus, Disassemblable. F. A. Holmes. No. 1,386,176; Aug. 2; v. 289; p. 43.
Batteries and producing same, Electrode element for galvanic. T. A. Edison. No. 1,386,095; Aug. 2; v. 289; p. 27.
Bearing, Ball-. K. W. Heyman. No. 1,386,570; Aug. 2; v. 289; p. 118.
Bearing for pump-shafts, Water-cooled. A. W. Archer. No. 1,386,219; Aug. 2; v. 289; p. 51.
Bearing, Roller, ball, and other. A. H. Hindle, S. W. Savage, A. B. Dabbs, and A. Liddle. No. 1,386,255; Aug. 2; v. 289; p. 59.
Bearing, Thrust-. J. W. Brown, Jr. No. 1,386,491; Aug. 2; v. 289; p. 102.
Bee-smoker. O. W. Shrader. No. 1,386,283; Aug. 2; v. 289; p. 64.
Beverage-mixer. F. G. Schneider. No. 1,386,280; Aug. 2; v. 289; p. 63.
Beverages or for cooling liquids, Appliance for preparing iced. J. B. Mitchell. No. 1,386,520; Aug. 2; v. 289; p. 109.
Binder, Loose-leaf. J. Schade. No. 1,386,428; Aug. 2; v. 289; p. 91.

Mold: *See*—
Tire-mold.

Mold for micarta tubes, rods, &c. W. H. Kempton. No. 1,386,003; Aug. 2; v. 289; p. 8.
Molded article in laminated form and making the same. R. P. Perry. No. 1,386,276; Aug. 2; v. 289; p. 63.
Molding-machine. W. B. George. No. 1,386,104; Aug. 2; v. 289; p. 29.
Molding Machine for forming finishing-. L. L. Hamilton. No. 1,386,107; Aug. 2; v. 289; p. 29.
Mop or brush. F. H. French. No. 1,386,100; Aug. 2; v. 289; p. 28.
Motion device, Intermittent-. M. L. Parret. No. 1,386,355; Aug. 2; v. 289; p. 78.
Motion, Mechanism for converting rotary into reciprocatory. R. Goldschmidt. No. 1,386,329; Aug. 2; v. 289; p. 73.
Motor: *See*—
Electric starting-motor. Explosion-motor.
Motor-bearing burning-in stand. H. Vatter, Jr. No. 1,386,035; Aug. 2; v. 289; p. 15.
Motor-casing-truck construction. H. J. Murray and W. S. Rugg. No. 1,386,587; Aug. 2; v. 289; p. 121.
Motor mechanism. M. Birkigt. No. 1,386,489; Aug. 2; v. 289; p. 102.
Motor-vehicle wheel. E. B. Trafton. No. 1,386,449; Aug. 8; v. 289; p. 95.
Motors, Controlling system for feed-. G. H. Case. No. 1,386,159; Aug. 2; v. 289; p. 39.
Necktie-form. H. E. Stonge. No. 1,386,140; Aug. 2; v. 289; p. 36.
Neckwear. W. C. Schmidt. No. 1,386,429; Aug. 2; v. 289; p. 91.
Needle-bar-operating mechanism. A. H. De Voe. No. 1,386,323; Aug. 2; v. 289; p. 72.
Needle-threader. B. Couch. No. 1,386,239; Aug. 2; v. 289; p. 55.
Nitrates, Treating undried organic. W. O. Snelling. No. 1,386,439; Aug. 2; v. 289; p. 93.
Nozzle, Rail-lubricator. J. M. Riddle. No. 1,386,426; Aug. 2; v. 289; p. 91.
Nut-fastener. L. Jourdan and A. Trémaux. No. 1,386,259; Aug. 2; v. 289; p. 59.
Oil-cup. A. C. Grunwald. No. 1,386,403; Aug. 2; v. 289; p. 86.
Oil, Distillation of. E. A. Rudigier. No. 1,386,077; Aug. 2; v. 289; p. 23.
Oil, Refining cacao-. J. W. Phelan and E. J. Wall. No. 1,386,527; Aug. 2; v. 289; p. 110.
Oil, Refining cacao-. J. N. Tuttle and J. W. Phelan. No. 1,386,471; Aug. 2; v. 289; p. 99.
Oil, Refining cacao-. E. J. Wall. No. 1,386,476; Aug. 2; v. 289; p. 100.
Oils, Method and apparatus for burning fuel-. C. E. Chapman. No. 1,386,091; Aug. 2; v. 289; p. 26.
Ordnance. A. T. Dawson and G. T. Buckham. No. 1,386,459; Aug. 2; v. 289; p. 97.
Ordnance. A. T. Dawson and G. T. Buckham. No. 1,386,460; Aug. 2; v. 289; p. 97.
Oven-door. M. Thiery. No. 1,386,542; Aug. 2; v. 289; p. 113.
Packing, Expansible. J. J. Fisher. No. 1,386,097; Aug. 2; v. 289; p. 27.
Paper boxes, Making covered. H. B. Smith. No. 1,386,373; Aug. 2; v. 289; p. 81.
Paper closures from milk-bottles, Device for removing. R. C. Groh. No. 1,386,056; Aug. 2; v. 289; p. 19.
Paper feeding and cutting mechanism. L. C. Palmer. No. 1,386,019; Aug. 2; v. 289; p. 11.
Paper or wooden boxes, Covering. O. W. Trilsch. No. 1,386,384; Aug. 2; v. 289; p. 82.
Pectous substances, Production of. B. T. P. Barker. No. 1,386,224; Aug. 2; v. 289; p. 53.
Pencil attachment. E. W. Owen. No. 1,386,526; Aug. 2; v. 289; p. 110.
Phonograph-operating mechanism. A. H. Franke. No. 1,386,099; Aug. 2; v. 289; p. 28.
Picture-machine shutter, Moving-. M. L. Parret. No. 1,386,198; Aug. 2; v. 289; p. 47.
Pin-ticket. C. F. White. No. 1,386,481; Aug. 2; v. 289; p. 100.
Pins and brooches, Safety-catch for. M. H. Le Marr. No. 1,386,574; Aug. 2; v. 289; p. 119.
Pistol, Self-loading. H. Ortgies. No. 1,386,197; Aug. 2; v. 289; p. 47.
Piston and connecting-rod, Engine-. A. W. Wall. No. 1,386,144; Aug. 2; v. 289; p. 36.
Piston connection. E. Hilton and A. Girodat. No. 1,386,254; Aug. 2; v. 289; p. 59.
Piston engine, Double-. H. Junkers. No. 1,386,062; Aug. 2; v 289; p. 20.
Piston for oxygen-compressors. E. Hill. No. 1,386,333; Aug. 2; v. 289; p. 74.
Plaiting device. L. L. Knaur. No. 1,386,180; Aug. 2; v. 289; p. 43.
Planter, Cane-. E. H. Hipple. No. 1,386,407; Aug. 2; v. 289; p. 87.
Pliers, Adjustable wrench-. J. A. Roberts. No. 1,386,365; Aug. 2; v. 289; p. 79.
Pliers, Dental. W. C. Smith. No. 1,386,436; Aug. 2; v. 289; p. 93.
Plow, Reversible. S. Posavac. No. 1,386,363; Aug. 2; v. 289; p. 79.
Plows, Draft for tractor-. L. M. Hoftrup. No. 1,386,336; Aug. 2; v. 289; p. 75.
Popcorn-husking device. J. H. Sissel. No. 1,386,207; Aug. 2; v. 289; p. 49.
Post: *See*—
Indicator-post.
Potassium sulfate and aluminum oxid from alunite or similar material, Producing. J. L. Silsbee. No. 1,386,031; Aug. 2; v. 289; p. 14.
Power-transmission apparatus. A. H. Neuland. No. 1,386,524; Aug. 2; v. 289; p. 109.
Power-transmission system. G. M. Eaton. No. 1,386,987; Aug. 2; v. 289; p. 5.

Shoes and slippers, Cloth. Outing Shoe Company. No. 146,328; Aug. 2; v. 289; p. 171.
Shoes and slippers, Felt. B. E. Bresee. No. 143,677; Aug. 2; v. 289; p. 159.
Shoes, Leather. Edmonds Shoe Company. Nos. 146,302–4; Aug. 2; v. 289; p. 170.
Shoes made wholly or in part of leather. Cotter Shoe Co. No. 146,202; Aug. 2; v. 289; p. 169.
Silk goods in the piece. J. A. Migel, Inc. No. 149,017; Aug. 2; v. 289; p. 175.
Soles and heels for boots and shoes. Lima Cord Sole & Heel Company. No. 145,571; Aug. 2; v. 289; p. 166.
Solvents for waste sewer pipes. Dynamic Chemical Co. No. 146,256; Aug. 2; v. 289; p. 170.
Spreaders, Manure and straw. Litchfield Manufacturing Company. No. 146,123; Aug. 2; v. 289; p. 169.
Sprocket-valve wheel-rims and chain-guides. Babbitt Steam Specialty Co. No. 143,740; Aug. 2; v. 289; p. 160.
Steel, Tool-. Vulcan Crucible Steel Company. No. 126,665; Aug. 2; v. 289; p. 149.
Steels, Ferrous alloy. Halcomb Steel Company. Nos. 144,185–8; Aug. 2; v. 289; p. 161.
Syrups and preserves, &c. Temtor Corn & Fruit Products Co No. 145,179; Aug. 2; v. 289; p. 164.
Tanning extracts. J. S. Young & Company. Nos. 148,473–4; Aug. 2; v. 289; p. 175.
Teas, coffees, food-flavoring extracts, spices. J. H. Van Winkle. No. 143,146; Aug. 2; v. 289; p. 159.
Threads and yarns. Caravel Company. No. 134,113; Aug. 2; v. 289; p. 152.
Tire casings and tubes, Rubber. Achilles Rubber and Tire Co., Inc. No. 146,104; Aug. 2; v. 289; p. 168.
Tire-repair equipment. Haywood Tire & Equipment Company. No. 134,895; Aug. 2; v. 289; p. 153.
Tires and tubes, Rubber. Cupples Company Manufacturers. No. 131,860; Aug. 2; v. 289; p. 152.
Tires, packing, Inner tubes, &c., Vehicle-. Federal Rubber Company. No. 146 898; Aug. 2; v. 289; p. 178.
Tires, reliners, outside tire-sleeves, &c., Vehicle-. Federal Rubber Company. No. 146,884; Aug. 2; v. 289; p. 172.
Tires, reliners, repair-patches, &c., Vehicle-. Federal Rubber Company. No. 146,891; Aug. 2; v. 289; p. 173.
Tobacco, cigars, cigarettes, &c. "Furmac" Turkish-Macedonian Tobacco Company. No. 141,046; Aug. 2; v. 289; p. 156.
Tobacco-working machinery. Universal Tobacco Machine Co. No. 145 048; Aug. 2; v. 289; p. 163.
Tooth-pastes, antiseptic solution, and germicidal disinfectant. Kolynos Company. No. 149,407; Aug. 2; v. 289; p. 176.
Toys, Rubber, composition, textile, celluloid, wooden, paper, and metal. Irokese Trading Corporation. No. 139,973; Aug. 2; v. 289; p. 155.
Transmission-disks, grips, mallets. Federal Rubber Company. No. 146,883; Aug. 2; v. 289; p. 172.
Transmission-disks, grips, mallets. Federal Rubber Company. No. 146,890; Aug. 2; v. 289; p. 173.
Transmission-disks, grips, mallets. Federal Rubber Company. No. 146,897; Aug. 2; v. 289; p. 173.
Valves, cocks, pipe-fittings, nozzles, &c. Lunkenheimer Company. No. 126,941; Aug. 2; v. 289; p. 149.
Vending-machines. Conigum Manufacturing Company. No. 145,739; Aug. 2; v. 289; p. 166.
Vermim-exterminator. Bu Bono Inc. No. 146,107; Aug. 2; v. 289; p. 168.
Wagons and coasters for children. Four-wheeled play-. H. C. White Company. No. 142,681; Aug. 2; v. 289; p. 158.
Waists, overblouses, sport-coats, and skirts. Goldberg & Rosenblatt. No. 146,429; Aug. 2; v. 289; p. 172.
Water-heaters, Gas. Bastian-Morley Co. No. 134,876; Aug. 2; v. 289; p. 153.
Water, Natural Aachener thermal. Aachener Thermalwasser Kaiserbrunnen Aktiengesellschaft. No. 137,060; Aug. 2; v. 289; p. 153.
Wheel-rims, Demountable. Lighting Sales Corporation. No. 147,522; Aug. 2; v. 289; p. 174.
Wine, Rhine. Alsace Lorraine Development and Trading Company. No. 140,241; Aug. 2; v. 289; p. 156.
Woolen and worsted cloth in piece goods. A. C. Gaunt. No. 148,936; Aug. 2; v. 289; p. 175.
Wrenches. E. Schwarz. No. 146,851; Aug. 2; v. 289; p. 172.
Yarns. Home Woolen Mills. No. 147,242; Aug. 2; v. 289; p. 174.
Yarns. A. Hymes. No. 139,777; Aug. 2; v. 289; p. 155.
Yarns, Silk and cotton. J. Contessa. No. 143,744; Aug. 2. v. 289; p. 160.

CLASSIFICATION OF PATENTS

ISSUED AUGUST 2, 1921.

NOTE.—First number—class, second number—subclass, third number—patent number.

2— 11: 1,386,429
93: 1,386,067
4— 26: 1,386,176
30: 1,385,985
5— 48: 1,386,397
56: 1,386,236
8— 6: 1,386,201

ALPHABETICAL LIST OF PATENTEES

TO WHOM

PATENTS WERE ISSUED ON THE 9TH DAY OF AUGUST, 1921.

NOTE.—Arranged in accordance with the first significant character or word of the name. (In accordance with city and telephone directory practice.)

Aeolian Company, The. (See Emmons, Charles L., assignor.)

Abler, Edwin A., Chester, Pa. Doll. No. 1,387,224; Aug. 9; v. 289; p. 321.

Air Reduction Company. (See Walker, George L., assignor.)

Aird, George, North Bay, Ontario, Canada, and W. Aird, San Francisco, Calif. Clamping device. No. 1,387,226; Aug. 9; v. 289; p. 321.

Aird, Wilfred. (See Aird, George and W.)

Akemann, Walther, Essen, assignor to Fried. Krupp, Aktiengesellschaft, Essen-on-the-Ruhr, Germany. Fire-control apparatus particularly intended for naval guns. No. 1,387,440; Aug. 9; v. 289; p. 365.

Aktiebolaget Ljungstroms Angturbin. (See Ljungström, Fredrik, assignor.)

Aktiengesellschaft Brown Boveri & Cie. (See Häberli, F., and Kubler, assignors.)

Alexanderson, Ernst F. W., Schenectady, N. Y., assignor to General Electric Company. Apparatus for producing and distributing electric-current waves of radiofrequency. No. 1,386,830; Aug. 9; v. 289; p. 244.

Allen, Charles J., Moorestown, N. J., assignor to S. L. Allen & Co., Inc. Tractor. No. 1,387,225; Aug. 9; v. 289; p. 321.

Allen, Charles J., *et al.*, executors. (See Allen, Samuel L.)

Allen, Elizabeth R., *et al.*, executors. (See Allen, Samuel L.)

Allen, S. L., & Co. (See Allen, Charles J., assignor.)

Allen, Samuel L., deceased, by S. H. Allen, E. R. Allen, S. J. Allen, and C. J. Allen, executors, Moorestown, N. J. Seed-sowing device. No. 1,387,436; Aug. 9; v. 289; p. 365.

Allen, Sarah H., *et al.*, executors. (See Allen, Samuel L.)

Allen, Susan J., *et al.*, executors. (See Allen, Samuel L.)

Alpert, David A., Beachmont, Mass. Amusement device. No. 1,386,590; Aug. 9; v. 289; p. 195.

Altsitzer, Isadore L., and M. Lismov, Yonkers, N. Y. Gas-heater. No. 1,386,672; Aug. 9; v. 289; p. 211.

American District Telegraph Company. (See Hopkins, Richard M., assignor.)

American Gas Machine Company. (See Hanson, Hans C., assignor.)

American Laundry Machinery Company, The. (See Braley, C. L., and Link, assignors.)

American Laundry Machinery Company, The. (See Brockett, Bluford W., assignor.)

American Laundry Machinery Company, The. (See Waream, C. E., and Braley, assignors.)

American Mine Door Company, The. (See Vignos, Charles, assignor.)

American Tag Company. (See Swett, Arthur H., assignor.)

American Tap Bush Co. (See Rice, Frank E., assignor.)

American Tar Company. (See Price, Charles P., assignor.)

American Taximeter Company, The. (See Karich, Rudolf R., assignor.)

American Telephone & Telegraph Company. (See Watson, Edward F., assignor.)

American Thermophone Company. (See Van Lynden, R. A., Baron, assignor.)

Anable, Frederick S., Brookline, assignor to National Binding Machine Company, Boston, Mass. Strip-serving device. No. 1,386,675; Aug. 9; v. 289; p. 212.

Anchor Cap & Closure Corporation. (See Ramsey, George, assignor.)

Anders, Charles F. P., Urbana, Ill., assignor to E. L. Greenewald, Washington, D. C. Vacuum-bottle. No. 1,387,337; Aug. 9; v. 289; p. 345.

Anderson, Andrew G., Wollaston, assignor to Carr Fastener Company, Cambridge, Mass. Separable fastener. No. 1,387,115; Aug. 9; v. 289; p. 301.

Anderson, Frederick E. (See Rhodes, W. A., and Anderson.)

Anderson, Maurice, Cranston, R. I., assignor to V. E. Black Company. Garment-fastener. No. 1,386,592; Aug. 9; v. 289; p. 195.

Anderson, Robert, New York, N. Y. Link jewelry. No. 1,386,591; Aug. 9; v. 289; p. 195.

Anthony, Joseph W., Lynn, Mass. Leather-folding machine. No. 1,386,676; Aug. 9; v. 289; p. 212.

Anthony, Thomas P., Edgewater Park, N. J., assignor to United States Cast Iron Pipe & Foundry Company. Drying molds. No. 1,386,593; Aug. 9; v. 289; p. 195.

Arms Products Company. (See Post, Truman W., assignor.)

Arvac Manufacturing Company. (See Schaefer, Clemens T., assignor.)

Asbury, Charles H., Post Falls, Idaho. Whiffletree. No. 1,386,673; Aug. 9; v. 289; p. 211.

Asfag Aktiengesellschaft. (See Gebhard, Conrad, assignor.)

Auffurth, Erwin, Jr., and E. Hjerpe, Port Arthur, Tex. Game. No. 1,386,594; Aug. 9; v. 289; p. 195.

Austin, Albert L., Cleveland, Ohio. Electric-terminal connector. No. 1,386,831; Aug. 9; v. 289; p. 244.

Automatic Signal & Sign Company, The. (See Myers, Parke G., assignor.)

Babcock-Davis Corporation. (See Nelson, Albert H., assignor.)

Badger Manufacturing Corporation. (See Hathaway, C. H., Starck, and McEvoy, assignors.)

Baer, Walter C., Toledo, Ohio. Refrigeration apparatus. No. 1,386,753; Aug. 9; v. 289; p. 228.

Bailey, Charles A., Cromwell, Conn. Toy pistol. No. 1,387,095; Aug. 9; v. 289; p. 298.

Bailly, Louis, assignor to The Columbus Oil Engine Company, Columbus, Ohio. Fuel-injector for two-stroke high-compression motors. No. 1,386,832; Aug. 9; v. 289; p. 244.

Balduff, Bruno E., Chicago, Ill., assignor to Western Electric Company, Incorporated, New York, N. Y. Capstan. No. 1,386,677; Aug. 9; v. 289; p. 212.

Ball, Charles F., Peoria, Ill., assignor to The Holt Manufacturing Company, Stockton, Calif. Auto-tractor. No. 1,387,033; Aug. 9; v. 289; p. 285.

Ball, John F., Estep, W. Va. Wire-fence stretcher. No. 1,387,338; Aug. 9; v. 289; p. 345.

Ballantine, William B., assignor to The Empire (Alloy) Steel Corporation, Limited, London, England. Production of metallic alloys. No. 1,386,981; Aug. 9; v. 289; p. 274.

Baltimore Tube Company. (See Morse, Charles S., assignor.)

Banister, Robert H., Anniston, Ala. Tool-holder. No. 1,387,339; Aug. 9; v. 289; p. 345.

Banner Rock Products Company. (See Hall, Charles C., assignor.)

Barber-Colman Company. (See Hathaway, Edgar F., assignor.)

Barber, Louis, and E. L. Filson, assignors to The National Screw and Tack Company, Cleveland, Ohio. Nut-castellating machine. No. 1,387,092; Aug. 9; v. 289; p. 297.

Barnard, Ray D., assignor to R. C. Plant, Minneapolis, Minn. Illumination device. No. 1,386,982; Aug. 9; v. 289; p. 247.

Barnes, John A., assignor to Fowler-Williams Company, Dallas, Tex. Blow-out boots. (Reissue.) No. 15,174; Aug. 9; v. 289; p. 366.

Barnes, S. V. (See Barnes, Willard F., assignor.)

Barnes, Willard F., assignor to S. V. Barnes, Berkeley, Calif. Basket-making machine. No. 1,387,093; Aug. 9; v. 289; p. 297.

Barrett, Charles D., J. E. Myers, and A. O. King, Altoona, Pa. Balanced throttle-valve. No. 1,386,678; Aug. 9; v. 289; p. 213.

Barrett, John L., Chicago, Ill. Steam-economizer. No. 1,387,227; Aug. 9; v. 289; p. 321.

Barron, William L., Newark, N. J., assignor to The Singer Manufacturing Company. Interchangeable needle-guide. No. 1,387,094; Aug. 9; v. 289; p. 297.

Barron, William L., and A. F. Fifield, Newark, N. J., assignors to The Singer Manufacturing Company. Work-holder for sewing-machines. No. 1,387,034; Aug. 9; v. 289; p. 285.

Basler, Norman E., St. Louis, Mo. Rail-antispreading device. No. 1,387,340; Aug. 9; v. 289; p. 345.

Baukhage, Frederick R. (See Collins, W. H., and Baukhage.)

Baule, Arno B., and W. G. Kirchhoff, Canton, Ohio. Operating device for valve-grinders. No. 1,386,674; Aug. 9; v. 289; p. 212.

Baumann, Karl, Urmston, England, assignor to The British Westinghouse Electric and Manufacturing Company Limited. Axial-flow steam-turbine. No. 1,386,983; Aug. 9; v. 289; p. 274.

Baxter, Alexander L., Masury Station, Ohio. Poured-concrete-cement block. No. 1,386,754; Aug. 9; v. 289; p. 228.

Baynard, William H. (See Eddins, S. A., and Baynard.)

Beardmore, Clarence A., assignor of one-half to W. G. Gott, Annapolis, Md. Liquid-level gage for automobile-radiators. No. 1,386,833; Aug. 9; v. 289; p. 245.

Beckert, Albert R., Lynn, Mass., assignor to General Electric Company. Torsion-spring. No. 1,386,834; Aug. 9; v. 289; p. 245.

Begtrup, Frederick L. (See Tower, M. L., and Begtrup.)

Behning, Robert V., Los Angeles, Calif. Hatrack. No. 1,387,341; Aug. 9; v. 289; p. 346.

Bell, Arthur M., Bombay, India, assignor to Taite & Carlton, Westminster, London, England. Continuous automatic fluid-pressure brake for railway and like vehicles. No. 1,387,035; Aug. 9; v. 289; p. 285.

Bell, John H., East Orange, N. J., assignor to Western Electric Company, Incorporated, New York, N. Y. Selective system. No. 1,387,228; Aug. 9; v. 289; p. 321.

Bell, John H., South Orange, N. J., assignor to Western Electric Company, Incorporated, New York, N. Y. Telegraph system. No. 1,386,679; Aug. 9; v. 289; p. 213.

Bell, John H., South Orange, N. J., assignor to Western Electric Company, Incorporated, New York, N. Y. Telegraph system. No. 1,387,229; Aug. 9; v. 289; p. 321.

Bennett, Cyrus E., Buffalo, N. Y. Garment-pocket. No. 1,387,342; Aug. 9; v. 289; p. 346.

Benson, Arthur J., Malden, Mass. Nut-lock. No. 1,387,096; Aug. 9; v. 289; p. 208.

Benson, Edward R., Minneapolis, Minn., and M. S. Crandall, Sioux City, Iowa. Vehicle-dump. No. 1,387,036; Aug. 9; v. 289; p. 285.

Benson, Jean L., Chicago, Ill. Cloth-protecting device. No. 1,386,755; Aug. 9; v. 289; p. 228.

Benson, Matthew P., Troy, and M. M. Wiemer, New York, N. Y. Strap attachment for brushes. No. 1,386,756; Aug. 9; v. 289; p. 229.

Benton, William E., San Francisco, Calif. Toy doll. No. 1,387,097; Aug. 9; v. 289; p. 208.

Berger, Joseph, Utica, N. Y., assignor to Union Special Machine Company, Chicago, Ill. Shaping and seaming garments. No. 1,386,680; Aug. 9; v. 289; p. 213.

Bergman, Frederick, assignor of one-third to A. B. Spach, Chicago, Ill. Blade-holder. No. 1,386,767; Aug. 9; v. 289; p. 229.

Betz, Samuel G., Lewiston, assignor to Standard Steel Works Company, Philadelphia, Pa. Tool-holder. No. 1,387,343; Aug. 9; v. 289; p. 346.

Beyer, Alois. (See Rendle, T. A., and Beyer.)

Binder, John, New York, assignor to International Cork Company, Brooklyn, N. Y. Machine for the manufacture of bottle-closures. No. 1,387,037; Aug. 9; v. 289; p. 285.

Birth, Charles, Kingston, assignor to Wales Adding Machine Company, Wilkes-Barre, Pa. Calculating-machine. No. 1,386,758; Aug. 9; v. 289; p. 229.

Birkett, Ralph, W., Sutton, England. Regenerative counter-propeller for marine vessels. No. 1,386,835; Aug. 9; v. 289; p. 245.

Birkholm, Axel. (See Hall, R. G., and Birkholm.)

Black, V. E., Company. (See Anderson, Maurice, assignor.)

Blake, Charles C., Brookline, Mass. Heel-lasting machine. No. 1,386,681; Aug. 9; v. 289; p. 213.

Blake, William F., Toledo, Ohio. Washing-machine. No. 1,386,682; Aug. 9; v. 289; p. 213.

Blalock, Jesse N., *et al.*, trustees. (See Rockwell, R. I., and Stevens, assignors.)

Bliss, Elmer J., Boston, Mass. Orthopedic last. No. 1,387,038; Aug. 9; v. 289; p. 286.

Boenning, William M., Manitowoc, Wis. Vehicle shock-absorber. No. 1,386,759; Aug. 9; v. 289; p. 229.

Boland, Marion D., Appleton, Ark. Cotton-chopper. No. 1,387,344; Aug. 9; v. 289; p. 346.

Bollinger, Frederick P., assignor of one-half to W. J. Peck, Newark, N. J. Tool for turning crank-pins, &c. No. 1,386,984; Aug. 9; v. 289; p. 275.

Booth, William T., East Orange, N. J., assignor to Western Electric Company, Incorporated, New York, N. Y. Telephone system. No. 1,386,683; Aug. 9; v. 289; p. 214.

Bosch, Carl, Ludwigshafen-on-the-Rhine, Germany, assignor, by mesne assignments, to The Chemical Foundation, Inc. Process and means relating to the production of ammonia. No. 1,386,760; Aug. 9; v. 289; p. 229.

Bowers, George L., Newark, Ohio. Means for securing shoe-tongues and the like. No. 1,386,985; Aug. 9; v. 289; p. 275.

Bowman, Wade W., New York, N. Y. Towel-holder. No. 1,386,761; Aug. 9; v. 289; p. 230.

Bowman, Walter H., Philadelphia, Pa. Artificial tooth. No. 1,386,762; Aug. 9; v. 289; p. 230.

Bradford, Charles M., Boston, Mass., assignor to United Shoe Machinery Corporation, Paterson, N. J. Shoe. No. 1,386,684; Aug. 9; v. 289; p. 214.

Braley, Charles L. (See Waream, C. E., and Braley.)

Braley, Charles L., and G. N. Link, Cincinnati, assignors to The American Laundry Machinery Company, Norwood, Ohio. Heating mechanism for presses. No. 1,387,039; Aug. 9; v. 289; p. 286.

Brandenburg, Francis C., Piqua, Ohio. Tool for dressing emery-wheels. No. 1,387,040; Aug. 9; v. 289; p. 286.

Brandt, Andrew G., Scranton, Pa. Pool-table. No. 1,387,345; Aug. 9; v. 289; p. 346.

Brannigan, George T., assignor to The Connecticut Web and Buckle Company, Bridgeport, Conn. Clasp-stud. No. 1,387,230; Aug. 9; v. 289; p. 322.

Brant, Gilmore, W., Canton, Ohio. Rail-joint box. No. 1,386,685; Aug. 9; v. 289; p. 214.

Bratt, Charles E., and G. Fluck, assignors to Continental Can Company, Inc., Syracuse, N. Y. Can-end-feeding device. No. 1,387,008; Aug. 9; v. 289; p. 208.

Braun, Carl A., Munich, assignor to H. M. Lachmann, R. G. Lachmann, and G. H. Lachmann, Berlin, Germany. Producing cellulose. No. 1,387,441; Aug. 9; v. 289; p. 366.

Brauner, Pincus. (See Rosen, L. W., and Brauner.)

Brenner, D. C. (See Trabue, William, assignor.)

Bretthauer, John H., Westchester, N. Y. Operating sounders. No. 1,386,763; Aug. 9; v. 289; p. 230.

Bricher, Manuel, Pocatello, Idaho. Wrench. No. 1,387,346; Aug. 9; v. 289; p. 347.

Brierley, Frank, Manchester, assignor to Chain Roller Bearing Company Limited, Stockport, England. Roller-bearing. No. 1,386,986; Aug. 9; v. 289; p. 275.

Brinkman, Louis H., Glen Ridge, N. J., assignor to Titeflex Metal Hose Corporation. Flexible tube. No. 1,387,231; Aug. 9; v. 289; p. 322.

Brintzenhofe, Otto, Cleveland, Ohio, assignor to Electric Vacuum Cleaner Company Inc. Switch for electric vacuum-cleaners. No. 1,386,836; Aug. 9; v. 289; p. 245.

Brion, Adolph E. (See Rosen, L. W., and Brauner, assignors.)

British Westinghouse Electric and Manufacturing Company Limited. (See Baumann, Karl, assignor.)

Brockett, Bluford W., Cleveland, assignor to The American Laundry Machinery Company, Cincinnati, Ohio. Workshirt press. No. 1,387,009; Aug. 9; v. 289; p. 298.

Brown, Earl D., Bakersfield, Calif. Frictionless spring. No. 1,387,041; Aug. 9; v. 289; p. 286.

Brown, Howard S., Oasis, Utah, assignor to Pawling & Harnischfeger Company, West Milwaukee, Wis. Excavating-wheel. No. 1,386,987; Aug. 9; v. 289; p. 275.

Brown, Lee, Modesto, Calif. Cranking device for tractors. No. 1,386,837; Aug. 9; v. 289; p. 245.

Broman, Lydia, Minneapolis, Minn. Apron. No. 1,386,595; Aug. 9; v. 289; p. 196.

Brucker, Henry. (See Oliver, J. W., and Brucker.)

Bryant Electric Company, The. (See Loedler, Fred W., assignor.)

Bryden, John A. (See McCutchen, U. R., Bryden, and Hall.)

Buchanan, Charles G., East Orange, N. J. Crusher. No. 1,386,764; Aug. 9; v. 289; p. 230.

Buchner, Max, Hanover, Germany, assignor, by mesne assignments, to The Chemical Foundation, Inc. Producing hydroxids of metals by precipitating metallic salts with ammonia. No. 1,386,920; Aug. 9; v. 289; p. 262.

Buck, Thomas F., New Castle, Pa. Safety-fender for automobiles. No. 1,387,100; Aug. 9, v. 289; p. 298.

Bugbee, Lucian W., assignor to Onepiece Bifocal Lens Company, Indianapolis, Ind. Lens-grinding machine. No. 1,387,232; Aug. 9; v. 289; p. 322.

Bulla, Melbern B., El Paso, Tex. Safety attachment for automatic train-stops. No. 1,387,233; Aug. 9; v. 289; p. 322.

Bullard, Albert M., deceased, by M. R. Bullard, administratrix, Woodstock, N. Y., and J. N. Reynolds, Greenwich, Conn., assignors, by mesne assignments, to Western Electric Company, Incorporated. Controlling system for automatic switching systems. No. 1,386,686; Aug. 9; v. 289; p. 214.

Bullard, Marion R., administratrix. (See Bullard, A. M., and Reynolds.)

Bullis, Frank G., Vancouver, Wash. Spotlight for motor-vehicles. No. 1,387,347; Aug. 9; v. 289; p. 347.

Burgess, C. F., Laboratories. (See Weiss, Howard F., assignor.)

Burgstresser, Abram K., assignor to Norristown Magnesia and Asbestos Co., Norristown, Pa. Pipe-covering and fabric from which pipe-coverings are made. No. 1,387,348; Aug. 9; v. 289; p. 247.

Burke, Andrew J., New Haven, Conn. Tool. No. 1,387,234; Aug. 9; v. 289; p. 322.

Burkhardt, Curt R., Teaneck, N. J. Ridge-saddle. No. 1,387,235; Aug. 9; v. 289; p. 323.

Burlew, Gilderoy O., Newark, N. J. Elastic collar for polishing and grinding wheels. No. 1,386,988; Aug. 9; v. 289; p. 276.

Burnett, Frances H., *et al.*, executors. (See Fahnestock, Ernest B.)

Burnham, Locke H., Pittsfield, Mass., assignor to General Electric Company. Winding for electrical apparatus. No. 1,386,838; Aug. 9; v. 289; p. 246.

Cadoret, Louis A., Pawtucket, R. I. Bobbin-holder. No. 1,386,921; Aug. 9; v. 289; p. 263.

Callomon, Clarence B., South Orange, assignor to Driver-Harris Company, Harrison, N. J. Box for heat-treating metallic articles. No. 1,387,236; Aug. 9; v. 289; p. 323.

Calovi, Primo, assignor, by mesne assignments, to Holdsem Company Inc., New York, N. Y. Composition of matter and producing the same. No. 1,386,022; Aug. 9; v. 289; p. 263.

Campbell, Archibald G., Richmond, England. Wind and weather screen for motorcycles. No. 1,387,349; Aug. 9; v. 289; p. 347.

Campbell, Argyle, assignor to Enterprise Railway Equipment Company, Chicago, Ill. Convertible box-car. No. 1,386,765; Aug. 9; v. 289; p. 230.

Candee, Zenas P., assignor to The Waterbury Farrel Foundry and Machine Company, Waterbury, Conn. Mechanical movement. No. 1,387,101; Aug. 9; v. 289; p. 299.

Canfield, Edwin J. (See Madden, J., and Canfield.)

Capper, Edward C., Prosper, Minn. Automatic fire-alarm device. No. 1,386,923; Aug. 9; v. 289; p. 263.

Capper, Edward C., Prosper, Minn. Goggles. No. 1,386,989; Aug. 9; v. 289; p. 276.

Carlson, Theodore, Stillwater, Wash. Excavating and hoisting apparatus. No. 1,387,042; Aug. 9; v. 289; p. 286.

Carpenter, William J., assignor of one-half to J. J. Jordan, Chicago, Ill. Wrench. No. 1,386,596; Aug. 9; v. 289; p. 196.

Carr Fastener Company. (See Anderson, Andrew G., assignor.)

Carr Fastener Company. (See Carr, Fred S., assignor.)

Carr Fastener Company. (See Carr, Moses F., assignor.)

Carr Fastener Company. (See Larssen, Lars A., assignor.)

Carr, Fred S., Newton, assignor to Carr Fastener Company, Cambridge, Mass. Separable fastener. No. 1,387,102; Aug. 9; v. 289; p. 299.

Carr, Fred S., Newton, assignor to Carr Fastener Company, Cambridge, Mass. Separable fastener. No. 1,387,103; Aug. 9; v. 289; p. 299.

Carr, Fred S., Newton, assignor to Carr Fastener Company, Cambridge, Mass. Fastener. No. 1,387,104; Aug. 9; v. 289; p. 299.

Carr, Fred S., Newton, assignor to Carr Fastener Company, Cambridge, Mass. Separable fastener. No. 1,387,107; Aug. 9; v. 289; p. 300.

Carr, Fred S., Newton, assignor to Carr Fastener Company, Cambridge, Mass. Separable fastener. No. 1,387,108; Aug. 9; v. 289; p. 300.

Carr, Fred S., Newton, assignor to Carr Fastener Company, Cambridge, Mass. Separable fastener. No. 1,387,109; Aug. 9; v. 289; p. 300.

Carr, Fred S., Newton, assignor to Carr Fastener Company, Cambridge, Mass. Fastener. No. 1,387,110; Aug. 9; v. 289; p. 300.

Carr, Fred S., Newton, assignor to Carr Fastener Company, Cambridge, Mass. Fastener. No. 1,387,111; Aug. 9; v. 289; p. 300.

Carr, Fred S., Newton, assignor to Carr Fastener Company, Cambridge, Mass. Fastener. No. 1,387,112; Aug. 9; v. 289; p. 300.

Carr, Fred S., Newton, assignor to Carr Fastener Company, Cambridge, Mass. Fastener. No. 1,387,113; Aug. 9; v. 289; p. 301.

Carr, Fred S., Newton, assignor to Carr Fastener Company, Cambridge, Mass. Fastener. No. 1,387,114; Aug. 9; v. 289; p. 301.

Carr, Fred S., Newton, assignor to Carr Fastener Company, Cambridge, Mass. Separable fastener. No. 1,387,116; Aug. 9; v. 289; p. 301.

Carr, Fred S., Newton, assignor to Carr Fastener Company, Cambridge, Mass. Separable fastener. No. 1,387,117; Aug. 9; v. 289; p. 301.

Carr, Fred S., Newton, assignor to Carr Fastener Company, Cambridge, Mass. Separable fastener. No. 1,387,118; Aug. 9; v. 289; p. 301.

Carr, Fred S., Newton, assignor to Carr Fastener Company, Cambridge, Mass. Separable fastener. No. 1,387,119; Aug. 9; v. 289; p. 301.

Carr, Fred S., Newton, assignor to Carr Fastener Company, Cambridge, Mass. Separable fastener. No. 1,387,120; Aug. 9; v. 289; p. 302.

Carr, Fred S., Newton, assignor to Carr Fastener Company, Cambridge, Mass. Separable fastener. No. 1,387,121; Aug. 9; v. 289; p. 302.

Carr, Fred S., Newton, assignor to Carr Fastener Company, Cambridge, Mass. Separable fastener and means for securing its stud to carrying fabrics. No. 1,387,122; Aug. 9; v. 289; p. 302.

Carr, Fred S., Newton, assignor to Carr Fastener Company, Cambridge, Mass. Separable fastener. No. 1,387,123; Aug. 9; v. 289; p. 302.

Carr, Fred S., Newton, assignor to Carr Fastener Company, Cambridge, Mass. Separable fastener and means for securing its socket to carrying fabrics. No. 1,387,124; Aug. 9; v. 289; p. 302.

Carr, Fred S., Newton, assignor to Carr Fastener Company, Cambridge, Mass. Separable fastener and means for securing its socket to carrying fabrics. No. 1,387,125; Aug. 9; v. 289; p. 302.

Carr, Moses F., Newton, assignor to Carr Fastener Company, Cambridge, Mass. Separable fastener. No. 1,387,126; Aug. 9; v. 289; p. 303.

Cartledge, Cora H., Philadelphia, Pa. Container. No. 1,387,237; Aug. 9; v. 289; p. 323.

Cave, Daniel B., assignor of one-fourth to H. M. George, one-fourth to E. A. Willner, one-eighth to C. P. Peterson, and one-eighth to R. W. Devoe, Lincoln, Nebr. Placer-gold concentrator. No. 1,387,238; Aug. 9; v. 289; p. 323.

Centervall, Hugo, Brooklyn, N. Y. Internal-combustion engine. No. 1,386,766; Aug. 9; v. 289; p. 231.

Chain Roller Bearing Company. (See Brierley, Frank, assignor.)

Chamberlain, Rufus N., Chicago, Ill., assignor to Gould Storage Battery Co., Depew, N. Y. Safety device for storage batteries. No. 1,387,350; Aug. 9; v. 289; p. 348.

Chamnion Ignition Company. (See McDougal, Taine G., assignor.)

Chandler, Hilda F., Chicago, Ill. Table-mat. No. 1,387,239; Aug. 9; v. 289; p. 323.

Chandler, Daniel L., Fitchburg, assignor to Vend-Ads Co., Inc., Worcester, Mass. Soap tablet. No. 1,386,767; Aug. 9; v. 289; p. 231.

Chapin, William R., Indianapolis, Ind. Welding compound. No. 1,387,351; Aug. 9; v. 289; p. 348.

Charters, Ernest D., assignor to Charters Manufacturing Co., Santa Cruz, Calif. Temperature-regulating device for incubators and brooders. No. 1,386,990; Aug. 9; v. 289; p. 276.

Charters Manufacturing Co. (See Charters, Ernest D., assignor.)

Chase, Elijah M., Cheyenne, Wyo. Releasing device for motion-picture-film reels. No. 1,386,839; Aug. 9; v. 289; p. 246.

Curtiss Aeroplane and Motor Corporation. (See Curtiss, G. H., and Kleckler, assignors.)

Curtiss Aeroplane and Motor Corporation. (See Kirkham, Charles B., assignor.)

Curtiss, Glenn H., Garden City, and H. Kleckler, Hammondsport, assignors to Curtiss Aeroplane and Motor Corporation, Garden City, N. Y. Fuel-supply system for aircraft and similar apparatus. No. 1,386,846; Aug. 9; v. 289; p. 247.

Damon, George N., assignor to The Lorain Rubber Heel Company, Lorain, Ohio. Rubber heel and insert therefor. No. 1,387,243; Aug. 9; v. 289; p. 324.

Danly, Robert C., assignor to Ludwig & Ludwig, Chicago, Ill. Drum and cymbal beater. No. 1,386,605; Aug. 9; v. 289; p. 196.

Davidenia, Terentie, Detroit, Mich. Railway-station indicator. No. 1,386,606; Aug. 9; v. 289; p. 198.

Davis, Evan J., Yakima, Wash. Heat-stove. No. 1,387,359; Aug. 9; v. 289; p. 349.

Davis, Haskell C. (See Keator, Frank Y., assignor.)

Davis, John, Detroit, Mich. Spring-tire. No. 1,387,360; Aug. 9; v. 289; p. 349.

Davis, Walter, Tulsa, Okla. Rotary switch. No. 1,387,361; Aug. 9; v. 289; p. 350.

Davy Brothers. (See Hand, Thomas W., assignor.)

Day, David E., Santa Maria, Calif. Oil-cracking process and apparatus therefor. No. 1,386,768; Aug. 9; v. 289; p. 231.

Dean, Clark A., assignor, by mesne assignments, to Stark-Inland Machine Works, St. Louis, Mo. Register adapted to be applied to the floors or footboards of automobiles. No 1,387,131; Aug. 9; v. 289; p. 303.

Dean, John H., Grand Rapids, Mich. Tobacco stemming and booking machine. No. 1,387,244; Aug. 9; v. 289; p. 324.

Decherd, Constant K., Middletown, assignor to International Silver Co., Meriden, Conn. Packing silverware. No. 1,387,132; Aug. 9; v. 289; p. 304.

De Clamecy, Philippe, New York, assignor to Corona Typewriter Company, Groton, N. Y. Folding typewriting-machine. No. 1,387,362; Aug. 9; v. 289; p. 350.

De Fore, Thomas M., assignor of one-half to W. T. Olson, Minneapolis, Minn. Support for liquid-soap containers. No. 1,387,363; Aug. 9; v. 289; p. 350.

De Laval Separator Company, The. (See Leitch, Meredith, assignor.)

Delaware Chemical Engineering Company. (See du Pont, Francis I., assignor.)

Dellisdo, Guy A., Belmont, Pa. Rail-joint. No. 1,386,847; Aug. 9; v. 289; p. 247.

Deming & Gould Company. (See Malmquist, Adolph K., assignor.)

De Raigman, Adrien F., Montreal, Quebec, Canada. Electric water-heater. No. 1,386,607; Aug. 9; v. 289; p. 198.

Detroit Lubricator Company. (See Kirby, Charles H., assignor.)

Deutsche Lichtbild-Gesellschaft. (See Schulze, Arthur, assignor.)

Dever, Christy J., Clinton, Okla. Pump-jack. No. 1,387,364; Aug. 9; v. 289; p. 350.

De Voe, Albert H., Westfield, N. J., assignor to The Singer Manufacturing Company. Universal joint-coupling. No. 1,387,043; Aug. 9; v. 289; p. 287.

Devoe, Robert W., *et al.* (See Cave, Daniel B., assignor.)

Dienner, John A., assignor to W. J. Conlon, Chicago, Ill. Gearing for washing-machines and the like. No. 1,387,365; Aug. 9; v. 289; p. 350.

Dillig, George F., Pittsburgh, Pa. Internal-combustion engine. No. 1,387,438; Aug. 9; v. 289; p. 355.

Dingfeld, Oscar, Brooklyn, N. Y. Hand-case for ladies. No. 1,386,848; Aug. 9; v. 289; p. 248.

Ditson, Jesse, Littleton, Colo., assignor to Ingersoll-Rand Company, Jersey City, N. J. Dolly-return device. No. 1,386,769; Aug. 9; v. 289; p. 231.

Dixon, Amos F., Newark, N. J., assignor to Western Electric Company, Incorporated, New York, N. Y. Telegraph system. No. 1,386,993; Aug. 9; v. 289; p. 277.

Doble, John A. (See Doble, W. A., W. A., Jr., and J. A.)

Doble Laboratories. (See Doble, William A., W. A., Jr., and J. A., assignors.)

Doble, William A., Jr. (See Doble, W. A., W. A., Jr., and J. A.)

Doble, William A., W. A., Jr., and J. A., assignors to Doble Laboratories, San Francisco, Calif. Liquid-fuel burner. No. 1,386,994; Aug. 9; v. 289; p. 277.

Dodge Brothers. (See Dodge, J. F., and Goddard, assignors.)

Dodge, John F., and G. E. Goddard, assignors to Dodge Brothers, Detroit, Mich. Window-runway. No. 1,387,366; Aug. 9; v. 289; p. 351.

Dodge, William L., and H. D. MacPherson, Maplewood, N. J., assignors to Western Electric Company, Incorporated, New York, N. Y. Telephone system. No. 1,387,367; Aug. 9; v. 289; p. 351.

Dorel, Félix, Paris, France. Manufacture of gelatinous compositions for use in the reproduction of line documents. No. 1,386,995; Aug. 9; v. 289; p. 277.

Dorrance, David W., San Jose, Calif. Artificial limb. No. 1,387,133; Aug. 9; v. 289; p. 304.

Douglas, Louis M. (See Parsons, C. A., Cook, and Douglas.)

Douglass, Ray, Deer Park, N. Y. Bobbin-winding apparatus for sewing-machines. No. 1,387,368; Aug. 9; v. 289; p. 351.

Dowling, Francis J., New York, N. Y. Lock. No. 1,387,245; Aug. 9; v. 289; p. 325.

Downey, Clement L., Cincinnati, Ohio. Coin-tube. No. 1,386,770; Aug. 9; v. 289; p. 231.

Draper Corporation. (See Snow, Isaac, assignor.)

Drechsel, George H. (See Stoll, G. W., and Drechsel.)

Driver-Harris Company. (See Callomon, Clarence B., assignor.)

Driver-Harris Company. (See Major, Ralph M., assignor.)

Drufva, John T., Longmeadow, Mass., assignor to Henry Hyman & Co., Inc., New York, N. Y. Portable electric light. (Reissue.) No. 15,176; Aug. 9; v. 289; p. 366.

Duchesne, Ernest, Montreal, Quebec, Canada. Staybolt-fastening. No. 1,386,691; Aug. 9; v. 289; p. 215.

Dudley, Walter J. (See Price, T. H., White, and Dudley.)

Dufek, Louis, Chehalis, Wash. Approachway for platforms of cars. No. 1,387,134; Aug. 9; v. 289; p. 304.

Duffek, Josef, assignor to Firm of Oesterreichische Waffenfabriksgesellschaft, Steyr, Upper Austria, Austria. Gun-lock for automatic firearms. No. 1,387,369; Aug. 9; v. 289; p. 351.

Du Pont, Francis I., assignor to Delaware Chemical Engineering Company, Wilmington, Del. System for steam-driven motor-vehicles. No. 1,386,608; Aug. 9; v. 289; p. 198.

Dupont, Jean G., Chicago, Ill. Bonnet. No. 1,386,602. Aug. 9; v. 289; p. 216.

Dwyer, William O., Pittsfield, Mass., assignor to General Electric Company. Electrical apparatus. No. 1,386,849; Aug. 9; v. 289; p. 248.

Earle, H. S., Mfg. Co. (See Earle, Horatio S., assignor.)

Earle, Horatio S., assignor to H. S. Earle Mfg. Co., Detroit, Mich. Grass-hook. No. 1,387,246; Aug. 9; v. 289; p. 325.

Eastman Kodak Company. (See Hastings, H. E., Farley, and Sulzer, assignors.)

Eastman Kodak Company. (See Vaeth, William C., assignor.)

Eck, Earl, Robbinsdale, Minn. Portable windlass. No. 1,386,698; Aug. 9; v. 289; p. 216.

Eddins, Sextus A., Brockton, and W. H. Baynard, Boston, Mass. Making low-cut shoes. No. 1,386,850; Aug. 9; v. 289; p. 248.

Edwards, William H., Annandale, near Sydney, New South Wales, Australia. Game-scoring device. No. 1,386,996; Aug. 9; v. 289; p. 277.

Elden, Alf L., Alvarado, Minn. Direct-current electric motor. No. 1,386,609; Aug. 9; v. 289, p. 199.

Electric Vacuum Cleaner Company. (See Brintzenhofe, Otto, assignor.)

Elevator Supplies Co., Inc. (See Cunningham, Charles G., assignor.)

Elliott-Nichols Manufacturing Company. (See Severance, H. W., and Hemphill, assignors.)

Elliott, Richard P., Lexington, Mass. Manufacturing piston-rings. No. 1,386,997; Aug. 9; v. 289; p. 277.

Elliott, Richard P., Lexington, Mass. Piston-ring. No. 1,386,998; Aug. 9; v. 289; p. 278.

Elliott, Thomas, assignor to The Cincinnati Car Company, Cincinnati, Ohio. Railway-car. No. 1,386,851; Aug. 9; v. 289; p. 248.

Elliott, Thomas, assignor to The Cincinnati Car Company, Cincinnati, Ohio. Railway-car. No. 1,386,852; Aug. 9; v. 289; p. 248.

Elliott, Thomas, assignor to The Cincinnati Car Company, Cincinnati, Ohio. Railway-car truck. No. 1,386,853; Aug. 9; v. 289; p. 248.

Elmore, Guy H., Swarthmore, Pa. Jig. No. 1,387,370; Aug. 9; v. 289, p. 352.

Emmons, Charles L., Cranford, N. J., assignor to The Aeolian Company. Tracking device. No. 1,387,371; Aug. 9; v. 289; p. 352.

Empire (Alloy) Steel Corporation, Limited, The. (See Ballantine, William B., assignor.)

Engel, Albert W., Chicago, Ill. Picture-mounting device. No. 1,386,771; Aug. 9; v. 289; p. 231.

Engel, Godfrey, Sr., Brooklyn, N. Y. Turning-plate. No. 1,386,999; Aug. 9; v. 289; p. 278.

Engelbrecht, Reinhold, Essen-Ruhr, Germany. Button. No. 1,386,772; Aug. 9; v. 289; p. 232.

Enlind, Kasnte A., South Nyack, N. Y. Airship. No. 1,387,247; Aug. 9; v. 289; p. 325.

Enterprise Railway Equipment Company. (See Campbell, Argyle, assignor.)

Eulberg, Joseph, Alton, Iowa. Wheel and demountable rim. No. 1,387,372; Aug. 9; v. 289; p. 352.

Olson, Carl P., Irvington, N. J. Process of and apparatus for the manufacture and handling of metallic-leaf films. No. 1,387,068; Aug. 9; v. 289; p. 292.
Olson, William T. (See De Fore, Thomas M., assignor.)
Olsson, Charles, Milwaukee, Wis. Storage battery. No. 1,386,895; Aug. 9; v. 289; p. 257.
Onepiece Bifocal Lens Company. (See Bugbee, Lucian W.)
Osborne, Evan E., Los Angeles, Calif. Lubricated stuffing-box. No. 1,387,301; Aug. 9; v. 289; p. 337.
Ostrom, Freeland W., Newark, and I. F. Webb, Elizabeth, N. J., assignors to The Singer Manufacturing Company. Filled-sack-sewing apparatus. No. 1,387,069; Aug. 9; v. 289; p. 292.
Ostwald, Walter, Grossbothen, near Leipsig, Germany, assignor, by mesne assignments, to The Chemical Foundation, Inc. Producing nitrogen compounds during the dry distillation of nitrogenous fuel. No. 1,386,723; Aug. 9; v. 289; p. 222.
Owens, Thomas S., Toledo, Ohio. Apparatus for drawing sheet-glass. No. 1,386,724; Aug. 9; v. 289; p. 222.
P & M Company, The. (See Poor, Fred A., assignor.)
Packard Motor Car Company. (See Vincent, Jesse G., assignor.)
Page, Peter, Pawtucket, R. I. Safety-lock for windows and the like. No. 1,387,302; Aug. 9; v. 289; p. 337.
Pageau, François, Montreal, Quebec, Canada. Boot and shoe. No. 1,386,651; Aug. 9; v. 289; p. 207.
Palmer, Joel C. R., New Rochelle, assignor to Western Electric Company, Incorporated, New York, N. Y. Signaling system. No. 1,386,725; Aug. 9; v. 289; p. 222.
Panian, Martin, Eveleth, Minn. Cobbler's cabinet. No. 1,387,303; Aug. 9; v. 289; p. 357.
Paque, Edward J., assignor to The Pollak Steel Company, Cincinnati, Ohio. Machine for forging articles from metal blanks. No. 1,386,726; Aug. 9; v. 289; p. 222.
Park, Russell J., St. Louis, Mo. Artificial tooth. No. 1,386,798; Aug. 9; v. 289; p. 237.
Parsons, Charles A., S. S. Cook, and L. M. Douglas, Newcastle-upon-Tyne, England; said Douglas assignor to said Parsons. Turbine-blade attachment. No. 1,387,304; Aug. 9; v. 289; p. 338.
Parsons, Frederick W., Cleveland, Ohio. Turret-lathe. No. 1,387,305; Aug. 9; v. 289; p. 338.
Patton, John E., New York, N. Y. Pillow. No. 1,386,652; Aug. 9; v. 289; p. 207.
Pawling & Harnischfeger Company. (See Brown, Howard S., assignor.)

Pazos-Martines, Richard, Venice, Calif. Internal-combustion turbines. No. 1,387,166; Aug. 9; v. 289; p. 310.
Peck, Arthur S., assignor to Lawrence Paper Manufacturing Company, Lawrence, Kans. Caddy-box. No. 1,387,167; Aug. 9; v. 289; p. 311.
Peck, Wilfred J. (See Bollinger, Frederick P., assignor.)
Pehrsson, Daniel F., Buffalo, N. D. Grain-sleve. No. 1,387,306; Aug. 9; v. 289; p. 338.
Peterson, C. Petrus, et al. (See Cave, Daniel B., assignor.)
Peterson, Charles F., Schenectady, N. Y., assignor to General Electric Company. Process and apparatus for the manufacture of sheets by aggregation of flake materials. No. 1,386,896; Aug. 9; v. 289; p. 258.
Petty, William E., Providence township, Buena Vista county, Iowa. Drier. No. 1,387,168; Aug. 9; v. 289; p. 311.
Pfleumer, Fritz and H., Dresden, Germany, assignors, by mesne assignments, to The Chemical Foundations Inc. Treatment of lumber. No. 1,386,727; Aug. 9; v. 289; p. 222.
Pfleumer, Herman. (See Pfleumer, Fritz and H.)
Philadelphia Bronze Bearing & Tube Company. (See Small, George A., assignor.)
Philadelphia Storage Battery Company. (See Holland, W. E., and Skinner, assignors.)
Photostat Corporation. (See Greene, John S., assignor.)
Pierce Wrapping Machine Company. (See Scherner, J., and Hutchens, assignors.)
Pierson, William D., assignor to The Waterbury Farrel Foundry and Machine Company, Waterbury, Conn. Wire-drawing machine. No. 1,387,169; Aug. 9; v. 289; p. 311.
Piette, Olivier, Paris, France, assignor to Société Anonyme des Fours à Coke Semet-Solvay & Piette. Horizontal coking oven. No. 1,386,799; Aug. 9; v. 289; p. 237.
Piggott, Derwood L. (See Wyss, Russell L., assignor.)
Pillinger, Gilbert C. (See Sunderland, L., and Pillinger.)
Pitman, Henry L., East Orange, N. J., assignor to Underwood Computing Machine Company, New York, N. Y. Combined typewriting and computing machine. No. 1,386,653; Aug. 9; v. 289; p. 207.
Pitot, Léon A. (See Rousseau, F. P. A., and Pitot.)
Pittsburgh Engineering Works, The. (See Moore, William E., assignor.)
Plant, Ray C. (See Barnard, Ray D., assignor.)
Pohlmann, Herman H., St. Louis, Mo. Mask. No. 1,387,307; Aug. 9; v. 289; p. 338.
Poindexter and Company. (See Poindexter, Robert W., assignor.)
Poindexter, Robert W., Los Angeles, Calif., assignor to Poindexter and Company. Producing hydrocyanic acid. No. 1,387,170; Aug. 9; v. 289; p. 311.
Polan, Joseph C. (See Nelson, L. C., and Polan.)
Polinkowsky, Lipa, assignor to Western Electric Company, Incorporated, New York, N. Y. Telephone-exchange system. No. 1,387,171; Aug. 9; v. 289; p. 312.
Polinkowsky, Lipa, London, England, assignor to Western Electric Company, Incorporated, New York, N. Y. Machine-switching telephone system. No. 1,386,728; Aug. 9; v. 289; p. 223.
Pollak Steel Company, The. (See Paque, Edward J., assignor.)
Poor, Fred A., assignor to The P & M Company, Chicago, Ill. Rail-anchor. No. 1,386,800; Aug. 9; v. 289; p. 238.
Pope, Joseph H., Hamilton, Mass., assignor to United Shoe Machinery Corporation, Paterson, N. J. Making shoes. No. 1,386,654; Aug. 9; v. 289; p. 207.
Potash Extraction Corporation. (See Glaeser, Walter, assignor.)
Post, Truman W., assignor to Arms Products Company, New York, N. Y. Attachment for firearms. No. 1,387,308; Aug. 9; v. 289; p. 339.
Postel, Arthur F. and C. J. R., assignors of one-fourth to H. C. Krom and C. D. Lockman, Indianapolis, Ind. Bolt-lock. No. 1,387,172; Aug. 9; v. 289; p. 312.
Postel, Charles J. R. (See Postel, Arthur F. and C. J. R.)
Pouget, Marcellin, Detroit, Mich. Speed-changing power-transmission device. No. 1,387,070; Aug. 9; v. 289; p. 292.
Powell, William E. C., Chicago, Ill. Convertible washing-machine. No. 1,387,173; Aug. 9; v. 289; p. 312.
Powell, Winfred T., East Orange, N. J., assignor to Western Electric Company, Incorporated, New York, N. Y. Machine-switching telephone system. No. 1,387,174; Aug. 9; v. 289; p. 312.
Prater, Leonard L., Denver, Colo. Can-rack. No. 1,387,309; Aug. 9; v. 289; p. 339.
Preble, Edwin N., Beverly, Mass., assignor to United Shoe Machinery Corporation, Paterson, N. J. Work-support for shoe-leveling machines. No. 1,386,655; Aug. 9; v. 289; p. 208.
Premier Cushion Spring Company. (See McCullough, W. D., and Mahoney, assignors.)
Price, Charles P., assignor to American Tar Company, Boston, Mass. Spraying apparatus. No. 1,387,071; Aug. 9; v. 289; p. 293.
Price, Frank G., Scotstoun, Glasgow, Scotland. Apparatus for consolidating granular substances in molds or other receptacles. No. 1,387,175; Aug. 9; v. 289; p. 312.
Price, Theodore H., B. C. White, New York, and W. J. Dudley, Brooklyn, N. Y.; said White and Dudley assignors to said Price. Cotton-picker. No. 1,387,176; Aug. 9; v. 289; p. 312.
Prouty, L. A., Company. (See Morlok, William, assignor.)
Putnam, Benjamin W., Jamaica Plain, Mass. Apparatus for treating textiles and other materials. No. 1,387,072; Aug. 9; v. 289; p. 293.
Quigley, John T., assignor to Costmeter Company, Boston, Mass. Filing and indexing equipment. No. 1,387,010; Aug. 9; v. 289; p. 280.
Quigley, John T., assignor to Costmeter Company, Boston, Mass. Filing and indexing equipment. No. 1,387,310; Aug. 9; v. 289; p. 339.
Quinn, Joseph J., Philadelphia, assignor to Consolidated Expanded Metal Companies, Braddock, Pa. Floor-socket. No. 1,386,947; Aug. 9; v. 289; p. 267.
Railway Utility Company. (See Hartwig, William G., assignor.)
Ramsey, George, assignor to Anchor Cap & Closure Corporation, Brooklyn, N. Y. Sinuous-bead friction-seal. No. 1,386,729; Aug. 9; v. 289; p. 223.
Rataiczak, Thomas F., assignor to The Hobard Manufacturing Company, Troy, Ohio. Finger-guard. No. 1,386,801; Aug. 9; v. 289; p. 238.
Ratcliff, Arthur, Chicago, Ill. Composition board. No. 1,387,011; Aug. 9; v. 289; p. 280.
Raynsford, Arthur, assignor to Western Electric Company, Incorporated, New York, N. Y. Telephone-exchange system. No. 1,386,730; Aug. 9; v. 289; p. 223.
Read, Harry S., East Orange, N. J., assignor to Western Electric Company, Incorporated, New York, N. Y. Vacuum-tube repeater-circuits. No. 1,386,731; Aug. 9; v. 289; p. 223.
Reboul, Edward A., Philadelphia, Pa. Train-controlling mechanism. No. 1,386,656; Aug. 9; v. 289; p. 208.
Reddig, Charles E., Kew Gardens, assignor to Western Electric Company, Incorporated, New York, N. Y. Flexible shaft-coupling. No. 1,387,177; Aug. 9; v. 289; p. 313.
Redford, Philip H. W., Providence, R. I. Card-holder. No. 1,386,657; Aug. 9; v. 289; p. 208.
Regenstein, Joseph, Chicago, Ill. Door-panel and the like. No. 1,387,311; Aug. 9; v. 289; p. 339.
Regenstein, Joseph, Chicago, Ill. Door-panel and the like. No. 1,387,312; Aug. 9; v. 289; p. 339.
Reid, James, Watertown, and A. M. Leahy, Somerville, Mass. Detachable chain-link. No. 1,386,732; Aug. 9; v. 289; p. 223.
Reilley, Edward P., Cleveland, Ohio. Combination multiple valve and lock. No. 1,387,073; Aug. 9; v. 289; p. 293.
Rembert, William E., Gilliam, La. Sample-taking drill. No. 1,386,802; Aug. 9; v. 289; p. 238.
Rendle, Thomas A., and A. Beyer, assignors to Hardinge Brothers, Inc., Chicago, Ill. Watchman's clock. No. 1,387,178; Aug. 9; v. 289; p. 313.
Renner, Georg, Dusseldorf, Germany. Flush-cistern. No. 1,386,948; Aug. 9; v. 289; p. 267.
Rey, Henri D., Avarua, Raratonga, New Zealand. Wheel. No. 1,387,179; Aug. 9; v. 289; p. 313.
Reynolds, John N. (See Bullard, A. M., and Reynolds.)
Reynolds, John N., Greenwich, Conn., assignor to Western Electric Company, Incorporated, New York, N. Y. Telephone system. No. 1,387,180; Aug. 9; v. 289; p. 313.
Rhodes, William A., New York, N. Y., and F. E. Anderson, Newark, N. J., assignor to Western Electric Company, Incorporated, New York, N. Y. Telephone-exchange system. No. 1,387,181; Aug. 9; v. 289; p. 314.
Rice, Frank E., assignor to American Tap Bush Co., Detroit, Mich. Tap-attaching device. No. 1,386,949; Aug. 9; v. 289; p. 268.
Rice, Sherwood P., and M. E. Michell, Detroit, Mich. Radiator-cap lock. No. 1,387,313; Aug. 9; v. 289; p. 340.
Richter, Alfred. (See Gelb, Carl A., assignor.)
Rifkin, Jacob, Wilkes-Barre, Pa. Union-garment. No. 1,386,950; Aug. 9; v. 289; p. 268.
Ringe, John C., Bridgeport, Conn., assignor to The Singer Manufacturing Company. Strip-severing device for sewing-machines. No. 1,387,012; Aug. 9; v. 289; p. 280.
Risser, Charles E., assignor to The Crawford, McGregor and Canby Company, Dayton, Ohio. Contouring-machine. No. 1,387,182; Aug. 9; v. 289; p. 314.
Rives, George H., New York, N. Y. Adjustable pedal extension. No. 1,386,951; Aug. 9; v. 289; p. 268.
Robbins, Frank, Clifton Hill, Victoria, Australia. Machine for removing the cores and stones from fruit. No. 1,387,183; Aug. 9; v. 289; p. 314.
Robertson, Charles J. (See Robertson, John D., assignor.)
Robertson, Donald, and R. M. Simpson, assignors to Imperial Postmarker's Limited, Wellington, New Zealand. Mail-marking machine. No. 1,386,952; Aug. 9; v. 289; p. 268.
Robertson, John D., assignor to C. J. Robertson, Taunton, Mass. Speedometer. No. 1,386,953; Aug. 9; v. 289; p. 269.
Robinson, Jesse T., Birmingham, Ala. Carbureter. No. 1,387,013; Aug. 9; v. 289; p. 281.
Rock Island Plow Company. (See Kaupke, Lee H., assignor.)
Rockwell, Robert L., and H. R. Stevens, assignors, by mesne assignments, to R. A. McClure, J. N. Bialock, A. E. Holland, D. O. McClay, and E. G. Howe, trustees, Seattle, Wash. Electrical limit-switch. No. 1,386,897; Aug. 9; v. 289; p. 258.

Roelker, Carl J., assignor of one-fourth to W. F. Lee, Richmond, Va. Roadbed construction. No. 1,387,184; Aug. 9; v. 289; p. 314.

Roganson, David E., Branford, Conn. Clothesline device. No. 1,387,074; Aug. 9; v. 289; p. 293.

Rosen, Louis W., and P. Brauner, assignors to A. E. Brion, New York, N. Y. Film-shifting device for cameras. No. 1,386,733; Aug. 9; v. 289; p. 224.

Rosenbaum, Harry, New York, N. Y. Dish-washing apparatus. No. 1,386,734; Aug. 9; v. 289; p. 224.

Rothwell, Charles F., Columbus, Mont. Basket. No. 1,387,185; Aug. 9; v. 289; p. 314.

Roush, Franklin E., Dayton, Ohio. Automobile-lock. No. 1,387,314; Aug. 9; v. 289; p. 340.

Rousseau, François P. A., and L. A. Pitot, Paris, France. Railway-sleeper. No. 1,386,954; Aug. 9; v. 289; p. 269.

Roy, Wesley C. (See McGuigan, J. W., and Roy.)

Rueger, Charles C., Benicia, Calif. Ore-concentrator. No. 1,387,075; Aug. 9; v. 289; p. 293.

Rushmore, Davis B., Schenectady, N. Y., assignor to General Electric Company. Protection of systems of distribution. No. 1,386,898; Aug. 9; v. 289; p. 258.

Ryder, Charles D., Covington, Ky., assignor to The Corcoran Victor Company, Cincinnati, Ohio. No. 1,386,803; Aug. 9; v. 289; p. 238.

Samuel, Herman, Stockholm, Sweden. Measuring instrument. No. 1,386,899; Aug. 9; v. 289; p. 258.

Sanders, Newell, Chattanooga, Tenn. Power-lift for plows. No. 1,386,955; Aug. 9; v. 289; p. 269.

Sanders, Ralph L., Pleasantville, N. J. Floating knife. No. 1,386,956; Aug. 9; v. 289; p. 269.

Saul, Tom W., Seattle, Wash. Milk-bottle-stopper remover. No. 1,387,014; Aug. 9; v. 289; p. 281.

Saxon, Herman R., and C. J. Schwarze, assignors of one-half to The Schwarze Electric Company, Adrian, Mich., and one-half to Willys Corporation, Toledo, Ohio. Horn. No. 1,386,804; Aug. 9; v. 289; p. 238.

Schaefer, Clemens T., assignor to Arvac Manufacturing Company, Anderson, Ind. Universal joints. No. 1,386,735; Aug. 9; v. 289; p. 224.

Schaller, Leon T., Irvington, N. J. Dirigible automatic headlight. No. 1,386,957; Aug. 9; v. 289; p. 269.

Schalow, August H. (See Schalow, Frank J., assignor.)

Schalow, Frank J., assignor of one-half to A. H. Schalow, East New York, N. Y. Hat-crown-crease-retaining device. No. 1,387,015; Aug. 9; v. 289; p. 281.

Schaub, Rudolph G., Woodbury, N. J. Folding seat. No. 1,387,315; Aug. 9; v. 289; p. 340.

Scheer, George F., assignor to Scheer Manufacturing Company, Inc., Rochester, N. Y. Belt-buckle. No. 1,386,805; Aug. 9; v. 289; p. 239.

Scheer Manufacturing Company. (See Scheer, George F., assignor.)

Scherner, John, and E. Hutchens, Milwaukee, Wis., assignors to Pierce Wrapping Machine Company, Chicago, Ill. Wrapping-machine. No. 1,387,016; Aug. 9; v. 289; p. 281.

Schmaus, Conrad. (See Long, C. L., and Schmaus.)

Schmerler, Joseph J., New York, N. Y. Toilet-case. No. 1,386,806; Aug. 9; v. 289; p. 239.

Schmidt, Henry F., Pittsburgh, Pa., assignor to Westinghouse Electric & Manufacturing Co. Fluid-translating device. No. 1,386,958; Aug. 9; v. 289; p. 269.

Schmidt, James J., Rahway, N. J. Combination-tool. No. 1,387,316; Aug. 9; v. 289; p. 340.

Schoenhut, A., Company, The. (See Schoenhut, Harry E., assignor.)

Schoenhut, Harry E., assignor to The A. Schoenhut Company, Philadelphia, Pa. Doll. No. 1,387,317; Aug. 9; v. 289; p. 340.

Schopf, Henry S., Spokane, Wash. Cooler. No. 1,386,900; Aug. 9; v. 289; p. 259.

Schreiner, Charles H., Rock Island, Ill. Chiropractic table. No. 1,386,901; Aug. 9; v. 289; p. 259.

Schueller, Eugéne, assignor to Societe Industrielle De Celluloid, Paris, France. Rotary pocket-fan. No. 1,387,186; Aug. 9; v. 289; p. 314.

Schulze, Arthur, assignor of one-half to Deutsche Lichtbild-Gesellschaft, Berlin, Germany. Process and device for ascertaining the correct exposure for copying rows of pictures on film-bands. No. 1,387,318; Aug. 9; v. 289; p. 341.

Schwarze, Carl J. (See Saxon, H. R., and Schwarze.)

Schwarze Electric Company, The, *et al.* (See Saxon, H. R., and Schwarze, assignors.)

Schwarz, John R., St. Joseph, Mo. Velocipede for children. No. 1,386,736; Aug. 9; v. 289; p. 224.

Seely, Thomas H. (See Hadaway, J. B., and Seely.)

Segal, Samuel, New York, N. Y. Padlock. No. 1,387,187; Aug. 9; v. 289; p. 315.

Severance, Horace W., and G. F. Hemphill, assignors, by mesne assignments, to Elliott-Nichols Manufacturing Company, Kansas City, Mo. Mirror-holder. No. 1,386,959; Aug. 9; v. 289; p. 270.

Shann, Oscar A., Brooklyn, assignor to Western Electric Company, Incorporated, New York, N. Y. Bell. No. 1,387,188; Aug. 9; v. 289; p. 315.

Sharkey, Albert E., Cuyahoga Falls, assignor to The General Rubber Goods Co., Cleveland, Ohio. Combined tool-pouch and testing device. No. 1,387,189; Aug. 9; v. 289; p. 315.

Sharp, John C., assignor to Moccasin Bushing Company, Chattanooga, Tenn. Lubricated bushing unit. No. 1,386,960; Aug. 9; v. 289; p. 270.

Sharp, John C., assignor to Moccasin Bushing Company, Chattanooga, Tenn. Lubricated journal-box and pulley bearing. No. 1,386,961; Aug. 9; v. 289; p. 270.

Sharp, John C., assignor to Moccasin Bushing Company, Chattanooga, Tenn. Lubricated pulley-bushing. No. 1,386,962; Aug. 9; v. 289; p. 270.

Sharp, Lee C., Plattsmouth, Nebr. Steering mechanism for motor-vehicles. No. 1,386,737; Aug. 9; v. 289; p. 225.

ALPHABETICAL LIST OF INVENTIONS

FOR WHICH

PATENTS WERE ISSUED ON THE 9TH DAY OF AUGUST, 1921.

NOTE.—Arranged in accordance with the first significant character or word of the name. (In accordance with city and telephone directory practice.)

Advertising or display device. J. Stranders. No. 1,387,209; Aug. 9; v. 289; p. 318.
Aerofoils, Method of and apparatus for making. J. G. Coffin. No. 1,386,841; Aug. 9; v. 289; p. 246.
Aeronautical machines, Safety device for. S. L. Van Meter, Jr. No. 1,386,815; Aug. 9; v. 289; p. 241.
Aeroplanes, Landing-gear for. H. M. Kudo. No. 1,387,057; Aug. 9; v. 289; p. 291.
Agitator. T. F. Taylor. No. 1,386,809; Aug. 9; v. 289; p. 239.
Air-brake system, Alarm for. R. L. Flinn. No. 1,387,002; Aug. 9; v. 289; p. 278.
Aircraft and similar apparatus, Fuel-supply system for. G. H. Curtiss and H. Kleckler. No. 1,386,846; Aug. 9; v. 289; p. 247.
Airship. K. A. Enlind. No. 1,387,247; Aug. 9; v. 289; p. 325.
Air-ship. F. H. Leinweber. No. 1,386,712; Aug. 9; v. 289; p. 220.
Airship. F. H. Leinweber. No. 1,386,713; Aug. 9; v. 289; p. 220.
Alloys, Production of metallic. W. B. Ballantine. No. 1,386,981; Aug. 9; v. 289; p. 274.
Aluminum, Soldering. M. M. Merritt. No. 1,387,426; Aug. 9; v. 289; p. 363.
Amalgamator, Cascade-. L. M. Kellogg. No. 1,386,875; Aug. 9; v. 289; p. 253.
Ammonia, Process and means relating to the production of. C. Bosch. No. 1,386,760; Aug. 9; v. 289; p. 229.
Amusement device. D. A. Alpert. No. 1,386,590; Aug. 9; v. 289; p. 195.
Apron. L. Broman. No. 1,386,595; Aug. 9; v. 289; p. 196.
Apron, Catamenial. M. S. George. No. 1,386,777; Aug. 9; v. 289; p. 232.
Arch-support. J. F. Kolkebeck. No. 1,387,411; Aug. 9; v. 289; p. 360.
Arm, Gripper-. L. J. Warner. No. 1,387,026; Aug. 9; v. 289; p. 283.
Autographic register. L. Jensen. No. 1,386,709; Aug. 9; v. 289; p. 219.
Autographic register. J. Q. Sherman. No. 1,386,963; Aug. 9; v. 289; p. 270.
Autographic register. J. Q. Sherman. No. 1,386,964; Aug. 9; v. 289; p. 271.
Automatic furnace. L. Garrison. No. 1,386,698; Aug. 9; v. 289; p. 217.
Automobile attachment. W. Trabue. No. 1,386,913; Aug. 9; v. 289; p. 261.
Automobile body and top therefor. C. T. Silver. No. 1,387,191; Aug. 9; v. 289; p. 315.
Automobile bumper. C. H. Hathaway, W. A. Starck, and L. F. McEvoy. No. 1,386,864; Aug. 9; v. 289; p. 251.
Automobile bumpers, Bracket for. W. G. Cox. No. 1,386,845; Aug. 9; v. 289; p. 247.
Automobile camp-trailer. N. R. Moore. No. 1,386,943; Aug. 9; v. 289; p. 267.
Automobile-curtain window. L. C. Nelson and J. C. Polan. No. 1,386,793; Aug. 9; v. 289; p. 236.
Automobile-hood. W. A. King. No. 1,387,407; Aug. 9; v. 289; p. 359.
Automobile-jacks, Alarm for. L. M. Fisher. No. 1,387,137; Aug. 9; v. 289; p. 305.
Automobile-lock. F. E. Roush. No. 1,387,314; Aug. 9; v. 289; p. 340.
Automobile-lock. G. S. White. No. 1,387,335; Aug. 9; v. 289; p. 344.
Automobile-radiators, Liquid-level gage for. C. A. Beardmore. No. 1,386,833; Aug. 9; v. 289; p. 245.
Automobile-signal. A. C. Cobb. No. 1,386,597; Aug 9; v. 289; p. 196.
Automobile tractor attachment. A. E. Cook and T. Van Tuyl. No. 1,386,842; Aug. 9; v. 289; p. 246.
Automobiles, Convertible seat for. L. B. Welch. No. 1,387,083; Aug. 9; v. 289; p. 295.
Automobiles, Register adapted to be applied to floors or footboard of. C. A. Dean. No. 1,387,131; Aug. 9; v. 289; p. 303.
Automobiles, Safety fender for. T. F. Buck. No. 1,387,100; Aug. 9; v. 289; p. 298.
Autovehicles, Grip-chain for. N. E. Montgomery. No. 1,387,429; Aug. 9; v. 289; p. 363.
Awning. L. Goudie. No. 1,386,860; Aug. 9; v. 289; p. 250.
Bag-holder. J. Sinclair. No. 1,386,658; Aug. 9; v. 289; p. 208.
Bag-holder. J. Zakarka. No. 1,386,669; Aug. 9; v. 289; p. 211.
Bagging-cutter. L. P. Lively. No. 1,386,940; Aug. 9; v. 289; p. 266.
Bandage. L. M. Kirwan. No. 1,386,936; Aug. 9; v. 289; p. 265.
Barking machine, Wet-. H. T. Holm. No. 1,386,930; Aug. 9; v. 289; p. 264.
Basket. C. F. Rothwell. No. 1,387,185; Aug. 9; v. 289; p. 314.
Basket-making machine. W. F. Barnes. No. 1,387,093; Aug. 9; v. 289; p. 297.
Battery: *See*—
Storage battery.
Bean-spacer. W. E. White. No. 1,387,088; Aug. 9; v. 289; p. 296.
Bearing, Dustproof. R. H. White and M. B. Morgan. No. 1,387,087; Aug. 9; v. 289; p. 296.
Bearing, Roller-. F. Brierley. No. 1,386,986; Aug. 9; v. 289; p. 275.
Beater, Drum and cymbal. R. C. Danley. No. 1,386,605; Aug. 9; v. 289; p. 198.
Beating or threshing machine. F. G. Fryer. No. 1,387,380; Aug. 9; v. 289; p. 354.

Electric switch. F. W. Loeffler. No. 1,387,419; Aug. 9; vol. 289; p. 361.
Electric-terminal connector. A. L. Austin. No. 1,386,631; Aug. 9; v. 289; p. 244.
Electric timer. R. L. Wyss. No. 1,387,223; Aug. 9; v. 289; p. 320.
Electrical apparatus. W. O. Dwyer. No. 1,386,849; Aug. 9; v. 289; p. 248.
Electrical apparatus, Winding for. L. H. Burnham. No. 1,386,838; Aug. 9; v. 289; p. 246.
Electrical apparatus, Windings for. E. G. Winston. No. 1,386,828; Aug. 9; v. 289; p. 244.
Electrical-fittings connection. J. A. McKay. No. 1,386,884; Aug. 9; v. 289; p. 255.
Electrical limit-switch. R. L. Rockwell and H. R. Stevens. No. 1,386,897; Aug. 9; v. 289; p. 258.
Electrical machines, Apparatus for the high-voltage windings of. F. Haberli and J. Kübler. No. 1,387,389; Aug. 9; v. 289; p. 355.
Electrical switch. W. Kaisling. No. 1,386,626; Aug. 9; v. 289; p. 202.
Electrolytic process and apparatus. M. M. Merritt. No. 1,387,425; Aug. 9; v. 289; p. 362.
Emery-wheels, Tool for dressing. F. C. Brandenburg. No. 1,387,040; Aug. 9; v. 289; p. 286.
Emplacing apparatus. H. L. Wiegand. No. 1,387,029; Aug. 9; v. 289; p. 284.
End-gate. J. J. McCulloch. No. 1,386,882; Aug. 9; v. 289; p. 254.
Engine: *See*—
Internal-combustion engine.
Engines, Air-preheater for explosive-. S. S. Staley and M. W. Collet. No. 1,387,328; Aug. 9; v. 289; p. 343.
Engines, Apparatus for driving magnetos in connection with internal-combustion. A. Maire. No. 1,387,265; Aug. 9; v. 289; p. 333.
Engines, Automatic operating means for internal-combustion. H. K. Cowen. No. 1,386,844; Aug. 9; v. 289; p. 247.
Engines, Device for heating the intake-manifolds of internal-combustion. H. L. Smith. No. 1,386,904; Aug. 9; v. 289; p. 259.
Engines, Saddle for. L. N. Clifton. No. 1,386,924; Aug. 9; v. 289; p. 263.
Envelops, Sealing. A. Nassano. No. 1,387,164; Aug. 9; v. 289; p. 310.
Etching instrument, Electric. E. F. Hankin. No. 1,387,304; Aug. 9; v. 289; p. 356.
Excavating and hoisting apparatus. T. Carlson. No. 1,387,042; Aug. 9; v. 289; p. 286.
Excavating-wheel. H. S. Brown. No. 1,386,987; Aug. 9; v. 289; p. 275.
Exhibiting apparatus. T. J. Mosure. No. 1,387,294; Aug. 9; v. 289; p. 335.
Fan, Rotary pocket-. E. Schueller. No. 1,387,186; Aug. 9; v. 289; p. 314.
Farming implement, Power-driven. J. T. Hickman, Jr. No. 1,386,783; Aug. 9; v. 289; p. 234.
Fastener. F. S. Carr. No. 1,387,104; Aug. 9; v. 289; p. 299.
Fastener. F. S. Carr. No. 1,387,110; Aug. 9; v. 289; p. 300.
Fastener. F. S. Carr. No. 1,387,111; Aug. 9; v. 289; p. 300.
Fastener. F. S. Carr. No. 1,387,112; Aug. 9; v. 289; p. 300.
Fastener. F. S. Carr. No. 1,387,113; Aug. 9; v. 289; p. 301.
Fastener. F. S. Carr. No. 1,387,114; Aug. 9; v. 289; p. 301.
Fastener and means for securing its stud to carrying fabrics, Separable. F. S. Carr. No. 1,387,122; Aug. 9; v. 289; p. 302.
Fastener and means for securing its sockets to carrying fabrics, Separable. F. S. Carr. No. 1,387,124; Aug. 9; v. 289; p. 302.
Fastener and means for securing its socket to carrying fabrics, Separable. F. S. Carr. No. 1,387,125; Aug. 9; v. 289; p. 302.
Fastener, Separable. F. S. Carr. No. 1,387,102; Aug. 9; v. 289; p. 299.
Fastener, Separable. F. S. Carr. No. 1,387,103; Aug. 9; v. 289; p. 299.
Fastener, Separable. F. S. Carr. No. 1,387,107; Aug. 9; v. 289; p. 300.
Fastener, Separable. F. S. Carr. No. 1,387,108; Aug. 9; v. 289; p. 300.
Fastener, Separable. F. S. Carr. No. 1,387,109; Aug. 9; v. 289; p. 300.
Fastener, Separable. A. G. Anderson. No. 1,387,115; Aug. 9; v. 289; p. 301.
Fastener, Separable. F. S. Carr. No. 1,387,116; Aug. 9; v. 289; p. 301.
Fastener, Separable. F. S. Carr. No. 1,387,117; Aug. 9; v. 289; p. 301.
Fastener, Separable. F. S. Carr. No. 1,387,118; Aug. 9; v. 289; p. 301.
Fastener, Separable. F. S. Carr. No. 1,387,119; Aug. 9; v. 289; p. 301.
Fastener, Separable. F. S. Carr. No. 1,387,120; Aug. 9; v. 289; p. 302.
Fastener, Separable. F. S. Carr. No. 1,387,121; Aug. 9; v. 289; p. 302.
Fastener, Separable. F. S. Carr. No. 1,387,123; Aug. 9; v. 289; p. 302.
Fastener, Separable. M. F. Carr. No. 1,387,126; Aug. 9; v. 289; p. 303.

Fastener, Separable. L. A. Larsson. No. 1,387,105; Aug. 9; v. 89; p. 299.
Fastener, Separable. L. A. Larsson. No. 1,387,106; Aug. 9; v. 289; p. 300.
Faucet. W. Morlok. No. 1,386,646; Aug. 9; v. 289; p. 206.
Fence, Concrete. J. C. Hamilton. No. 1,386,928; Aug. 9; v. 289; p. 264.
Fibrous product, Composite. H. F. Weiss. No. 1,387,219; Aug. 9; v. 289; p. 320.
Filing and indexing equipment. J. T. Quigley. No. 1,387,010; Aug. 9; v. 289; p. 280.
Filing and indexing equipment. J. T. Quigley. No. 1,387,310; Aug. 9; v. 289; p. 339.
Film-feed apparatus for projection devices. C. H. McQuillan. No. 1,387,283; Aug. 9; v. 289; p. 333.
Films, Process of and apparatus for the manufacture and handling of metallic-leaf. C. P. Olson. No. 1,387,068; Aug. 9; v. 289; p. 292.
Finger-guard. T. F. Ratalczak. No. 1,386,801; Aug. 9; v. 289; p. 238.
Fire-alarm apparatus. S. Nikiel. No. 1,386,649; Aug. 9; v. 289; p. 206.
Fire-alarm device, Automatic. E. C. Capper. No. 1,386,923; Aug. 9; v. 289; p. 263.
Firearm. F. A. Stafford. No. 1,387,207; Aug. 9; v. 289; p. 317.
Firearms, Attachment for. T. W. Post. No. 1,387,308; Aug. 9; v. 289; p. 339.
Firearms, Cleaning-rod for. R. G. Hall and A. Birkholm. No. 1,386,862; Aug. 9; v. 289; p. 250.
Firearms, Gun-lock for automatic. J. Duffek. No. 1,387,369; Aug. 9; v. 289; p. 351.
Flexible tube. L. H. Brinkman. No. 1,387,231; Aug. 9; v. 289; p. 322.
Floor-socket. J. J. Quinn. No. 1,386,947; Aug. 9; v. 289; p. 267.
Fluid-translating device. H. F. Schmidt. No. 1,386,958; Aug. 9; v. 289; p. 269.
Flush-tanks, Waste control for. R. H. Keevan. No. 1,386,785; Aug. 9; v. 289; p. 234.
Flying-machine. H. Vass. No. 1,386,916; Aug. 9; v. 289; p. 262.
Folding seat. R. G. Schaub. No. 1,387,315; Aug. 9; v. 289; p. 340.
"Fondant" chocolate and similar chocolates, Manufacturing of high-class. F. G. Fryer and B. G. McLellan. No. 1,387,377; Aug. 9; v. 289; p. 353.
"Fondant" chocolate and similar chocolates, Manufacturing of high-class. F. G. Fryer and B. G. McLellan. No. 1,387,378; Aug. 9; v. 289; p. 353.
"Fondant" chocolate and similar chocolates, Manufacturing of high-class. F. G. Fryer and B. G. McLellan. No. 1,387,379; Aug. 9; v. 289; p. 353.
Footwear. L. Trolle. No. 1,386,637; Aug. 9; v. 289; p. 204.
Frame construction. D. E. Lewellen. No. 1,386,939; Aug. 9; v. 289; p. 266.
Frictionless spring. E. D. Brown. No. 1,387,041; Aug. 9; v. 289; p. 286.
Frothing and mineral selective agent and using same. R. Luckenbach. No. 1,386,716; Aug. 9; v. 289; p. 220.
Fruit, Machine for removing the cores and stones from. F. Robbins. No. 1,387,183; Aug. 9; v. 289; p. 314.
Fruit-picker. F. J. Miller. No. 1,387,064; Aug. 9; v. 289; p. 291.
Fuel-containers, Self-puncture-sealing covering for. G. J. Murdock. No. 1,386,791; Aug. 9; v. 289; p. 236.

Rotary switch. W. Davis. No. 1,387,361; Aug. 9; v. 289; p. 350.
Rules, Magnifying attachment for slide-. C. Holle, Jr. No. 1,387,267; Aug. 9; v. 289; p. 329.
Sack-sewing apparatus, Filled-. F. W. Ostrom and I. F. Webb. No. 1,387,069; Aug. 9; v. 289; p. 292.
Saddle, Ridge-. C. E. Burkhardt. No. 1,387,235; Aug. 9; v. 289; p. 323.
Sample-taking drill. W. E. Rembert. No. 1,386,802; Aug. 9; v. 289; p. 238.
Sash-pulley. J. H. Foote. No. 1,386,774; Aug. 9; v. 289; p. 232.
Saw equalizer, Crosscut-. L. E. Killian. No. 1,387,274; Aug. 9; v. 289; p. 330.
Saw-set. R. L. Webb. No. 1,386,821; Aug. 9; v. 289; p. 242.
Saw, Wood-. R. A. Helsel. No. 1,387,264; Aug. 9; v. 289; p. 328.
Scale, Automatic. A. and A. T. McLeod. No. 1,386,790; Aug. 9; v. 289; p. 235.
Scales, Locking device for weighing-. E. G. Thomas. No. 1,386,662; Aug. 9; v. 289; p. 209.
Scraper for cleaning irregular surfaces. I. A. Watrous. No. 1,387,027; Aug. 9; v. 289; p. 283.
Seal, Sinuous bead friction-. G. Ramsey. No. 1,386,729; Aug. 9; v. 289; p. 223.
Seat: *See*—
Folding seat.
Seed-sowing device. S. L. Allen. No. 1,387,436; Aug. 9; v. 289; p. 365.
Seine. A. Mattson. No. 1,386,889; Aug. 9; v. 289; p. 256.
Selective system. J. H. Bell. No. 1,387,228; Aug. 9; v. 289; p. 321.
Separator: *See*—
Storage-battery separator.
Sewing-machine. J. A. Flanagan. No. 1,387,138; Aug. 9; v. 289; p. 305.
Sewing-machine. J. A. Flanagan. No. 1,387,143; Aug. 9; v. 289; p. 306.
Sewing-machine drive. J. Kornas. No. 1,386,632; Aug. 9; v. 289; p. 203.
Sewing-machine, Tension for. J. A. Flanagan. No. 1,387,139; Aug. 9; v. 289; p. 305.
Sewing-machines, Bobbin-winding apparatus for. R. Douglass. No. 1,387,368; Aug. 9; v. 289; p. 351.
Sewing-machines, Bobbin-winding mechanism for. J. A. Flanagan. No. 1,387,141; Aug. 9; v. 289; p. 305.
Sewing-machines, Combined presser-foot and work-guide for. J. A. Flanagan. No. 1,387,142; Aug. 9; v. 289; p. 306.
Sewing-machines, Feeding mechanism for. J. A. Flanagan. No. 1,387,145; Aug. 9; v. 289; p. 306.
Sewing-machines, Safety and bobbin-winder, attachment for. J. Hochman. No. 1,387,005; Aug. 9; v. 289; p. 279.
Sewing-machines, Stitch control for. J. A. Flanagan. No. 1,387,140; Aug. 9; v. 289; p. 305.
Sewing-machines, Stitch-forming mechanism for. J. A. Flanagan. No. 1,387,144; Aug. 9; v. 289; p. 306.
Sewing-machines, Strip-severing device for. J. C. Ringe. No. 1,387,012; Aug. 9; v. 289; p. 280.
Sewing-machines, Work-holder for. W. L. Barron and A. F. Fifield. No. 1,387,034; Aug. 9; v. 289; p. 285.
Shaft-coupling, Flexible. C. E. Reddig. No. 1,387,177; Aug. 9; v. 289; p. 313.
Shaft, Drive. J. E. Goddard. No. 1,387,384; Aug. 9; v. 289; p. 354.
Shaft-hanger. J. C. Fitzgerald. No. 1,387,044; Aug. 9; v. 289; p. 287.
Shafts, Bearing for. C. G. von Post. No. 1,386,745; Aug. 9; v. 289; p. 226.
Shafts, Means for actuating speed-indicating devices, governors, and other devices from rotating. G. Constantinesco. No. 1,386,925; Aug. 9; v. 289; p. 263.
Sheets by aggregation of flake materials, Process and apparatus for the manufacture of. C. F. Peterson. No. 1,386,896; Aug. 9; v. 289; p. 258.
Shirt press, Work-. B. W. Brockett. No. 1,387,099; Aug. 9; v. 289; p. 298.
Shock-absorber. G. H. Hayes. No. 1,386,782; Aug. 9; v. 289; p. 234.
Shock-absorber for vehicles. F. W. Springer. No. 1,387,081; Aug. 9; v. 289; p. 295.
Shock-absorber, Pneumatic. C. T. Walter. No. 1,386,818; Aug. 9; v. 289; p. 242.
Shock-absorbers, Vehicle. W. M. Boenning. No. 1,386,759; Aug. 9; v. 289; p. 229.
Shock-absorbing mechanism, Friction. W. A. Geiger. No. 1,386,776; Aug. 9; v. 289; p. 232.
Shock-absorbing mechanism, Friction. J. F. O'Connor. No. 1,386,795; Aug. 9; v. 289; p. 237.
Shoe. C. M. Bradford. No. 1,386,684; Aug. 9; v. 289; p. 214.
Shoe-leveling machines, Work-support for. E. N. Preble. No. 1,386,655; Aug. 9; v. 289; p. 208.
Shoe-tacking machine. C. F. Ziegler. No. 1,386,752; Aug. 9; v. 289; p. 228.
Shoe-tongues, Means for securing. G. L. Bowers. No. 1,386,985; Aug. 9; v. 289; p. 275.
Shoes, Making. J. H. Pope. No. 1,386,654; Aug. 9; v. 289; p. 207.
Shoes, Making low-cut. S. A. Eddins and W. H. Baynard. No. 1,386,850; Aug. 9; v. 289; p. 248.
Shovel-operating machine. T. W. Thomas. No. 1,386,911; Aug. 9; v. 289; p. 261.
Sieve, Grain-. D. F. Pehrsson. No. 1,387,306; Aug. 9; v. 289; p. 338.
Signal: *See*—
Automobile-signal. Danger-signal.
Signaling and telephone system. C. W. Keckler. No. 1,387,270; Aug. 9; v. 289; p. 330.
Signaling device. R. M. Hopkins. No. 1,387,399; Aug. 9; v. 289; p. 357.
Signaling system. J. C. R. Palmer. No. 1,386,725; Aug. 9; v. 289; p. 222.
Signaling system. R. S. Wilbur. No. 1,386,748; Aug. 9; v. 289; p. 227.
Silverware, Packing. C. K. Decherd. No. 1,387,132; Aug. 9; v. 289; p. 304.
Snap fastener. W. H. Farnham. No. 1,387,135; Aug. 9; v. 289; p. 304.
Soap containers, Support for liquid-. T. M. De Fore. No. 1,387,363; Aug. 9; v. 289; p. 350.
Soap tablet. D. L. Chandler. No. 1,386,767; Aug. 9; v. 289; p. 231.
Solar motor. W. J. Harvey. No. 1,386,781; Aug. 9; v. 289; p. 233.
Sounders, Operating. J. H. Bretthauer. No. 1,386,763; Aug. 9; v. 289; p. 230.
Sound-reproducer mounting. F. Koerbitz. No. 1,387,410; Aug. 9; v. 289; p. 360.
Spark-plug. T. G. McDougal. No. 1,386,883; Aug. 9; v. 289; p. 255.
Spark-plug cleaner. E. G. La Voie. No. 1,387,414; Aug. 9; v. 289; p. 360.
Speed motor, Constant-. C. I. Hall. No. 1,386,861; Aug. 9; v. 289; p. 250.
Speedometer. J. D. Robertson. No. 1,386,953; Aug. 9; v. 289; p. 269.
Speed-regulating apparatus. V. A. Fynn. No. 1,387,048; Aug. 9; v. 289; p. 288.
Sprayer device. J. Clark. No. 1,387,352; Aug. 9; v. 289; p. 348.
Spraying apparatus. C. P. Price. No. 1,387,071; Aug. 9; v. 289; p. 293.

Wrench. W. J. Carpenter. No. 1,386,596; Aug. 9; v. 289; p. 196.
Wrench. J. C. Hurley. No. 1,386,708; Aug. 9; v. 289; p. 219.
Wrench. J. C. Smith. No. 1,386,905; Aug. 9; v. 289; p. 260.
X-ray-tube-controlling mechanism. H. A. Mulvany and H. E. Kennedy. No. 1,387,162; Aug. 9; v. 289; p. 310.

ALPHABETICAL LIST OF DESIGNS.

Ampul. J. L. Robinson. No. 58,687; Aug. 9; v. 289; p. 373.
Automobile-body. H. J. Earl. No. 58,665; Aug. 9; v. 289; p. 368.
Automobile-body molding. H. J. Earl. No. 58,664; Aug. 9; v. 289; p. 368.
Automobile rear-sight device. H. W. Stover and B. M. Coates. No. 58,692; Aug. 9; v. 289; p. 373.
Battery-connector. G. E. Lundberg. No. 58,675; Aug. 9; v. 289; p. 370.
Bottle-cap. G. W. Goodridge. No. 58,671; Aug. 9; v. 289; p. 369.
Brush or mirror back. H. D. Mosauer. No. 58,678; Aug. 9; v. 289; p. 371.
Building-block. H. E. Clouser and E. R. Thornton. No. 58,660; Aug. 9; v. 289; p. 367.
Can-tester. H. Rabezzana. No. 58,684; Aug. 9; v. 289; p. 372.
Comb. H. D. Mosauer. No. 58,680; Aug. 9; v. 289; p. 371.
Container. H. Senften. No. 58,689; Aug. 9; v. 289; p. 373.
Cooker, Pressure-. T. V. Connor. No. 58,662; Aug. 9; v. 289; p. 368.
Drill-hole cleaner or similar article. L. J. Sortor. No. 58,691; Aug. 9; v. 289; p. 373.
Electric-light bracket. C. B. Rogers. No. 58,688; Aug. 9; v. 289; p. 373.
Electric switches, Casing for. O. H. and A. F. Pieper. No. 58,681; Aug. 9; v. 289; p. 372.
Game-board. A. Cohn and L. H. Debs. No. 58,661; Aug. 9; v. 289; p. 368.
Game-board. G. P. Garin. No. 58,670; Aug. 9; v. 289; p. 369.
Hair-cutter, Power. J. G. Beshara. No. 58,658; Aug. 9; v. 289; p. 367.
Jar opener, Fruit-. A. R. Gurnett. No. 58,672; Aug. 9; v. 289; p. 370.
Lamp-door. N. Macneale. No. 58,676; Aug. 9; v. 289; p. 371.
Pen or pencil-case. J. C. Wahl. Nos. 58,693–4; Aug. 9; v. 289; p. 374.
Phonograph-cabinet. H. L. Meidinger. No. 58,677; Aug. 9; v. 289; p. 371.
Screw or similar article. J. P. Bustis. No. 58,666; Aug. 9; v. 289; p. 368.
Signal, Traffic-. J. P. Hots. No. 58,673; Aug. 9; v. 289; p. 370.
Soda-fountain and ice-cream-dispensing apparatus. W. F. Beatty. No. 58,667; Aug. 9; v. 289; p. 367.
Spoon, Ice-cream. J. A. Rayder. No. 58,685; Aug. 9; v. 289; p. 372.
Store-front. C. H. Seymour. No. 58,690; Aug. 9; v. 289; p. 373.
Telephone-earpiece. R. W. Post. No. 58,682; Aug. 9; v. 289; p. 372.
Tie-fastener and soft-collar retainer, Combined. H. I. Felix. No. 58,667; Aug. 9; v. 289; p. 368.
Tire-tread. W. G. Lerch. No. 58,674; Aug. 9; v. 289; p. 370.
Tire-tread. J. W. Price. No. 58,683; Aug. 9; v. 289; p. 372.
Toilet-article handle. H. D. Mosauer. No. 58,679; Aug. 9; v. 289; p. 371.
Tool, Combination-. A. H. Crampton. No. 58,663; Aug. 9; v. 289; p. 368.
Tooth cleaner and support, Combined. L. A. Gable. Nos. 58,668–9; Aug. 9; v. 289; p. 369.
Toy bowling-alley. H. Reuhl. No. 58,686; Aug. 9; v. 289; p. 373.
Vehicle, Child's. J. T. Casey. No. 58,659; Aug. 9; v. 289; p. 367.

ALPHABETICAL LIST OF TRADE-MARKS REGISTERED.

Aprons and house-dresses. Ward-Stilson Company. No. 145,588; Aug. 9; v. 289; p. 408.
Bedspreads. Stevens Manufacturing Co. No. 145,583; Aug. 9; v. 289; p. 488.
Bench grinding-machines. Duwell Manufacturing Company. No. 145,554; Aug. 9; v. 289; p. 407.
Blouses, play-suits, or rompers, &c., Boys'. Sonny Manufacturing Co. No. 145,582; Aug. 9; v. 289; p. 408.

Medicine for influenza, colds, cholera, pneumonia. L. Kubanek. No. 143,694; Aug. 9; v. 289; p. 387.
Metal buildings and metal-building sections. International Housing Corporation. No. 148,073; Aug. 9; v. 289; p. 403.
Milk, Unsweetened evaporated. American Milk Products Corporation. No. 147,390; Aug. 9; v. 289; p. 402.
Milk, Unsweetened evaporated. Nestle's Food Company. No. 143,183; Aug. 9; v. 289; p. 385.
Mouth-wash, Antiseptic. Steroline Company. No. 129,810; Aug. 9; v. 289; p. 377.
Mouth-wash and antiseptic, Liquid. H. L. Asselin. No. 142,312; Aug. 9; v. 289; p. 384.
Muslin, sheets, pillow-cases, Bleached. Cooper, Coate & Casey Dry Goods Co. No. 148,711; Aug. 9; v. 289; p. 405.
Muslin, sheets, pillow-cases, Bleached. Cooper, Coate & Casey Dry Goods Co. Nos. 148,713–14; Aug. 9; v. 289; p. 405.
Neckties. E. G. Hagedorn. No. 145,624; Aug. 9; v. 289; p. 394.
Oil, cold-cream, witch-hazel, &c., Cod-liver. International Drug Company. No. 131,173; Aug. 9; v. 289; p. 377.
Oil compound used in the baking of food products. Bakers Products Company. No. 118,505; Aug. 9; v. 289; p. 375.
Oil, cup-greases, &c., Lubricating motor-. J. J. South. No. 125,862; Aug. 9; v. 289; p. 376.
Oil, Lubricating-. Automotive Lubricant Company. No. 148,045; Aug. 9; v. 289; p. 403.
Oil, Lubricating-. E. K. Lincoln. No. 144,817; Aug. 9; v. 289; p. 389.
Oil, Lubricating-. Moon-Shine Manufacturing Company. No. 148,946; Aug. 9; v. 289; p. 405.
Oil, Petroleum-. Standard Oil Company. No. 147,214; Aug. 9; v. 289; p. 401.
Oils and greases, Lubricating. Corning International Corporation. No. 136,873; Aug. 9; v. 289; p. 380.
Oils and greases, Lubricating. Lubricants Company. No. 149,088; Aug. 9; v. 289; p. 406.
Oils, greases, candles, &c. Atlantic Refining Company. No. 148,690; Aug. 9; v. 289; p. 404.
Oils, Lubricating-. Radium Oil Company. No. 148,348; Aug. 9; v. 289; p. 404.
Oils, Lubricating-. Sun Company. No. 147,850; Aug. 9; v. 289; p. 403.
Overalls, cover-alls, trousers, palm beach suits. Kahn Manufacturing Company. No. 143,499; Aug. 9; v. 289; p. 386.
Perfumes. R. Bernardo. No. 147,275; Aug. 9; v. 289; p. 401.
Perfumes, toilet waters, liquid and solid brilliantines, &c. Lé Benart Import Co. No. 145,276; Aug. 9; v. 289; p. 392.
Perfumes, toilet waters, &c. M. M. R. Vve. Grenoville. Nos. 145,185–6; Aug. 9; v. 289; pp. 390–1.
Perfumes, toilet waters, &c. M. M. R. Vve. Grenoville. Nos. 145,188–9; Aug. 9; v. 289; p. 391.
Perfumes, toilet waters, &c. M. M. R. Vve. Grenoville. No. 145,192; Aug. 9; v. 289; p. 32.
Perfumes, toilet waters, &c. M. M. R. Vve. Grenoville. No. 145,194; Aug. 9; v. 289; p. 392.
Petroleum jelly. Puritan Drug Mfg. Co. No. 146,648; Aug. 9; v. 289; p. 399.
Petroleum products. Texas Company. No. 131,050; Aug. 9; v. 289; p. 377.
Piston-rings. General Utility Company. No. 149,224; Aug. 9; v. 289; p. 406.
Play-wagons, and coasters for children. H. C. White Company. No. 146,101; Aug. 9; v. 289; p. 395.
Pliers. C. E. Swihart. No. 145,419; Aug. 9; v. 289; p. 393.
Plurigrandular formulas for treatment of amenorrhea, &c. H. R. Harrower. No. 145,212; Aug. 9; v. 289; p. 392.
Pluriglandular formulas for treatment of asthenia, &c. H. R. Harrower. No. 145,213; Aug. 9; v. 289; p. 392.
Polishing-cloths for gold, silver, and all precious metals. L. G. Pearson Corporation. No. 147,847; Aug. 9; v. 289; p. 403.
Powder and mouth-lotion, Tooth-. P. M. Wenzel. No. 121,612; Aug. 9; v. 289; p. 376.
Powder and rouge, Compact-. F. R. Arnold & Co. No. 146,420; Aug. 9; v. 289; p. 396.
Powder, Face-. F. R. Arnold & Co. No. 146,419; Aug. 9; v. 289; p. 396.
Powder, Face-. Tremonte Co. No. 142,430; Aug. 9; v. 289; p. 384.
Preparation for catarrh, &c. C. M. Shipman. No. 142,892; Aug. 9; v. 289; p. 385.
Preparation for increasing the brilliancy and removing the yellowness from white or gray hair. Harriet Hubbard Ayer. No. 146,353; Aug. 9; v. 289; p. 395.
Preparation for relief of pain. B. Accoata, Jr. No. 146,423; Aug. 9; v. 289; p. 396.
Preparation for treatment of colds, croup, whooping-cough, &c. A. S. Whitfield. No. 146,607; Aug. 9; v. 289; p. 399.
Printed and engraved matter. W. F. Roberts Company. No. 149,559; Aug. 9; v. 289; p. 406.
Publication, Monthly periodical. Farm Publishing Company. No. 147,773; Aug. 9; v. 289; p. 403.
Publication, Weekly. Cole Publishing Company. No. 148,928; Aug. 9; v. 289; p. 405.
Publications. Malone & Hyde. No. 148,500; Aug. 9; v. 289; p. 404.
Publications. H. E. Millikin. No. 124,660; Aug. 9; v. 289; p. 376.
Remedy for stomach disorders. Stom-A-Lax Medicine Co. No. 118,356; Aug. 9; v. 289; p. 375.
Repair kits, Portable. American Automobile Accessories Company. No. 120,272; Aug. 9; v. 289; p. 376.
Rubber automobile tires and tubes. Automobile Owners' Tire Corporation. No. 141,150; Aug. 9; v. 289; p. 283.
Rubber tire and tube patches, &c., Sheet-. J. W. Freedly. No. 146,008; Aug. 9; v. 289; p. 395.
Rugs, Grass. S. L. Stroud. No. 147,576; Aug. 9; v. 289; p. 402.
Salve. Puritan Drug Mfg. Co. No. 146,649; Aug. 9; v. 289; p. 399.
Salve applied externally as a treatment for rheumatism, sprains, colds, &c. John Novak Company. No. 144,036; Aug. 9; v. 289; p. 387.
Salve for boils and carbuncles. J. H. Brodhead. No. 132,078; Aug. 9; v. 289; p. 378.
Salve for cuts, wounds, and bruises, and a general medicinal tonic. J. Sagan. No. 144,054; Aug. 9; v. 289; p. 387.
Salve for sore throats, pleurisy, &c. P. Hohl. No. 145,828; Aug. 9; v. 289; p. 394.
Salve for treatment of cancers and cancerous sores. A. L. Beall. No. 132,228; Aug. 9; v. 289; p. 378.
Salve for wounds and sores. J. Buzinski. No. 143,678; Aug. 9; v. 289; p. 387.
Sateens, percalines, taffetas, piece goods, and print cloths. J. W. Goddard & Sons. No. 142,388; Aug. 9; v. 289; p. 384.

Toilet preparations. N. A. Gleim. No. 142,830; Aug. 9; v. 289; p. 385.
Toilet preparations. Marshall Field & Company. No. 146,539; Aug. 9; v. 289; p. 397.
Tonic alterative. F. C. Hazelrigg. No. 145,508; Aug. 9; v. 289; p. 393.
Tonic nutritive and alterative. Parke, Davis & Company. No. 147,123; Aug. 9; v. 289; p. 401.
Tonic, System-. Dr. Peter Fahrney & Sons Company. No. 142,614; Aug. 9; v. 289; p. 384.
Tonics, General. F. A. Weinstein. No. 146,610; Aug. 9; v. 289; p. 399.
Torch, Self-blowing. E. Folgman. No. 149,896; Aug. 9; v. 289; p. 406.
Toy carpet-sweeper. Bissell Carpet Sweeper Co. Nos. 147,335–6; Aug. 9; v. 289; p. 401.
Toy dogs, Stuffed. Davis and Voetsch. Nos. 149,070–1; Aug. 9; v. 289; p. 406.
Toy music-boxes. Lang & Pressprich. No. 149,763; Aug. 9; v. 289; p. 406.
Toy vacuum-cleaner and bags. Kaye Manufacturing Company. No. 144,920; Aug. 9; v. 289; p. 389.
Tractors, Gasolene industrial. Towmotor Company. No. 142,180; Aug. 9; v. 289; p. 384.
Tree-wounds, Chemical composition of matter for dressing. Davey Tree Expert Company. No. 141,419; Aug. 9; v. 289; p. 383.
Underwear. Tailored Silk Undergarment Co. No. 142,115; Aug. 9; v. 289; p. 383.
Underwear, Wool-. Medlicott Company. No. 146,643; Aug. 9; v. 289; p. 399.
Upholstery and drapery trimmings. E. Maag. No. 143,288; Aug. 9; v. 289; p. 386.
Vitamine preparations, nerve-tonics, &c. Society of Chemical Industry in Basle. Nos. 130,377–8; Aug. 9; v. 289; pp. 381–2.
Waists. Waistcraft Corporation. No. 145,538; Aug. 9; v. 289; p. 394.
Washing-tablets for fabrics. Little Servant Manufacturing Co. No. 148,807; Aug. 9; v. 289; p. 405.
Water, Artificial health mineral. D. S. Campbell. No. 133,349; Aug. 9; v. 289; p. 378.
Worsteds, woolen, &c., piece goods. Louis Walther Manufacturing Company. No. 140,534; Aug. 9; v. 289; p. 382.

CLASSIFICATION OF PATENTS

ISSUED AUGUST 9, 1921.

NOTE.—First number—class, second number—subclass, third number—patent number.

1— 2.3: 1,387,268
1,387,269
18: 1,386,752
2— 54: 1,386,595
106: 1,386,980
108: 1,387,015
118: 1,386,992
144: 1,386,950
149: 1,386,989
151: 1,387,342
198: 1,387,307
226: 1,387,135
241: 1,386,894
229: 1,386,746
245: 1,387,230
259: 1,386,592
25— 41: 1,387,175
121: 1,387,263
128: 1,387,066
154: 1,387,055
155: 1,387,057
26— 8: 1,387,155
27— 28: 1,387,185
29— 34: 1,387,260
49: 1,387,305
86.3: 1,386,721
86.4: 1,386,944
96: 1,387,339
1,387,343
1,387,417
156: 1,387,199
156.6: 1,386,997
182: 1,387,157
30— 9: 1,386,956
1,387,246
31— 73: 1,387,436
32— 5: 1,387,053
9: 1,386,762
1,386,798
10: 1,387,329
33— 3: 1,387,038

ALPHABETICAL LIST OF PATENTEES

TO WHOM

PATENTS WERE ISSUED ON THE 16TH DAY OF AUGUST, 1921.

NOTE.—Arranged in accordance with the first significant character or word of the name. (In accordance with city and telephone directory practice.)

Aarons, Henry M., New York, N. Y. Window-guard. No. 1,387,958; Aug. 16; v. 289; p. 519.

Adam, Folger, assignor to Illinois Wire & Mfg. Co., Joliet, Ill. Corncrib and the like. No. 1,388,013; Aug. 16; v. 289; p. 530.

Adams, H. Blanche. (See Gordon, G. Murl, assignor.)

Adams, Harry E., New York, N. Y. Securing means for inclosures for automobile-tops. No. 1,387,634; Aug. 16; v. 289; p. 455.

Aiguier, Harold, Kearney, N. J. Combined knife and saw. No. 1,388,014; Aug. 16; v. 289; p. 531.

Air Reduction Company. (See Metzger, Floyd J., assignor.)

Aisenberg, Jacob, Corona, N. Y. Moving sign. No. 1,387,635; Aug. 16; v. 289; p. 456.

Aktiebolaget Gyro. (See Cassel, Gunnar E., assignor.)

Albert, Alverdo S., Ione, Wash. Milk-shake-powder compound. No. 1,388,084; Aug. 16; v. 289; p. 544.

Aldeborgh, Erik H., assignor to C. E. Johansson, Inc., Poughkeepsie, N. Y. Mechanical movement. No. 1,387,825; Aug. 16; v. 289; p. 494.

Alden, George I., assignor to Norton Company, Worcester, Mass. Easy-start driving and reversing mechanism. No. 1,387,636; Aug. 16; v. 287; p. 456.

Alexander, Clive M., Port Arthur, Tex., assignor to Gulf Refining Company, Pittsburgh, Pa. Heating oil-retorts and apparatus therefor. No. 1,387,677; Aug. 16; v. 89; p. 464.

Alford, Allen, Waco, Tex. Rock-drill. No. 1,387,447; Aug. 16; v. 289; p. 417.

Allen, Charles H., Attleboro, Mass. Collar-holder. No. 1,387,878; Aug. 16; v. 289; p. 505.

Allen, Jessie L., New York, N. Y. Mop cleaner and holder. No. 1,387,580; Aug. 16; v. 289; p. 445.

Allen, S. L., & Co. (See Walz, Carl F., assignor.)

Allsteelequip Company. (See Erickson, A. F., and Shiek, assignors.)

American Brake Company. (See Brown, Thomas R., assignor.)

Amesbury Brass & Foundry Company. (See Miller, William, assignor.)

Anagnostopulos, Theodore D., Opelousas, assignor of one-half to J. M. Fox, New Orleans, La. Box-lid holder. No. 1,388,147; Aug. 16; v. 289; p. 556.

Anderson-Barngrover Mfg. Co. (See Thompson, Albert R., assignor.)

Anderson, Charles W., Brooklyn, N. Y. Control means for drive mechanism. No. 1,387,445; Aug. 16; v. 289; p. 417.

Anderson, Gilbert V., Philadelphia, Pa. Gun mounts and control. No. 1,387,678; Aug. 16; v. 289; p. 464.

Anderson, Gustaf M., assignor to Associated Manufacturers Company, Waterloo, Iowa. Oiling system. No. 1,387,637; Aug. 16; v. 289; p. 456.

Anti-Corrosion Engineering Company. (See Wilson, John J., assignor.)

Appleton, Jamie F., Keokuk, assignor to Iowa Lock and Manufacturing Company, Burlington, Iowa. Combination-lock. No. 1,387,750; Aug. 16; v. 289; p. 479.

Arkansas Short Leaf Lumber Company. (See Walker, William H., assignor.)

Armstrong, Frank H., Auburn, assignor to Corona Typewriter Company, Inc., Groton, N. Y. Typewriting-machine. No. 1,387,959; Aug. 16; v. 289; p. 520.

Armstrong, Frank H., Auburn, assignor to Corona Typewriter Company, Inc., Groton, N. Y. Typewriting-machine. No. 1,387,960; Aug. 16; v. 289; p. 520.

Arneth, John F., Washington, D. C. Animal-trap. No. 1,387,826; Aug. 16; v. 289; p. 494.

Asakawa, Seiji, Tokyo-Fu, and K. Nosawa, Chiba-Ken, Japan. Ship's-bottom paint. No. 1,387,448; Aug. 16; v. 289; p. 417.

Ashcroft, Edgar A., London, England. Recovering values from ores. No. 1,388,086; Aug. 16; v. 289; p. 544.

Associated Manufacturers Company. (See Anderson, Gustaf M., assignor.)

Astier, Antoine J., Colombes, France. Valve for pipes for water and other fluids. No. 1,387,446; Aug. 16; v. 289; p. 417.

Atcheson, Robert H., Providence, R. I., assignor to Ibex Rubber Corporation, Jersey City, N. J. Method of and apparatus for vulcanizing. No. 1,388,138; Aug. 16; v. 289; p. 555.

Atlas Doll & Toy Co. (See Gerberg, M., Hirsch, and Morgan, assignors.)

Ault, Eugene B., Calallen, Tex. Bee-shipping cage. No. 1,388,085; Aug. 16; v. 289; p. 544.

Autosales Corporation. (See Bertram, Louis, assignor.)

Axline, Clarence E., Sr., Bryant, Ill. Gate-latch. No. 1,387,961; Aug. 16; v. 289; p. 520.

Bach, Charles H., Laconia, N. H. Pump. No. 1,388,087; Aug. 16; v. 289; p. 545.

Bacher, Rollin L., Cleveland Heights, assignor to The United States Air Compressor Company, Cleveland, Ohio. Pressure-release. No. 1,387,679; Aug. 16; v. 289; p. 464.

Bacon Heater Manufacturing Company, The. (See Bacon, Joseph H., assignor.)

Bacon, Joseph H., Lakewood, assignor to The Bacon Heater Manufacturing Company, Cleveland, Ohio. Gas-burner-attaching means. No. 1,387,827; Aug. 16; v. 289; p. 495.

Baerwaldt, Erwin W., assignor to Farmers Barn Equipment Co., Stevens Point, Wis. Hinge. No. 1,387,962; Aug. 16; v. 289; p. 520.

Bajett, Louis, New York, N. Y. Cloth-sponging machine. No. 1,387,449; Aug. 16; v. 289; p. 417.

Baker, Burton W., Silesia, Mont. Harvester attachment. No. 1,387,680; Aug. 16; v. 289; p. 464.

Baker, Thomas F. (See Rutherford, J., and Baker.)

Baltzley, Louis E., Glen Ridge, N. J. Binder. No. 1,388,140; Aug. 16; v. 289; p. 555.

Banks, Mack, Chicago, Ill. Marble-gun. No. 1,388,015; Aug. 16; v. 289; p. 531.

Baranski, Julian, Trenton, N. J. Shade and curtain bracket. No. 1,387,752; Aug. 16; v. 289; p. 479.

Barnes, Edwin, Sheffield, England. Spectacles. No. 1,387,753; Aug. 16; v. 289; p. 480.

Barnholdt, Harold L., Pittsburgh, Pa., assignor to Westinghouse Electric and Manufacturing Company. Winding structure for multispeed induction-motors. No. 1,387,458; Aug. 16; v. 289; p. 419.

Bartlett, Hayward Company, The. (See Tast, Gustave, assignor.) (Reissue.)

Bassick Manufacturing Company, The. (See Fesler, Douglas F., assignor.)

Bates, John R., Chicago, Ill. Hydrocarbon-gas burner. No. 1,387,459; Aug. 16; v. 289; p. 419.

Bates, William P., Dallas, Tex. Fountain-brush. No. 1,387,754; Aug. 16; v. 289; p. 480.

Bauder, Victor S., Fort Plain, N. Y. Silo. No. 1,387,751; Aug. 16; v. 289; p. 479.

Bauer, Walter, assignor to Firm of Rohm & Haas, Darmstadt, Hessia, Germany. Manufacture of alkylene cyanhydrins. No. 1,388,016; Aug. 16; v. 289; p. 531.

Baumgartner, Charles B., assignor to National Manufacturing Company, Manchester, Iowa. Latching means for flexible gates. No. 1,388,017; Aug. 16; v. 289; p. 531.

Beam, Jacob B., Punxsutawney, Pa. Automobile-radiator. No. 1,387,755; Aug. 16; v. 289; p. 480.

Beckett, John R., Somerville, Mass. Indexing device. No. 1,387,756; Aug. 16; v. 289; p. 480.

Bedford, L. E., *et al.* (See Gruss, George H., assignor.)

Beebe, Stanley J., Union, N. Y. Upper-leather-cutting machine. No. 1,387,828; Aug. 16; v. 289; p. 495.

Beets, Nicolaas, New York, N. Y., assignor of one-half to W. J. Wilkinson. Block-action for repeating arms. No. 1,387,460; Aug. 16; v. 289; p. 420.

Bellay, John, Belleville, N. J. Automobile-jack. No. 1,387,581; Aug. 16; v. 289; p. 445.

Beller, Albert E., Ogden, Utah. Direction-indicating signal for automobiles. No. 1,387,916; Aug. 16; v. 289; p. 512.

Benedict, Hershel A., East Orange, and E. M. Moller, Jersey City, N. J. Underhang framework or chassis construction. No. 1,387,757; Aug. 16; v. 289; p. 481.

Bennett, Carl W., Duboistown, Pa. Attachment for umbrellas. No. 1,387,758; Aug. 16; v. 289; p. 481.

Bergamini, Antonio, North Haven, Conn. Hammer. No. 1,387,582; Aug. 16; v. 289; p. 445.

Bersey, Alfred E., Dobwalls, Liskeard, England. Box or carrier for live birds. No. 1,387,759; Aug. 16; v. 289; p. 481.

Bertram, Louis, Long Island City, assignor to Autosales Corporation, New York, N. Y. Coin-testing mechanism for coin-controlled machines. No. 1,387,681; Aug. 16; v. 289; p. 465.

Bethke, John P., and R. H. Stearns, assignors to Magnetic Manufacturing Co., Milwaukee, Wis. Magnetic pulley. No. 1,387,879; Aug. 16; v. 289; p. 505.

Bethlehem Steel Company. (See Land, John, assignor.)

Beyer, Jacob J., McKees Rocks, Pa. Device for bending chain-links. No. 1,387,880; Aug. 16; v. 289; p. 505.

Bingham, Jeremiah, assignor to The Bock Bearing Company, Toledo, Ohio. Making cup and cone members for roller-bearings. No. 1,387,638; Aug. 16; v. 289; p. 457.

Bingham, Jeremiah, assignor to The Bock Bearing Company, Toledo, Ohio. Roller-bearing cage. No. 1,387,639; Aug. 16; v. 289; p. 495.

Bingham, Jeremiah, assignor to The Bock Bearing Company, Toledo, Ohio. Assembling roll-holding cages. No. 1,387,830; Aug. 16; v. 289; p. 495.

Bingham, Jeremiah, assignor to The Bock Bearing Company, Toledo, Ohio. Machine for accurately alining and closing roll-holding cages for roller-bearings. No. 1,387,881; Aug. 16; v. 289; p. 505.

Birch, Charles H., Chicago, Ill. Can-capping or disk-feeding machine. No. 1,387,461; Aug. 16; v. 289; p. 420.

Bishop, James T. (See Vales, E. J., and Bishop.)

Bjorge, Arne K. H., St. Paul, Minn. Electric third rail. No. 1,388,088; Aug. 16; v. 289; p. 545.

Blanchard, George N., assignor to Colmar Burner Co. Inc., San Francisco, Calif. Automatic fuel control. No. 1,387,583; Aug. 16; v. 289; p. 445.

Blechowick, Frank S. (See Erickson, Ingvald E., assignor.)

Bock Bearing Company, The. (See Bingham, Jeremiah, assignor.)

Bolender, Joel D., and E. R. Creamer, assignors to The George R. Carter Company, Connersville, Ind. Molding for upholstering. No. 1,387,639; Aug. 16; v. 289; p. 457.

Borchert, Charles A., and M. G. O'Neil, Beaver, Pa., assignors to Protected Seat Valve Company, Pittsburgh, Pa. Valve. No. 1,387,831; Aug. 16; v. 289; p. 495.

Bosc, Louis P., Paris, France. Rotary duplicator. No. 1,388,139; Aug. 16; v. 289; p. 555.

Bourn, Stephen W., Providence, R. I. Applying a coating fluid. No. 1,387,963; Aug. 16; v. 289; p. 520.

Bourn, Stephen W., Providence, R. I. Surface-coating machine. No. 1,387,964; Aug. 16; v. 289; p. 521.

Bowe, David W., Detroit, Mich. Clamp. No. 1,387,917; Aug. 16; v. 289; p. 512.

Bowen, Edgar W., Detroit, and R. Turner, Highland Park, assignors of D. M. Ferry & Company, Detroit, Mich. Display apparatus. No. 1,387,965; Aug. 16; v. 289; p. 521.

Bowman, Edward, Dubuque, Iowa. Adjustable ventilator-hood for automobiles. No. 1,387,584; Aug. 16; v. 289; p. 445.

Boyce, Ruben H., Glasco, Kans. Box-holder. No. 1,388,089; Aug. 16; v. 289; p. 545.

Boyd, Sanford S., Laurens, S. C. Underwear. No. 1,387,585; Aug. 16; v. 289; p. 446.

Bradford, Louise L., Allston, Mass. Bust-pad holder. No. 1,387,586; Aug. 16; v. 289; p. 446.

Bradley, Charles, Denver, Colo. Railway-metal-tie appliance. No. 1,387,462; Aug. 16; v. 289; p. 420.

Brady, Enoch J., Burkburnett, Tex. Water-motor. No. 1,388,018; Aug. 16; v. 289; p. 531.

Brainard, George C., East Cleveland, assignor to The Hydraulic Pressed Steel Company, Cleveland, Ohio. Producing and uniting heads to barrels. No. 1,387,640; Aug. 16; v. 289; p. 457.

Brassler, George F., Whitestone, N. Y. Milk-bottle lock and retainer. No. 1,388,090; Aug. 16; v. 289; p. 54.

Breitholtz, Sigrid, New York, N. Y. Composition of matter. No. 1,388,019; Aug. 16; v. 289; p. 531.

Brenahan, Thomas M., Washington, D. C. Automobile-window attachment. No. 1,388,091; Aug. 16; v. 289; p. 546.

Bridges, Robert L., Lake Charles, La. Rotary automatic valve-controlling mechanism. No. 1,387,760; Aug. 16; v. 289; p. 481.

Brockway, Don M. and F. R., Los Angeles, Calif. Transformable automobile-tractor. No. 1,388,148; Aug. 16; v. 289; p. 556.

Brockway, Foss R. (See Brockway, Don M. and F. R.)

Broido, Benjamin, assignor to The Superheater Company, New York, N. Y. Superheater-regulator. No. 1,387,463; Aug. 16; v. 289; p. 420.

Broido, Benjamin, assignor to The Superheater Company, New York, N. Y. Boiler with superheaters. No. 1,387,464; Aug. 16; v. 289; p. 420.

Bronnert, Emile, Mulhausen, France. Manufacture of artificial silk. No. 1,387,882; Aug. 16; v. 289; p. 505.

Brown, Daniel J., Northport, Nebr. Appliance for mending broken vehicle-wheels. No. 1,387,918; Aug. 16; v. 289; p. 512.

Brown, Thomas R., Pittsburgh, Pa., assignor to American Brake Company, St. Louis, Mo. Automatic slack-adjuster. No. 1,388,020; Aug. 16; v. 289; p. 531.

Brown, Wilbur L., Santa Ana, Calif. Lubricant-distributer for internal-combustion engines. No. 1,387,587; Aug. 16; v. 289; p. 446.

Brown, William H., et al. (See Spiker, Harry E., assignor.)

Browning, George, assignor to Lee Razor Manufacturing Company, Chicago, Ill. Safety-razor. No. 1,387,465; Aug. 16; v. 289; p. 421.

Brumann, Otto F., Leysin-Village, Switzerland. Means for intermixing fluids. No. 1,387,832; Aug. 16; v. 289; p. 496.

Buchsbaum, Samuel, Chicago, Ill. Belt-buckle. No. 1,387,919; Aug. 16; v. 289; p. 512.

Budd, Edward G., assignor to Budd Wheel Corporation, Philadelphia, Pa. Wire-spoked wheel. No. 1,388,021; Aug. 16; v. 289; p. 531.

Budd, Edward G., assignor to Budd Wheel Corporation, Philadelphia, Pa. Hub structure of detachable wire-spoked wheels. No. 1,388,022; Aug. 16; v. 289; p. 532.

Budd Wheel Corporation. (See Budd, Edward G., assignor.)

Burton, Charles S., Oak Park, Ill. Container for music-rolls and the like. No. 1,388,092; Aug. 16; v. 289; p. 546.

Zuercher, Chas., Broadhead, Wis. Chase. No. 145,486; Aug. 16; v. 289; p. 575.

ALPHABETICAL LIST OF INVENTIONS

FOR WHICH

PATENTS WERE ISSUED ON THE 16TH DAY OF AUGUST, 1921.

NOTE.—Arranged in accordance with the first significant character or word of the name. (In accordance with city and telephone directory practice.)

Abrasive for grinding and smoothing glass. W. L. Kann. No. 1,387,649; Aug. 16; v. 289; p. 459.
Acid and compounds of the same, Apparatus for the manufacture of phosphoric. W. H. Waggaman and T. B. Turley. No. 1,387,817; Aug. 16; v. 289; p. 493.
Addressing apparatus. P. F. Cox. No. 1,387,592; Aug. 16; v. 289; p. 447.
Aeroplane. W. F. Osborne. No. 1,387,809; Aug. 16; v. 289; p. 508.
Aeroplane speed-indicator. A. F. Poole. No. 1,387,555; Aug. 16; v. 289; p. 440.
Aeroplanes, Control for. W. S. Rabb. No. 1,387,513; Aug. 16; v. 289; p. 431.
Agitator. H. Halstead. No. 1,387,709; Aug .16; v. 289; p. 471.
Air and gases electrically, Method of and apparatus for treating. W. T. Hoofnagle. No. 1,388,112; Aug. 16; v. 289; p. 550.
Air-compressor, Engine. M. Rotter. No. 1,387,515; Aug. 16; v. 289; p. 432.
Alarm: *See*—
Automobile thief-alarm.
Alkylene cyanhydrins, Manufacture of. W. Bauer. No. 1,388,016; Aug. 16; v. 289; p. 531.
Alloy. A. Pacz. No. 1,387,900; Aug. 16; v. 289; p. 509.
Alloy of nickel and zirconium, Making an. N. Petinot. No. 1,387,663; Aug. 16; v. 289; p. 461.
Amusement apparatus. F. W. Thompson. No. 1,388,130; Aug. 16; v. 289; p. 553.
Analytical balance. W. M. Pestel. No. 1,387,998; Aug. 16; v. 289; p. 528.
Anchoring means. H. T. R. Dray. No. 1,388,031; Aug. 16; v. 289; p. 534.
Anæsthetizing-machine. J. A. Heidbrink. No. 1,387,647; Aug. 16; v. 289; p. 458.
Angle-cock handle. C. C. Farmer. No. 1,387,971; Aug. 16; v. 289; p. 522.
Animal-trap. J. F. Arneth. No. 1,387,826; Aug. 16; v. 289; p. 494.
Animal-trap. O. Palahnuk. No. 1,387,803; Aug. 16; v. 289; p. 490.
Antirattler. E. J. Gulick. No. 1,387,539; Aug. 16; v. 289; p. 436.
Arch support, Shank-piece and metatarsal-. J. Steinbrecher. No. 1,387,952; Aug. 16; v. 289; p. 518.
Auto-light-controlling device. J. Zenishek. No. 1,387,579; Aug. 16; v. 289; p. 444.
Auto baggage-carrier. E. H. Johnson. No. 1,388,044; Aug. 16; v. 289; p. 536.
Autos, Attachment for. C. H. Headley. No. 1,387,775; Aug. 16; v. 289; p. 483.
Automaton. M. Gerberg, A. Hirsch, and M. Morgan. No. 1,387,482; Aug. 16; v. 289; p. 424.
Automobile-bumper. W. G. Cox. No. 1,387,456; Aug. 16; v. 289; p. 419.
Automobile-bumper. W. G. Cox. No. 1,387,767; Aug. 16; v. 289; p. 483.
Automobile-bumper. F. G. Whittington. No. 1,387,527; Aug. 16; v. 289; p. 434.
Automobile-engine heater. F. Thornton, Jr. No. 1,387,522; Aug. 16; v. 289; p. 433.
Automobile-engine support. G. Dotterweich. No. 1,388,104; Aug. 16; v. 289; p. 548.
Automobile-jack. J. Bellay. No. 1,387,581; Aug. 16; v. 289; p. 445.
Automobile-jack. V. Stawicki. No. 1,387,563; Aug. 16; v. 289; p. 441.
Automobile-locking device. A. H. Larduskey. No. 1,387,651; Aug. 16; v. 289; p. 459.
Automobile-radiator. J. B. Beam. No. 1,387,755; Aug. 16; v. 289; p. 480.
Automobile-radiators, Indicating instrument for. J. Kleidman. No. 1,387,890; Aug. 16; v. 289; p. 507.
Automobile-signal. F. Pekar. No. 1,387,611; Aug. 16; v. 289; p. 451.
Automobile-skid. O. G. Moore. No. 1,388,053; Aug. 16; v. 289; p. 538.
Automobile thief-alarm. W. J. Miller. No. 1,387,798; Aug. 16; v. 289; p. 489.
Automobile-tractor. Transformable. D. M. and F. R. Brockway. No. 1,388,148; Aug. 16; v. 289; p. 556.
Automobile-tops, Securing means for inclosures for. H. E. Adams. No. 1,387,634; Aug. 16; v. 289; p. 456.
Automobile ventilator-hood, Adjustable. E. Bowman. No. 1,387,589; Aug. 16; v. 289; p. 445.
Automobile-wheel. S. Madjar. No. 1,387,793; Aug. 16; v. 289; p. 488.
Automobile-wheel. C. Ritzel. No. 1,388,061; Aug. 16; v. 289; p. 539.
Automobile-window attachment. T. M. Bresnahan. No. 1,388,091; Aug. 16; v. 289; p. 546.
Automobiles, Clutch-pedal lock for. E. J. Friedrich. No. 1,388,149; Aug. 16; v. 289; p. 557.
Automobiles, Direction-indicating signal for. A. E. Beller. No. 1,387,916; Aug. 16; v. 289; p. 512.
Automobiles, Parking-device attachment for. A. W. Swanson. No. 1,387,626; Aug. 16; v. 289; p. 454.
Automobiles, Sanding device for. P. R. Shaller. No. 1,387,620; Aug. 16; v. 289; p. 453.
Bakers' mix, Forming. F. A. Doyle. No. 1,387,693; Aug. 16; v. 289; p. 467.
Bar: *See*—
Track-liner bar.
Barrels, Producing and uniting heads to. G. C. Brainard. No. 1,387,640; Aug. 16; v. 289; p. 457.
Bearing. A. Kingsbury and H. A. S. Howarth. No. 1,367,929; Aug. 16; v. 289; p. 514.
Bearing. A. Kingsbury and H. A. S. Howarth. No. 1,387,930; Aug. 16; v. 289; p. 514.
Bearing, Ball-. K. O. Leon. No. 1,387,993; Aug. 16; v. 289; p.526.
Bearing, Ball-. J. A. Ohlsson. No. 1,387,609; Aug. 16; v. 289; p. 450.
Bearing Cage, Roller-. J. Bingham. No. 1,387,829; Aug. 16; v. 289; p. 495.
Bearing-plate, Removable. B. H. Canady. No. 1,387,588; Aug. 16; v. 289; p. 446.
Bearings, Machine for accurately aligning and closing roll-holding cages for roller-. J. Bingham. No. 1,387,881; Aug. 16; v. 289; p. 505.
Bearings, Making cup and cone members for roller-. J. Bingham. No. 1,387,638; Aug. 16; v. 289; p. 457.
Beehives, Entrance for. F. L. Nitsch and A. Meier. No. 1,387,734; Aug. 16; v. 289; p. 476.
Beverage-mixing devices, Dispensing attachment for. R. W. Riedel. No. 1,387,908; Aug. 16; v. 289; p. 510.
Binder. L. E. Baltzley. No. 1,388,140; Aug. 16; v. 289; p. 555.
Binder, Loose-leaf. E. C. Mahon. No. 1,387,859; Aug. 16; v. 289; p 501.
Bit: *See*—
Well-drilling bit.
Blackboard or slate. A. B. Ellis. No. 1,387,534; Aug. 16; v. 289; p. 435.
Block: *See*—
Terminal block.
Blowpipe-burner. W. J. Cooper. No. 1,387,591; Aug. 16; v. 289; p. 447.
Boards, Roughening the side edges of flooring-. W. H. Walker. No. 1,387,873; Aug. 16; v. 289; p. 504.
Boat, Bathing-. J. Sebeto. No. 1,388,003; Aug. 16; v. 289; p. 528.
Bobbin-support. G. R. Plott. No. 1,387,943; Aug. 16; v. 289; p. 517.
Boiler: *See*—
Superheater-boiler.
Boiler and damper regulator for both steam and hot water. J. M. Larson. No. 1,387,853; Aug. 16; v. 289; p. 500.
Boiler-flues, Support for. E. W. Clarke. No. 1,388,025; Aug. 16; v. 289; p. 532.
Bolting-up and plate-tightening machinery. J. P. McBride. No. 1,387,895; Aug. 16; v. 289; p. 508.
Book, Car-record. F. C. King. No. 1,388,048; Aug. 16; v. 289; p. 537.
Book-covers, Apparatus for cleaning. J. E. Cross. No. 1,387,884; Aug. 16; v. 289; p. 505.
Boots and shoes, Treeing device for. H. S. Jones. No. 1,388,046; Aug. 16; v. 289; p. 537.
Bottle-filling apparatus. F. W. Müller. No. 1,387,507; Aug. 16; v. 289; p. 430.
Bottle, Hot-water. W. E. Swift. No. 1,387,953; Aug. 16; v. 289; p. 519.
Box: *See*—
Core-box. Packing-box.
Exhaust-box. Tool-box.
Box-blank. J. Srofe. No. 1,388,006; Aug. 16; v. 289; v. 289; p. 529.
Box-holder. R. H. Boyce. No. 1,388,089; Aug. 16; v. 289; p. 545.
Box-lid holder. T. D. Anagnostopoulos. No. 1,388,147; Aug. 16; v. 289; p. 556.

Box or carrier for live birds. A. E. Bersey. No. 1,387,759; Aug. 16; v. 289; p. 481.
Bracket: *See*—
License-bracket. Shade-bracket.
Brake: *See*—
Car-brake. Rail-engaging brake.
Brake-beam. S. A. Crone. No. 1,387,768; Aug. 16; v. 289; p. 483.
Brake-beam release and support. C. H. Williams. No. 1,387,956; Aug. 16; v. 289; p. 519.
Brake control for trains, Automatic. V. S. and S. A. Burton. No. 1,388,141; Aug. 16; v. 289; p. 555.
Breast-drill. G. E. Cassel. No. 1,387,921; Aug. 16; v. 287; p. 513.
Bricks, Method of and apparatus for making facing-. J. H. Mitchell. No. 1,387,861; Aug. 16; v. 289; p. 501.
Brush. C. Schatte. No. 1,388,127; Aug. 16; v. 289; p. 552.
Brush, Fountain-. W. P. Bates. No. 1,387,754; Aug. 16; v. 289; p. 480.
Brush, Shaving-. P. P. Pupilla. No. 1,388,001; Aug. 16; v. 289; p. 528.
Buckle, Belt-. S. Buchsbaum. No. 1,387,919; Aug. 16; v. 289; p. 512.
Buffing device for the inner face of rings, Manually-operated. M. Jelalian. No. 1,387,778; Aug. 16; v. 289; p. 485.
Building structure. I. E. Erickson. No. 1,387,698; Aug. 16; v. 289; p. 468.
Bumping-post. J. M. Scott. No. 1,387,561; Aug. 16; v. 289; p. 441.
Burglar-alarms, Mounting for. J. M. Butcher. No. 1,387,966; Aug. 16; v. 289; p. 521.
Burglar lock and alarm, Combined. A. S. Cummings. No. 1,387,594; Aug. 16; v. 289; p. 448.
Burner: *See*—
Blowpipe-burner. Oil-burner.
Gas-burner. Vulcanizing-burner.
Bust-pad holder. L. L. Bradford. No. 1,387,586; Aug. 16; v. 289; p. 446.
Button. C. Silverman. No. 1,387,948; Aug. 16; v. 289; p. 518.
Cabinet, Ironing-. F. W. Hurst. No. 1,387,721; Aug. 16; v. 289; p. 473.
Cabinet, Kitchen-. R. Hoffman. No. 1,367,927; Aug. 16; v. 289; p. 514.
Cabinets, Towel-. A. Miller. No. 1,387,932; Aug. 16; v. 289; p. 515.
Calculating-machine. V. J. Odhner. No. 1,387,608; Aug. 16; v. 289; p. 450.
Call-metering system. F. M. Slough. No. 1,387,668; Aug. 16; v. 289; p. 462.
Cameras, Automatic focusing device for. J. A. De Bouzek. No. 1,387,457; Aug. 16; v. 289; p. 419.
Cameras, Exposure-meter and finder for. P. W. Stoner. No. 1,387,811; Aug. 16; v. 289; p. 491.
Can: *See*—
Cell-can. Oil-can.
Candy-mold. P. Witty. No. 1,387,574; Aug. 16; v. 289; p. 443.
Cane-cutting machine. G. G. Powell. No. 1,387,511; Aug. 16; v. 289; p. 431.
Canoe. F. W. Zeidler and C. Halpern. No. 1,387,957; Aug. 16; v. 289; p. 519.
Can-capping or disk-feeding machine. C. H. Birch. No. 1,387,461; Aug. 16; v. 289; p. 420.
Canning-machine. J. C. Green. No. 1,387,977; Aug. 16; v. 289; p. 523.
Car brake, Railway-. E. J. McGorry. No. 1,387,729; Aug. 16; v. 289; p. 475.
Car, Dump-. N. Ekberg. No. 1,387,968; Aug. 16; v. 289; p. 521.
Car, Logging-. H. O. Williams and W. J. Miller. No. 1,387,822; Aug. 16; v. 289; p. 494.
Car, Side-dump. A. M. Gow. No. 1,387,485; Aug. 16; v. 289; p. 425.
Car-signal. S. Wideman. No. 1,387,671; Aug. 16; v. 289; p. 463.
Cars, Fluid-pipe coupling for railway-. A. E. Nescher. No. 1,387,508; Aug. 16; v. 289; p. 430.
Cars, Side bearing for railway-. W. J. Knox. No. 1,387,852; Aug. 16; v. 289; p. 500.
Carbureter. G. N. Goodrich. No. 1,387,484; Aug. 16; v. 289; p. 425.
Carriage adjustable back. C. A. Lindberg. No. 1,387,499; Aug. 16; v. 289; p. 428.
Carrier: *See*—

Horns, Electric. Schwarze Electric Company. No. 148,355; Aug. 16; v. 289; p. 587.
Horseshoe-nails, Cold-rolled. Fowler Nail Co. Nos. 118,221–2; Aug. 16; v. 289; p. 560.
Ice-cream and ice-breaking machines, lathe-tool holders, &c. Allman Gas Engine and Machine Co. No. 147,184; Aug. 16; v. 289; p. 583.
Ice-making and refrigerating machinery and parts thereof. De La Vergne Machine Company. No. 139,082; Aug. 16; v. 289; p. 567.
Index and bristol boards. Whiting Paper Company. No. 145,600; Aug. 16; v. 289; p. 575.
Inks, typewriter-ribbons, and inking-pads, Writing-. Buxton & Skinner Printing and Stationery Company. No. 139,843; Aug. 16; v. 289; p. 567.
Insecticide. Vaycide Chemical Corporation. Nos. 147,487–8; Aug. 16; v. 289; pp. 584–5.
Intestinal lubricant. Langley & Michaels Company. No. 147,202; Aug. 16; v. 289; p. 583.
Invalid-rings, sprays, surgeons' operating rubber gloves, ice-caps. National Drug Stores Corporation. No. 130,284; Aug. 16; v. 289; p. 561.
Knives and forks, Handles for. Mappin & Webb. No. 147,569; Aug. 16; v. 289; p. 585.
Kumyss. Kumyss, Incorporated. No. 137,131; Aug. 16; v. 289; p. 565.
Lamp sockets and receptacles, Electric-. Bryant Electric Company. No. 146,247; Aug. 16; v. 289; p. 577.
Leather. Martin Leather Company. No. 149,472; Aug. 16; v. 289; p. 590.
Leather packings. Chas. A. Schieren Company. No. 138,264; Aug. 16; v. 289; p. 566.
Linen and hemp, silk piece goods, carpets, &c. Morton Sundour Fabrics Ld. No. 147,206; Aug. 16; v. 289; p. 583.
Lubricant, lubricant dispensers and compressors, &c., Devices for applying. Bassick Manufacturing Co. No. 143,736; Aug. 16; v. 289; p. 572.
Malt extracts. A. Wielich. No. 141,445; Aug. 16; v. 289; p. 560.
Marshmallow crême. Colby Confectionery Company. No. 147,410; Aug. 16; v. 289; p. 584.
Medicinal preparation. J. Berlin. No. 145,737; Aug. 16; v. 289; p. 576.
Medicinal preparation. V. Halper. No. 146,911; Aug. 16; v. 289; p. 581.
Medicinal preparation. J. H. Margosian. No. 144,241; Aug. 16; v. 289; p. 573.
Medicinal preparation for use in tuberculosis, coughs, colds, &c. A. Schutt. No. 146,399; Aug. 16; v. 289; p. 578.
Milk, Ice-cream, Evaporated and powdered. United Dairy Association of Washington. No. 147,482; Aug. 16; v. 289; p. 584.
Mirrors, Hand-. Fiberloid Corporation. No. 141,971; Aug. 16; v. 289; p. 569.
Mowers, Lawn-. Jacobsen Manufacturing Company. No. 147,785; Aug. 16; v. 289; p. 586.
Muslins and cotton piece goods. G. Sidenberg & Co. No. 147,262; Aug. 16; v. 289; p. 583.
Novelties in the form of curios, old prints, &c. Look-See Shop. No. 138,815; Aug. 16; v. 289; p. 566.
Oats, cream-meal, cornmeal, hominy-grits, pearl-hominy, Rolled and steel-cut. Atlas Cereal Company. No. 132,834; Aug. 16; v. 289; p. 563.
Oil, Kerosene-. Texas Company. No. 125,518; Aug. 16; v. 289; p. 561.
Oil prepared and colored for use as a wood-stain, Pine-. Valdosta Retort Co. No. 143,970; Aug. 16; v. 289; p. 572.
Oleomargarin. Pure Food Specialties Company. No. 141,020; Aug. 16; v. 289; p. 568.
Overcoats, suits, coats, &c., Men's and boys'. Joffe-Foster Co. No. 145,749; Aug. 16; v. 289; p. 576.
Paint and liquid waterproof coating. E. R. Oden. No. 143,000; Aug. 16; v. 289; p. 571.
Paint coating or enamel for iron surfaces. J. Davis. No. 126,956; Aug. 16; v. 289; p. 561.
Paint enamels. Patek Brothers. No. 144,741; Aug. 16; v. 289; p. 574.
Paint, Flat wall-. Capitol Paint & Varnish Company. No. 143,684; Aug. 16; v. 289; p. 572.
Paint, Ready-mixed. Industrial Paint Company. No. 146,259; Aug. 16; v. 289; p. 577.
Paints. Frank Bownes Company. No. 142,382; Aug. 16; v. 289; p. 570.
Paints. Indiana Iddestructible Paint Co. No. 146,555; Aug. 16; v. 289; p. 579.
Paints and waterproofing-fillers. New Process Chemical Co. No. 116,788; Aug. 16; v. 289; p. 559.
Paints, stains, varnishes, &c. California Paint Company. Nos. 146,110–11; Aug. 16; v. 289; p. 577.
Paints, varnishes, and paint enamels. Sailors and Lamb Company. No. 143,716; Aug. 16; v. 289; p. 572.
Paints, varnishes, and stains. Bass-Hueter Paint Co. No. 145,149; Aug. 16; v. 289; p. 575.
Painters' supplies, &c. Sailors and Lamb Company. No. 143,717; Aug. 16; v. 289; p. 572.
Paper, Cover-. Hampden Glazed Paper & Card Co. No. 148,387; Aug. 16; v. 289; p. 587.
Paper, Printing-. Blunden-Lyon Company. No. 148,363; Aug. 16; v. 289; p. 587.
Paper, Waxed. Waxed Paper Company. No. 146,475; Aug. 16; v. 289; p. 579.
Pattern-marking machines. J. A. Rosenfeld. No. 148,457; Aug. 16; v. 289; p. 587.
Peaches, Fresh. L. T. Foss. No. 110,143; Aug. 16; v. 289; p. 559.
Peanut-brittle. J. R. Council. No. 146,520; Aug. 16; v. 289; p. 579.
Peelers, washers, and slicers, exhaust-boxes, &c., Fruit and vegetable. Premier Machinery Company. No. 147,571; Aug. 16; v. 289; p. 585.
Phonographs. B. E. Linquist. No. 123,650; Aug. 16; v. 289; p. 560.
Pipe thread and gasket compound. Kimball Company. No. 144,025; Aug. 16; v. 289; p. 573.
Polish, Automobile-. Navajo Laboratories. No. 146,459; Aug. 16; v. 289; p. 579.
Polishing-buffs. H. Paulson. No. 140,408; Aug. 16; v. 289; p. 568.
Polish, Nail-. J. Brueck. No. 144,846; Aug. 16; v. 289; p. 574.
Potatoes, (bagged in their natural state.) Monmouth County Farmers Exchange. No. 147,301; Aug. 16; v. 289; p. 583.
Powder, Face-. R. T. French Company. No. 146,962; Aug. 16; v. 289; p. 581.
Powder, Insect-. Regal Manufacturing Co. No. 146,846; Aug. 16; v. 289; p. 581.
Powder, Toilet. Eli Lilly & Company. No. 120,311; Aug. 16; v. 289; p. 560.
Preparation for treatment of the scalp. Orium Company. No. 146,730; Aug. 16; v. 289; p. 580.
Preparation used as a polish for painted, varnished, waxed, and oil surfaces, &c. Ultra Refined Crude Products Company. No. 135,675; Aug. 16; v. 289; p. 565.
Razors. Wester Bros. No. 149,049; Aug. 16; v. 289; p. 589.
Relish condiment, or sauce, Preparation of mustard. J. & J. Colman. Nos. 146,411–12; Aug. 16; v. 289; p. 578.
Rope made of aluminium. Aluminium-Walzwerke A.-G. No. 138,801; Aug. 16; v. 289; p. 566.
Rubber tires. Coast Tire and Rubber Company. No. 147,801; Aug. 16; v. 289; p. 586.

(REGISTRATION APPLIED FOR.)

Rust-preventing and polishing preparation. F. T. Adams. No. 125,272; Aug. 16; v. 289; p. 560.
Salve for eczema, &c. R. Theiner. No. 144,437; Aug. 16; v. 289; p. 573.
Scissors. H. Wolff & Co. No. 148,960; Aug. 16; v. 289; p. 589.
Seasonings for improving soups, &c. Maggi Co. Nos. 146,974–5; Aug. 16; v. 289; pp. 581–2.
Shade-cloth. Interstate Shade Cloth Co. No. 147,163; Aug. 16; v. 289; p. 582.
Sheetings. Bencoe Exporting and Importing Co. No. 134,299; Aug. 16; v. 289; p. 564.
Shingles. Reynolds Company. No. 121,944; Aug. 16; v. 289; p. 560.
Shores, Adjustable. H. W. Roos. No. 148,762; Aug. 16; v. 289; p. 588.
Shuttles, shuttle-pegs, picking band-pegs, creel-pegs, &c. Maatschappij Ago. No. 137,952; Aug. 16; v. 289; p. 565.
Skins, Fur-. Alexandre Works. No. 146,617; Aug. 16; v. 289; p. 580.
Silver flat-ware—namely, knives, forks, spoons, &c., German-. R. Wallace & Sons Mfg. Co. No. 145,093; Aug. 16; v. 289; p. 575.
Spark-plugs. Lightning Spark Plug Company. No. 149,195; Aug. 16; v. 289; p. 589.
Sprayers, Dust-. California Sprayer Company. No. 147,598; Aug. 16; v. 289; p. 585.
Starters, motors, dynamos, and rail-bases therefor. Crocker-Wheeler Company. No. 148,795; Aug. 16; v. 289; p. 588.
Steel factory equipment. Fairbanks Co. No. 142,138; Aug. 16; v. 289; p. 570.
Stone-cutting machines. Pollard Machinery Company. No. 147,260; Aug. 16; v. 289; p. 583.
Syrup, catarrh solution, cough-syrup, &c., Alterative. C. W. Burgoon. No. 142,773; Aug. 16; v. 289; p. 570.
Table-cloths, serviettes, cushion-covers, &c. Morton Sundour Fabrics Ld. No. 147,204; Aug. 16; v. 289; p. 583.
Talking-boards. M. Jacobson. No. 131,428; Aug. 16; v. 289; p. 562.
Telephones and parts thereof. Universal High Power Telephone Company. No. 123,400½; Aug. 16; v. 289; p. 560.
Threshing machinery, &c. Frick Company. No. 148,063; Aug. 16; v. 289; p. 586.
Tire casings, Pneumatic-. B. F. Goodrich Company. No. 115,482; Aug. 16; v. 289; p. 559.
Tires, Automobile-. Sam Bretch Wholesale Specialties. No. 148,695; Aug. 16; v. 289; p. 588.
Tires, Vehicle-. Federal Rubber Company. Nos. 146,903–4; Aug. 16; v. 289; p. 581.
Tobacco and cigarettes, Smoking and chewing. Liggett & Myers Tobacco Company. No. 138,770; Aug. 16; v. 289; p. 566.
Tobacco and cigarettes, smoking and chewing. Liggett & Myers Tobacco Company. No. 138,772; Aug. 16; v. 289; p. 566.
Tobacco and cigarettes, smoking and chewing. Liggett & Myers Tobacco Company. No. 139,358; Aug. 16; v. 289; p. 567.
Tobacco products. S. A. Reynolds. No. 138,922; Aug. 16; v. 289; p. 566.
Tobacco, Smoking-. Robert Sinclair Tobacco Company. No. 141,509; Aug. 16; v. 289; p. 569.
Tomatoes, Fresh. F. Biggio & Sons. No. 147,404; Aug. 16; v. 289; p. 584.
Tool and machine handles and ferrules. G. B. Doane. No. 147,865; Aug. 16; v. 289; p. 586.
Tools for cutting the covers of sheet-metal cans and boxes. Openright Specialty Company. No. 149,145; Aug. 16; v. 289; p. 589.
Toys. National Toy and Tinsel Mfg. Co. No. 127,484; Aug. 16; v. 289; p. 561.
Turpentine substitute. Texas Company. No. 145,241; Aug. 16; v. 289; p. 575.
Twines. J. E. Harbour Company. No. 140,247; Aug. 16; v. 289; p. 568.
Varnish, &c., Auto-. E. K. Lincoln. No. 144,819; Aug. 16; v. 289; p. 574.
Vegetable fiber. California Fibre Company. No. 147,153; Aug. 16; v. 289; p. 582.
Vehicles, Self-propelled. Locomobile Company of America. No. 116,784; Aug. 16; v. 289; p. 559.
Vitreous or porcelain enamel to be baked on metal ware. Chicago Vitreous Enamel Product Company. No. 147,089; Aug. 16; v. 289; p. 582.
Wagons, Hand-drawn express-. M. E. Lynn. No. 142,292; Aug. 16; v. 289; p. 570.
Wall and sheathing boards. Niagara Wall Board Company. No. 144,469; Aug. 16; v. 289; p. 574.
Wall-finish, iron enamel, mixed paint, &c. Wadsworth-Howland Company. No. 141,616; Aug. 16; v. 289; p. 569.
Wall glazing and coloring, Interior-. Alinall Mfg. Co. No. 142,380; Aug. 16; v. 289; p. 570.
Watches, watchcases, watch dials and movements, and alarm-clocks. E. Gisiger. Nos. 132,241–7; Aug. 16; v. 289; pp. 562–3.
Woolen piece goods, suitings, and overcoating. F. C. Huyck & Sons. No. 143,863; Aug. 16; v. 289; p. 572.
Yarns. Dixie Mercerizing Company. No. 149,849; Aug. 16; v. 289; p. 590.
Yeast. E. F. McDonald, Jr. No. 146,022; Aug. 16; v. 289; p. 577.

CLASSIFICATION OF PATENTS

ISSUED AUGUST 16, 1921.

NOTE.—First number—class, second number—subclass, third number—patent number.

1— 3: 1,387,530
7: 1,387,707
2— 9: 1,387,728
23: 1,388,098
60: 1,387,937
62: 1,388,056
73: 1,387,596
79: 1,387,854
144: 1,387,585
5— 29: 1,387,743
1,387,744
56: 1,388,117
61: 1,387,801
6— 4: 1,387,734
9: 1,388,085
7— 1: 1,388,014
8— 1: 1,387,596
18: 1,388,081
9— 7: 1,387,957
18: 1,388,003
12— 12: 1,387,763
128. 1: 1,388,046
128. 5: 1,387,516
142: 1,388,120
15— 25: 1,387,590
37: 1,388,074
38: 1,388,127
49: 1,387,754
50: 1,388,001
54: 1,387,472
56: 1,387,644
16— 11: 1,387,962
146: 1,387,961
18— 17: 1,388,138
19: 1,387,617
1,387,805

ALPHABETICAL LIST OF PATENTEES

TO WHOM

PATENTS WERE ISSUED ON THE 23D DAY OF AUGUST, 1921.

NOTE.—Arranged in accordance with the first significant character or word of the name. (In accordance with city and telephone directory practice.)

Abraham, Edwin D., Chicago, Ill. Bedpan. No. 1,388,155; Aug. 23; v. 289; p. 615.

Acker, Harold I., assignor to Foamite Firefoam Company, New York, N. Y. Duplex hydrant. No. 1,388,785; Aug. 23; v. 289; p. 740.

Adams, Reginald G., Kalgoorlie, Western Australia, Australia. Pliers. No. 1,388,398; Aug. 23; v. 289; p. 665.

Adell, James C., Cleveland, Ohio. Automatic flushing mechanism. No. 1,388,499; Aug. 23; v. 289; p. 685.

Ahlstedt Ljungstroms Angturbin. (See Ljungstrom, [illegible]berg, and Eriksson, assignors.)

Alexander, Nunnally H., and W. A. Baldwin, Dawson, Ga. Fly-trap. No. 1,388,786; Aug. 23; v. 289; p. 740.

Allen, Chauncy W., Sacramento, Calif. Fishing-fly and making the same. No. 1,388,156; Aug. 23; v. 289; p. 615.

Allen, Dennis J., Binghamton, N. Y. Railway signal device. No. 1,388,787; Aug. 23; v. 289; p. 740.

Altwein, Oscar R., Asheville, N. C. Comb. No. 1,388,788; Aug. 23; v. 289; p. 740.

Ambler, George A. (See Gilman, James E., assignor.)

American Balsa Company. (See Broady, Harry W., assignor.)

American Button & Fastener Co. (See Latham, Albert, assignor.)

American Car and Foundry Company. (See Voss, William, assignor.)

American Chain Company. (See Hoover, Thomas A., assignor.)

American Dressler Tunnel Kilns, Inc. (See Meehan, Paul A., assignor.)

American Electrical Heater Company. (See Kuhn, F., and Hand, assignors.)

American Metal Molding Company. (See Johnston, Gustave V., assignor.)

American Radiator Company. (See Stoll, Frank A., assignor.)

American Safety Device Co. (See Johnston, Frank B., assignor.)

American Sterilizer Company. (See Mueller, Paul M., assignor.)

American Writing Paper Company. (See Harrigan, Herman R., assignor.)

American Zinc Lead & Smelting Company. (See Pederson, John E., assignor.)

Anderson, Leo M., New York, N. Y. Gazing-bowl. No. 1,388,789; Aug. 23; v. 289; p. 740.

Andres, Albert, Cannstatt, assignor to Firm of Fortuna-Werke, Spezial-Maschinen-Fabrik, G. m. b. H., Cannstatt-Stuttgart, Germany. Cutting device. No. 1,388,500; Aug. 23; v. 289; p. 685.

Angus, Donald J. (See Esterline, J. W., and Angus.)

Aforga y Larralde, Francisco, Matanzas, Cuba. Plow. No. 1,388,233; Aug. 23; v. 289; p. 630.

Arbetter Felling Machine Company. (See Hayes, Thomas J., assignor.)

Arent, Arthur, Des Moines, Iowa. Protective treatment of materials. No. 1,388,824; Aug. 23; v. 289; p. 747.

Arent, Arthur, Des Moines, Iowa. Protectively treating materials. No. 1,388,825; Aug. 23; v. 289; p. 747.

Arent, Arthur, Des Moines, Iowa. Treatment of materials to reduce their inflammability. No. 1,388,826; Aug. 23; v. 289; p. 747.

Arent, Arthur, Des Moines, Iowa. Protective material. No. 1,388,827; Aug. 23; v. 289; p. 747.

Arent, Arthur, Des Moines, Iowa. Protectively treating materials. No. 1,388,828; Aug. 23; v. 289; p. 748.

Arent, Arthur, Des Moines, Iowa. Protective treatment of materials. No. 1,388,829; Aug. 23; v. 289; p. 748.

Armstrong, Edwin H. (See Pupin, M. I., and Armstrong.)

Armstrong, Percy A. E., Loudonville, N. Y., assignor to Ludlow Steel Company. Vanadium-containing impact-tools for hot work. No. 1,388,157; Aug. 23; v. 289; p. 615.

Armstrong, Sir W. G., Whitworth & Company. (See Le Mesurier, Louis J., assignor.)

Armstrong, Sir W. G., Whitworth and Company. (See Lee, H. W., and Swindale, assignors.)

Arnold, Harold D. (See Colpitts, E. H., and Arnold.)

Aurand, Evelyn P., Tamaqua, Pa., assignor to Atlas Powder Company, Wilmington, Del. Binder for burning compositions. No. 1,388,501; Aug. 23; v. 289; p. 685.

Aurand, Evelyn P., Tamaqua, Pa., assignor to Atlas Powder Company, Wilmington, Del. Torch fuse-lighter. No. 1,388,502; Aug. 23; v. 289; p. 685.

Austin, Frederick C. (See French, James C., assignor.)

Austin, Frederick C. (See Stahl, Charles E, assignor.)

Austin, John, Geneva, Ohio. Pipe. No. 1,388,158; Aug. 23; v. 289; p. 615.

Austin, John S., administrator. (See Austin, Willis E.)

Austin, Willis E., deceased, Minneapolis, Minn.; J. S. Austin, administrator. Pneumatic action for pipe-organs. No. 1,388,318; Aug. 23; v. 289; p. 648.

Automatic Appliance Company. (See Mapel, Lewis A., assignor.)

Atlas Powder Company. (See Aurand, Evelyn P., assignor.

Ayer, Edward M., U. S. Army, assignor to N. D. Baker, Secretary of War, trustee. Canister. No. 1,388,503; Aug. 23; v. 289; p. 685.

Ayres, Elwood B., assignor to The Philadelphia Textile Machinery Company, Philadelphia, Pa. Drier. No. 1,388,790; Aug. 23; v. 289; p. 741.

Babcock-Davis Corporation. (See Davis, William A, assignor.)

Backus, Peter J., Delphos, Ohio. Landing-station for aircraft. No. 1,388,319; Aug. 23; v. 289; p. 649.

Bacsanyi, Geza, Detroit, Mich., assignor to Underwood Typewriter Company, New York, N. Y. Typewriting-machine. No. 1,388,320; Aug. 23; v. 289; p. 649.

Bailhache, Nicholas, Berkeley, Calif. Mop-wringer. No. 1,388,688; Aug. 23; v. 289; p. 720.

Baker, Arthur R., assignor, by mesne assignments, to C. G. McCutchen, Indianapolis, Ind. Igniter trip mechanism. No. 1,388,689; Aug. 23; v. 289; p. 720.

Baker, Malcolm H., deceased, Braintree, Mass.; M. H. Baker, administrator, assignor, by mesne assignments, to Tremont Products Company. Time-retarded lamp-extinguishing device. No. 1,388,504; Aug. 23; v. 289; p. 685.

Baker, Marie H., administratrix. (See Baker, Malcolm H.)

Baker, Newton D., Secretary of War, trustee. (See Ayer, Edward M., assignor.)

Baker, Robert D., Detroit, Mich. Paving apparatus. No. 1,388,690; Aug. 23; v. 289; p. 721.

Baldwin, James L., Chicago, Ill. Cash-carrier. No. 1,388,791; Aug. 23; v. 289; p. 741.

Baldwin, Walter A. (See Albrecht, N. H., and Baldwin.)

Bamforth, Thomas H., North Vancouver, assignor of one-half to R. M. Rawlings, Vancouver, British Columbia, Canada. No. 1,388,505; Aug. 23; v. 289; p. 685.

Barling, Walter H., London, England. Rib for airplane-wings and the like. No. 1,388,543; Aug. 23; v. 289; p. 692.

Bartholomew, William, and G. Simon, assignors to Troy Laundry Machinery Co., Ltd., Chicago, Ill. Self-aligning shaft-bearing. No. 1,388,321; Aug. 23; v. 289; p. 649.

Baseman, Ernest. (See Robinson, C. W., and Baseman.)

Batemon, Thomas A., Los Angeles, Calif. Valveless rotary pump. No. 1,388,234; Aug. 23; v. 289; p. 630.

Beissel, Frederick. (See Root, Walter F., assignor.)

Belcher, Warren J., assignor to The Whitney Manufacturing Company, Hartford, Conn. Drive-chain. No. 1,388,506; Aug. 23; v. 289; p. 686.

Bell, John H., South Orange, N. J., assignor to Western Electric Company, Incorporated, New York, N. Y. Synchronizing system. No. 1,388,507; Aug. 23; v. 289; p. 686.

Belt, John A., Washington, D. C. Moistening device. No. 1,388,399; Aug. 23; v. 289; p. 665.

Benedict, Edward L., Pittsburgh, assignor of one-half to H. E. Marks, Glen Osborne, Pa. Concrete-roadway-reinforcing fabric. No. 1,388,544; Aug. 23; v. 289; p. 693.

Berdon, Albert E., assignor to Remy Electric Company, Anderson, Ind. Ignition-controller. No. 1,388,628; Aug. 23; v. 289; p. 709.

Bergen, George B., Chicago, Ill. Permutation locking-ring. No. 1,388,691; Aug. 23; v. 289; p. 721.

Bergen, Joseph C., Davenport, Iowa. Automatic door-operating means. No. 1,388,400; Aug. 23; v. 289; p. 665.

Bernay, Henri, assignor, by mesne assignments, to F. W. Thurston, San Francisco, Calif. Drill. No. 1,388,792; Aug. 23; v. 289; p. 741.

Berndt, Arthur W. (See Owers, E., Pearson, and Berndt.)

Bird & Son. (See Wyman, George R., assignor.)

Birdsall, Wilfred T., Montclair, N. J., assignor, by mesne assignments, to Westinghouse Lamp Company. Vacuum-type converter. No. 1,388,793; Aug. 23; v. 289; p. 741.

Bissell, Torrance E., Elora, Ontario, Canada. Disk harrow. No. 1,388,159; Aug. 23; v. 289; p. 615.

Bissell, Torrance E., Elora, Ontario, Canada. Horisontal adjustable draft connection for disk harrows. No. 1,388,160; Aug. 23; v. 289; p. 615.

Black, Walter A., Perry, Iowa. Tire-core. No. 1,388,447; Aug. 23; v. 289; p. 675.

Blaesser, Anthony J., assignor to Joslyn Mfg. & Supply Co., Chicago, Ill. Manufacturing guy-clamps. No. 1,388,692; Aug. 23; v. 289; p. 721.

Blaine, Joseph R., Oak Park, assignor to Miehle Printing Press and Manufacturing Company, Chicago, Ill. Reloading feeder. No. 1,388,161; Aug. 23; v. 289; p. 616.

Blair, Albert, *et al.* (See Ehrlich, Leo, assignor.)

Blake, Charles C., Brookline, Mass. Mechanism for handling articles. No. 1,388,235; Aug. 23; v. 289; p. 631.

Blake, Loring L., assignor to Blake Pencil Co., Chicago, Ill. Lead-feeding pencil. No. 1,388,693; Aug. 23; v. 289; p. 721.

Blake Pencil Co. (See Blake, Loring L., assignor.)

Blaw-Knox Company. (See Brynoldt, Christian, assignor.)

Blaw Knox Company. (See Goodman, Arlie H., assignor.)

Blevins, Walker S. (See Rasnick, J. S., and Blevins.)

Bloss, Richard E., and W. Schwemlein, assignors to The Parkersburg Rig & Reel Company, Parkersburg, W. Va. Fitting for diagonal braces. No. 1,388,162; Aug. 23; v. 289; p. 616.

Blumenberg, Henry, Jr., Oro Grande, Calif. Electric production of ammonia. No. 1,388,448; Aug. 23; v. 289; p. 675.

Bogstrand, Ole K., Brooklyn, N. Y. Power plant. No. 1,388,694; Aug. 23; v. 289; p. 721.

Bohan, William J., St. Paul, Minn. Self-intrenching subsurface land-torpedoe. No. 1,388,545; Aug. 23; v. 289; p. 693.

Bolig, Thomas F., Bellevue, Ohio. Line-buckle. No. 1,388,401; Aug. 23; v. 289; p. 665.

Boll, William J., Platteville, Wis. Lawn-mower attachment. No. 1,388,794; Aug. 23; v. 289; p. 741.

Bolstad, Martin J., Salt Lake City, Utah. Necktie-retainer. No. 1,388,163; Aug. 23; v. 289; p. 616.

Böminghaus, Franz, Essen, Germany, assignor to Fried. Krupp Aktiengesellschaft. Essen-on-the-Ruhr, Germany. Vehicle-spring. No. 1,388,695; Aug. 23; v. 289; p. 695.

Boyd, William J. (See Powers, E. V., and Boyd.)

Brabant, John W., La Crosse, Wis. Discharge-chute. No. 1,388,696; Aug. 23; v. 289; p. 722.

Branco, Michael, Norristown, Pa. Wheel-lock. No. 1,388,322; Aug. 23; v. 289; p. 649.

Brasseur, Ernest J., assignor to A. B. Dick Company, Chicago, Ill. Starting and speed-controlling device. No. 1,388,449; July 23; v. 289; p. 675.

Brecht, Carl F., Indianapolis, Ind. Retaining means for frames. No. 1,388,697; Aug. 23; v. 289; p. 722.

Bressler, Robert E., Hammond, assignor to O. F. Jordan Company, East Chicago, Ind. Railway motor-car. No. 1,388,236; Aug. 23; v. 289; p. 631.

Brett, Thomas A., Pittsburg, Calif. Direction-indicator for motor-vehicles. No. 1,388,795; Aug. 23; v. 289; p. 742.

Bridgwater, Herbert E., Syracuse, assignor to Remington Typewriter Company, Ilion, N. Y. Typewriting-machine. No. 1,388,164; Aug. 23; v. 289; p. 616.

Brilhart, Samuel B., New York, N. Y. Railway-truck. No. 1,388,508; Aug. 23; v. 289; p. 685.

Broady, Harry W., Bayside, N. Y., assignor to American Balsa Company, Inc. Crane or davit. No. 1,388,831; Aug. 23; v. 289; p. 748.

Broady, Harry W., Bayside, N. Y., assignor to American Balsa Company, Inc. Davit and crane. No. 1,388,830; Aug. 23; v. 289; p. 748.

Broberg, Isidor. (See Ljungstrom, F. Broberg, and Eriksson.)

Bronle, William, Brooklyn, assignor to National Carbon Company, Inc., New York, N. Y. Flashlight. No. 1,388,165; Aug. 23; v. 289; p. 617.

Bronson, George C., and M. C. St. Clair, Newcastle, Ind. Railway-crossing signal. No. 1,388,166; Aug. 23; v. 289; p. 617.

Brown, Harley T., Hubbardston, Mich. Snow-remover. No. 1,388,509; Aug. 23; v. 289; p. 686.

Brown, Stanley E., Middlebury, Vt. Manure-Remover. No. 1,388,796; Aug. 23; v. 289; p. 742.

Bruce, William J., and F. M. Worthington, Sterling, Ill. Hat-case. No. 1,388,323; Aug. 23; v. 289; p. 649.

Brueck, Joseph, New York, N. Y. Nail-polish. No. 1,388,546; Aug. 23; v. 289; p. 693.

Bryce, James W., Binghamton, assignor to The International Time Recording Company of New York. Synchronizing-clock system. No. 1,388,167; Aug. 23; v. 289; p. 617.

Brynoldt, Christian, Pittsburgh, Pa., assignor to Blaw-Knox Company. Method of and apparatus for widening tunnels. No. 1,388,698; Aug. 23; v. 289; p. 722.

Buffalo-Springfield Roller Company, The. (See Jones, Henry D., assignor.)

Bullard, Earl J., Madison, Wis. Compression-seal for pistons. No. 1,388,168; Aug. 23; v. 289; p. 617.

Burke, Peter W. (See Greene, T. J., and Burke.)

Burns, Joseph E., Syracuse, N. Y. Cutting-tool. No. 1,388,547; Aug. 23; v. 289; p. 693.

Bush, John L., Little River, Kans. Window-fastener. No. 1,388,237; Aug. 23; v. 289; p. 631.

Bushnell Manufacturing Company, The. (See Zent, Abram L., assignor.)

Buttress, George, Los Angeles, Calif. Expanding pulley. No. 1,388,797; Aug. 23; v. 289; p. 742.

Byers, Joseph J., Brookline, assignor to Products Syndicate, Inc., Boston, Mass. Treating materials with cellulose derivatives. No. 1,388,169; Aug. 23; v. 289; p. 617.

Calvete, Isidoro, London, England. Apparatus for singeing the hair. No. 1,388,402; Aug. 23; v. 289; p. 666.

Cameron, William J., Chicago, Ill. Retractor. No. 1,388,170; Aug. 23; v. 289; p. 617.

Campagnie D'Applications Mecaniques. (See Rouanet, Louis, assignor.)

Campbell, Leon J., Buchanan, Mich. Variable-speed-transmission mechanism. No. 1,388,548; Aug. 23; v. 289; p. 693.

Carey-McFall Co. (See McFall, William H., assignor.)

Carr, William C., Buffalo, N. Y. Change-speed mechanism. No. 1,388,324; Aug. 23; v. 289; p. 650.

Carson, Robert N., San Francisco, Calif. Glove construction. No. 1,388,549; Aug. 23; v. 289; p. 693.

Carter, James S., Roby, Tex. Double tongue. No. 1,388,798; Aug. 23; v. 289; p. 742.

Cartwright, Ernest O., assignor to C. F. Gardner, Springfield, Ohio. Street and sewer cleaning apparatus. No. 1,388,510; Aug. 23; v. 289; p. 686.

Cartwright, Ernest O., assignor to C. F. Gardner, Springfield, Ohio. Portable pumping apparatus. No. 1,388,511; Aug. 23; v. 289; p. 687.

Case, J. I., Threshing Machine Company. (See Davies, David P., assignor.)

Case Making Machine Company, The. (See Crosble, Robert G., assignor.)

Casella, Secondo L., assignor to National Carbon Company, Inc., New York, N. Y. Machine for polishing battery-cells. No. 1,388,403; Aug. 23; v. 289; p. 666.

Casner, Thaddeus S., Plainfield, N. J. Secondary electric clock. No. 1,388,512; Aug. 23; v. 289; p. 687.

Celluloid Company, The. (See Lindsay, William G., assignor.)

Chadwick, Lee S., East Cleveland, and M. Resek, Cleveland Heights, assignor to The Cleveland Metal Products Company, Cleveland, Ohio. Treatment of iron or steel for the prevention of oxidation or rusting. No. 1,388,325; Aug. 23; v. 289; p. 650.

Chaikin, Morris J., Detroit, Mich. Tire-pump. No. 1,388,326; Aug. 23; v. 289; p. 650.

Chandler, Asa C., Houston, Tex. Treating wood. No. 1,388,513; Aug. 23; v. 289; p. 687.

Chapel, Charles C. (See Rogers, E. W., and Chapel.)

Chappelle, Charles C., New York, N. Y. Gas-heater. No. 1,388,238; Aug. 23; v. 289; p. 631.

Chemical Fuel Company of America. (See Stevens, Elbridge W., assignor.)

Chicago Pneumatic Tool Company. (See Noakes, Robert J., assignor.)

Chiles, George J. (See Schuyler, W. H., and Chiles.)

Choinski, Walter, Milwaukee, Wis. Attachment for bowling-alley return-troughs. No. 1,388,239; Aug. 23; v. 289; p. 632.

Choinski, Walter, Milwaukee, Wis. Toy. No. 1,388,240; Aug. 23; v. 289; p. 632.

Christensen, Jens C., Penn Yan, N. Y. Implement-support. No. 1,388,799; Aug. 23; v. 289; p. 742.

Cincinnati Car Company, The. (See Elliott, Thomas, assignor.)

Cirac, Charles P., San Francisco, Calif. Reverse-stop for vehicles. No. 1,388,404; Aug. 23; v. 289; p. 666.

Clapp, Stuart H., Pittsfield, Mass. Truck for vehicles. No. 1,388,405; Aug. 23; v. 289; p. 666.

Clark, Edgar M., Alton, Ill., assignor to Standard Oil Company, Whiting, Ind. Distillation of petroleum hydrocarbons. No. 1,388,514; Aug. 23; v. 289; p. 687.

Clark, Omar E., assignor to The Denver Rock Drill Manufacturing Company, Denver, Colo. Rock-drill. No. 1,388,406; Aug. 23; v. 289; p. 666.

Clark, Robert F., Salt Lake City, Utah. Washing-machine. No. 1,388,800; Aug. 23; v. 289; p. 743.

Clark, William M., Chicago, Ill. Talking moving-picture apparatus. No. 1,388,515; Aug. 23; v. 289; p. 687.

Clark, William M., Chicago, Ill. Phonographic apparatus and combined phonographic and moving-picture apparatus. No. 1,388,516; Aug. 23; v. 289; p. 687.

Cleveland Metal Products Company, The. (See Chadwick, L. S., and Resek, assignors.)

Coast, John W., Jr., assignor to The Process Company, Tulsa, Okla. Cracking hydrocarbons. No. 1,388,629; Aug. 23; v. 289; p. 709.

Cobb, Ernest B., Jersey City, assignor to Standard Oil Company, Bayonne, N. J. Manufacture of viscous water-white oils and other decolorized products of petroleum. No. 1,388,517; Aug. 23; v. 289; p. 688.

Cobb, Ernest B., Jersey City, assignor to Standard Oil Company, Bayonne, N. J. Manufacture of medicinal oils and other viscous decolorized products of petroleum. No. 1,388,832; Aug. 23; v. 289; p. 748.

Zip Products Company, Fremont, Ohio. Cleansing and polishing fluid. No. 147,328; Aug. 23; v. 289; p. 779.

ALPHABETICAL LIST OF INVENTIONS

FOR WHICH

PATENTS WERE ISSUED ON THE 23D DAY OF AUGUST, 1921.

NOTE.—Arranged in accordance with the first significant character or word of the name. (In accordance with city and telephone directory practice.)

Advertising device. F. Thompson. No. 1,388,219; Aug. 23; v. 289; p. 628.

Aeroplane. A. L. Turner. No. 1,388,620; Aug. 23; v. 289; p. 707.

Aeroplane-wing for transportation or storage, Folding or jointing. A. H. G. Fokker. No. 1,388,457; Aug. 23; v. 289; p. 677.

Air-brake control. J. S. Rasnick and W. S. Blevins. No. 1,388,483; Aug. 23; v. 289; p. 681.

Air-heating furnace. L. Lee. No. 1,388,583; Aug. 23; v. 289; p. 700.

Air-preheating device. L. W. Schuessler. No. 1,388,381; Aug. 23; v. 289; p. 661.

Aircraft, Landing-station for. P. J. Backus. No. 1,388,819; Aug. 23; v. 289; p. 649.

Airplane. M. C. Sharpnack. No. 1,388,770; Aug. 23; v. 289; p. 736.

Airplane-launching apparatus. L. J. Le Mesurier. No. 1,388,361; Aug. 23; v. 289; p. 657.

Airplane-wings and the like, Rib for. W. H. Barling. No. 1,385,543; Aug. 23; v. 289; p. 692.

Alum cake, Manufacture of. R. Moldenke. No. 1,388,436; Aug. 23; v. 289; p. 672.

Amusement device. J. Flinner. No. 1,388,420; Aug. 23; v. 289; p. 669.

Anesthetic compound. O. Kamm and E. H. Volwiler. No. 1,388,573; Aug. 23; v. 289; p. 698.

Annealing. P. A. Meehan. No. 1,388,188; Aug. 23; v. 289; p. 621.

Antiskid device. J. C. Keavey. No. 1,388,264; Aug. 23; v. 289; p. 637.

Arms and legs, Control for artificial. J. R. B. Norfolk. No. 1,388,524; Aug. 23; v. 289; p. 689.

Articles having a systematic resemblance to a pattern, Manufacture of. E. J. Prindle. No. 1,388,301; Aug. 23; v. 289; p. 644.

Articles having a systematic resemblance to a pattern, Manufacture of. E. J. Prindle. No. 1,388,302; Aug. 23; v. 289; p. 645.

Auto adjustable sunshade. E. V. Powers and W. J. Boyd. No. 1,388,199; Aug. 23; v. 289; p. 623.

Automatic ventilator. C. C. Shipp. No. 1,388,611; Aug. 23; v. 289; p. 705.

Automobile-bodies, Reinforcing. J. F. Godfrey. No. 1,388,250; Aug. 23; v. 289; p. 634.

Automobile-bumper. T. A. Hoover. No. 1,388,432; Aug. 23; v. 289; p. 672.

Automobile gasolene-lock. H. M. Mason. No. 1,388,280; Aug. 23; v. 289; p. 640.

Automobile-radiators, Heater for. A. and H. Priebe. No. 1,388,300; Aug. 23; v. 289; p. 644.

Automobile-windshields, Glare-shield attachment for. R. H. Woodmansee. No. 1,388,446; Aug. 23; v. 289; p. 675.

Automobiles, Direction-indicator for. O. C. Cook. No. 1,388,550; Aug. 23; v. 289; p. 694.

Automobiles, Manifold-heater for. H. J. Wheeler. No. 1,388,538; Aug. 23; v. 289; p. 691.

Automobiles, Means for operating the steering-posts of. E. P. Le Compte. No. 1,388,582; Aug. 23; v. 289; p. 700.

Automobiles, Pulling apparatus for. J. H. Wood. No. 1,388,683; Aug. 23; v. 289; p. 719.

Automobiles, Shipping-support for. J. N. Duncan. No. 1,388,244; Aug. 23; v. 289; p. 633.

Automobiles, Side curtain for. L. and C. Gillig. No. 1,388,425; Aug. 23; v. 289; p. 670.

Automobiles, Spring-equalizer attachment for. B. F. Hardesty. No. 1,388,461; Aug. 23; v. 289; p. 678.

Ax-heads, Attachment for. C. E. Manners. No. 1,388,475; Aug. 23; v. 289; p. 680.

Axle. T. Zimmermann. No. 1,388,397; Aug. 23; v. 289; p. 664.

Bag-cleaning apparatus. J. M. Kelly. No. 1,388,722; Aug. 23; v. 289; p. 727.

Basket. H. R. Garritson. No. 1,388,556; Aug. 23; v. 289; p. 694.

Basket, Creel or trout-. W. L. Marble. No. 1,388,187; Aug. 23; v. 289; p. 621.

Batteries, Electrode for storage. V. C. Stanley. No. 1,388,530; Aug. 23; v. 289; p. 690.

Battery: *See*—
Storage battery.

Battery-cells, Machine for polishing. S. L. Casella. No. 1,388,403; Aug. 23; v. 289; p. 660.

Battery-tester. L. L. Laska. No. 1,388,727; Aug. 23; v. 289; p. 728.

Bearing, Self-alining shaft-. W. Bartholomew and G. Simon. No. 1,388,321; Aug. 23; v. 289; p. 649.

Bearings, Clamping device for. J. C. Nelson. No. 1,388,200; Aug. 23; v. 289; p. 642.

Bed. J. Yeager. No. 1,388,783; Aug. 23; v. 289; p. 739.

Bed, Invalid-. T. Dodds. No. 1,388,242; Aug. 23; v. 289; p. 632.

Bed-spring. J. L. Isaacs. No. 1,388,261; Aug. 23; v. 289; p. 636.

Bed-spring. F. Karr. No. 1,388,263; Aug. 23; v. 289; p. 637.

Bedpan. E. D. Abraham. No. 1,388,155; Aug. 23; v. 289; p. 615.

Bellows-box. F. J. Novotney. No. 1,388,293; Aug. 23; v. 289; p. 643.

Binder, Loose-leaf. C. R. Nelson. No. 1,388,591; Aug. 23; v. 289; p. 701.

Bit: *See*—
Rotary bit.

Blanc fixe, Manufacture of. G. Moore. No. 1,388,285; Aug. 23; v. 289; p. 641.

Blanching peanuts. R. P. Witt. No. 1,388,395; Aug. 23; v. 289; p. 664.

Board: *See*—
Hammer-board.

Boat, Submarine. J. B. Locker. No. 1,388,730; Aug. 23; v. 289; p. 729.

Boiler-tube-cleaning device. J. Ross. No. 1,388,309; Aug. 23; v. 289; p. 646.

Bolt: *See*—
Door-bolt.

Bomb, Exploding toy. L. F. Duck. No. 1,388,807; Aug. 23; v. 289; p. 744.

Boring and grinding cylinders, Lathe attachment for. C. I. Kephart. No. 1,388,576; Aug. 23; v. 289; p. 698.

Bottle, Thermos. G. S. Meikle. No. 1,388,189; Aug. 23; v. 289; p. 621.

Bowl, Gazing-. L. M. Anderson. No. 1,388,789; Aug. 23; v. 289; p. 740.

Bowling-alley return-trougha, Attachment for. W. Choinski. No. 1,388,239; Aug. 23; v. 289; p. 632.

Box: *See*—
Bellows-box. Fare-box.
Cheese-box. Knockdown packing-box.

Box-filling machines, Shuck-feeding mechanism for. H. C. Schumacher. No. 1,388,668; Aug. 23; v. 289; p. 716.

Box or package handling apparatus. W. G. Price. No. 1,388,200; Aug. 23; v. 289; p. 624.

Boxes, crates, &c., Apparatus for use in making. R. G. Crosbie. No. 1,388,408; Aug. 23; v. 289; p. 667.

Brace: *See*—
Railway-rail brace.

Braces, Fitting for diagonal. R. R. Bloss and W. Schwemlein. No. 1,388,162; Aug. 23; v. 289; p. 616.

Brake: *See*—
Railway-car brake. Sled-brake.

Brake-beam. E. R. Viberg. No. 1,388,391; Aug. 23; v. 289; p. 663.

Bridge construction, Arch-. J. B. Marsh. No. 1,388,584; Aug. 23; v. 289; p. 700.

Broom-clamp. E. Ward. No. 1,388,224; Aug. 23; v. 289; p. 629.

Brush. A. R. Wiens. No. 1,388,680; Aug. 23; v. 289; p. 710.

Buck, Double-decking. E. S. Evans. No. 1,388,247; Aug. 23; v. 289; p. 633.

Buckle, Belt-. E. H. Humphrey. No. 1,388,646; Aug. 23; v. 289; p. 712.

Buckle, Belt-. T. D. Walker. No. 1,388,623; Aug. 23; v. 289; p. 708.

Buckle, Line-. T. F. Bolig. No. 1,388,401; Aug. 23; v. 289; p. 665.

Building-wall. L. H. Guimonneau. No. 1,388,181; Aug. 23; v. 289; p. 620.

Burner: *See*—
Gas burner. Oil-burner.
Hydrocarbon-burner.

Burning compositions, Binder for. E. P. Auraud. No. 1,388,501; Aug. 23; v. 289; p. 685.

Butt-hook. C. Vala. No. 1,388,494; Aug. 23; v. 289; p. 683.

Butt-welding-thin-gage tubing. Method and apparatu for. G. V. Johnston. No. 1,388,434; Aug. 23; v. 289; p. 672.

Butter making machine. C. H. Halt. No. 1,388,639; Aug. 23; v. 289; p. 711.

Button. A. Latham. No. 1,388,469; Aug. 23; v. 289; p. 679.
Button. A. Latham. No. 1,388,470; Aug. 23; v. 289; p. 679.
Button. A. Latham. No. 1,388,471; Aug. 23; v. 289; p. 679.
Button-card. L. W. Harlem. No. 1,388,833; Aug. 23; v. 289; p. 748.
Button. Cuff-. C. D. Lyons. No. 1,388,522; Aug. 23; v. 289; p. 689.
Buttonhole-sewing machine. H. C. Searle. No. 1,388,313; Aug. 23; v. 289; p. 647.
Cabinet, Dentist's. R. Klicka. No. 1,388,347; Aug. 23; v. 289; p. 654.
Cabinet for phonographic records. A. E. Michaelson. No. 1,388,284; Aug. 23; v. 289; p. 641.
Cables, Device for tightening. T. J. Hughes. No. 1,388,716; Aug. 23; v. 289; p. 726.
Cake-baking pan. M. A. Miller. No. 1,388,864; Aug. 23; v. 289; p. 658.
Calculating-machine. E. C. Schinke and N. A. Sutherland. No. 1,388,379; Aug. 23; v. 289; p. 661.
Calender-roll. A. O. Tate. No. 1,388,215; Aug. 23; v. 289; p. 627.
Calf-weaning device. M. C. Schow. No. 1,388,608; Aug. 23; v. 289; p. 705.
Caliper, Micrometer-. F. H. Miller. No. 1,388,740; Aug. 23; v. 289; p. 731.
Calipers. W. H. Harris. No. 1,388,705; Aug. 23; v. 289; p. 723.
Calling device. A. T. Palmer. No. 1,388,368; Aug. 23; v. 289; p. 658.
Canister. E. M. Ayer. No. 1,388,503; Aug. 23; v. 289; p. 685.
Caps, Manufacture of rubber bathing-. R. E. Riley. No. 1,388,762; Aug. 23; v. 289; p. 735.
Car, Double ended railway-. T. Elliott. No. 1,388,416; Aug. 23; v. 289; p. 668.
Car-dump mechanism, Automatic. D. L. Swank. No. 1,388,388; Aug. 23; v. 289; p. 663.
Car, Railway motor-. R. E. Bressler. No. 1,388,236; Aug. 23; v. 289; p. 631.
Car, Railway-. H. W. Sanford, C. A. Griffith, and G. E. Jones, Jr. No. 1,388,486; Aug. 23; v. 289; p. 682.
Car-step, Extensible. J. Toutges. No. 1,388,493; Aug. 23; v. 289; p. 683.
Car-stove. W. H. Gardiner. No. 1,388,330; Aug. 23; v. 289; p. 651.
Car, Supporting apparatus for the rear-wheel shaft of a motor-. S. Tamura and M. Watanabe. No. 1,388,389; Aug. 23; v. 289; p. 663.
Cars, Adjustable partition for stock-. J. R. Moriarty. No. 1,388,819; Aug. 23; v. 289; p. 746.
Cars, Trolley-wheel for electric street-. J. S. Navarro. No. 1,388,590; Aug. 23; v. 289; p. 701.
Carbon-scraper. A. B. Seppmann. No. 1,388,489; Aug. 23; v. 289; p. 682.
Carriages, Attachment for children's. F. Peters. No. 1,388,756; Aug. 23; v. 289; p. 734.
Carrier: *See*—
Cash-carrier.
Case: *See*—
Hat-case.
Case-shifting mechanism. C. Spiro. No. 1,388,616; Aug. 23; v. 289; p. 706.
Cash-carrier. J. L. Baldwin. No. 1,388,791; Aug. 23; v. 289; p. 741.
Caster. T. J. Keeping. No. 1,388,721; Aug. 23; v. 289; p. 727.
Catamenial sacks or napkins, Supporter of. G. B. Smith. No. 1,388,529; Aug. 23; v. 289; p. 690.
Cellulose derivatives, Treating materials with. J. J. Byers. No. 1,388,169; Aug. 23; v. 289; p. 617.
Centrifugal machines, Driving-mount for the bowls of. J. J. Hay. No. 1,388,339; Aug. 23; v. 289; p. 652.
Chain-hook, Detachable. J. G. Rieff. No. 1,388,305; Aug. 23; v. 289; p. 646.
Change-speed mechanism. W. C. Carr. No. 1,388,324; Aug. 23; v. 289; p. 650.
Cheese-box. E. Zeidler. No. 1,388,396; Aug. 23; v. 289; p. 664.
Chute, Discharge-. J. W. Brabant. No. 1,388,696; Aug. 23; v. 289; p. 722.
Cigarette-holder. R. Vakilian. No. 1,388,222; Aug. 23; v. 289; p. 628.
Cinematographic apparatus, Shutter for. P. S. Gauriat. No. 1,388,423; Aug. 23; v. 289; p. 670.
Circuit-controlling apparatus. H. C. Woodbury. No. 1,388,541; Aug. 23; v. 289; p. 692.
Circulator-heater. H. E. Roys. No. 1,388,822; Aug. 23; v. 289; p. 747.
Clamp: *See*—
Broom-clamp. Fence-wire clamp.
Clamps, Manufacturing guy-. A. J. Blaeser. No. 1,388,692; Aug. 23; v. 289; p. 721.
Clasp. L. H. Dierking. No. 1,388,241; Aug. 23; v. 289; p. 632.
Clasp. A. L. Vilander. No. 1,388,495; Aug. 23; v. 289; p. 684.
Cleaner: *See*—
Furnace-cleaner.
Clock, Secondary electric. T. S. Casner. No. 1,388,512; Aug. 23; v. 289; p. 687.
Clock, Secondary electric. F. Frick. No. 1,388,458; Aug. 23; v. 289; p. 677.
Clock system, Synchronizing-. J. W. Bryce. No. 1,388,167; Aug. 23; v. 289; p. 617.
Clothesline-pulling clutch. S. J. Fleming. No. 1,388,455; Aug. 23; v. 289; p. 677.
Clothing and other articles, Apparatus for sorting. A. M. Stokoe. No. 1,388,385; Aug. 23; v. 289; p. 662.
Clutch mechanism. A. H. De Voe. No. 1,388,412; Aug. 23; v. 289; p. 667.
Coating the surfaces of flexible foundations, Apparatus for. R. A. McQuitty. No. 1,388,353; Aug. 23; v. 289; p. 655.
Cock, Safety scaleproof automatic gage-. L. Whipple and Z. Oneal. No. 1,388,624; Aug. 23; v. 289; p. 708.
Collar. J. L. Murphy. No. 1,388,660; Aug. 23; v. 289; p. 715.
Collar. J. L. Murphy. No. 1,388,661; Aug. 23; v. 289; p. 715.
Colters, Hub for rotary. W. R. Kinney. No. 1,388,577; Aug. 23; v. 289; p. 698.

Bed-springs, mattresses, and pillows. Charles P. Rogers & Co. No. 146,335; Aug. 23; v. 289; p. 776.
Belting. B. F. Goodrich Company. No. 128,498; Aug. 23; v. 289; p. 754.
Beverages. Ohio Valley Bottling Works. No. 149,523; Aug. 23; v. 289; p. 785.
Beverages and syrup for making same. H. B. Bischoff. No. 149,673; Aug. 23; v. 289; p. 785.
Beverages and syrups for making same. A. C. Jewell. No. 150,195; Aug. 23; v. 289; p. 786.
Blankets made of a mixture of cotton and wool and all cotton, Bed-. W. S. Libbey Company. No. 137,843; Aug. 23; v. 289; p. 759.
Blouses, aprons, knitted leggings, bodices, pelisses, &c. Thornton & Mawby. No. 143,796; Aug. 23; v. 289; p. 768.
Boots and shoes. James A. Bannister Company. No. 146,249; Aug. 23; v. 289; p. 776.
Braces, extension-shoes, artificial limbs, &c., Deformity-. Chicago Orthopedic Appliance Company. No. 139,848; Aug. 23; v. 289; p. 761.
Bristles. Chesnutt, Cooper & Co. No. 148,125; Aug. 23; v. 289; p. 781.
Brushes, Lather-. Hardright Company. No. 140,886; Aug. 23; v. 289; p. 762.
Brushes, Lather-. Hardright Company. Nos. 140,888–9; Aug. 23; v. 289; p. 762.
Brushes, Lather-. Hardright Company. No. 140,891; Aug. 23; v. 289; p. 763.
Cabinets, Urinalysis. Du Bois Laboratories. No. 144,387; Aug. 23; v. 289; p. 769.
Calcareous composition for soil improvement. Security Cement & Lime Co. No. 141,242; Aug. 23; v. 289; p. 763.
Candy. Chocolate Truffles Co. No. 148,581; Aug. 23; v. 289; p. 783.
Candy. A. E. Perkins, Jr. No. 148,550; Aug. 23; v. 289; p. 783.
Candy in boxes. Harem Candy Co. No. 148,329; Aug. 23; v. 289; p. 782.
Canned vegetables. Inderrieden Canning Co. No. 148,146; Aug. 23; v. 289; p. 781.
Carbon-remover, Chemical. Chemical Reduction Co. No. 146,068; Aug. 23; v. 289; p. 775.
Carbureters, which are air-feeding devices in coal-burning furnaces. H. Swartz. No. 144,690; Aug. 23; v. 289; p. 770.
Cars, &c., Transmission apparatus, and explosion-motors for motor-. Minerva Motors. No. 139,214; Aug. 23; v. 289; p. 760.
Cartoons, Series of. E. Wheelan. No. 145,761; Aug. 23; v. 289; p. 773.
Casting battery parts, Molds for. E. J. Kukac. No. 144,288; Aug. 23; v. 289; p. 769.
Castings, Non-ferrous. Acme Die Casting Corporation. No. 139,927; Aug. 23; v. 289; p. 762.
Cement, Adhesive. H. A. Cook. No. 142,782; Aug. 23; v. 289; p. 766.
Cement, Adhesive. J. Goldstein. No. 142,437; Aug. 23; v. 289; p. 765.
Cement, Hydraulic and high-temperature. King Refractories Corporation. No. 148,229; Aug. 23; v. 289; p. 782.
Cement, Mending-. Hemmerdinger, L., & Co. No. 140,943; Aug. 23; v. 289; p. 763.
Cement, Patching-. P. C. Plasterer. No. 142,806; Aug. 23; v. 289; p. 766.
Chemical for removing dirt and stains. H. P. Spencer. No. 147,321; Aug. 23; v. 289; p. 779.
Chemicals, medicines, &c. Cooper & Cooper. No. 129,586; Aug. 23; v. 289; p. 754.
Chilli sauce, chilli con-carne, &c. Taylor Tamale Company. No. 133,170; Aug. 23; v. 289; p. 758.
Cigarettes. Balkan Sobranie Cigarettes Limited. No. 135,958; Aug. 23; v. 289; p. 759.
Cleanser for carpets, rugs, &c., Paste. Klenzal Co. No. 130,143; Aug. 23; v. 289; p. 755.
Cleansing and polishing fluid. Zip Products Company. No. 147,328; Aug. 23; v. 289; p. 779.
Coffee. C. A. Herink. No. 149,132; Aug. 23; v. 289; p. 785.
Coffee, Roasted. Young & Griffin Coffee Co. Inc. No. 148,358; Aug. 23; v. 289; p. 782.
Coffee, spices, mustard, fruit flavoring extract—namely, lemon. C. A. Murdock Mfg. Co. No. 148,158; Aug. 23; v. 289; p. 782.
Collets, thread-cutting dies and guides therefor, die-holders, &c. Union Twist Drill Company. No. 141,146; Aug. 23; v. 289; p. 763.
Colors, Coal-tar. Society of Chemical Industry in Basle. No. 135,870; Aug. 23; v. 289; p. 758.
Conveyers and conveying machinery and parts thereof. Alvey-Ferguson Company. No. 117,918; Aug. 23; v. 289; p. 752.
Corn, Cracked. Chas. A. Krause Milling Co. No. 131,974; Aug. 23; v. 289; p. 757.
Corn, Popping. E. D. Bradshaw. No. 148,790; Aug. 23; v. 289; p. 784.
Corrugated-fiber packages, folding boxes, and paper boxes. J. M. Baffel Co. No. 139,225; Aug. 23; v. 289; p. 761.
Cotton, &c., piece goods. Everett, Heaney & Company. No. 134,811; Aug. 23; v. 289; p. 758.
Cough medicines. J. F. Allison. No. 147,888; Aug. 23; v. 289; p. 780.
Cream, Beauty-. W. T. Green. No. 148,064; Aug. 23; v. 289; p. 781.
Cream, Cold-. S. M. Baltsly. No. 145,429; Aug. 23; v. 289; p. 772.
Cream for beautifying the skin. M. F. Stamos. No. 141,694; Aug. 23; v. 289; p. 763.
Cream, Massage and tissue. (Mrs.) C. M. Lamping-Nolan. No. 145,788; Aug. 23; v. 289; p. 773.
Cream-separators, shears, trowels, tinners' shears, clothes-washers, &c. Hibbard, Spencer, Bartlett & Co. No. 145,686; Aug. 23; v. 289; p. 772.
Cream, Vanishing. Harriet Hubbard Ayer. No. 146,852; Aug. 23; v. 289; p. 777.
Disinfectants. Glidden Company. No. 144,568; Aug. 23; v. 289; p. 770.
Doll beds and cribs. Michigan Wire Goods Co. No. 139,862; Aug. 23; v. 289; p. 762.
Drawers, pajamas, union-suits, undershirts, &c. Oppenheim, Oberndorf & Co. No. 143,830; Aug. 23; v. 289; p. 769.

Gas-intake deflectors and gaskets, Combination. M. B. Eaton. No. 143,688; Aug. 23; v. 289; p. 768.
Gas, Natural. J. C. Whitfield. No. 145,760; Aug. 23; v. 289; p. 773.
Glass, cleansing and polishing liquid. H. T. Prange. No. 148,672; Aug. 23; v. 289; p. 784.
Gloves and mittens, Leather. Joseph N. Eisendrath Company. No. 146,001; Aug. 23; v. 289; p. 775.
Hair grower and tonic, facial cream, shampoo, &c. Lulu E. Morris. No. 146,385; Aug. 23; v. 289; p. 777.
Hair or wool, Animal. J. Ephraimson. No. 146,114; Aug. 23; v. 289; p. 775.
Hair-tonic. S. A. Johnson. No. 145,330; Aug. 23; v. 289; p. 772.
Heels and tread-lifts therefor, Metal. Cinderella Heel Corporation. No. 144,848; Aug. 23; v. 289; p. 771.
Hose, dredging-sleeves, and machinery packing. B. F. Goodrich Company. No. 149,897; Aug. 23; v. 289; p. 786.
Hosiery. Junior Hosiery Company. No. 146,122; Aug. 23; v. 289; p. 776.
Hosiery. Pittsburgh Dry Goods Company. No. 142,099; Aug. 23; v. 289; p. 764.
Hosiery. Pittsburgh Dry Goods Company. No. 145,707; Aug. 23; v. 289; p. 773.
Ice-cream. Tri-State Ice Cream Corporation. No. 149,302; Aug. 23; v. 289; p. 785.
Ice picks and tongs, milk-can carriers, &c. Bessiere & Company. No. 122,964; Aug. 23; v. 289; p. 753.
Incubators, brooders, and galvanized hovers, Chicken. Queen Incubator Company. No. 147,308; Aug. 23; v. 289; p. 779.
Indicating and recording instruments for use in effecting fuel saving. Uehling Instrument Co. No. 136,773; Aug. 23; v. 289; p. 759.
Ingots of non-ferrous metal. Keystone Die Casting Co. No. 139,581; Aug. 23; v. 289; p. 761.
Insect-powders. El-Kay Co. No. 148,138; Aug. 23; v. 289; p. 781.
Insecticides, Liquid. John Paterson & Co. No. 126,333; Aug. 23; v. 289; p. 753.
Indicators of revolution, speed-indicators, &c. Edmond Jaeger. No. 118,734; Aug. 23; v. 289; p. 753.
Knife-grinders, scissors-sharpeners, &c. Stewart-Skinner Company. No. 131,671; Aug. 23; v. 289; p. 757.
Ladders, Folding. Tuckaway Folding Ladder Co. No. 144,602; Aug. 23; v. 289; p. 770.
Leads for use in mechanical pencils. Wahl Company. No. 128,122; Aug. 23; v. 289; p. 754.
Leather material, Imitation-. B. Kay. No. 148,659; Aug. 23; v. 289; p. 783.
Liniment. J. M. Jacobs. No. 146,120; Aug. 23; v. 289; p. 776.
Liniment. Dr. Earl S. Sloan Incorporated. No. 143,896; Aug. 23; v. 289; p. 769.
Liquid compound for toilet use. John Paterson & Co. No. 126,332; Aug. 23; v. 289; p. 753.
Machines, their parts and accessories, and tools used in the manufacture of boots and shoes. United Shoe Machinery Corporation. No. 141,542; Aug. 23; v. 289; p. 763.
Magazine, Monthly. United Publishing Company. No. 149,303; Aug. 23; v. 289; p. 785.
Magazine publication, Monthly. Buffalo Society of Natural Sciences. No. 143,151; Aug. 23; v. 289; p. 767.
Malt extracts. H. Krauss. No. 148,233; Aug. 23; v. 289; p. 785.
Malt extracts. A. Wielich. No. 140,974; Aug. 23; v. 289; p. 763.
Mattresses. Sanitary Mattress Company. No. 138,641½; Aug. 23; v. 289; p. 760.
Medical compound for treatment of indigestion or dyspepsia. Sharp & Dohme. No. 146,188; Aug. 23; v. 289; p. 776.
Medical preparation for black tongue, sore mouth, and distemper. Southern Veterinary Remedies Company. No. 144,475; Aug. 23; v. 289; p. 769.
Medicinal preparations for affections of the eye. W. H. Rutland. No. 117,783; Aug. 23; v. 289; p. 752.
Medicinal tablets for colds. T. W. Penny. No. 145,966; Aug. 23; v. 289; p. 774.
Medicinal tablets to relieve headache, neuralgia, migraine, &c. M. A. Cohen. Nos. 144,849–50; Aug. 23; v. 289; p. 771.
Medicine used in the treatment of gonorrhea. C. Gekas. No. 145,016; Aug. 23; v. 289; p. 771.
Medicines for the treatment of cancer, External. D. B. O'Neal. No. 146,233; Aug. 23; v. 289; p. 776.
Medicines for treatment of congested liver, indigestion, &c., Hog. Swiantox Company. No. 146,398; Aug. 23; v. 289; p. 777.
Medicines for treatment of indigestion, dyspepsia, rheumatism, neuralgia, &c. Globe Drug Company. No. 147,344; Aug. 23; v. 289; p. 779.

C

ALPHABETICAL LIST OF PATENTEES

TO WHOM

PATENTS WERE ISSUED ON THE 30TH DAY OF AUGUST, 1921.

NOTE.—Arranged in accordance with the first significant character or word of the name. (In accordance with city and telephone directory practice.)

Adams, George C. and W. F., San Francisco, Calif. Bottle-capping machine. No. 1,389,111; Aug. 30; v. 289; p. 859.
Adams, William F. (See Adams, George C. and W. F.)
Adelson, Samuel L., New York, N. Y. Incandescent-lamp lock. No. 1,389,112; Aug. 30; v. 289; p. 859.
Adler, Philip, assignor of one-half to Chris Uebersetzig, Madison, Wis. Aeroplane driving mechanism. No. 1,389,471; Aug. 30; v. 289; p. 931.
Aimes, W. B., and G. H. T. Schaefer, Atchison, Kans. Display apparatus. No. 1,389,177; Aug. 30; v. 289; p. 873.
Alexander, Robert H., Willington Quay, and T. Graham, Sunderland, England. Ship's davit. No. 1,389,338; Aug. 30; v. 289; p. 905.
Alexander, William T., *et al.* (See Torrey, Charles L., assignor.)
Allan, William N., San Antonio, Tex. Vehicle-wheel. No. 1,389,472; Aug. 30; v. 289; p. 931.
Allan, William N., San Antonio, Tex. Vehicle-wheel. No. 1,389,473; Aug. 30; v. 289; p. 931.
Alldredge, Francis B., Des Moines, Iowa. Detachable-end bailer. No. 1,389,023; Aug. 30; v. 289; p. 842.
Allen, Charles J., Moorestown, N. J. Agricultural implement. No. 1,389,113; Aug. 30; v. 289; p. 859.
Allen, Herbert C., Richmond, Va. Etching-machine. No. 1,389,284; Aug. 30; v. 289; p. 894.
Allen, Thomas W., Hoquiam, Wash. Gear and key puller. No. 1,388,839; Aug. 30; v. 289; p. 805.
Allis-Chalmers Manufacturing Company. (See Newhouse, Ray C., assignor.)
Allmand, John T., assignor to Ternstedt Manufacturing Company, Detroit, Mich. Windshield-wiper. No. 1,388,911; Aug. 30; v. 289; p. 819.
Alloy Parts Manufacturing Company, The. (See Naugle, Harry M., assignor.)
Alloys & Products, Inc. (See Hecht, H., and Black, assignors.)
Alphaero Engines (Foreign Patents) Limited. (See Houston, Percival T., assignor.)
Alschuler, Ernest, St. Louis, Mo., assignor, by mesne assignments, to National Carbon Company, Inc., Cleveland, Ohio. Switch. No. 1,389,088; Aug. 30; v. 289; p. 855.
Althoff, August W., Oklahoma, Okla. Vehicle-wheel. No. 1,389,285; Aug. 30; v. 289; p. 894.
Ambrose, Nicholas, *et al.* (See Johnston, James A., assignor.)
American Brake Company, The. (See Burton, Thomas L., assignor.)
American Button & Fastener Company. (See Elliott, William E., assignor.)
American Dressler Tunnel Kilns. (See Wilputte, Louis, assignor.)
American Laundry Machinery Company, The. (See Waream, C. E., and Benjamin, assignors.)
American Motor Body Company. (See Lambert, A. L., and Bell, assignors.)
American Motor Body Company. (See Dryer, George W., assignor.)
American Radio & Research Corporation. (See Bush, Vannevar, assignor.)
American Thermophone Company. (See de Lange, P., and van Lynden, assignors.)
American Thermophone Company. (See van Lynden, Robert A. B., assignor.)
Anderson, Carl E., Worcester, Mass. Lock. No. 1,389,339; Aug. 30; v. 289; p. 905.
Anderson, Emil F., Chicago, Ill., assignor to International Harvester Company. Straw-rack. No. 1,388,912; Aug. 30; v. 289; p. 819.
Anderson, Fred. (See Watkins, J. M., and Anderson.)
Anderson, Jalmer, Burkburnett, Tex. Valve structure. No. 1,389,474; Aug. 30; v. 289; p. 932.
Anderson, John N., Chicago, Ill. Phonograph. No. 1,389,089; Aug. 30; v. 289; p. 855.
Anderson, Kristoffer A., Hartford, Conn. Means for securing dies in forging apparatus. No. 1,389,286; Aug. 30; v. 289; p. 894.
Anderson, Robert J., Sidney, Ohio. Washing-machine. No. 1,389,091; Aug. 30; v. 289; p. 855.
Anderson, Robert J., Sidney, Ohio. Washing-machine tub. No. 1,389,090; Aug. 30; v. 289; p. 855.
Angier, Edward H., Framingham, Mass. Preparing tires for shipment or storage. No. 1,388,840; Aug. 30; v. 289; p. 805.
Arner, Paul A., Allentown, Pa. Child's coaster. No. 1,389,418; Aug. 30; v. 289; p. 921.
Arntz, Fred B. (See Backhaus, A. A., and Arntz.)
Asprooth, Axel Hj, Rockford, Ill., assignor to Cotta Transmission Company, Rockford, Ill. Change-speed gearing. No. 1,389,287; Aug. 30; v. 289; p. 894.
Atkinson, William F., Bakersfield, Calif. Tire-tool. No. 1,389,114; Aug. 30; v. 289; p. 860.
Avey Drilling Machine Company, The. (See Mirrielees, James F., assignor.)
Backhaus, A. A., Baltimore, and F. B. Arentz, Curtis Bay, Md., assignors to U. S. Industrial Alcohol Co. Making aldehydes. No. 1,388,841; Aug. 30; v. 289; p. 805.
Bacon, Frank, Bayside, N. Y. Portable burglar-alarm. No. 1,389,178; Aug. 30; v. 289; p. 873.
Bagg, Hollis B., Watertown, assignor to Scovill Manufacturing Co., Waterbury, Conn. Spring. No. 1,388,913; Aug. 30; v. 289; p. 820.
Baldwin, Nathaniel, East Mill Creek, Utah. Pneumatic tire. No. 1,389,024; Aug. 30; v. 289; p. 843.
Barnes, Ansley, Waterville, Me. Cable-tightener. No. 1,389,475; Aug. 30; v. 289; p. 932.
Barron, W. L., New York, N. Y., and F. E. Osol, Elizabeth, N. J., assignors to The Singer Manufacturing Company. Sewing-machine. No. 1,388,914; Aug. 30; v. 289; p. 820.
Barry, Edward H. (See Smith, B. L., Barry, and Boetteher.)
Barry, Gerald G., Chicago, Ill. Metal wheel. No. 1,389,179; Aug. 30; v. 289; p. 873.
Barry, Joseph, Sharon, Pa. Curtain-stretcher. No. 1,389,431; Aug. 30; v. 289; p. 922.
Bassick Manufacturing Company, The. (See Fesler, Douglas F., assignor.)
Bassisty, Michael, New York, N. Y. Automatic hand embroidering-machine. No. 1,389,115; Aug. 30; v. 289; p. 860.
Baster, Harry C., Benton Harbor, Mich. Loose-leaf filing system or posting-tray. No. 1,389,116; Aug. 30; v. 289; p. 860.
Bauer & Black. (See Sharp, William H., assignor.)
Bazzoni, Lewis J., Swampscott, Mass., assignor to United Shoe Machinery Corporation, Paterson, N. J. Arctic-upper-stamping machine. No. 1,388,842; Aug. 30; v. 289; p. 805.
Beach, Sylvester J., Portland, Me. Optical instrument. No. 1,389,092; Aug. 30; v. 289; p. 856.
Beall, Benjamin R., Kansas City, Mo. Treating excelsior. No. 1,389,340; Aug. 30; v. 289; p. 905.
Beard, James R. (See Hunter, P. V., and Beard.)
Beattie Manufacturing Company, The. (See Beattie, Walter J., assignor.)
Beattie, Walter J., assignor to The Beattie Manufacturing Company, Cohoes, N. Y. Folding-machine. No. 1,389,117; Aug. 30; v. 289; p. 860.
Beauchamp, Virgil L., Evanston, Ill. Powder-box. No. 1,389,288; Aug. 30; v. 289; p. 895.
Becker, Benjamin V., *et al.*, trustees. (See Stephenson, Leigh J., assignor.)
Beeman, Archibald C., Oklahoma, Okla. Extension for handles. No. 1,389,477; Aug. 30; v. 289; p. 932.
Behncke, David L., Chicago, Ill. Aerial-photograph map. No. 1,388,915; Aug. 30; v. 289; p. 820.
Bell, Alfred. (See Lambert, A. L., and Bell.)
Belpedio, Jobby, Bridgeport, Conn. Talking-machine. No. 1,389,478; Aug. 30; v. 289; p. 932.
Benbow, James D., assignor to Western Wheeled Scraper Company, Aurora, Ill. Dust-guard for car-axles. No. 1,389,289; Aug. 30; v. 289; p. 895.
Benjamin, Dana H. (See Waream, C. E., and Benjamin.)
Bennett, Robert H., Washington, D. C. Illumination-light. No. 1,389,180; Aug. 30; v. 289; p. 873.
Benson, Jacob, Bristol, Conn. Key-cabinet. No. 1,389,181; Aug. 30; v. 289; p. 873.
Berg, Olaf, *et al.* (See Koch, Georg, assignor.)
Bergeron, Joseph D., Iberville, Quebec, Canada. Snow-plow. No. 1,389,118; Aug. 30; v. 289; p. 861.
Bergman, Julius. (See Cole, D., and Bergman.)
Bergren, John A., Lake Park, Minn. Gang-plow. No. 1,389,479; Aug. 30; v. 289; p. 932.
Berman, Frank, Oregon, Wis. Attachment for hospital-beds. No. 1,389,480; Aug. 30; v. 289; p. 933.
Bernstein, William, Jamaica Plain, assignor to Panther Rubber Manufacturing Company, Stoughton, Mass. Tread. No. 1,389,025; Aug. 30; v. 289; p. 843.
Berry, Thomas W. (See Houk, C. V., and Berry.)

Beth, Wilhelm F. L., Lübeck, Germany. Shaking device for cleaning filters. No. 1,389,481; Aug. 30; v. 289; p. 933.

Beth, Wilhelm F. L., Lübeck, Germany. Air or gas filter. No. 1,389,482; Aug. 30; v. 289; p. 933.

Betz, William G., assignor to Straube Piano Company, Hammond, Ind. Piano-action. No. 1,389,290; Aug. 30; v. 289; p. 895.

Beudet, Maurice. (See Koetschet, J., and Beudet.)

Biesmeyer, Lorenz F., and O. Stocksick, Chamois, Mo. Resilient-tire-casing filler. No. 1,388,843; Aug. 30; v. 289; p. 805.

Biggs, Charles A., Regina, Saskatchewan, Canada. Apple-feeding device. No. 1,388,916; Aug. 30; v. 289; p. 820.

Billingsley, Rennie E., San Antonio, Tex. Rotary plow. No. 1,389,484; Aug. 30; v. 289; p. 933.

Billingsley, Rennie E., San Antonio, Tex. Rotary plow-share. No. 1,389,483; Aug. 30; v. 289; p. 933.

Binder, Gottlob, Palmyra, N. J. Rotary washing-machine. No. 1,389,182; Aug. 30; v. 289; p. 874.

Black, David G. (See Hecht, H., and Black.)

Blair, Robert S., South Orange, N. J. Musical instrument and record therefor. No. 1,389,236; Aug. 30; v. 289; p. 884.

Blaisdell, Jennie G., West Somerville, Mass. Circuit-controller for liquid-gages. No. 1,389,485; Aug. 30; v. 289; p. 934.

Blake, Eli J., Buffalo, N. Y., assignor to Hall Switch & Signal Co. System of speed control. No. 1,388,917; Aug. 30; v. 289; p. 820.

Block, Alexander, New York, N. Y. Typewriter. No. 1,389,237; Aug. 30; v. 289; p. 884.

Blood, Bryant H., Hartford, Conn., assignor to Pratt & Whitney Company, New York, N. Y. Linear-measuring machine. No. 1,389,341; Aug. 30; v. 289; p. 905.

Blood, Harold L., Plainfield, assignor to Niles-Bement-Pond Company, Jersey City, N. J. Planer and system of motor control therefor. No. 1,389,342; Aug. 30; v. 289; p. 905.

Boehm, Wenzel, Swissvale; H. S. Corey, Munhall, and L. A. Lambing, Pittsburgh, Pa. Tar-burner. No. 1,389,563; Aug. 30; v. 289; p. 949.

Boettcher, Arthur H. (See Smith, B. L., Barry, and Boettcher.)

Bock Bearing Company, The. (See Flaherty, John F., assignor.)

Bone, Evan P., Cincinnati, Ohio. Headlamp. No. 1,389,291; Aug. 30; v. 289; p. 895.

Bornhauser, Otto E. (See Schwer, G. A., and Bornhauser.)

Boston Auto Gage Company. (See Gregory, G. P., and MacKelvie, assignors.)

Bowman, Robert L., Knoxville, Tenn. Elastic, automatic, adjustable blasting-shell. No. 1,389,292; Aug. 30; v. 289; p. 895.

Bradford, Charles M., Boston, Mass., assignor to United Shoe Machinery Corporation, Paterson, N. J. Softening apparatus. No. 1,388,844; Aug. 30; v. 289; p. 806.

Brainard, Osceola D., Great Falls, Mont. Automatic gage. No. 1,389,432; Aug. 30; v. 289; p. 923.

Brandt, Edmund S. R., Newport, R. I. Torpedo. No. 1,388,918; Aug. 30; v. 289; p. 820.

Branen, Edward F., Sr., Elgin, Ill. Making tire-fillers. No. 1,389,093; Aug. 30; v. 289; p. 856.

Brennan, William J., Swampscott, Mass., assignor to United Shoe Machinery Corporation, Paterson, N. J. Cutting-machine. No. 1,388,845; Aug. 30; v. 289; p. 805.

Brewer, Joseph, New York, N. Y. Wire and drill gage. No. 1,389,486; Aug. 30; v. 289; p. 934.

Brewer, Lester P. (See Lochhead, E. C., and Brewer.)

Bridwell, William E., Los Angeles, Calif. Locality-finder for maps and the like. No. 1,389,293; Aug. 30; v. 289; p. 896.

Briggs, Ella E., St. Louis, Mo. Attachment for typewriters. No. 1,389,419; Aug. 30; v. 289; p. 921.

Brightman, Samuel D. (See Rosenthal, S., and Brightman.)

Brilliant, Abraham, Boston, Mass. Compound tool for watchmakers. No. 1,389,119; Aug. 30; v. 289; p. 861.

Brock, Edward L., administrator. (See Brock, Matthias.)

Brock, Matthias, deceased, Boston, Mass., by E. L. Brock, administrator, Beverly, Mass., assignor to United Shoe Machinery Corporation, Paterson, N. J. Staple making and driving machine. No. 1,388,846; Aug. 30; v. 289; p. 806.

Bromley, John, & Sons. (See Grundy, James A., assignor.)

Brookins, Andrew J., Chicago, Ill. Train-control apparatus. No. 1,389,094; Aug. 30; v. 289; p. 856.

Broslus, Edgar E., Pittsburgh, Pa. Charging apparatus for annealing-furnaces. No. 1,389,238; Aug. 30; v. 289; p. 884.

Brophy, John P., Cleveland, Ohio. Driving mechanism for automatic machines. No. 1,389,433; Aug. 30; v. 289; p. 924.

Brunnert, Anton, Old Monroe, Mo. Farm implement. No. 1,388,847; Aug. 30; v. 289; p. 806.

Browder, Benjamin F. (See Smith, M. J., and Browder.)

Buchanan, John W., assignor of one-half to G. E. Sanford, Boston, Mass. Typewriter. No. 1,389,120; Aug. 30; v. 289; p. 861.

Buff, Jacob, Jersey City, N. J. Steam-condenser for clothes-presses. No. 1,389,434; Aug. 30; v. 289; p. 924.

Bugbee, Niles Company. (See King, Rufus, assignor.)

Bullard, Edwin W., Whitneyville, assignor to Winchester Repeating Arms Co., New Haven, Conn. Bit-brace. No. 1,388,920; Aug. 30; v. 289; p. 821.

Bullard, Edwin W., Whitneyville, assignor to Winchester Repeating Arms Co., New Haven, Conn. Ratchet mechanism. No. 1,388,929; Aug. 30; v. 289; p. 823.

Bullard, Edwin W., Whitneyville, assignor to Winchester Repeating Arms Co., New Haven, Conn. Brace-head. No. 1,388,928; Aug. 30; v. 289; p. 822.

Bullard, Edwin W., Whitneyville, assignor to Winchester Repeating Arms Co., New Haven, Conn. Ratchet mechanism. No. 1,388,927; Aug. 30; v. 289; p. 822.

Bullard, Edwin W., Whitneyville, assignor to Winchester Repeating Arms Co., New Haven, Conn. Ratchet mechanism. No. 1,388,926; Aug. 30; v. 289; p. 822.

Bullard, Edwin W., Whitneyville, assignor to Winchester Repeating Arms Co., New Haven, Conn. Bit-brace handle. No. 1,388,925; Aug. 30; v. 289; p. 822.

Bullard, Edwin W., Whitneyville, assignor to Winchester Repeating Arms Co., New Haven, Conn. Bit-brace handle. No. 1,388,924; Aug. 30; v. 289; p. 822.

Bullard, Edwin W., Whitneyville, assignor to Winchester Repeating Arms Co., New Haven, Conn. Ratchet mechanism. No. 1,388,923; Aug. 30; v. 289; p. 821.

Bullard, Edwin W., Whitneyville, assignor to Winchester Repeating Arms Co., New Haven, Conn. Brace-head. No. 1,388,922; Aug. 30; v. 289; p. 821.

Bullard, Edwin W., Whitneyville, assignor to Winchester Repeating Arms Co., New Haven, Conn. Brace-head. No. 1,388,921; Aug. 30; v. 289; p. 821.

Bullard, Edwin W., Whitneyville, assignor to Winchester Repeating Arms Co., New Haven, Conn. Ratchet mechanism. No. 1,388,919; Aug. 30; v. 289; p. 821.

Burgess, Edward W., Chicago, Ill., assignor, by mesne assignments, to International Harvester Company. Tillage implement. No. 1,388,930; Aug. 30; v. 289; p. 823.

Burke, Edward F., assignor of one-fourth to J. M. Lichty, Sioux City, Iowa. Wrecking-tool. No. 1,389,183; Aug. 30; v. 289; p. 874.

Burke, Joseph P. (See Pirdun, L., and Burke.)

Burnen, Bernard C., New York, N. Y. Valve-lifter. No. 1,389,504; Aug. 30; v. 289; p. 949.

Burnett, Charley, Washington Court House, Ohio. Hog-oiler. No. 1,389,435; Aug. 30; v. 289; p. 924.

Burrage, George B., *et al.*, trustees. (See Stephenson, Leigh J., assignor.)

Burton, Thomas L., assignor to The American Brake Company, St. Louis, Mo. Brake-beam suspension. No. 1,389,121; Aug. 30; v. 289; p. 861.

Bury, Ernest. (See Jones, F. B., and Bury.)

Busch-Sulzer Bros.-Diesel Engine Company. (See Hantschke, Paul, assignor.)

Bush, Vannevar, Chelsea, assignor to American Radio & Research Corporation, Medford, Mass. Radio receiving system. No. 1,389,026; Aug. 30; v. 289; p. 843.

Butler, Edith, Mercer, Pa. Sand-box. No. 1,389,544; Aug. 30; v. 289; p. 945.

Cadgene, Ernest, *et al.* (See Koch, Georg, assignor.) (Reissue.)

Calkin, Benjamin H. and F. L., Detroit, Mich.; said Benjamin H. Calkin assignor to said F. L. Calkin. Coffee-percolator. No. 1,389,239; Aug. 30; v. 289; p. 895.

Calkin, Frances L. (See Calkin, Benjamin H. and F. L.)

Cameron, William J., Chicago, Ill. Retractor. No. 1,389,436; Aug. 30; v. 289; p. 924.

Campaigne, William T. D., Spooner, Wis. Wheel-flange oiler. No. 1,389,420; Aug. 30; v. 289; p. 927.

Canfield, John A., Danbury, Conn. Coin-adding machine. No. 1,389,122; Aug. 30; v. 289; p. 861.

Canion, William G., Glen Burnie, Md., assignor to The National Manufacturing Company. Demountable rim. No. 1,389,123; Aug. 30; v. 289; p. 862.

Carlson, Frederick E. (See Lamb, J. F., and Carlson.)

Carpenter, Linn E., East Orange, N. J., and E. E. Eldredge, Sidney, assignors to Phenix Cheese Company, New York, N. Y. Swiss cheese and sterilising the same. No. 1,389,095; Aug. 30; v. 289; p. 856.

Carter, Willis M., Jersey City, N. J., assignor to The W. F. Powers Company, New York, N. Y. Tire-display support. No. 1,388,848; Aug. 30; v. 289; p. 806.

Casey, Thomas W., Yonkers, N. Y., assignor to National Pneumatic Company, Chicago, Ill. Support for third rails. No. 1,389,124; Aug. 30; v. 289; p. 862.

Cassel, Gunnar E., Stockholm, Sweden, assignor to Arthur Leffler Djursholm, Sweden. Adjustable wrench. No. 1,389,487; Aug. 30; v. 289; p. 934.

Celler, Arthur, assignor of one-half to T. B. Oneill, Brooklyn, N. Y. Combined scraper and chopper. No. 1,388,931; Aug. 30; v. 289; p. 823.

Centervall, Hugo, Brooklyn, N. Y. Aerial torpedo. No. 1,388,932; Aug. 30; v. 289; p. 823.

Central Railway Signal Company. (See Dutcher, Frank, assignor.)

Chappell, Arthur E., Chicago, Ill. Surfacing-machine. No. 1,389,125; Aug. 30; v. 289; p. 862.

Chappell, Frank L., Cleveland, Ohio. Roof-ladder fire-escape. No. 1,389,096; Aug. 30; v. 289; p. 856.

Chicago Railway Signal and Supply Company. (See McCarthy, Daniel J., assignor.)

Cholick, Joseph J., Rio Honde, Tex. Attachment for tractors. No. 1,389,488; Aug. 30; v. 289; p. 934.

Chubb, Lewis W., Edgewood Park, Pa., assignor to Westinghouse Electric & Manufacturing Company. Electrical precipitating system. No. 1,389,126; Aug. 30; v. 289; p. 862.

Churchward, Jack, New York, N. Y., assignor to Wilson Welder & Metals Company, Inc. Welding cast iron. No. 1,389,476; Aug. 30; v. 289; p. 932.

Cincinnati Butchers' Supply Company, The. (See Schmidt, Charles G., and O. C., assignors.)

Cincinnati Butchers' Supply Company, The. (See Schmidt, Oscar C., assignor.)

Cinema Patents Company. (See Teitel, Albert, assignor.)

Claffey, Thomas J., *et al.* (See Johnston, James A., assignor.)

Clark, Mary A. L., Boston, Mass. Tone-guide for singers. No. 1,389,240; Aug. 30; v. 289; p. 885.

Clefton, Claud J., assignor, by mesne assignments, of one-half to Guy J. Clefton, Owatonna, Minn. Cooking utensil. No. 1,389,241; Aug. 30; v. 289; p. 885.

Clefton, Guy J. (See Clefton, Claud J., assignor.)

Clement, Alvah W., assignor to The Cleveland Brass Manufacturing Company, Cleveland, Ohio. Alloy. No. 1,389,097; Aug. 30; v. 289; p. 856.

Cleveland Brass Manufacturing Company, The. (See Clement, Alvah W., assignor.)

Cleveland Brass Manufacturing Company, The. (See Glekler, John T., assignor.)

Click, Walter E., assignor to The Godfrey Conveyer Company, Elkhart, Ind. Track-joint. No. 1,389,545; Aug. 30; v. 289; p. 946.

Cohn, Irwin, Stroudsburg, assignor to Exeloid Company of Pennsylvania, East Stroudsburg, Pa. Soap-bubble pipe. No. 1,389,098; Aug. 30; v. 289; p. 857.

Coffee, James C., Webb City, Mo. Automatic oiler. No. 1,389,489; Aug. 30; v. 289; p. 934.

Coffey, John, Boston, Mass., assignor to United Shoe Machinery Corporation, Paterson, N. J. Stitched buttonhole. No. 1,389,027; Aug. 30; v. 289; p. 843.

Colburn, Albert L., New Haven, Conn. Direct-reading micrometer-caliper. No. 1,389,028; Aug. 30; v. 289; p. 843.

Cole, David, and J. Bergman, El Paso, Texas. Method and plant for storing and averaging materials. No. 1,389,184; Aug. 30; v. 289; p. 874.

ALPHABETICAL LIST OF INVENTIONS

FOR WHICH

PATENTS WERE ISSUED ON THE 30TH DAY OF AUGUST, 1921.

NOTE.—Arranged in accordance with the first significant character or word of the name. (In accordance with city and telephone directory practice.)

Acid and of alkaline valerianates, Manufacture of valerianic. L. Dupont. No. 1,389,187; Aug. 30; v. 289; p. 875.

Adding machine, Coin-. J. A. Canfield. No. 1,389,122; Aug. 30; v. 289; p. 861.

Adjustable wrench. G. E. Cassel. No. 1,389,487; Aug. 30; v. 289; p. 934.

Advertising or display novelty. P. M. Heanegan. No. 1,389,551; Aug. 30; v. 289; p. 947.

Aerial propeller. P. Levasseur. No. 1,389,146; Aug. 30; v. 289; p. 866.

Aeroplane. T. A. Macdonald. No. 1,389,257; Aug. 30; v. 289; p. 888.

Aeroplane. P. J. Reuser. No. 1,389,163; Aug. 30; v. 289; p. 870.

Aeroplane driving mechanism. P. Adler. No. 1,389,471; Aug. 30; v. 289; p. 931.

Agricultural implement. C. J. Allen. No. 1,389,115; Aug. 30; v. 289; p. 859.

Agricultural-implement frame. T. C. Duncan. No. 1,389,296; Aug. 30; v. 289; p. 896.

Air and gas, Method of and means for burning. W. H. Geesman and A. G. McKee. No. 1,388,944; Aug. 30; v. 289; p. 826.

Air-brake lock. A. W. Paulson. No. 1,389,070; Aug. 30; v. 289; p. 861.

Air-compressor. M. A. Estes. No. 1,389,039; Aug. 30; v. 289; p. 845.

Aircraft, marine steering-gear, and other apparatus, Control device applicable to. W. C. Gardiner. No. 1,389,347; Aug. 30; v. 289; p. 907.

Airplane. B. D. Thomas. No. 1,389,106; Aug. 30; v. 289; p. 858.

Airplane-stabilizer. T. E. Weible. No. 1,388,907; Aug. 30; v. 289; p. 818.

Alarm: *See*—
Portable burglar-alarm.

Aldehydes, Making. A. A. Backhaus and F. B. Arentz. No. 1,388,841; Aug. 30; v. 289; p. 805.

Alloy. A. W. Clement. No. 1,389,097; Aug. 30; v. 289; p. 856.

Alloy. H. Hecht. No. 1,389,446; Aug. 30; v. 289; p. 926.

Alloy, Heat-resisting. J. T. Glekler. No. 1,389,133; Aug. 30; v. 289; p. 863.

Alloys, Treating lead. J. O. Johnstone. No. 1,389,511; Aug. 30; v. 289; p. 939.

Annealing. C. M. Stein. No. 1,388,976; Aug. 30; v. 289; p. 832.

Arctic-upper-stamping machine. L. J. Bassoni. No. 1,388,842; Aug. 30; v. 289; p. 805.

Armchair. M. McCarthy. No. 1,389,254; Aug. 30; v. 289; p. 888.

Assembling-cradle. C. W. Olson. No. 1,389,068; Aug. 30; v. 289; p. 851.

Auto-window frame. H. P. Davis. No. 1,389,033; Aug. 30; v. 289; p. 844.

Automatic gage. O. D. Brainard. No. 1,389,432; Aug. 30; v. 289; p. 923.

Automatic machines, Driving mechanism for. J. P. Brophy. No. 1,389,433; Aug. 30; v. 289; p. 924.

Automobile attachment. J. Finch. No. 1,388,940; Aug. 30; v. 289; p. 825.

Automobile-lock. S. G. Gerlach. No. 1,389,499; Aug. 30; v. 289; p. 936.

Automobile power-transmitting device. S. L. Shuster and G. J. Riegert. No. 1,389,167; Aug. 30; v. 289; p. 871.

Automobile-radiator cap. W. M. Erwin and W. F. Stretch. No. 1,389,495; Aug. 30; v. 289; p. 936.

Automobile signal-controlling mechanism. C. C. Loder. No. 1,389,366; Aug. 30; v. 289; p. 910.

Automobile-signal, Rear-end. G. G. Morin. No. 1,389,373; Aug. 30; v. 289; p. 912.

Automobile-skid. L. L. Tufts. No. 1,389,400; Aug. 30; v. 289; p. 917.

Automobiles, Air-regulator for. A. Hango. No. 1,388,999; Aug. 30; v. 289; p. 837.

Automobiles, &c., Starter, lights, and alarm control device for. W. H. Collier. No. 1,388,933; Aug. 30; v. 289; p. 824.

Automobiles, Attachment for. J. F. Fair. No. 1,388,996 Aug. 30; v. 289; p. 837.

Automobiles, Brake attachment for. F. R. Peterson. No. 1,389,159; Aug. 30; v. 289; p. 869.

Automobiles, Foot-rest for. S. L. Myatt. No. 1,389,209; Aug. 30; v. 289; p. 879.

Automobiles, Gear-shift-lever lock for. C. W. Mueller. No. 1,389,316; Aug. 30; v. 289; p. 900.

Automobiles, Safety device for. M. Thiery. No. 1,388,961; Aug. 30; v. 289; p. 833.

Automobiles, Traffic-signal for. I. C. Schrag. No. 1,388,900; Aug. 30; v. 289; p. 817.

Bag: *See*—
Male urinal bag.

Bailer, Detachable-end. F. B. Alldredge. No. 1,389,023; Aug. 30; v. 289; p. 842.

Baling-wire needle. W. A. Seymour. No. 1,389,386; Aug. 30; v. 289; p. 914.

Bar: *See*—
Grate-bar.

Batteries, Grid for storage. J. C. Sundby. No. 1,389,018; Aug. 30; v. 289; p. 841.

Battery: *See*—
Storage battery.

Battery plates, Lead-burning machine for storage-. P. E. Norris. No. 1,389,155; Aug. 30; v. 289; p. 869.

Bearing. N. Constant. No. 1,389,127; Aug. 30; v. 289; p. 862.

Bearing cages, Tie-bar for roller-. C. S. Lockwood. No. 1,389,313; Aug. 30; v. 289; p. 900.

Bearing, Roller-. J. F. Flaherty. No. 1,389,040; Aug. 30; v. 289; p. 845.

Bearing, Roller-. C. E. Robson. No. 1,389,385; Aug. 30; v. 289; p. 914.

Bearing spindle, Ball-. T. M. Prudden. No. 1,389,009; Aug. 30; v. 289; p. 840.

Bed-spring and auto-cushion. A. F. Sturm. No. 1,389,168; Aug. 30; v. 289; p. 871.

Beds, Attachment for hospital-. F. Berman. No. 1,389,480; Aug. 30; v. 289; p. 933.

Belt-holder. J. E. MacMillan. No. 1,389,206; Aug. 30; v. 289; p. 878.

Bicycle construction. E. M. Lewis. No. 1,388,961; Aug. 30; v. 289; p. 829.

Binder, Infant-. E. L. Larrabee. No. 1,388,867; Aug. 30; v. 289; p. 810.

Bit-brace. E. W. Bullard. No. 1,388,920; Aug. 30; v. 289; p. 821.

Bit-brace handle. E. W. Bullard. No. 1,388,924; Aug. 30; v. 289; p. 822.

Bit-brace handle. E. W. Bullard. No. 1,388,925; Aug. 30; v. 289; p. 822.

Blower, Soot-. W. M. McNeill. (Reissue.) No. 15,185; Aug. 30; v. 289; p. 951.

Bobbin. E. J. Hubbard. No. 1,388,951; Aug. 30; v. 289; p. 827.

Bobbin. E. J. Hubbard. No. 1,388,952; Aug. 30; v. 289; p. 827.

Boiler: *See*—
Steam-boiler.

Bolt: *See*—
Lubricating-bolt. Spring-bolt.

Book, Deposit-. G. H. Kent. No. 1,389,561; Aug. 30; v. 289; p. 949.

Bottle-capping machine. G. C. and W. F. Adams. No. 1,389,111; Aug. 30; v. 289; p. 859.

Box: *See*—
Photoprinting-box. Sand-box.
Powder-box.

Brace: *See*—
Bit-brace.

Brace-head. E. W. Bullard. No. 1,388,921; Aug. 30; v. 289; p. 821.

Brace-head. E. W. Bullard. No. 1,388,922; Aug. 30; v. 289; p. 821.

Brace-head. E. W. Bullard. No. 1,388,928; Aug. 30; v. 289; p. 822.

Bracelet clasp, Ribbon-. R. King. No. 1,389,196; Aug. 30; v. 289; p. 876.

Bracket: *See*—
Shade-bracket.

Brake-beam fulcrum. W. E. Fowler, Jr. No. 1,389,041; Aug. 30; v. 289; p. 846.

Brake-beam suspension. T. L. Burton. No. 1,389,121; Aug. 30; v. 289; p. 861.

Bread-raiser. L. B. Hawkins. No. 1,389,352; Aug. 30; v. 289; p. 908.

Brush and comb, Combined. T. Koslowsky and W. Rogosky. No. 1,388,955; Aug. 30; v. 289; p. 828.

Brush-holder mechanisms, Controlling device for. M. E. Gysel. No. 1,389,137; Aug. 30; v. 289; p. 864.

Buckle, Belt-. S. Rosenthal and S. D. Brightman. No. 1,389,459; Aug. 30; v. 289; p. 929.

Bumper-bar and support therefor. J. Di Salvo. No. 1,389,344; Aug. 30; v. 289; p. 906.

Burglar-alarm, Portable. F. Bacon. No. 1,389,178; Aug. 30; v. 289; p. 873.
Burner: *See*—
Kindling-burner. Tar-burner.
Liquid-fuel burner. Vapor-burner.
Oil-burner.
Burner-head. C. L. Torrey. No. 1,389,107; Aug. 30; v. 289; p. 858.
Buttonhole, Stitched. J. Coffey. No. 1,389,027; Aug. 30; v. 289; p. 843.
Buttons, Manufacturing connecting members or links for cuff-. J. W. Schoellner and J. P. Rowley. No. 1,388,973; Aug. 30; v. 289; p. 832.
Buttons, Package of. W. E. Elliott. No. 1,389,188; Aug. 30; v. 289; p. 875.
Cabinet, Filing-. C. R. Southwell. No. 1,389,279; Aug. 30; v. 289; p. 893.
Cabinet, Key-. J. Benson. No. 1,389,181; Aug. 30; v. 289; p. 873.
Cable-tightener. A. Barnes. No. 1,389,475; Aug. 30; v. 289; p. 932.
Caliper, Direct-reading micrometer-. A. L. Colburn. No. 1,389,028; Aug. 30; v. 289; p. 843.
Caliper, Taper-gaging. F. G. Renton. No. 1,389,381; Aug. 30; v. 289; p. 913.
Camera. A. E. Lipp. No. 1,388,870; Aug. 30; v. 289; p. 811.

Dolls. Notaseme Hosiery Company. No. 145,355; Aug. 30; v. 289; p. 997.

Dolls. Notaseme Hosiery Company. No. 146,226; Aug. 30; v. 289; p. 999.

Dolls, Mechanical. F. B. Meehan. No. 141,730; Aug. 30; v. 289; p. 993.

Doughnuts. Gahan Baking Company. No. 120,665; Aug. 30; v. 289; p. 986.

Educational and amusement appliance, Child's. G. L. E. Klingbeil. No. 147,829; Aug. 30; v. 289; p. 1005.

Envelops and mailing-containers. Letalog Mailer Co. No. 147,031; Aug. 30; v. 289; p. 1001.

Expectorant for bronchitis, whooping-cough, &c. Chemische Fabrik vormals Sandoz. No. 143,916; Aug. 30; v. 289; p. 994.

Feed for horses, mules, cattle, hogs, and poultry. Beaumont Cotton Oil Mill Co. No. 105,163; Aug. 30; v. 289; p. 985.

Flies, gravers, tweezers, &c. H. Paulson. No. 140,402; Aug. 30; v. 289; p. 991.

Fire-brick, hollow building-tile, face-brick, &c. Crush Brick Company. No. 145,882; Aug. 30; v. 289; p. 998.

Fire-extinguishers, Hand. Ideal Fire Extinguisher Co. No. 146,258; Aug. 30; v. 289; p. 999.

Fishing-lines. Marshall-Wells Company. No. 148,451; Aug. 30; v. 289; p. 1008.

Foot appliances, Corrective. Wizard Foot Appliance Company. No. 129,114; Aug. 30; v. 289; p. 987.

Fruits and vegetables, Fresh. Merced Growers Packing Ass'n. No. 147,445; Aug. 30; v. 289; p. 1004.

Furnaces, Refractory composition for use in. General Electric Company. No. 144,521; Aug. 30; v. 289; p. 995.

Furniture and automobile polish. Wisconsin Compounding Company. No. 149,162; Aug. 30; v. 289; p. 1009.

Game apparatus. B. M. Hutchison. No. 140,837; Aug. 30; v. 289; p. 992.

Gasolene-improver. W. H. Pugh. No. 147,734; Aug. 30; v. 289; p. 1005.

Glare-shields, Automobile. Protectoglare Co. No. 133,493; Aug. 31; v. 289; p. 988.

Glass. Corning Glass Works. No. 134,303; Aug. 30; v. 289; p. 988.

Glass globes and reflectors. Holophane Glass Co. Inc. Nos. 147,197–8; Aug. 30; v. 289; p. 1002.

Golf-balls. Midland Rubber Co. Ltd. No. 144,032; Aug. 30; v. 289; p. 994.

Golf-clubs. S. Tousey. No. 148,249; Aug. 30; v. 289; p. 1007.

Guava jelly, canned guavas, &c. F. E. Smith. No. 141,808; Aug. 30; v. 289; p. 993.

Gum, Chewing-. American Chicle Company. No. 147,330; Aug. 30; v. 289; p. 1003.

Gun-recoil pads for hand-arms. B. F. Goodrich Company. No. 137,463; Aug. 30; v. 289; p. 989.

Gun-recoil pads for hand-arms. B. F. Goodrich Company. No 137,466; Aug. 30; v. 289; p. 989

Hair-nets. Empire Notion Co. No. 149,955; Aug. 30; v. 289; p. 1010.

Hair-nets. Samstag & Hilder Bros. No. 148,676; Aug. 30; v. 289; p. 1009.

Hair-tonic. Conner & Walter Company. No. 143,910; Aug. 30; v. 289; p. 994.

Hams, bacon, picnic-hams, dried beef, &c. John Morrell & Company. No. 147,367; Aug. 30; v. 289; p. 1003.

Hammers and wrenches. Henry Cheney Hammer Corporation. No. 141,250; Aug. 30; v. 289; p. 992.

Hoists, dredging, mining, and logging engines, &c., Contractors' steam and gasolene. J. S. Mundy Hoisting Engine Co. No. 148,233; Aug. 30; v. 289; p. 1007.
Ice-cream and candy kisses. Kalashian Bros. No. 143,326; Aug. 30; v. 289; p. 994.
Kraft wrapping-papers. Central Ohio Paper Company. No. 146,754; Aug. 30; v. 289; p. 1001.
Label-holders. "Little Major" Appliances Co., The. No. 145,346; Aug. 30; v. 289; p. 997.
Lacquer for coloring electric-lamp bulbs. Western Electric Company. No. 111,637; Aug. 30; v. 289; p. 985.
Lamps, Acetylene-. Universal Lamp Co. No. 150,380; Aug. 30; v. 289; p. 1011.
Lard. T. L. Boyd. No. 133,567; Aug. 30; v .289; p. 988.
Lard substitutes. H. R. Ellah. No. 144,609; Aug. 30; v. 289; p. 995.
Laundry-washing machines. Voss Brothers Manufacturing Co. No. 138,030; Aug. 30; v. 289; p. 990.
Lawn-sprinklers. Rainbow Lawn Sprinkler Company. No. 148,087; Aug. 30; v. 289; p. 1006.
Lenses, Non-breakable lamp-. Insel Company. No. 143,170; Aug. 30; v. 289; p. 993.
Liniment. A. Szabo. No. 145,656; Aug. 30; v. 289; p. 998.
Liquids, Cleaning and polishing. Lincoln Chemical Company. No. 147,671; Aug. 30; v. 289; p. 1004.
Lock-nuts. Patterson Lock Nut Mfg. Co. No. 148,618; Aug. 30; v. 289; p. 1008.
Lubricant or lotion for rendering the cuticle soft and pliable, &c. Lustrite Corporation, The. No. 146,920; Aug. 30; v. 289; p. 1001.
Lye. Stoneward Corporation. No. 132,760; Aug. 30; v. 289; p. 987.
Magnesia, light calcined magnesia, &c. P. Cary Manufacturing Company. No. 145,317; Aug. 30; v. 289; p. 997.
Malt-syrup. J. B. Tuor. No. 145,176; Aug. 30; v. 289; p. 996.
Manicuring preparations, powders, &c., Containers for. A. Moeller. No. 114,065; Aug. 30; v. 289; p. 985.
Medical preparation. Hanson Manufacturing Company. No. 147,196; Aug. 30; v. 289; p. 1002.
Medicine, Emollient antiseptic. Eucatol Co. No. 143,550; Aug. 30; v. 289; p. 994.
Medicine for cholera and roup. H. C. Ford. No. 133,658; Aug. 30; v. 289; p. 988.
Medicine for cows. Germicide Company. No. 147,778; Aug. 30; v. 289; p. 1005.
Medicine for the treatment of diseases of the blood, nerves, &c., and a hair-cream. J. B. Khan. No. 147,669; Aug. 30; v. 289; p. 1004.
Medicine, Tonic, &c. G. Prunier & Cie. No. 147,983; Aug. 30; v. 289; p. 1006.
Menthol cough-drops. W. H. Luden. No. 147,967; Aug. 30; v. 289; p. 1006.
Metal molds. Eppelsheimer & Co. No. 146,959; Aug. 30; v. 289; p. 1001.
Metal-rods, bars, stirrups, &c., for reinforcing concrete. Corrugated Bar Company. No. 148,648; Aug. 30; v. 289; p. 1008.
Milk, Condensed. Chas. T. Stork and Co. No. 117,544; Aug. 30; v. 289; p. 985.
Milk, Evaporated. Tri-State Milk Products Co. No. 148,629; Aug. 30; v. 289; p. 1008.
Milk, Unsweetened, evaporated. American Milk Products Company. Nos. 148,361–2; Aug. 30; v. 289; p. 1007.
Mineral waters. J. Hall. No. 148,654; Aug. 30; v. 289; p. 1008.
Minnow-nets. W. H. Reisner Manufacturing Company. No. 145,970; Aug. 30; v. 289; p. 999.
Nails, Clenching-. Geo. Baker & Sons. No. 148,052; Aug. 30; v. 289; p. 1006.
Oil, Olive-. J. Rocha Bros. No. 147,994; Aug. 30; v. 289; p. 1006.
Oil, Polishing-. Texas Company. No. 149,984; Aug. 30; v. 289; p. 1010.
Ointment for eczema, boils, &c. Hudson & Company. No. 146,631; Aug. 30; v. 289; p. 1000.
Ornamental electrical fixture parts of stamped brass and copper. Alfred Vester Sons', Inc. No. 147,589; Aug. 30; v. 289; p. 1004.
Packing, Braided asbestos lubricated yarn. Stewart R. Brown Mfg. Co. Inc. No. 150,434; Aug. 30; v. 289; p. 1011.
Paint, Corrosion, acid, and gas proof. Kingsbury Corporation. No. 148,079; Aug. 30; v. 289; p. 1006.
Paints, Cold-water. Sherwin-Williams Company. No. 147,469; Aug. 30; v. 289; p. 1004.
Paints, Enamel. Remien & Kuhnert Co. No. 144,639; Aug. 30; v. 289; p. 995.
Paints, finishes, enamels, japans, varnishes, &c. Sherwin-Williams Company. No. 147,136; Aug. 30; v. 289; p. 1001.
Paints, Ready-mixed. Phoenix Paint & Varnish Company. No. 149,026; Aug. 30; v. 289; p. 1009.
Paper, cards, and envelops therefor, Correspondence-. Jordan Marsh Company. No. 146,712; Aug. 23; v. 289; p. 1000.
Paper, Cover-. Chemical Paper Manufacturing Co. No. 142,386; Aug. 30; v. 289; p. 993.
Paper, paper towels and napkins, Wrapping and toilet. Continental Paper & Bag Mills. No. 140,990; Aug. 30; v. 289; p. 992.
Paper, Printing and writing bond-. Alling and Cory Company. No. 147,179; Aug. 30; v. 289; p. 1002.
Paper, Printing and writing bond-. Alling and Cory Company. No. 147,181; Aug. 30; v. 289; p. 1002.
Paper, Wrapping-. B. A. Nienhauser. No. 147,676; Aug. 30; v. 289; p. 1005.
Paper, Writing-. Marcus Ward, Inc. No. 134,399; Aug. 30; v. 289; p. 988.
Papers, Cover and textile book-. The Central Ohio Paper Company. No. 146,752; Aug. 30; v. 289; p. 1000.
Papers, Enamel cover and book. Central Ohio Paper Company, The. No. 146,753; Aug. 30; v. 289; p. 1000.
Paprika, Spanish. V. Rodrigues. Nos. 145,231–5; Aug. 30; v. 289; p. 996.
Petrolatums, mineral jellies and oils. Sherwood Petroleum Co., Inc. No. 145,657; Aug. 30; v. 289; p. 998.
Pile remedy. W-K-M Co. No. 147,804; Aug. 30; v. 289; p. 1005.
Pneumatic tools—namely, riveting-hammers. Chicago Pneumatic Tool Company. No. 146,295; Aug. 30; v. 289; p. 999.
Potatoes, Fresh. Norfolk Truckers Exchange. No. 142,716; Aug. 30; v. 289; p. 993.
Preparation for removing old varnish, wax, dirt, grease, &c. C. A. Walter. No. 147,855; Aug. 30; v. 289; p. 1006.
Preparation for treatment of heaves. C. B. Baker. No. 148,367; Aug. 30; v. 289; p. 1007.
Preparation for use in treatment of rheumatism, gout, lumbago. F. J. Volkmar. No. 147,695; Aug. 30; v. 289; p. 1005.
Preparation used in sterilizing infected dentine. Kings Specialty Co. No. 147,828; Aug. 30; v. 289; p. 1005.
Preparations used in the treatment of chlorosis, anemia, skin diseases, &c. Winthrop Chemical Company. No. 120,298; Aug. 30; v. 289; p. 985.
Presses, &c. E. W. Bliss Company. No. 145,547; Aug. 30; v. 289; p. 997.
Presses and drop-lifters, Drop-. Birmingham Iron Foundry. No. 144,376; Aug. 30; v. 289; p. 995.
Preventive for venereal diseases. M. Twersky. No. 147,588; Aug. 30; v. 289; p. 1004.
Pumps and parts thereof. Geo. D. Roper Corporation. No. 146,496; Aug. 30; v. 289; p. 1000.
Putty. Liberty Paint Co. No. 148,542; Aug. 30; v. 289; p. 1008.
Putties, Bituminous. Standard Asphalt & Refining Company. No. 131,988; Aug. 30; v. 289; p. 987.
Puzzles. W. L. Ferris. No. 137,169; Aug. 30; v. 289; p. 989.
Remedy for aching limbs, summer complaint, &c. S. P. Hite Company. No. 147,290; Aug. 30; v. 289; p. 1003.
Remedy for piles. R. N. Jones. No. 137,261; Aug. 30; v. 289; p. 989.
Remedy for the scalp and hair, &c. P. R. Jones. No. 128,604; Aug. 30; v. 289; p. 986.
Remedy, Headache and neuralgia. H. M. Griffin. No. 140,494; Aug. 30; v. 289; p. 991.
Ribbon in the piece. Weber & Lefton. No. 145,484; Aug. 30; v. 289; p. 997.
Rubber belting and hose. New Jersey Car Spring & Rubber Co. No. 136,951; Aug. 30; v. 289; p. 989.
Rubber patches. Eagle Tire Patch Co. No. 138,161; Aug. 30; v. 289; p. 990.
Rubber tires and tubes. Du Bois Rubber & Tube Company. Nos. 148,979–80; Aug. 30; v. 289; p. 1009.
Sedative for relieving spasms and colic. Chemische Fabrik vormals Sandoz. Nos. 145,253–4; Aug. 30; v. 289; p. 997.
Shampoo and tonic for the hair. F. Wechsler. No. 141,737; Aug. 30; v. 289; p. 993.
Silk piece goods. H. R. Mallinson & Co. No. 146,836; Aug. 30; v. 289; p. 1001.
Silver-plated hollow ware and tableware. Middletown Silver Company. No. 145,956; Aug. 30; v. 289; p. 999.
Sink-flushers. W. G. Donald. No. 147,098; Aug. 30; v. 289; p. 1001.
Skates, Ice and roller. Winchester Repeating Arms Co. No. 148,253; Aug. 30; v. 289; p. 1007.
Skylights. A. Kuhnla, Inc. No. 148,495; Aug. 30; v. 289; p. 1008.
Spaghetti, macaroni, &c. Gandolfo-Ghio Mfg. Co. No. 137,377; Aug. 30; v. 289; p. 989.
Stock-certificate and bond blanks, stock-certificate books, record-books, &c., Engraved, lightographed or printed. A. R. Maul. No. 144,530; Aug. 30; v. 289; p. 995.
Stoves and ranges. John Dunn Son & Co. No. 140,875; Aug. 30; v. 289; p. 992.
Stoves, Coal and wood. Estate Stove Company. No. 144,314; Aug. 30; v. 289; p. 995.
Stoves, Gas and coal. Wincroft Stove Works. No. 147,223; Aug. 30; v. 289; p. 1002.
Tablets for treatment of headaches, neuralgia, colds, &c. T. A. Buxton. No. 145,764; Aug. 30; v. 289; p. 998.
Tablets, Pepsin. Orium Company. No. 131,348; Aug. 30; v. 289; p. 987.
Targets and traps. Western Cartridge Company. Nos. 149,207–8; Aug. 30; v. 289; pp. 1009–10.
Taxidermists, Composition of matter for the use of. J. A. Riner. No. 146,035; Aug. 30; v. 289; p. 999.
Tea and coffee. Chase & Sanborn. No. 148,373; Aug. 30; v. 289; p. 1008.
Tents and tent-sheds. Des Moines Tent & Awning Company. No. 145,999; Aug. 30; v. 289; p. 999.

Tires and inner tubes. Goodyear Rubber Company. No. 134,562; Aug. 30; v. 289; p. 989.
Tongues, sausages, souse, luncheon-meat, &c. John Morrell & Company. No. 148,157; Aug. 30; v. 289; p. 1007.
Tonic for blood disorders, liver complaints, &c. Britt Manufacturing Company. No. 146,409; Aug. 30; v. 289; p. 999.
Tonic for the bowels. R. Berry Co. No. 147,656; Aug. 30; v. 289; p. 1004.
Tonic, Nerve and body. F. M. Welch. No. 145,807; Aug. 30; v. 289; p. 998.
Tooth paste and powder, mouth-wash, gas, and extracting fluids. H. N. Shor. No. 143,788; Aug. 30; v. 289; p. 994.
Toy vehicles. A. Mecky Company. No. 144,630; Aug. 30; v. 289; p. 995.
Toy wooden horses mounted on wheels. Toytown Manufacturing Company. No. 140,621; Aug. 30; v. 289; p 991.
Toys. Irokese Trading Corporation. Nos. 139,975–7; Aug. 30; v. 289; p. 991.
Traffic-signals for vehicles. V. Oliver, Inc. No. 144,871; Aug. 30; v. 289; p 996.
Vanilla extract for food-flavoring. K. Reinhart. No. 130,116; Aug. 30; v 289; p. 987.
Vanilla extract, Imitation-. Horine & Bowey Company. No. 140,326; Aug 30; v. 289; p. 991.
Vaporizing chemicals to be used in treatment of pulmonary diseases. Charles Alfred Waldeck Company. No. 138,152; Aug. 30; v. 289; p 990.
Varnish. Empire Varnish Company. No. 137,769; Aug. 30; v. 289; p. 990.
Varnish. McDougall-Butler Co. No. 149,410; Aug. 30; v. 289; p. 1010.
Varnish. McDougall-Butler Co. No. 149,411; Aug. 30; v. 289; p. 1010.
Varnishes. S. V. De Foreest. No. 147,712; Aug. 30; v. 289; p. 1005.
Varnishes. Egan and Hausman Company. No. 148,263; Aug. 30; v. 289; p. 1007.
Vehicle-wheels, Combination lifter and stand for. L. C. Beadle. No. 147,549; Aug. 30; v. 289; p. 1004.
Vehicles, Traffic-signals for motor-. J. D. Coward. No. 147,155; Aug. 30; v. 289; p. 1002.
Veiling by the piece. Edw. Malley Co. No. 148,021; Aug. 30; v. 289; p. 1006.
Warming-closets, steam-tables, &c. Morandi-Proctor Company. No. 144,733; Aug. 30; v. 289; p. 995.
Watches, watch cases, and movements. S. Gutter. No. 139,529; Aug. 30; v. 289; p. 990.
Water, non-alcoholic beverages, and syrups for making same, Distilled. H-2-O Still Company. No. 141,107; Aug. 30; v. 289; p. 992.
Whist score-card. M. Moir. No. 146,449; Aug. 30; v. 289; p. 1000.
Wood-polish. Puritan Drug Mfg. Co. No. 146,653; Aug. 30; v. 289; p. 1000.
Woolen goods in the piece. J. A. Doyle. No. 150,063; Aug. 30; v. 289; p. 1010.
Yarns. Smolin-Hartman & Co. No. 147,946; Aug. 30; v. 289; p. 1006.

CLASSIFICATION OF PATENTS

ISSUED AUGUST 30, 1921.

NOTE.—First number—class, second number—subclass, third number—patent number.

1— 41: 1,389,205
2— 98: 1,388,867
142: 1,389,131
144: 1,389,067
149: 1,388,959
5— 12: 1,389,480
29: 1,389,168
72: 1,389,073
6— 11: 1,389,294
8— 19: 1,389,444
20: 1,389,274
1,389,275
9— 4: 1,389,104
22: 1,389,338
10— 72: 1,389,308
12— 1: 1,388,844
2: 1,388,852
139: 1,389,451
142: 1,389,455
15— 2: 1,389,201
8: 1,389,082
40: 1,389,302
59: 1,389,129
1,389,509
16— 119: 1,389,336
17— 11: 1,388,898
1,388,899
18— 2: 1,389,219
8: 1,389,517
11: 1,388,902
19: 1,389,442
42: 1,389,283
55: 1,389,143
59: 1,389,221
19— 27: 1,389,392
20— 4: 1,389,557
16: 1,389,423
35: 1,389,211
51: 1,389,136
55: 1,388,881
56.4: 1,389,057
22— 158: 1,389,315
23— 13: 1,389,546
21: 1,388,905
24: 1,388,841
1,389,187
1,389,250
24— 76: 1,389,226
81: 1,389,304
201: 1,389,173
213: 1,389,196

Changes in Classification.

(ORDER No. 2,691.)

DEPARTMENT OF THE INTERIOR,
UNITED STATES PATENT OFFICE,
Washington, September 6, 1921.

The following change in the classification of inventions is hereby directed, to take effect immediately:

In class 150, Cloth, Leather, and Rubber Receptacles, (Division XL,) establish the following subclass and definition:

Bags—
1.5. Golf-bag type.

1.5. BAGS, GOLF-BAG TYPE. Bags for golf-clubs, bats, and similar articles.

Search Class—
46.—GAMES AND TOYS, subclass 4, Balls and bats, for golf-clubs and other accessories for playing golf.

The patents contained in this subclass have been taken for the most part from class 224, Package and Article Carriers, subclass 45, Hand.

THOMAS E. ROBERTSON,
Commissioner.

Changes in Classification.

(ORDER No. 2,692.)

DEPARTMENT OF THE INTERIOR,
UNITED STATES PATENT OFFICE,
Washington, September 6, 1921.

The following changes in the classification of inventions are hereby directed, to take effect immediately:

In class 218, Button, Eyelet, and Rivet Setting, (Division XI,) establish the following subclasses and definitions:

Machines—
Eyeleting—
14.1. Blind or invisible,
Magazine—
15.2. Duplex,
Lacing-hook—
Magazine—
17.11. Washer-strip type,
17.12. Duplex.
29. Methods.

14.1. MACHINES, EYELETING, BLIND OR INVISIBLE. Machines for setting blind or invisible eyelets.

15.2. MACHINES, EYELETING, MAGAZINE, DUPLEX. Eyeleting-machines of the magazine type which simultaneously set eyelets on opposite sides of an intermediate anvil-plate.

17.11. MACHINES, LACING-HOOK, MAGAZINE, WASHER-STRIP TYPE. Lacing-hook-setting machines of the magazine type which are provided with means for forming a washer from a strip through which the lacing-stud is set.

17.12. MACHINES, LACING-HOOK, MAGAZINE, DUPLEX. Lacing-hook-setting machines of the magazine type which simultaneously set lacing-studs on opposite sides of an intermediate anvil-plate.

29. METHODS. Various processes used in attaching fasteners of the type adapted to be used in the machines found in this class.

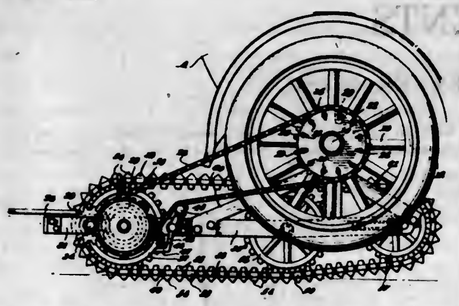
The patents contained in these subclasses have been taken for the most part from class 218, Button, Eyelet, and Rivet Setting, subclasses 14, Machines, Eyeleting; 15, Machines, Eyeleting, Magazine, and 17, Machines, Lacing-hook, Magazine.

In class 218, Button, Eyelet, and Rivet Setting, (Division XI,) subclass 15, Machines, Eyeleting, Magazine, add to the definition before the existing search note the following:

Search this class, subclass 14.1.

THOMAS E. ROBERTSON,
Commissioner.

TRADE-MARK SECTION OF THE OFFICIAL GAZETTE.



In response to the public demand a section of the Official Gazette containing all matter relating to Trade-Marks may be procured separately beginning with volume 290, September 6, 1921.

The Trade-Mark section will include: Trade-Marks published under the act of 1905; Trade-Marks registered under the act of 1905 and under the act of 1920; Labels and Prints; the indexes, and decisions from time to time in Trade-Mark cases.

The cost will be five cents each number, or $2.50 for annual subscriptions, to which must be added $2.00 to cover postage to subscribers in foreign countries.

4703

1,389,576. TRACTOR ATTACHMENT FOR AUTOMOBILES. JOHN D. CALDWELL, Forsyth, Mont. Filed June 25, 1919. Serial No. 306,536. 10 Claims. (Cl. 180—9.1.)

1. In a tractor attachment for automobiles, the combination with the rear drive wheels of an automobile, of a supporting structure, means on said supporting structure for adjustably supporting said rear wheels in an elevated position, a pair of endless tracks, means connecting said endless tracks to said wheels for driving the tracks from the wheels, and speed change gears in said driving connecting means.

1,389,577. CHEESE AND PROCESS FOR STERILIZING THE SAME. LINN EUGENE CARPENTER, East Orange, N. J., and ELMER ELLSWORTH ELDREDGE, New Berlin, N. Y., assignors to Phenix Cheese Company, New York, N. Y., a Corporation of New York. Filed June 21, 1915, Serial No. 35,477. Renewed Mar. 14, 1918. Serial No. 222,514. 9 Claims. (Cl. 99—1.)

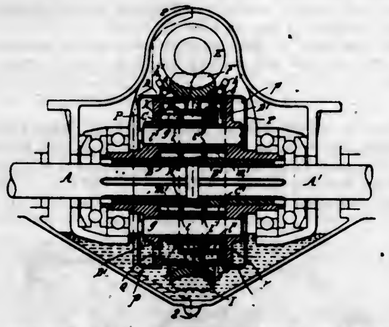
1. The method herein described, of treating cheese, which consists in grinding the cheese, adding to it a small proportion of an alkaline citrate, heating the mass to a temperature high enough to destroy undesirable bacteria contained in the cheese but not sufficiently high to disintegrate the cheese, and maintaining the temperature until the cheese is sterilized.

4. The cheese mass herein described, containing sterilized cheese and sodium citrate.

6. As an article of manufacture, a cheese of the Camembert genus, sterilized sufficiently to enable it to keep indefinitely under ordinary climatic temperatures, said cheese having a homogeneous texture.

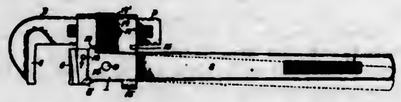
8. The method herein described of treating a cheese mass containing a preponderance of cheese of the Camembert type, which consists in heating the cheese mass to a temperature of about 170 degrees Fahrenheit and thus melting it, stirring the cheese mass for about thirty minutes while maintaining it at said temperature, and pouring the cheese mass into containers.

1,389,578. AUGER. ROBERT W. CHARLTON, Pineville, La., assignor of one-half to Harry Mairus, Rapides parish, La. Filed Oct. 18, 1920. Serial No. 417,544. 2 Claims. (Cl. 145—126.)



2. An auger comprising a shank provided with a spiral conveyer screw winding thereabout and terminating at one end of said shank at one side thereof, said shank and conveyer screw having a socket formed in their coterminus ends which extends radially with respect thereto, and a cutterhead having a rib fitting snugly in said socket and coöperating with the walls thereof to prevent movement of said cutter-head in any direction transverse to the axis of said shank, said cutter-head having a portion forming a continuation, and the cutting lip, of said conveyer screw and a screw point in axial alinement with said shank.

1,389,579. SHADE-ROLLER. ISHMAEL G. CUTRIGHT and JOHN A. SHARPS, Buckhannon, W. Va., assignors to The Cutright Sharps Company, Inc., Buckhannon, W. Va. Filed Sept. 22, 1919. Serial No. 325,397. 8 Claims. (Cl. 156—29.)

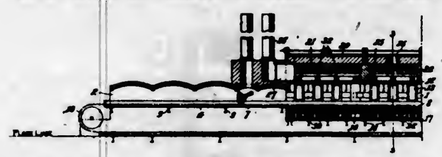


7. A metal roller having a slot in a side thereof and having the edge portions defining the walls of the slot recurved and an end piece provided with an extension to enter the roller and cutaway to clear the recurved edge portions of the roller and engage therewith.

1,389,580. DIFFERENTIAL GEAR. FRANCIS W. DAVIS, Buffalo, N. Y. Filed Jan. 25, 1918. Serial No. 213,629. 14 Claims. (Cl. 74—99.)

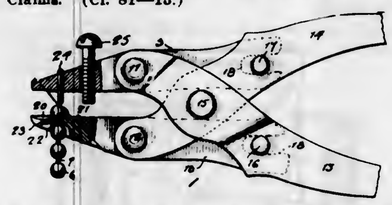
1. The combination with driven members, and differential gear wheels connecting said members for producing differential motion thereof, of parts coöperating with said gear wheels to form a plurality of complete gear pumps actuated by the differential motion of said members to propel a liquid, whereby the resistance to said differential motion increases with an increase in said differential motion, all of said pumps operating to thus resist said differential motion in both directions of rotation of said driven members.

1,389,581. WRENCH. CHARLES A. DIBB, Chicago, Ill., assignor to John V. Larson, Chicago, Ill. Filed Mar. 27, 1919, Serial No. 285,600. Renewed Feb. 8, 1921. Serial No. 443,491. 2 Claims. (Cl. 81—105.)



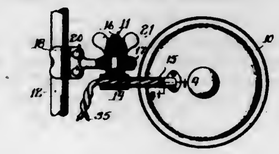
2. A plate metal housing for adjustable tools comprising, an initially flat metal plate or blank formed with a central elongated rectangular aperture, the lower edge of which is formed with two recesses which form abutment cavities for a spring in the finished housing, with a pair of journal orifices, and with a pair of rectangular extensions at two corners, said plate or blank being bent into a rectangular shell or housing with the various pairs of orifices and recesses in transverse alinement and with the pair of corner extensions in transverse abutting association to constitute short coacting stop lugs for an operating handle.

1,389,582. SAFETY-HOOK. GEORGE T. FLEMING, La Grande, Oreg. Filed Nov. 8, 1920. Serial No. 422,439. 9 Claims. (Cl. 24—241.)



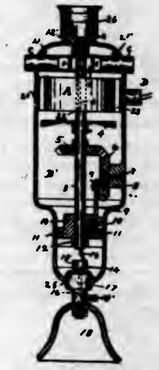
1. A fastener comprising a guard, a hook pivoted thereto and movable across the guard, said guard and hook being constantly disposed relatively in planes at right angles to each other.

1,389,583. DECORATING OR ANNEALING OVEN. CHAUNCEY E. FRAZIER, Washington, Pa. Filed Mar. 26, 1921. Serial No. 455,719. 6 Claims. (Cl. 25—144.)



1. In a muffle oven, a furnace comprising a primary combustion chamber and secondary chambers located at opposite ends of said primary chamber, means separating said chambers, a muffle extending through said furnace beneath said chambers and comprising a floor, side-walls and a roof, vertical flues formed between the side-walls of said muffle and those of the furnace, and flues extending longitudinally beneath said floor and having communication with said vertical flues, said communicating flues constituting passages around the muffle for conducting products of combustion to said secondary chambers.

1,389,584. SPLICING-TOOL. GILBERT W. GOODRIDGE, Bridgeport, Conn., assignor to The Bead Chain Manufacturing Company, Bridgeport, Conn., a Corporation of Connecticut. Filed Apr. 12, 1919. Serial No. 289,665. 2 Claims. (Cl. 81—15.)

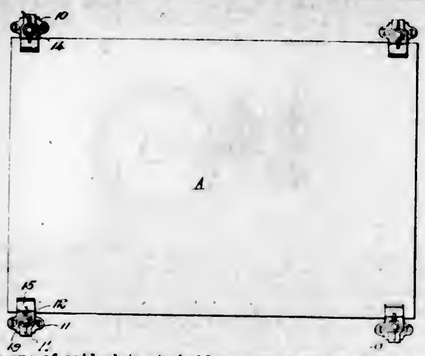


1. A splicing tool for bead chains, comprising a pair of jaws, one of which is slotted in the direction of its length to receive the shank of a dumb-bell chain link and recessed at the inner end of said slot to afford a seat for the chain ball engaging said link, said jaw having its ball supporting face grooved on opposite sides of the slot to accommodate the ball, and being channeled on its opposite face to accommodate an adjacent ball, the two grooves being spaced apart by a thin web of less thickness than the link between the adjacent balls, the entrance to said groove being flared to form a guide for the entering link, in combination with a spreader carried by the other jaw in register with said seat and adapted to operate on the ball seated in said recess in the first mentioned jaw.

1,389,585. EXTENSION-LAMP MOUNTING FOR VEHICLES. BERTRAM J. GRIGSBY, Chicago, Ill., assignor to Anderson Electric & Equipment Co., Chicago, Ill., a Corporation of Illinois. Filed Oct. 31, 1917. Serial No. 199,478. 2 Claims. (Cl. 240—7.)

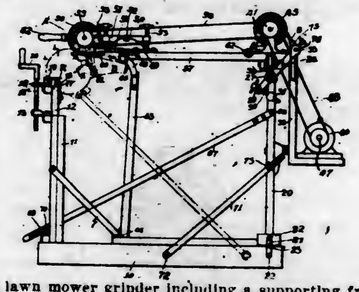
1. As a new article of manufacture, a combined spot and trouble lamp, comprising a lamp casing, a universal lamp-supporting bracket and a conductor cord take-up device; the bracket comprising a hollow arm adjustably connected to the lamp casing and a rigid arm having a swivel connection with the hollow arm at one end thereof and at the other end provided with means to attach the lamp to a wind shield frame; a lamp cord normally coiled within the take-up device and extending through the hollow arm into the lamp casing; said take-up device having attaching means at one side thereof, to independently attach it to a part of the vehicle, and terminals to electrically connect the inner ends of the lamp cord.

1,389,586. VIBRATOR. EDGAR O. HATTEN, Evanston, Wyo. Filed July 18, 1919. Serial No. 311,901. 3 Claims. (Cl. 128—49.)



1. A vibrator of the character described in combination with a casing, a motor mounted within said casing, means for operating said motor, a driving shaft secured to said motor, said driving shaft being journaled within said casing, a gear secured to said driving shaft for driving another gear, the other gear, said other gear being secured to the side of said casing, a pitman rod attached to said other gear and to a sliding sleeve, the sliding sleeve, said sliding sleeve mounted on said driving shaft, the valves within said sliding sleeve for preventing the return of air through the holes within said sliding sleeve when said sliding sleeve is moved upward by said pitman rod, a spring on the lower end of said driving shaft for connecting said driving shaft with a driven shaft, the driven shaft and a cup secured to said driven shaft.

1,389,587. CLAMP. BERT E. HILBORN, Spokane, Wash. Filed Nov. 9, 1920. Serial No. 422,925. 4 Claims. (Cl. 40—125.)



1. A device of the character described comprising a base plate adapted to be permanently secured to a sup-

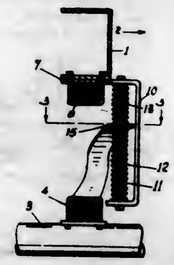
port, a clamp plate, means to force said plates together to clamp a portion of an article therebetween, and means

on one of said plates to hold the article clamped between the plates in flat contact with the surface of said support.

1,389,588. GRINDER. ANDREW KLAY, Lima, Ohio. Filed Oct. 17, 1919. Serial No. 331,374. 7 Claims. (Cl. 51—36.)

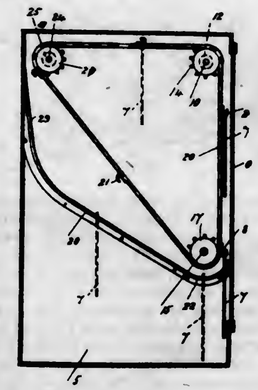
1. A lawn mower grinder including a supporting frame, means for adjustably securing a lawn mower relative to the supporting frame, a rocking frame, a carriage supported for movement upon the rocking frame, grinding means supported by the carriage, and means supported by the carriage for securing the grinding means in operable relation to the reel blades of the lawn mower.

1,389,589. TOY. SIGMUND F. KOHN, New York, N. Y. Filed Jan. 11, 1919. Serial No. 270,619. 6 Claims. (Cl. 46—46.)



1. In a toy, the combination of a tube having outlets and formed as a ring at one end and whose other end is a radial extension of the ring portion, and a mouth piece and inlet in the extension.

1,389,590. TIRE-CHAIN-CONNECTING DEVICE. WILLIAM LUMATAINEN, Albion, Pa. Filed Apr. 26, 1921. Serial No. 464,491. 8 Claims. (Cl. 24—69.)



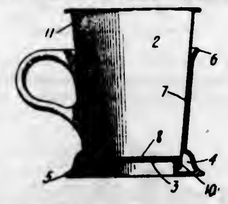
3. In a tire chain connecting device, the combination of a connector, a guard carried by the connector, a keeper pivotally mounted on the connector and a laterally projecting post for a link of the free end of the chain carried by the keeper and adapted to be moved between the connector and guard to a position beyond the pivotal center of the keeper when closed, means for limiting the closing movement of the keeper, and means for releasably locking the keeper in closed position.

1,389,591. SHOCK-ABSORBER. MICHAEL J. MAGIN and WILLIAM G. BIEK, Dowagiac, Mich. Filed Mar. 21, 1921. Serial No. 453,919. 4 Claims. (Cl. 267—28.)

1. In a structure of the class described, the combination with an axle and a spring supported body member, of a body carrying spring comprising a semi-elliptic spring member mounted on said axle, a hanger member on said body member having a vertical spring supporting rod thereon, a U-shaped spring member having one arm mounted on said spring member carried by the axle and the other slidably engaged with said rod on said hanger, and coiled springs arranged on said rod on each side of the spring member arm engaged therewith.

1,389,592. CARD-EXHIBITOR. MARION MATHER, Olean, N. Y. Filed Nov. 6, 1920. Serial No. 422,253. 1 Claim. (Cl. 40—78.)

In a card exhibitor, a casing, driving wheels journaled in the casing, front and rear guide wheels journaled in

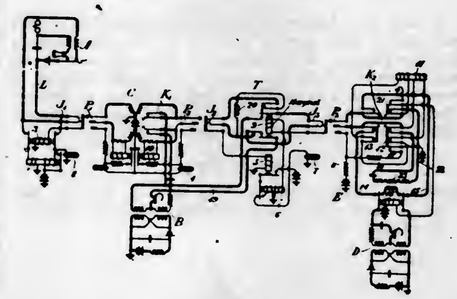


the casing above the level of the driving wheels, endless flexible connections passing over the said wheels, curved rest bars arranged under and substantially concentric with the said driving wheels, inclined guide bars extending upwardly from the rear ends of the rest bars to points beyond the rear guide wheels, display cards having lugs adapted to slide on the said guide bars and rest bars, and hooks carried by the said flexible connections and operating to engage with the lugs on the display cards when supported by the rest bars and to drop the cards as they pass over the rear guide wheels so that they fall onto the said guide bars and slide down them onto the rest bars.

1,389,593. AIR-CUSHION NOZZLE. GEORGE A. MILLAR, Ensley, Ala. Filed Mar. 5, 1920. Serial No. 363,483. 1 Claim. (Cl. 299—140.)

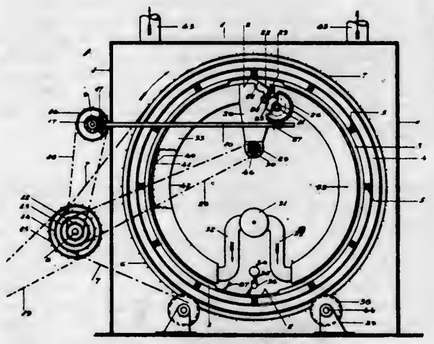
A nozzle having an outstanding annular flange slightly in rear of the tip thereof, and a cylindrical rim carried by said flange surrounding and projecting beyond said tip, said flange having air inlet opening substantially parallel with said rim.

1,389,594. PAPER-CUP HOLDER. HUGH MOORE, Leonia, N. J., assignor to Individual Drinking Cup Company, Inc., a Corporation of New York. Filed Sept. 15, 1917. Serial No. 191,572. 10 Claims. (Cl. 65—61.)



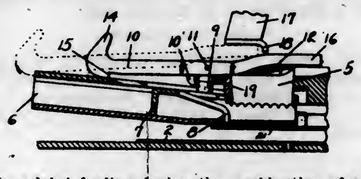
1. A holder for paper cups having a base and side walls, said base having an interiorly formed annular depression providing a raised support for the bottom of a paper cup, whereby the bottom of the cup will not be subject to distortion by the contact of a spoon or a like utensil therewith.

1,389,595. WARDROBE-TRUNK. ROBERT E. PHILLIPS, Portland, Oreg. Filed Dec. 29, 1920. Serial No. 433,880. 6 Claims. (Cl. 190—13.)



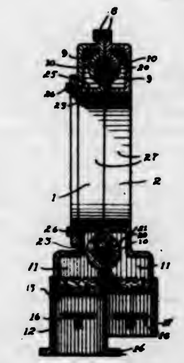
1. In a wardrobe trunk having a clothes compartment, a follower board of substantially the full width of the clothes compartment of the trunk, whose inner face is padded to serve as an ironing board, the covering for the said face being projected along the opposite sides and bottom whereby to produce valance portions adapted to lap back when the board is inserted against the clothes, to provide a dust-proof fit of the said board.

1,389,596. DESK OPERATOR'S CIRCUITS. WILLIAM A. RHODES, New York, N. Y., assignor to American Telephone and Telegraph Company, a Corporation of New York. Filed Dec. 5, 1918. Serial No. 265,436. 5 Claims. (Cl. 179—50.)



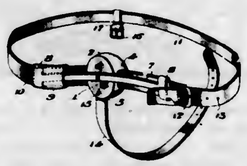
1. In a telephone system, a subscriber's line, an A operator's position, a trunk leading from the A operator's position to a special operator's position, a link circuit at the A operator's position for switching said line into connection with other lines or with said trunk, means whereby the special operator's set may be associated with said trunk over a low impedance path in response to a connection established therewith ,and means whereby when said line is connected to said trunk the special operator may establish a high impedance connection between her set and A operator's set over said trunk and independent of said link circuit.

1,389,597. DESICCATING APPARATUS. ARTHUR D. ROBINSON, St. Louis, Mo. Filed June 26, 1919. Serial No. 306,983. 6 Claims. (Cl. 127—9.)



1. A desiccating apparatus for eggs and the like comprising a casing, an open ended drum rotatably mounted in said casing and having an interior lining formed of pieces of slate joined so as to present an imperforate smooth interior surface, means whereby the material to be dried is supplied in a batter condition to said imperforated surface, a scraper for removing the material when dried from said imperforate surface, pipes for supplying hot air for drying said material, and means whereby said drum is caused to rotate.

1,389,598. LABEL-FEEDING MEANS FOR AUTOMATIC LABEL AND PATCH STITCHING MACHINES. MORRIS G. ROSENTHAL, Cincinnati, Ohio. Filed Sept. 15, 1920. Serial No. 410,447. 5 Claims. (Cl. 112—104.)

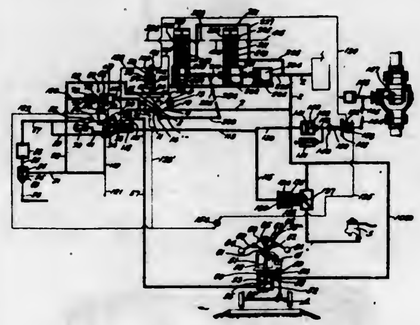


5. In a label feeding device, the combination of a work shoe and a label holding shoe, of a label feed slide, a follower adapted to reciprocate in said slide, a latch on said follower to hold the same in withdrawn position to receive a label, a spring to move said follower to feed the label, and means for releasing the said latch automatically when the work shoe is lowered, as specified.

1,389,599. VULCANIZER. ARTHUR J. SAVAGE, San Diego, Calif. Filed Sept. 10, 1919. Serial No. 322,904. 14 Claims. (Cl. 18—38.)

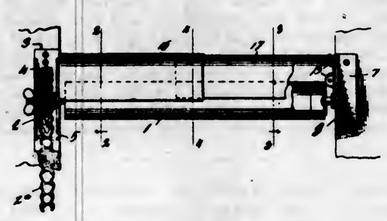
1. A tire vulcanizer including complemental sections, one of which is bodily movable toward and away from the other section, said sections having tire-receiving grooves in the meeting faces thereof, and each of said sections being hollow to provide a steam chamber and being provided with a water chamber at the bottom thereof, means for heating the water chambers, and means for holding the complemental sections together.

1,389,600. TRUSS. HENRY F. SCHOENFIELD, Roseburg, Oreg. Filed Nov. 17, 1920. Serial No. 424,623. 2 Claims. (Cl. 128—111.)



1. The combination in a truss, of a pad, a plate spring secured to the pad and having its ends extended at opposite sides of the pad, an elastic belt loosely secured to the pad and the ends of the spring so the belt can slide relative to the pad and spring, said belt at its free ends being provided with means for adjustably connecting said ends, and a holding strap secured at one end to the pad and the other end to the belt.

1,389,601. DISK WHEEL. FRED C. SCHOENTHAL, Buffalo, N. Y. Filed Mar. 23, 1920. Serial No. 368,094. 6 Claims. (Cl. 301—63.)

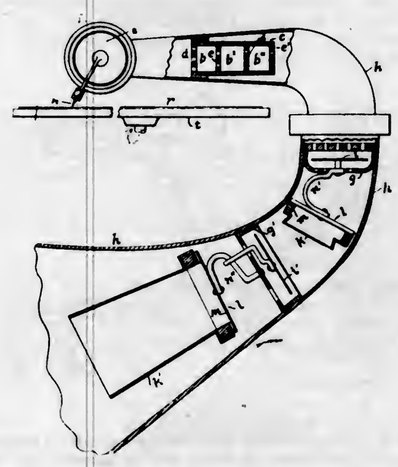


6. In a disk wheel, the combination of a hub, a hub flange, a shoulder on said hub, a main disk and an auxiliary disk bearing against said shoulder and said flange adjacent its periphery.

1,389,602. AUTOMATIC TRAIN-CONTROL SYSTEM. DANIEL HERBERT SCHWEYER, Easton, Pa. Filed Sept. 6, 1916. Serial No. 118,731. 6 Claims. (Cl. 246—182.)

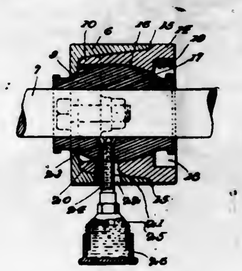
1. In a train controlling apparatus, the combination of a brake pipe, pressure fluid supply means, a mechanism for establishing communication between the brake pipe and atmosphere, track controlled means controlling said mechanism, speed controlled means controlling said mechanism in connection with the second mentioned means to render said mechanism operative above a predetermined speed, and means whereby the brake pipe is recharged from the first mentioned means through said mechanism, said mechanism including a pressure fluid operated equalizing device for shutting off communication between the brake pipe and atmosphere when the pressure in the brake pipe falls below a predetermined amount, and said mechanism including means controlled thereby for controlling the flow of pressure fluid to and from said device in opposition to brake pipe pressure.

1,389,603. SHADE-ROLLER FIXTURE. JOHN A. SHARPS and ISHMAEL G. CUTRIGHT, Buckhannon, W. Va., assignors to The Cutright Sharps Company, Inc., Buckhannon, W. Va. Filed Sept. 4, 1920. Serial No. 408,128. 2 Claims. (Cl. 156—31.)



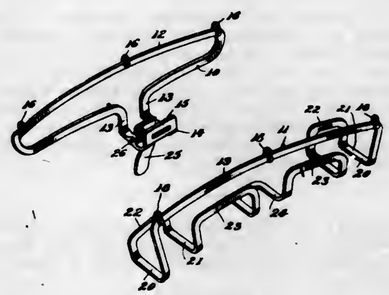
2. A dust shield for shade rollers provided at each of its ends with a reinforcing bar, the latter having inner lateral extensions secured to the shield and having an end portion extending to provide a supporting shank.

1,389,604. COLLAR-HOLDER. CHARLES SILVERMAN, Providence, R. I. Filed Apr. 20, 1921. Serial No. 462,924. 3 Claims. (Cl. 24—87.)



1. In a collar holder, an oblong casing provided with slots in its ends, rods yieldingly mounted in the casing, and prongs on the rods registrable in the slots.

1,389,605. PHONOGRAPH SOUND-REGULATOR. HARRY C. STAGEMAN, Council Bluffs, Iowa. Filed Mar. 15, 1920. Serial No. 365,881. 4 Claims. (Cl. 181—27.)

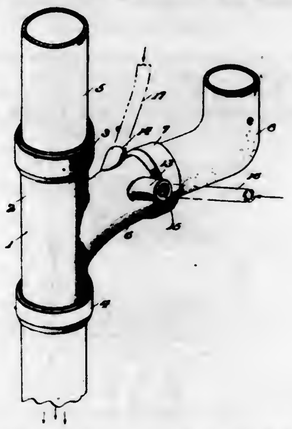


2. The combination with a phonograph horn of a sound modifier comprising a perforated head, a sound diaphragm arranged at one side of the perforated head, an auxiliary horn located at the opposite side of the perforated head and a spring connection between the head and the diaphragm and the auxiliary horn.

1,389,606. BEARING FOR SPREADER-SHAFTS. HENRY SYNCK, Coldwater, Ohio, assignor, by mesne assignments, to The New Idea Spreader Company, Coldwater, Ohio, a Corporation of Ohio. Filed Mar. 9, 1920. Serial No. 364,464. 4 Claims. (Cl. 64—54.)

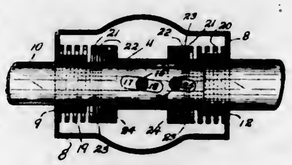
4. The combination of a supporting arm, a bearing bracket secured rigidly against one side of said arm and having a central tubular member projecting laterally away from the supporting arm, said tubular member having its bore tapered toward the end distant from the supporting arm and the supporting arm being provided with an opening registering with said bore, and a bearing sleeve extending through said bore and said opening and having its intermediate portion enlarged and forming a ball and socket joint with the bore of said tubular member.

1,389,607. ANTISKID DEVICE. IDA J. THOMPSON, Lincoln, Nebr. Filed Oct. 23, 1919. Serial No. 332,704. 5 Claims. (Cl. 152—14.)



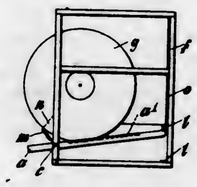
1. In an anti-skid device, the combination, with a vehicle wheel including a felly and tire, of a pair of felly engaging members, tractive elements carried by said felly engaging members, each of said members adapted to engage both sides of a wheel felly, and means for detachably clamping said members together to support the tractive elements in engagement with the tire.

1,389,608. PIPE-FITTING. CHARLES J. TRUEMAN, Baltimore, Md. Filed Nov. 22, 1919. Serial No. 339,884. 1 Claim. (Cl. 285—203.)



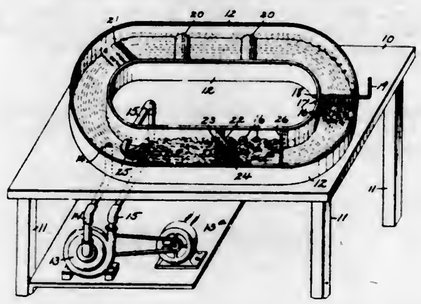
A pipe fitting comprising a T having a relatively long laterally extending arm, the outer portion of which is straight and terminates in a laterally opening bell to receive one end of a lead pipe bend, the arm being pro-

vided at a point inwardly of the said bell end and below the plane of the upper side of the arm with means for



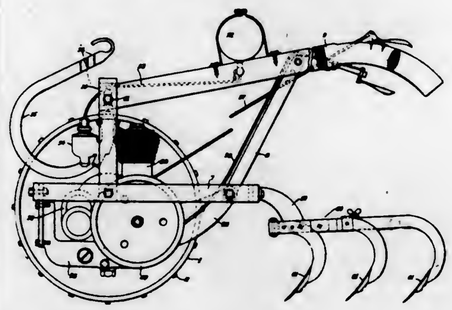
the connection of a branch pipe with the arm to lead at an angle therefrom.

1,389,609. AEROPLANE-PROPELLER. GEORGE F. WEITHER, Dayton, Ohio. Filed Dec. 26, 1919. Serial No. 347,331. 6 Claims. (Cl. 170—162.)



1. A propeller for aeroplanes comprising a central housing, two telescoping tubes projecting outwardly, in opposite directions, from said housing, a blade carried by each tube, each tube being provided with a pair of oppositely inclined slots, and a pin secured within the housing, that projects loosely through each pair of slots, for the purpose of turning said tubes to vary the pitch of the blades which they carry, when moved outwardly by centrifugal force.

1,389,610. PHONOGRAPH-RECORD CABINET. GEOFFREY WATKIN WILLIAMS, Burgess Hill, England. Filed Feb. 8, 1921. Serial No. 443,425. 1 Claim. (Cl. 211—16.)

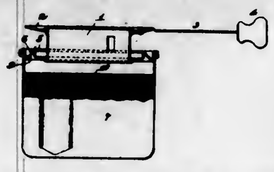


In a phonograph record cabinet the combination of an open sided case, a vertical partition forming within said case a compartment, a pivoted lever constituting the base of said compartment, said lever being connected to the front side of said case by a pivot pin, said pivoted connection being near the forward end of the lever so that the axis of a record supported thereon is always situated behind the pivot of the lever so as to cause the record to automatically roll back into the interior of the cabinet except when downward pressure is applied to the forward end of the lever, the upper face of said lever having formed therein a longitudinal groove for the reception of the edge of the record, a facing of soft material on the inside face of the rear side of the casing, limiting stops secured to said rear side of the casing adapted to be engaged by the rear end of said pivoted lever in its two extreme positions so as to limit the extent of the pivotal movement of the same, and an inclined stop disposed across the open side of the compartment to prevent the records from rolling completely out when their respective pivoted levers are depressed.

1,389,611. GAME APPARATUS. WALTER J. WOOD, Newark, and WILLLIAM G. SAND, Irvington, N. J. Filed May 1, 1920. Serial No. 378,082. 8 Claims. (Cl. 46—56.)

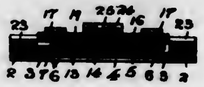
2. A game apparatus comprising an endless trough, an inlet pipe, an outlet pipe, both pipes opening into said trough and disposed so as to cause water in the trough to travel in one direction therein, floats, a stop to define the finish of travel of said floats, and a gate for releasing said floats simultaneously at the start.

1,389,612. POWER AGRICULTURAL IMPLEMENT. GEORGE C. WOODDELL and HARRY C. REESER, Dayton, Ohio. Filed Mar. 22, 1920. Serial No. 367,596. 3 Claims. (Cl. 180—19.)



1. In a garden tractor, the combination, with a master wheel, its shaft and planetary gearing mounted on the shaft and connected with the wheel, of a general frame and an engine bed supported on said shaft, an explosive engine carried by the bed and having its shaft geared to the shaft of the master wheel.

1,389,613. METHOD OF AND MACHINE FOR CUTTING HEEL-SEATS. OTIS R. ANGELL, Haverhill, Mass., assignor to Hamel Shoe Machinery Company, a Corporation of Massachusetts. Filed Jan. 7, 1918. Serial No. 210,606. 11 Claims. (Cl. 12—17.)

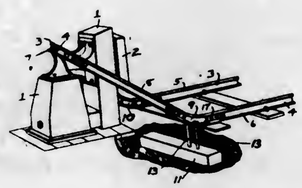


1. The process of preparing heel seats on shoes for the reception of heels consisting in inserting a guard-member between the outer and inner soles and thereafter removing the surplus material at the margin of the outer-sole by a single incision.

1,389,614. BURNER FOR VAPOR-STOVES. HENRY PRICE BALL, Brooklyn, N. Y., assignor to S. Sternau & Company, Inc., Brooklyn, N. Y., a Corporation of New York. Filed Feb. 20, 1919. Serial No. 278,161. 10 Claims. (Cl. 158—97.)

3. A reversible burner comprising a tube, an outwardly extending peripheral flange at one extremity thereof and adapted to support the tube when the latter is in one position, and outwardly projecting fingers carried by the tube in proximity to the opposite end thereof, said fingers being adapted to support the tube when the latter is in the inverted position.

1,389,615. PHOTOGRAPHIC-PRINTING FRAME. ANTHONY A. BARBER, Newark, N. J., assignor to B. & B. Photo Co., a Corporation of New Jersey. Filed Nov. 14, 1917. Serial No. 201,924. 3 Claims. (Cl. 95—77.)

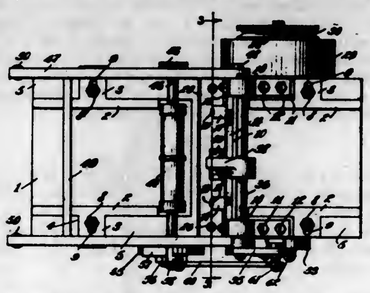


1. A photographic printing frame comprising a frame having an exposing opening, a glass mounted in said opening, and a mask, negative and card-registering means back of said glass adapted to receive and register masks of different sizes whereby the print or picture may be produced with a uniform margin, said registering means consisting of a pair of angularly disposed bars mounted in immovably fixed positions at the back of and adjacent one corner of said glass, combined with a closing cover, said cover being provided upon the back with a pad having cut-away parts in registration with the said angularly disposed registering bars.

1,389,616. TRUCK-FRAME FOR RAILWAY-CARS. HERSCHEL A. BENEDICT, East Orange, and EDWARD M. MOLLER, Jersey City, N. J. Original application filed Feb. 7, 1920, Serial No. 356,888. Divided and this application filed Apr. 9, 1921. Serial No. 460,140. 5 Claims. (Cl. 105—213.)

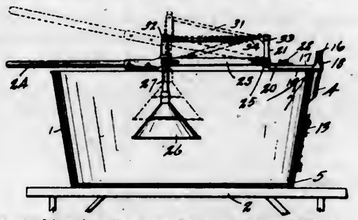
1. A truck-frame for railway cars, and the like, consisting of a pair of longitudinally extending side-members, carrier-elements connected with the respective end-portions of said side-members, links extending from said carrier-elements, a brake-beam provided with brake-shoes connected with each pair of oppositely located links, a bearing-plate carried by said brake-beam, an actuating member pivotally connected with said bearing-plate, and means connected with said actuating member for actuating the same.

1,389,617. RAILWAY ACCESSORY. HENRY E. BILLMAN, St. Louis, Mo., assignor to Industrial Track Construction Company, St. Louis, Mo., a Corporation of Missouri. Filed Jan. 17, 1921. Serial No. 437,674. 8 Claims. (Cl. 104—254.)



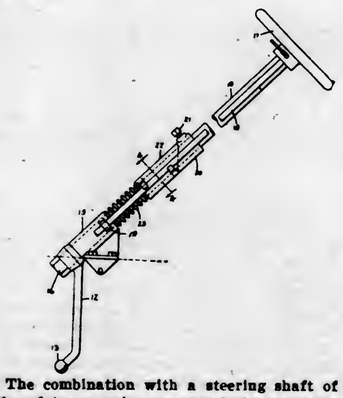
1. In apparatus of the class described, in combination, a bumping device comprising an anchored support; horizontal and inclined rail lengths associated therewith; and means for strengthening said lengths, said means comprising a member fitting the outer side of both lengths, a member similarly fitting the inner side of both lengths, means for securing said members together and to both lengths, and means for anchoring both members.

1,389,618. PERFORATING-MACHINE. GEORGE W. BINGHAM, Cleveland, Ohio, assignor to The International Moving Picture & Film Company, Nashville, Tenn., a Corporation of Tennessee. Filed Oct. 23, 1918. Serial No. 259,363. 3 Claims. (Cl. 164—89.)



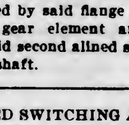
1. In a machine of the character set forth, the combination of a reciprocable punch, feeding means involving a rocker arm and situated in operative relation to the punch, an eccentric, operative connections between the eccentric and punch, a member pivoted to the eccentric, means for locking said member in various angular posi-

tions with respect to the eccentric, a crank pin carried by said member, and a connecting link journaled at one end



upon the crank pin and pivoted at the other to the aforesaid rocker arm.

1,389,619. LAUNDRY-WASHING MACHINE. GEORGE R. BOOMER, Spokane, Wash., assignor of one-half to Horatio M. Mobbs, Spokane, Wash. Filed Mar. 10, 1919. Serial No. 281,839. 1 Claim. (Cl. 259—113.)



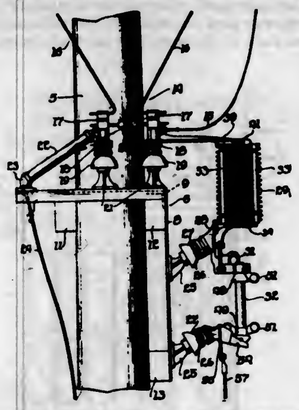
The combination in a washing machine with an attaching device including a stationary support and horizontally swiveled bracket sleeve thereon having an integral arm, of a post formed with an integral slidable arm and means for securing said arms in adjusted position, a slotted lever fulcrumed on the post and an oscillatable sleeve having trunnions journaled in said lever and a pounder retained in the sleeve, a hook at the upper end of the post and a hook on the sleeve adjacent its trunnions and a spring suspended between said hooks.

1,389,620. AUTOMOBILE STEERING CONTROL. DAVID A. BOSWELL, Indianapolis, Ind., assignor, by direct and mesne assignments, of one-half to Jackson H. Kerr and one-half to Harry P. Talbert, Indianapolis, Ind. Filed Mar. 13, 1920. Serial No. 365,463. 5 Claims. (Cl. 280—94.)

1. The combination with a steering shaft of an automobile, of two members mounted thereon with their adjacent faces correspondingly formed to interfit with each other so that one may move relative to the other, one of said members being secured rigidly to the shaft and the other non-rotary but longitudinally slidable thereof, and yielding means for forcing said members toward each other so that the steering shaft may be automatically maintained in a normal position.

1,389,621. NAIL-POLISHER. VIOLA C. BROD, Sandusky, Ohio. Filed Apr. 17, 1919. Serial No. 290,897. 5 Claims. (Cl. 132—73.)

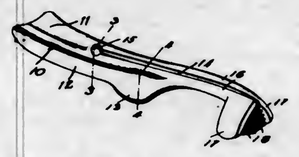
1. In a device of the character described, the combination of a receptacle provided with an opening, said receptacle having a nail polishing material secured to its inner walls adjacent such opening.



1,389,622. POWER-TRANSMISSION GEAR. LOUIS G. E. BUEHLER, Chicago, Ill. Filed Jan. 29, 1920. Serial No. 354,782. 4 Claims. (Cl. 74—34.)

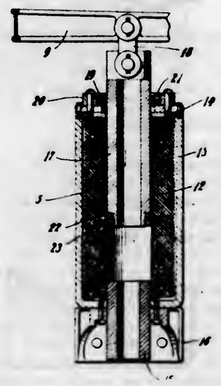
1. In a speed reducing gear, a casing, alined bearings in the casing, power transmission shafts in the bearings, a third shaft arranged at an angle to said first shafts, a bevel pinion on the third shaft, a bevel gear meshing with the pinion and fixed on the inner end of one of the alined shafts for rotating same, a flange fixed on the other of said alined shafts, a gear element rigid with the casing, a pinion concentric with and fixed to the bevel gear, and planetary gears carried by said flange and operably interposed between said gear element and said concentric pinion for rotating said second alined shaft at a less speed than the first alined shaft.

1,389,623. COMBINED SWITCHING AND PROTECTIVE UNIT FOR ELECTRICAL TRANSMISSION-LINES. RUSSELL T. CALLOWAY, Chicago, Ill., assignor to Electrical Engineers Equipment Company, Chicago, Ill., a Corporation of Illinois. Filed Mar. 29, 1920. Serial No. 369,533. 14 Claims. (Cl. 175—30.)



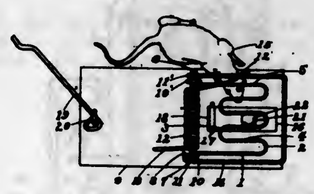
1. As an article of manufacture, a combined protective and switching unit of self-supporting character comprising a supporting base of angular formation, and having an upper horizontal limb and a depending vertical limb,

a lightning arrester on the horisontal limb of said base, and a disconnect switch on the vertical limb of said base,



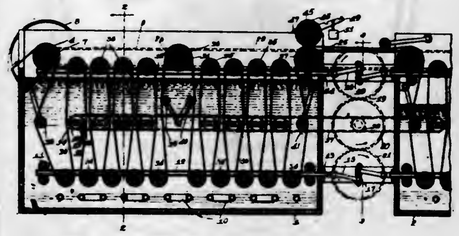
said disconnect switch having electrical connection with the lightning arrester.

1,389,624. TOOTHBRUSH. CHARLES EDWARD CARROLL, Newport, Ark. Filed June 23, 1920. Serial No. 390,994. 3 Claims. (Cl. 15—39.)



1. A tooth brush comprising a handle of channel shaped throughout its length and divided longitudinally to form spaced shank portions having outwardly and downwardly directed heads, and bristles carried by said heads and extending downwardly and inwardly toward each other.

1,389,625. ELECTRICAL SOLENOID. ALEXANDER CHURCHWARD, New York, N. Y., assignor to Wilson Welder & Metals Company, Inc., a Corporation of New York. Filed June 24, 1919. Serial No. 306,373. 7 Claims. (Cl. 175—341.)

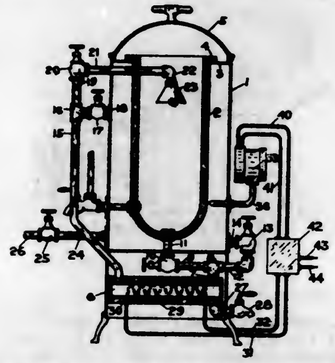


1. A solenoid comprising a coil, a core working therein, and a guide of self-lubricating anti-friction material secured in co-axial relation with the coil and fitting the core.

1,389,626. ANIMAL-TRAP. LEVI CRUTE, St. Joseph, Mo. Filed Dec. 8, 1919. Serial No. 343,157. 2 Claims. (Cl. 43—81.)

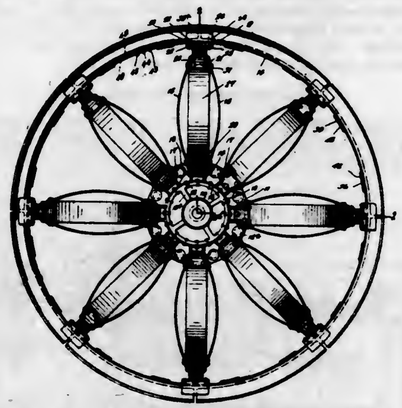
1. The combination with a spring actuated animal trap provided with bait holding means therefor and with a hinge member secured on each side of the central portion of the body of said trap; of a shield of grid formation said shield having other hinge members formed thereon and inserted in the hinge members of said trap respectively; a crank formed on the outer end of one of said hinge members of said shield said crank being adapted to be engaged by a movable portion of said trap for normally holding said shield in a practically vertical position while said trap is set; and an upright formed with said shield said upright being adapted to be engaged by another movable part of said trap after said spring is released thereby oscillating said shield from said vertical position to a position over said bait holding means.

1,389,627. TEXTILE-FABRIC-TREATING MACHINE. LOUIS CLARENBACH, Passaic, N. J. Filed Nov. 18, 1920. Serial No. 424,929. 6 Claims. (Cl. 8—19.)



1. A vat for treating textile fabrics in open width with liquid consisting of a compartment, a frame structure arranged in said compartment with fabric carrying rollers, means for operating said frame to cause the fabric to engage the liquid flatwise while in the substantially vertical position and means for feeding said fabric through said compartment.

1,389,628. BEVERAGE-URN. WARREN F. CLARK, Cleveland, Ohio, assignor, by mesne assignments, to Automatic Electric Heater Company, Warren, Pa., a Corporation of Delaware. Filed Dec. 24, 1919. Serial No. 347,239. 5 Claims. (Cl. 219—44.)

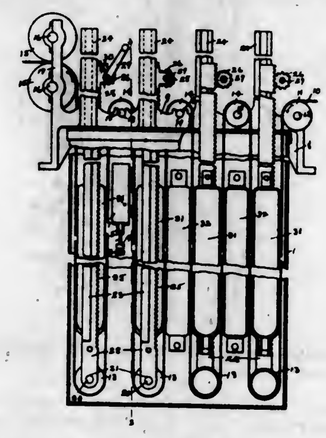


1. An urn construction comprising a liquid container, a beverage container associated with the container, a heating container, means for heating said heating con-

tainer, conduits connecting the heating container at two points and connecting with the liquid container at two

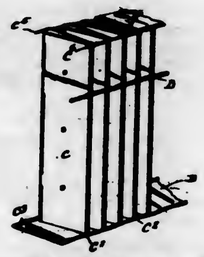
points whereby fluid may be circulated through the heating container and the liquid container.

1,389,629. VEHICLE-WHEEL. JOSEPH L. COHEN, New York, N. Y. Filed Feb. 20, 1920. Serial No. 360,058. 6 Claims. (Cl. 152—29.)



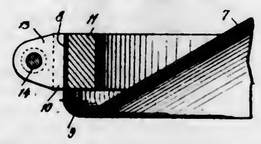
4. In a vehicle wheel, a hub, a resilient felly flat in cross section, resilient spoke members therebetween, and a tire carrying rim removably mounted on said felly, provided at its circumferential edges with tire retaining flanges, said flanges being provided with radially disposed cut-outs in spaced relation to each other, substantially in radial alinement with said resilient spoke members, and adapted to permit local deflection of said rim.

1,389,630. METHOD OF AND APPARATUS FOR SATURATING PAPER. CHARLES A. COONEY, Erie, Pa., assignor of one-half to Richard A. Cooney, Erie, Pa. Filed May 10, 1920. Serial No. 380,041. 11 Claims. (Cl. 91—46.)



2. The method of saturating paper which consists in rapidly passing the paper through a saturating material in confined ways and delivering said saturating material at a high temperature into absorbing relation to the paper while confining the space occupied by the saturating material after it is placed in absorbing relation to effect a rapid transfer of the material from the point of delivery into saturating relation to the paper.

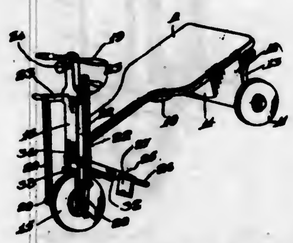
3. In a saturating apparatus, the combination of a tank; rollers at different levels for guiding paper into and out of the tank; devices for delivering saturating material to the tank; and means for reducing the space within the body of the tank and through which the paper passes.



10. In a saturating apparatus, the combination of a tank; a series of upper rollers; a series of lower rollers, said rollers forming a series of paths for paper passing over them; a float arranged between two of the paths; and an inlet valve controlled by the float.

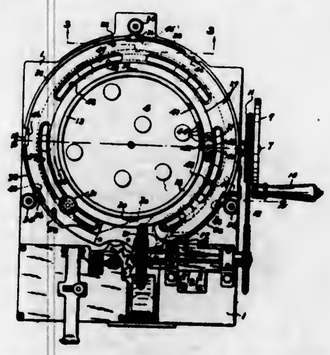
1,389,631. RADIATOR. EDWARD T. CURRAN, Detroit, Mich. Filed Dec. 23, 1918. Serial No. 267,900. 3 Claims. (Cl. 257—130.)

1. An autogenous welded radiator comprising an assemblage of flattened steel tubes, and knobs formed of separate material from that of the tubes welded on the interior flat surfaces of said tubes and bridging the space between opposite faces of the tubes to prevent collapsing, substantially as described.



1,389,632. ACOUSTIC DIAPHRAGM. WILLIAM H. DAVIS, Bronxville, and FREDRICK E. JOHS, Brooklyn, N. Y., assignors to Lektophone Corporation, a Corporation of Delaware. Filed May 13, 1918. Serial No. 234,104. 3 Claims. (Cl. 181—32.)

2. An acoustic diaphragm, comprising a central, vibratile cone, an upstanding supporting rim encircling said

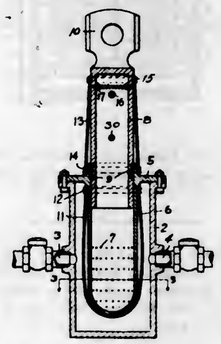


cone at the base thereof, and an annular trough connecting the lower portion of said rim and said cone base and providing a resilient mounting for the cone; and a support for said diaphragm comprising a pair of nested rings between which said rim is rigidly held.

1,389,633. SCOOTER-CAR. JOHN DITTRICK, Sr., Perth, Ontario, Canada. Filed Oct. 11, 1920. Serial No. 416,225. 3 Claims. (Cl. 208—33.)

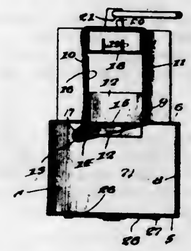
1. A scooter car comprising a seat, a rolling rear support for the seat, a steering post pivotally connected to the seat, a wheel on the steering post, a crank connected to the wheel, a connecting rod extending from the crank, a hand crank connected to the upper end of the connecting rod, and a foot rest extending from the steering post, and a brake adapted to operate on the wheel, the said brake comprising a pivotally mounted rod, and a foot lever on the rod.

1,389,634. COIN-COUNTING MACHINE. EDWARD P. DONNELLAN, Brooklyn, N. Y., assignor to Standard Coin Counter, Inc., Brooklyn, N. Y., a Corporation of New York. Filed June 12, 1920. Serial No. 388,408. 13 Claims. (Cl. 133—8.)



1. In a coin counting machine, the combination with a rotatable feed table of an annular coin guiding means vertically movable to accommodate the thickness of coin desired to be counted, stop means for limiting the upward movement of said guiding means, and means movable between said stop means and said guiding means for determining the desired elevation of the latter.

10. In a coin counting machine, the combination with a vertically movable coin guiding ring, of stop means for limiting the upward movement of said guiding ring, a rotatable adjustable cam ring intermediate said guiding ring and said stop means, said guiding ring having clearance notches alined with said stop means, and said cam ring having similar clearances notches alinable with said notches of said guiding ring by rotative movement of said cam ring, whereby both rings may be removed from the machine.

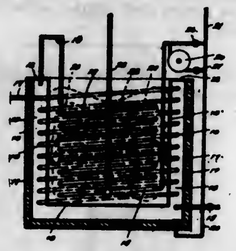


12. In a coin counting machine, the combination with a rotatable feed table, of a guide ring having a coin runway arranged over the marginal portions of said table, said guide ring having slots giving access to the interior of said runway.

1,389,635. DIAPHRAGM-PUMP. WESLEY E. DUNKLE, Contact, Nev. Filed Dec. 23, 1919. Serial No. 346,862. 13 Claims. (Cl. 103—10.)

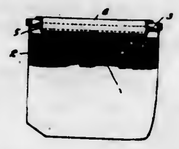
1. A pump comprising a reciprocable plunger and a tubular, radially distensible working diaphragm surrounding the said plunger.

1,389,636. ANIMAL-TRAP. JOHN R. EASTRIDGE, Washington, D. C. Filed Mar. 17, 1921. Serial No. 452,979. 3 Claims. (Cl. 43—69.)



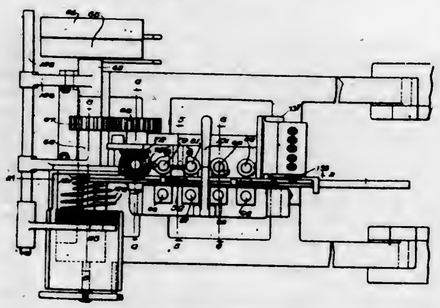
1. A trap comprising a pound having an opening in its top, spaced walls rising from the longitudinal edges of the opening, plates disposed against the ends of the opening and extending above and below the top of the pound between the said walls from one to the other, the upper portions of said plates being extended outwardly, a closure plate for the opening pivotally connected with the portions of the end plates that depend below the top of the pound, means for holding the closure plate yieldably in closed position and against downward movement, and a bait holder mounted between the walls intermediate the ends of the said opening.

1,389,637. HEAT-TRANSFERENCE APPARATUS. CROSBY FIELD, Brooklyn, N. Y., assignor to Chemical Machinery Corporation, New York, N. Y. Filed Jan. 7, 1918. Serial No. 210,714. 20 Claims. (Cl. 257—192.)



5. In an apparatus for heat transference, a vessel adapted to contain material, a jacket surrounding said vessel and adapted to contain a heat carrying medium, a coil in said vessel in communication with said jacket, the medium in said jacket adapted to circulate through

said coil, and secondary means out of contact with said vessel for changing the heat content of said medium, and

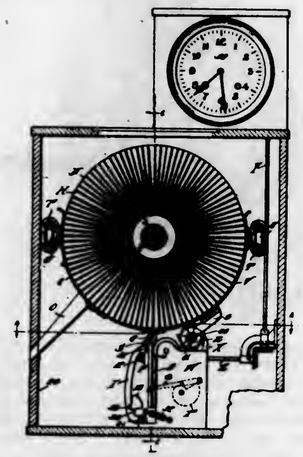


an agitator in said vessel for promoting the flow of the material therein about said coil disposed in said vessel, and in contact with the sides of said vessel.

1,380,638. SOLID FUEL AND PROCESS OF MAKING THE SAME. HARRY L. FISHER, New York, N. Y., assignor to S. Sternau & Co., Inc., Brooklyn, N. Y., a Corporation of New York. Filed Apr. 9, 1917. Serial No. 160,670. 3 Claims. (Cl. 44—7.)

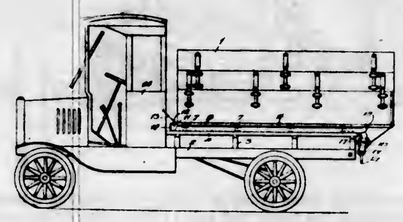
1. A solid fuel comprising alcohol having approximately a 4% water content, the reaction product of caustic soda and stearic acid substantially free of oleic and palmitic acids, and stearic acid substantially free of oleic and palmitic acids.

1,380,639. FLANGE-CURLING MACHINE. PAUL W. FLEISCHER, Weehawken Heights, N. J., assignor to American Can Company, New York, N. Y., a Corporation of New Jersey. Filed June 30, 1919. Serial No. 307,663. 13 Claims. (Cl. 153—29.)



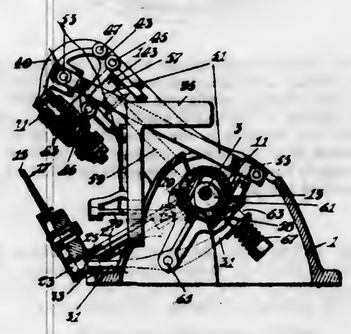
1. A can end flanging machine for curling the flanges of rectangular can ends, comprising in combination a plurality of sets of rolls successively engaging the flanges to be curled and operating to bring said flanges to desired formation, housings in which said rolls are mounted and between which the can ends move while being operated upon, said housings being separable on an axis parallel to the direction of travel of the said can ends.

1,389,640. OIL-CUP. WILLIAM J. FRISBIE, Chicago, Ill., assignor to Justrite Manufacturing Company, Chicago, Ill., a Corporation of Illinois. Filed Oct. 6, 1920. Serial No. 415,108. 5 Claims. (Cl. 184—48.)



5. In an oiling device, the combination of a nipple member adapted to be secured on a support, a cup member having threaded connection with said nipple member, a bottom wall for said cup member, a removable top wall for said nipple member, said walls having registering openings for the flow of oil from the cup member to the nipple member, a spring housed within said nipple member and having its end projecting upwardly to the nipple top wall, the bottom wall of said cup member having detent formation for coöperation with said spring end to lock the cup member to the nipple member after threaded engagement of such members.

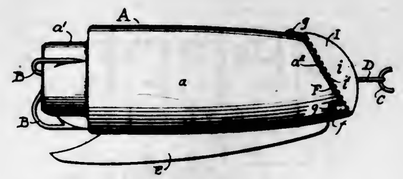
1,389,641. WORKMAN'S TIME-RECORDER. WILLIAM T. GELTZ, Cleveland, Ohio. Filed Apr. 17, 1920. Serial No. 374,589. 23 Claims. (Cl. 234—41.)



5. In a time recorder, the combination of a printing mechanism, a shaft, a card magazine rotatable with and slidable axially on said shaft, said magazine having a radial compartment for each card, means to rotate the shaft and slide the magazine laterally to register a selected compartment with said mechanism, and means automatically actuated by said means to permit a card to drop from said compartment to said mechanism and to return said card to said compartment.

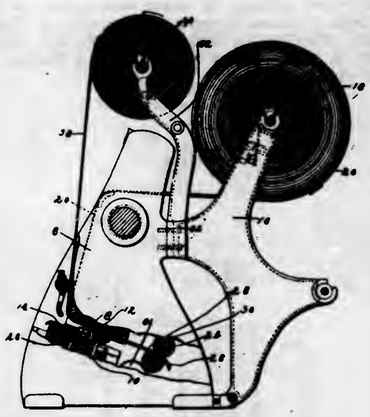
1,389,642. DUMPING-BODY. OLLIE C. GEORGE, Chicago, Ill. Filed May 31, 1919. Serial No. 300,996. 4 Claims. (Cl. 298—14.)

1. In combination, a vehicle having a platform for receiving various types of interchangeable bodies, a pair of channel members removably mounted upon said platform, rollers journaled in said channel members, a dumping body, a pair of channel members carried by said dumping body and adapted for coöperation with said rollers to guide said body therealong, means carried by said first channel members for moving said body along said rollers, said means being arranged without the space between the vehicle platform and the dumping body to permit employment of a dumping body of maximum size and provide a low center of gravity and high order of stability in the resulting combination, a trunnion carried by the dumping body for limiting the movement thereof and fulcrum means carried by said first channel members for coöperation with said trunnion to form a pivot above which said body is tilted to dump its contents.



1,389,643. TURNING AND BEADING MACHINE. PERLEY R. GLASS, Brookline, Mass., assignor, by mesne assignments, to United Shoe Machinery Corporation, Paterson, N. J., a Corporation of New Jersey. Filed June 29, 1916. Serial No. 106,625. 24 Claims. (Cl. 12—53.)

1. A machine of the class described, having in combination, mechanism for pounding a piece of work, and means for causing said mechanism either to pound the work or both to pound and to feed the work as may be desired.

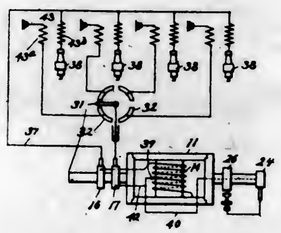


1,389,644. ADJUSTABLE LURE-WABBLER. HENRY L. GOTTSCHALK, Chicago, Ill. Filed Feb. 7, 1921. Serial No. 443,187. 3 Claims. (Cl. 43—46.)

1. A fish lure comprising a cylindrical body provided with an inclined plane at the forward end thereof extending downward and forwardly, in combination with a wabbler comprising a base rigidly secured to said forward end, a movable member provided with wings rigidly set

in planes inclined to the planes of the central portion thereof, and an eyelet arranged to rotatably attach said central portion of the movable member to said base.

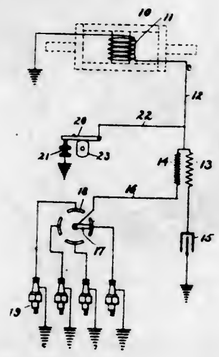
1,389,645. PERFORATING. ALBERT E. HUDSON, Beverly, Mass., assignor to United Shoe Machinery Corporation, Paterson, N. J., a Corporation of New Jersey. Filed Nov. 14, 1919. Serial No. 338,046. 15 Claims. (Cl. 164—89.)



1. The process of perforating which consists in positioning the stock to be perforated against a plurality of superimposed backing members and operating a perforating instrument to perforate the stock and the backing member adjacent thereto.

11. In a machine of the class described, a punch, means to sustain a backing strip, means to sustain a supplemental backing strip between the first backing strip and the stock to be perforated, and means to cause the punch to perforate the stock and the supplemental backing strip.

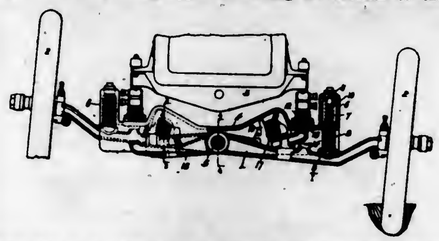
1,389,646. IGNITION SYSTEM. DOW B. HUGHES, Cleveland, Ohio, assignor, by mesne assignments, to Motor Ignition & Devices Company, a Corporation of West Virginia. Filed Apr. 2, 1910. Serial No. 553,111. 7 Claims. (Cl. 123—148.)



1. In an ignition system, spark electrodes, means for supplying to the electrodes high frequency current of high voltage so as to form an arc of low heat value and for supplying to the electrodes a current at relatively low voltage so as to form an arc of high heat value which follows after the arc of low heat value, comprising a gen-

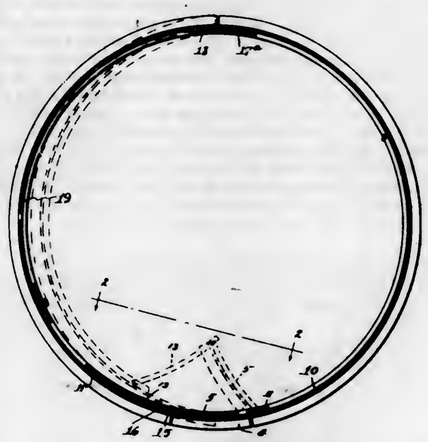
erator having an armature winding, means for forming a local short circuit for the armature winding and for opening the short circuit, a condenser and a disruptive dis-

charge coil, the condenser being connected to said circuit in series with the primary of the coil, and the electrodes being connected to the armature winding in series with the secondary of the coil.



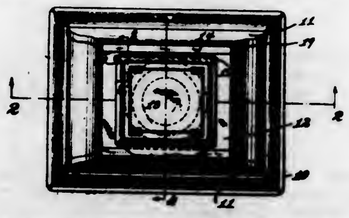
1,389,647. IGNITION SYSTEM. DOW B. HUGHES, Cleveland, Ohio, assignor, by mesne assignments, to Motor Ignition & Devices Company, a Corporation of West Virginia. Filed Oct. 22, 1910, Serial No. 588,426. Renewed Sept. 1, 1920. Serial No. 407,505. 6 Claims. (Cl. 123—148.)

1. In an ignition system for a plurality of spark plugs, a source of current, a distributer having stationary contacts connected to the spark plugs, and its movable member connected to the source of current so that current from said source may be distributed to the several plugs, a condenser, and a disruptive discharge coil, the condenser being connected to the source so that it may be charged thereby and having in its discharge circuit, the primary of the coil, and the secondary of the coil being connected to the movable member of the distributer, and means for periodically causing the charging and disruptive discharging of the condenser.



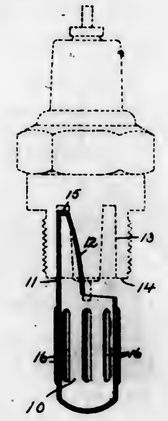
1,389,648. VEHICLE-BODY-EQUALIZING MEANS. AUGUST KADOW, Toledo, Ohio. Filed Feb. 21, 1921. Serial No. 446,852. 6 Claims. (Cl. 280—112.)

1. In a vehicle, a body supporting frame, an axle and an equalizing lever centrally carried by the frame for vertical rocking movements relative thereto and to each other, means for imparting opposed rocking movements to the



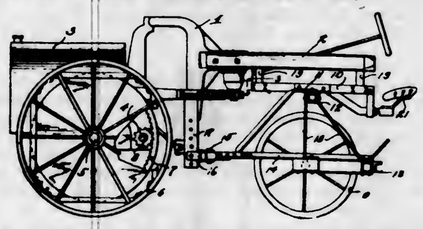
lever and axle when either is rocked, and yielding connection between the frame and axle at both sides of the axle center.

1,389,649. VEHICLE-RIM. CHARLES B. KEENUM, Cleveland, Ohio. Filed Feb. 2, 1920. Serial No. 355,615. 2 Claims. (Cl. 301—32.)



1. A vehicle rim comprising an annulus of channel form in cross section provided with beveled ribs on its inner surface, said annulus having one segmental portion separate and adapted to collapse inwardly, and hinge members connecting said segment to the remainder of the annulus and provided with interfitting tongues and recesses, said hinge members having beveled side portions which at their ends abut said beveled ribs.

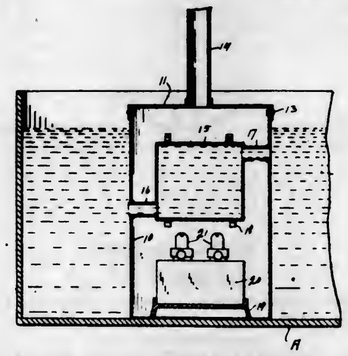
1,389,650. INKSTAND. FRANZ A. FULLER, Newark, N. J., assignor to The J. E. Mergott Company, Newark, N. J., a Corporation of New Jersey. Filed Mar. 25, 1920. Serial No. 368,805. 5 Claims. (Cl. 120—57.)



1. An inkstand comprising a sheet-metal base plate, a sheet-metal cover plate provided with marginal depressed portions mounted upon said base plate, sheet-metal side plates provided with marginal flanges to engage said depressed portions secured to the longitudinal, edges of the cover plate, said side plates each being provided with marginal integral interlocking means for securing the cover plate and side plates to the base plate.

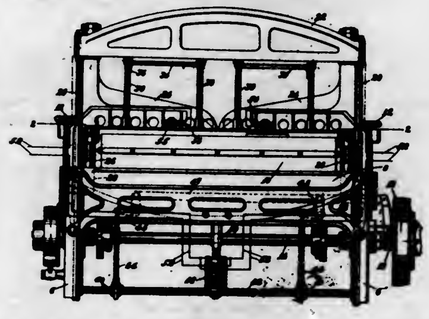
1,389,651. SPARK-PLUG CLEANER. JOSEPH F. GONDER, Newark, N. J. Filed June 8, 1920. Serial No. 387,378. 3 Claims. (Cl. 83—64.)

1. A spark plug cleaner comprising an open-ended receptacle forming a handle and having a curved blade extending from its edge and in extension thereof at the open end so that material cut by the blade falls into the receptacle.



1,389,652. FARM IMPLEMENT. GEORGE W. GOSS and CHARLES E. GOSS, Baltimore, Ohio. Filed Dec. 17, 1919. Serial No. 345,674. 4 Claims. (Cl. 180—20.)

1. In a tractor, the combination with the frame thereof, an engine carried by the forward end of said frame, drive wheels mounted for rotation adjacent to the forward end of the frame, a land roller structure carried by and situated beneath the rear end of said frame, said roller structure being of such length as to bridge the distance between the inner edges of said wheels, and driving means for transmitting the power of said engine to said wheels, said means operating upon the advance of the tractor to force said roller downwardly.

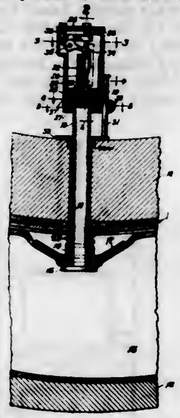


1,389,653. TANK-HEATER. WALTER H. GUBNIN, Lewellen, Nebr. Filed Feb. 21, 1919. Serial No. 278,358. 2 Claims. (Cl. 126—360.)

1. A tank heater of the character described including a casing, a closure normally closing the upper portion of the casing and formed of two sections hinged to each other, the closure as a whole being detachably engaged with the casing, one of said sections forming a lid adapted to be oscillated in a vertical plane, said lid section carrying an outlet pipe, the other section being formed with an air inlet opening, an air pipe attached to the wall of the casing and extending downward from said air inlet opening and discharging adjacent the bottom of the casing, a burner disposed within the casing, and a water tank disposed above the burner and between the burner and the

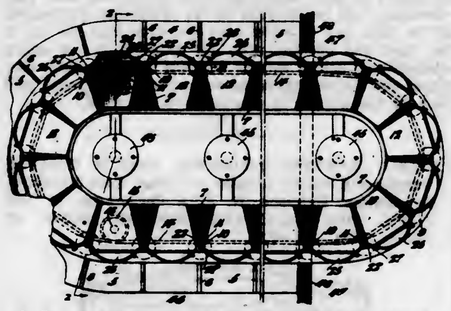
lid and supported within the casing in spaced relation at all points to the casing, the tank having an inlet pipe extending from the exterior of the casing into the bottom of the tank, and an outlet pipe extending from the top of the tank and opening upon the exterior of the casing whereby said heater may be disposed within a water container and the circulation of water produced through said tank by the heating of the water in the tank.

1,389,654. CUTTING-MACHINE. JOHN B. HADAWAY, Swampscott, Mass., assignor to United Shoe Machinery Corporation, Paterson, N. J., a Corporation of New Jersey. Filed Apr. 29, 1918. Serial No. 231,349. 35 Claims. (Cl. 164—23.)



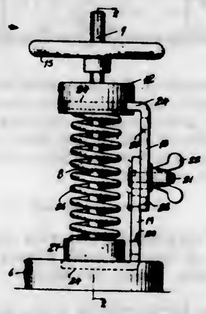
1. In a machine of the class described, a cutting block and a crosshead relatively movable toward and from each other, and a presser member co-extensive with approximately one-half of the cutting block and mounted for movement from and into position over the block between said block and crosshead.

1,389,655. WARNING-SIGNAL FOR TIRE DEFLATION. FREDERICK E. HAFELFINGER, Weehawken, N. J. Filed Aug. 11, 1920. Serial No. 402,794. 15 Claims. (Cl. 116—34.)



1. A signal for pneumatic tires, including a whistle adapted to be directly secured to the valve stem, means

for moving the valve stem endwise upon a predetermined change in tire air pressure, and means carried by the

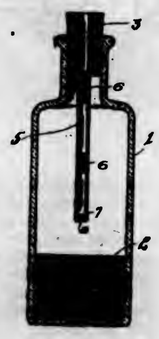


whistle for opening the tire air valve to blow the whistle upon said predetermined valve stem movement.

1,389,656. AUTOMATIC RESTAURANT. HUGH A. HALL, Philadelphia, Pa. Filed July 31, 1919. Serial No. 314,437. 5 Claims. (Cl. 186—1.)

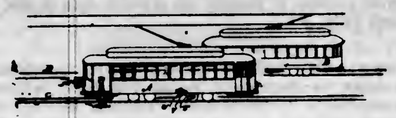
1. In an automatic restaurant, a conveyer having a series of article receiving compartments, each of which is provided with a coin controlled delivery door, and having juxtaposed walls pivotally connected at their outer ends, and means to actuate said conveyer.

1,389,657. COMBINATION SPRING-COMPRESSOR AND SPRING-CLAMP. JOHN W. HARSLEY and MILTON P. AGGAR, New York, N. Y. Filed July 2, 1920. Serial No. 398,479. 5 Claims. (Cl. 29—86.3.)



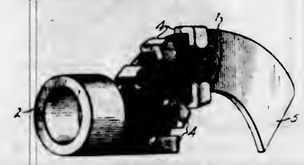
1. A combination spring compressor and spring clamp, comprising a stand to hold a spring with grooves made in the stand, a spring compressing device used in conjunction with the stand to force the spring into compression, and an adjustable clamp to slip into the grooves capable of fitting over the ends of a spring to hold said spring under compression.

1,389,658. LOOSE-LEAF BOOK. THOMAS E. HESTER, St. Louis, Mo. Filed Mar. 3, 1921. Serial No. 449,307. 4 Claims. (Cl. 129—21.)



1. A loose leaf post, comprising a cylindrical section, an enlarged cylindrical base adapted to be received in a perforation in the book back or cover, a flange on the base, and a washer adapted to be riveted in connection with the base by the over-turning of the edges of the shoulder at the juncture of the base and the cylindrical portion.

1,389,659. RECEPTACLE FOR BACTERIAL CULTURES. MATHEW J. HOLLOWOOD, Rochester, N. Y. Filed Oct. 8, 1919. Serial No. 328,264. 3 Claims. (Cl. 215—37.)



3. In combination with a receptacle, a bacterial culture media contained therein, a stopper for the receptacle, and an air tube carried by the stopper and depending into the receptacle, said air tube being of substantially uniform diameter throughout its length with its free end flaring slightly outwardly and having an inwardly turned portion tapering upwardly in the outwardly flaring portion and in spaced relation to the inner walls of the outwardly flaring portion, the inner end of the upwardly turned portion having an opening.

1,389,660. SAFETY-SIGNAL FOR STREET-CARS. HERBERT P. HOPPE, St. Louis, Mo. Filed Mar. 28, 1921. Serial No. 456,212. 6 Claims. (Cl. 246—208.)

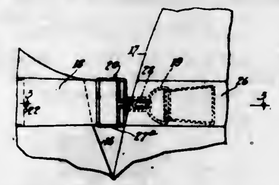
4. A safety signal for a street car, comprising a warning signal located at one end of the car, a rotary circuit closer adapted to be rotated by the movement of the car and normally open under rotation but closing automatically when the car stops, and electric connections between said signal and said rotary circuit closer.

1,389,661. ROD-COUPLING. JOHN M. HUMISTON, Chicago, Ill. Filed May 27, 1920. Serial No. 384,771. 6 Claims. (Cl. 287—103.)

1. A rod coupling member, comprising means for attachment to the end of a rod, and an arcuate part formed to have interlocking engagement with the corresponding part of an identical member secured to a second rod.

1,389,662. MEANS FOR TREATMENT OF PYORRHEA. JOHN ROBERT IRWIN, Cobourg, Ontario, Canada. Filed Apr. 6, 1920. Serial No. 371,730. 1 Claim. (Cl. 174—89.)

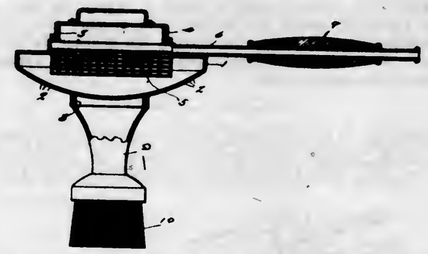
The apparatus used in the treatment of pyorrhea comprising an arcuate member designed to be inserted in the mouth and to coincide with the gums, a solution retaining member carried by the arcuate member and adjacent to the gums, the said arcuate member being adapted to be connected to a source of electrical supply connected to the arcuate member whereby a current of electricity is passed through the arcuate member to ionize the solution, and impregnate all the gums simultaneously with the solution.



1,389,663. PROCESS OF PREPARING LICORICE-ROOT EXTRACT. KATSUICHI ITO, Nishi Ku, Osaka, Japan. Filed Apr. 5, 1920. Serial No. 371,260. 3 Claims. (Cl. 167—4.)

1. A process of preparing licorice root extract characterized by allowing a decoction of licorice root to stand for a while after adding thereto an acid, decanting therefrom supernatant clear solution, boiling the clear solution in the presence of an acid until the dissolved matters coagulate to the hardness of resin, and neutralizing the same by an alkali carbonate; substantially as and for the purposes hereinbefore set forth.

2. A process of preparing licorice root extract characterized by allowing a decoction of licorice root to stand for a while after adding thereto an acid, decanting therefrom supernatant clear solution, boiling the solution in the presence of an acid, thereby hydrolysing fermentable sugars and odor giving matters, until the dissolved matters coagulate to the hardness of resin, breaking the coagulated substance into pieces, and neutralising the same with an alkali carbonate, substantially as and for the purposes hereinbefore set forth.



3. The process of preparing licorice root extract which consists in beating said root and adding hot water thereto, separating the fibrous material from the liquid, adding sulfuric acid to said liquid and boiling the same, allowing the liquid to cool thereby to coagulate glycyrrhizic acid therefrom, neutralizing said acid with an alkali carbonate, heating the mass to dissolve the same, and filtering the resulting solution.

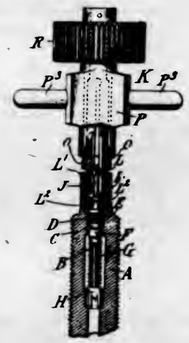
1,389,664. GARMENT. ARTHUR A. JACKSON, Long Beach, Calif. Filed June 12, 1920. Serial No. 388,621. 1 Claim. (Cl. 2—144.)

In a garment of the character described having a back portion and an apron portion separated from each other at the sides of the garment, means for connecting said portions and adjusting the waist portion of the garment, said means comprising a strap extending across one of said portions to form a belt and having its ends overturned and secured to said portion adjacent its side edges to form loops, a fastening member adjustably positioned on said loops and complemental fastening members upon the other portion of the garment.

1,389,665. FOUNTAIN-BRUSH. OWEN JAMES, Brooklyn, N. Y. Filed Dec. 6, 1920. Serial No. 428,678. 1 Claim. (Cl. 15—51.)

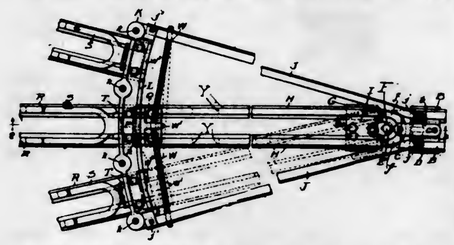
A device of the class described comprising a body having a perforated bottom, an inlet pipe connected with the body for introducing water thereinto, a flange on the bottom of less diameter than the body, a hollow member detachably engaging said flange and a brush having a perforated head carried by said member.

1,389,666. CLOCK, WATCH, AND THE LIKE TIME-KEEPING INSTRUMENT. ARTHUR JARRED, London, England. Filed July 29, 1920. Serial No. 399,813. 1 Claim. (Cl. 58—128.)



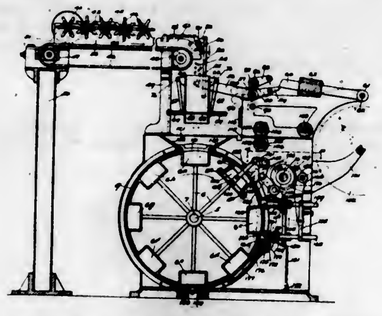
A time keeping instrument having a primary dial bearing two sets of hour indications, a masking dial to expose either of said hour indications and conceal the other in accordance with the position of the primary dial relative

to the masking dial, opposed springs carried by the primary dial and each operative when tensioned to move the primary dial in a direction responsive to such tension, a cam formed to directly engage and tension said springs



in succession at periodic intervals, and members carried by the primary dial to be held by said cam against permitting movement of the primary dial under the spring influence until one of said members and said cam are in a determinate relative position.

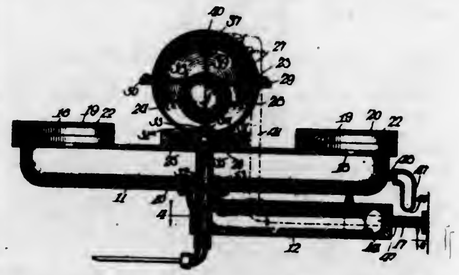
1,389,667. EXTRACTING-TOOL. HENRY P. KRAFT, Ridgewood, N. J. Filed Mar. 1, 1916. Serial No. 81,342. 5 Claims. (Cl. 29—86.1.)



1. In an extracting tool, the combination of a normally expanded resilient member adapted to engage the part to be extracted, means for moving such member into such engagement, and means for moving the member to withdraw such part, said last-named means reacting against said first-named means.

1,389,668. SAFETY-SWITCH FOR A SUSPENDED TWO-RAIL TRACK. NIC KRUMP, Chicago, Ill. Filed Jan. 28, 1921. Serial No. 440,595. 7 Claims. (Cl. 104—103.)

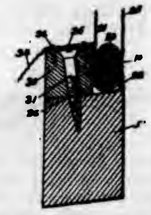
1. In a safety switch for a suspended two rail track a vertical member rigidly secured on the underside of a supporting member, and provided with a table and a base at the lower end thereof, a horizontally disposed member provided with a semi-circular annular flange fulcrumed on said table member in combination with rails secured to said base so that the ends thereof abut against the curved outside of said semi circular flange, and additional rails secured to said fulcrumed member so that the ends thereof abut against the ends of said semicircular flange, and traveling means to support the opposite ends of said last named rails.



1,389,669. PACKAGING-MACHINE. GOTTHOLD L. LANGER, Portland, Oreg., assignor, by direct and mesne assignments, to Sticky-Fruit Packaging Machine Company, Portland, Oreg., a Corporation of Oregon. Filed Sept. 12, 1916. Serial No. 119,682. 10 Claims. (Cl. 93—7.)

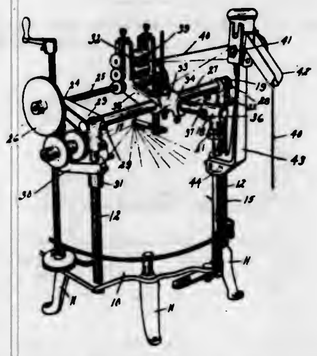
1. In combination, a weighing receptacle to receive matter to be wrapped, means normally holding said receptacle in a loading position, said means being adapted to yield when a predetermined amount of matter has been put into said receptacle, means adapted to be automatically operated by the movement of said receptacle when loaded for discharging its load, wrapping mechanism positioned to receive the discharged load and adapted to automatically wrap said matter, and interconnections between said weighing mechanism and said wrapping mechanism, whereby the movement of the weighing receptacle and the discharge of its load automatically sets in operation the wrapping mechanism, substantially as described.

7. In a machine of the character referred to, in combination with a wrapping pocket adapted to receive the matter to be wrapped, folding members pivotally and slidably mounted adjacent said wrapping pocket, means for automatically moving said folding members into positions opposite said wrapping pocket, and means for automatically turning said folding members upon their pivotal mountings for automatically folding wrapping paper about matter to be wrapped within said pocket, substantially as described.



1,389,670. GAS-GENERATOR. JOSEPH W. LEE, River Forest, Ill., assignor to Lee Gas Generator Company, a Corporation of Illinois. Filed Oct. 31, 1917. Serial No. 199,552. 4 Claims. (Cl. 158—61.)

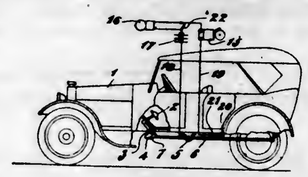
4. A gas generator of the character described, the combination of a manifold formed with a plurality of burners,



a mixing chamber communicating with said manifold and with the atmosphere, a vaporizing vessel adapted to be heated by one of said burners, means within the vessel for maintaining a substantially constant volume of oil therein, a duct communicating with said vaporizing vessel and adapted to conduct vapor therefrom to the mixing chamber, and a burner communicating with said manifold and adapted to heat said vapor adjacent the point where it is introduced into said mixing chamber.

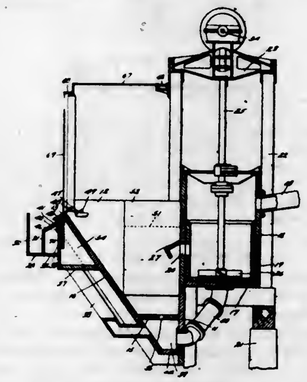
1,389,671. VEHICLE-TOP. ADOLPH H. LICHTER, Toledo, Ohio. Filed July 22, 1918. Serial No. 246,226. 16 Claims. (Cl. 296—144.)

16. In combination, a vehicle body, a top therefor including inner and outer flexible portions, a border member concealed between said flexible portions and having projections extending therefrom, and means securing said projections upon said body.



1,389,672. BRAIDING-MACHINE. ARLON LITTLEFIELD, Cranston, R. I., assignor to New England Butt Company, Providence, R. I., a Corporation of Rhode Island. Filed Jan. 15, 1920. Serial No. 351,629. 7 Claims. (Cl. 28—4.)

1. In a braiding machine, a body portion including the braiding and twisting elements, a frame supported on said body comprising two side standards, a mechanism supporting cross-bar removably mounted on said side standards, a rear standard on the body portion of the machine and positioned between said side standards, and means whereby said rear standard is caused to coöperate with said cross-bar for adjustably supporting said mechanism.



1,389,673. AUTOMOBILE-SIGNAL. GEORGE LOCKHART, New York, N. Y. Filed Apr. 3, 1919. Serial No. 287,294. 2 Claims. (Cl. 116—36.)

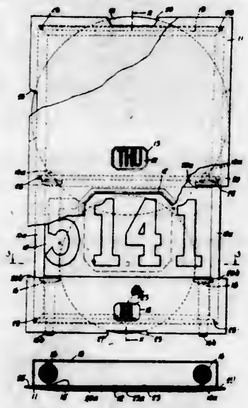
1. The combination with a motor vehicle, a brake lever for controlling the brake of said vehicle and a cam on said brake lever, of a bracket secured to the under side of the vehicle, a lever rockably mounted in said bracket, means on the lever for coöperation with the cam whereby when the brake lever is operated the lever will be rocked

and means controlled by the movement of the lever to indicate the intention of the operator of the vehicle to stop.

1,389,674. FLOTATION-MACHINE. LEO DANIEL LYONS and CONRAD FRANCIS HOFF, Butte, Mont. Filed May 21, 1920. Serial No. 383,229. 13 Claims. (Cl. 83—85.)

1. In a flotation machine provided with a container, having an overflow lip, and a movably and automatically operated member associated with said container for uniformly separating the concentrate froth from the subfroth, as said froths flow over said lip regardless of the level of the pulp in said container.

1,389,675. COLLAR-HOLDER. WILLIAM J. MCCLELLAN, Attleboro, Mass., assignor to Freeman-Daughaday Co., Chartley, Mass., a Corporation of Massachusetts. Filed Sept. 17, 1920. Serial No. 410,958. 5 Claims. (Cl. 24—81.)

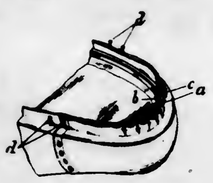


1. A collar holder comprising a bar having a pair of oppositely extending gripping arms formed integral with and folded downwardly from the side edge of said bar, each arm coöperating with its end of the bar to grip the fabric between them.

1,389,676. CALENDAR. ANDREW J. MCDADE, Brooklyn, N. Y. Filed July 13, 1920. Serial No. 395,923. 4 Claims. (Cl. 40—113.)

1. A calendar of the class described including a body having a front presenting an opening for the display of

a given day of the month, winding rollers mounted in said body at the sides of said opening and optionally operable from the exterior of the body, a web extending transversely of said body between said rollers and across said opening adapted to be moved in either direction by the rollers, a unit on said body beneath said front and



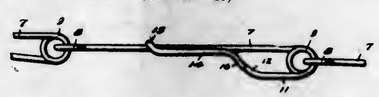
constituting at said opening a table forming a backing for said web, and adjustable means carried by said unit respectively above and below said table and bearing respectively the names of the week days and the months, said front of the body presenting openings at which the name of a week day and the name of a month may be displayed.

1,389,677. MEDICAL COMPOUND. JOHN HEBER MCDAVIS, Newark, N. J. Filed Apr. 12, 1920. Serial No. 373,329. 2 Claims. (Cl. 167—9.)

1. A compound of the character specified, composed of the following ingredients in the quantities named: black gun powder, 2 grains, chloroform, 70 grains, beef gall 3¾ drams, alcohol sufficient to make one ounce.

1,389,678. METHOD OF MAKING SHOES. RONALD F. MCFEELY, deceased, Beverly, Mass., by E. Mark Sullivan, administrator, Boston, Mass., assignor to United Shoe Machinery Corporation, Paterson, N. J., a Corporation of New Jersey. Original application filed May 1, 1916, Serial No. 94,675. Divided and this application filed Jan. 14, 1918. Serial No. 211,850. 11 Claims. (Cl. 12—145.)

1. That improvement in methods of making shoes which consists in pulling over a last both lengthwise and laterally the toe portion of an upper including stiffening material which is normally hard but has been temporarily softened, after the upper has been thus pulled at the end and the sides of the toe and before said stiffening material has had time to harden, working the pulled-over upper into permanently lasted position around the toe, maintaining the lasting pressure until said stiffening material has substantially hardened, and then releasing the upper from said pressure and utilizing the stiffening material to hold the upper in lasted shape.



1,389,679. ALLOY STEEL. PHILIP M. MCKENNA, Congress Heights, D. C. Filed Apr. 2, 1921. Serial No. 458,031. 2 Claims. (Cl. 75—1.)

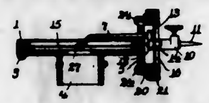
1. An alloy steel of usual formula and containing 16 to 20 per cent. of tungsten, 2½ to 5 per cent. of chromium, and 1 to 3 per cent. of tantalum.

1,389,680. ALLOY STEEL. PHILIP M. MCKENNA, Congress Heights, D. C. Filed Apr. 2, 1921. Serial No. 458,032. 1 Claim. (Cl. 75—1.)

An alloy containing, besides iron, not less than .20 per cent. carbon, .70 to 1.60 per cent. chromium, and 1 to 3 per cent. of tantalum.

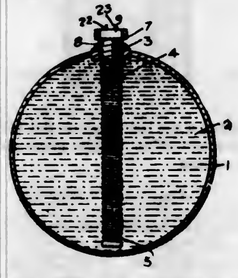
1,389,681. CLOTHESLINE. MILTON H. MCKINLEY, Seattle, Wash. Filed Feb. 10, 1920. Serial No. 357,592. 1 Claim. (Cl. 68—3.)

A pinless clothes line formed of connected wire sections, each comprising a straight line section, a loop formed at one end thereof, the other end of the straight line section being bent to form a resilient perpendicularly extending loop, with the end of the wire of the resilient loop extending from the lower side thereof for a short distance parallel to the straight line section and abruptly inclined toward the straight line section to form an abutment, and bent upon itself to provide parallel members spaced slightly below the straight line section and connected by a loop overlying the straight line section, the end of the wire being angularly bent to lie adjacent the abutment section of the relatively short portion extending from the resilient loop to coöperate therewith in limiting movement of clothes mounted on the straight line section toward the resilient loop.



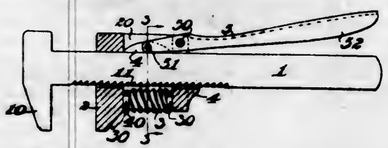
1,389,682. HAMMOCK. ABRAHAM MELNIKER, Brooklyn, N. Y. Filed Oct. 12, 1920. Serial No. 416,438. 2 Claims. (Cl. 5—56.)

1. A collapsible hammock, crib or the like including the combination of rigid corner members having end bars rigidly connected therewith, and longitudinal bars pivotally secured thereto, so that the said longitudinal bars can be revolved toward and away from the said end bars, the said longitudinal bars being connected by intermediate frames to which they are pivotally connected so that one set of longitudinal bars can be revolved until they overlie the other set of longitudinal bars and locking means adjacent and adapted to be secured to the said corner frames and to the adjacent ends of the said longitudinal bars, the said longitudinal bars being so mounted in the said intermediate frames that they can be revolved in only one direction, so as to be one above the other, the said hammock, crib or the like being free from any locking cross-members which extend beneath the fabric thereof.



1,389,683. SOUND-BOX. GEORGE A. MOORE, Medford, Mass. Filed Sept. 28, 1919, Serial No. 326,419. Renewed Sept. 25, 1920. Serial No. 412,893. 14 Claims. (Cl. 274—35.)

1. A sound box comprising a case, a resonator diaphragm supported by said case, a pivotal diaphragm supported substantially at right angles to the plane of the resonator diaphragm and with its center in the plane of



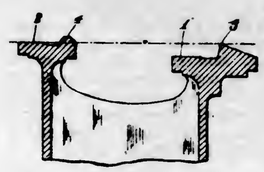
the same, and a needle arm supported by the pivotal diaphragm and attached to the resonator diaphragm.

1,389,684. ELECTRIC HEATER. WILLIAM ANDREW MORRISON and FREDERICK DELIMER LAKE, St. Catherines, Ontario, Canada. Filed Oct. 4, 1920. Serial No. 414,629. 4 Claims. (Cl. 219—41.)

1. An electric water heater comprising a cylindrical casing of heat conducting material adapted to be inserted in an orifice in a boiler wall and to extend inwardly into the boiler, a core formed of heat absorbing material fitting within the casing and provided with a double thread extending longitudinally thereof, and a winding formed by a wire extending inwardly longitudinally of the core through one member of the double thread and returning outward through the other member of the double thread and adapted to be secured at its ends to leading in wires.

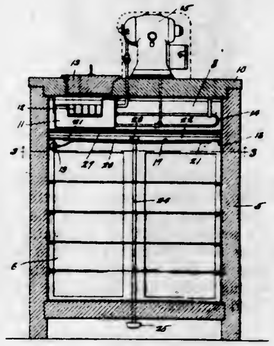
1,389,685. WRENCH. CHARLES F. NAST, Anacortes, Wash. Filed July 19, 1920. Serial No. 397,455. 3 Claims. (Cl. 81—158.)

1. In a wrench, in combination, a handle having a fixed jaw and teeth thereon, a jaw coöperating with said fixed jaw and movable along the handle, a lever pivotally supported upon said movable jaw and extending along the edge of the handle opposite the jaw opening, in position to be brought closely against the handle when gripped in use, and a toothed locking member carried within and movable relative to the movable jaw, and connected with said lever to be moved into engagement with the teeth of the handle when said lever is brought closely against the handle.



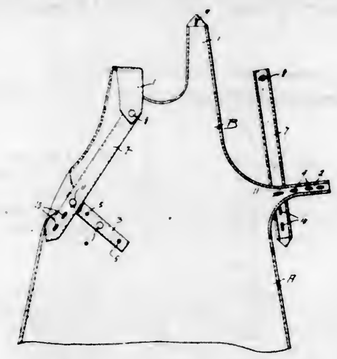
1,389,686. TIE-PLATE. GEORGE W. NIMER, Chicago, Ill. Filed Nov. 29, 1920. Serial No. 426,910. 4 Claims. (Cl. 238—296.)

1. A tie plate having an upper rail receiving surface and a rail abutting flange extending transversely of the said plate, the said rail bearing surface being canted longitudinally of said plate, and a bottom tie engaging surface having longitudinally extending ribs on its marginal edges, and a longitudinally extending central rib intermediate its edges, and a series of diagonally extend-



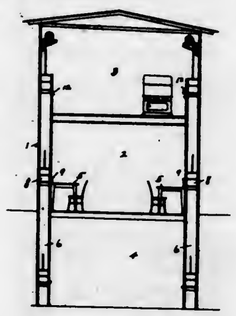
ing tie engaging ribs joined at their inner ends to the said central rib and to the marginal ribs at their outer ends and having a series of recesses in the body of said tie plate between said diagonally extending ribs respectively and between the central rib and the marginal ribs.

1,389,687. LATHE-BED. KARL OLSSON and ANDERS HILMER OLSSON, Lidköping, Sweden, assignors to Aktiebolaget Lidköpings Mekaniska Verkstad, Lidköping, Sweden, a Corporation. Filed Sept. 22, 1919. Serial No. 325,422. 1 Claim. (Cl. 82—32.)



In a lathe bed front and back slides, gibs on said slides to guide the saddle or carriage, the front slide being arranged lower than the back slide and the gib of the front slide being arranged at approximately the same level as the back slide for the purpose of obtaining a corresponding increase in the thickness of material counted in a vertical direction at the fore end of the saddle or carriage.

1,389,688. REFRIGERATOR. REUBEN E. OTTENHEIMER, Baltimore, Md. Filed Nov. 11, 1920. Serial No. 423,237. 1 Claim. (Cl. 62—4.)

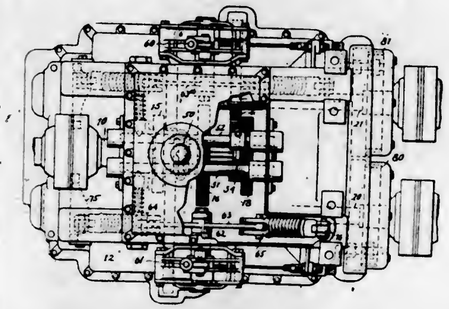


A refrigerator comprising a storage chamber, a cooling chamber at the top of the storage chamber and having a bottom outlet slot, a pair of oppositely movable damper plates associated with the slot, and an operating rod extending lengthwise of the damper plates, toggle links connecting the rod to the respective damper plates, and a thermostat operatively connected to the rod.

1,389,689. APRON. HENRY W. PARKER, Little Rock, Ark. Filed July 26, 1920. Serial No. 398,862. 2 Claims. (Cl. 2—54.)

1. As a new article of manufacture, an apron consisting of a skirt, a bib, straps at the opposite sides of the bib, straps at opposite sides of the apron at the waist line thereof, said skirt, bib and straps comprising a single sheet of material adapted to lie flat, and shoulder straps removably connecting the first named straps and the second named straps, each of said shoulder straps coacting with a first named strap and a second named strap at the same side of the apron.

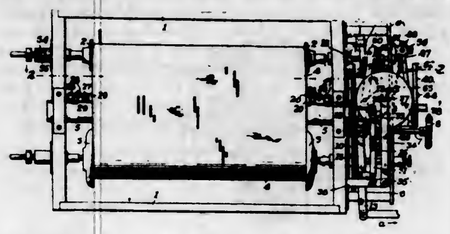
1,389,690. WAITERLESS RESTAURANT. CHARLES [illegible] PAUL, Texas City, Tex. Filed Aug. 11, 1920. Serial No. 402,904. 1 Claim. (Cl. 186—1.)



In combination, a dining room, a serving room, tables arranged in said dining room adjacent the walls thereof, elevator shafts arranged within the walls adjacent the respective tables and continuing to said serving room, waiters movable in said respective shafts, between the tables and serving room, and means for controlling the movement of said waiters.

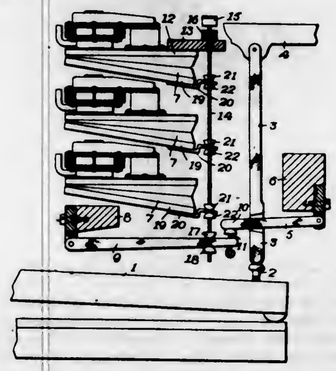
1,389,691. DRY-CELL ELECTRIC BATTERY. JAMES E. PEAVEY, Cincinnati, Ohio. Filed Mar. 15, 1919. Serial No. 282,907. 1 Claim. (Cl. 204—38.)

In a dry cell electric battery, a metallic casing providing a container and battery anode, a cathode electrode centrally disposed within said casing, an absorbent inner lining for said casing having its upper end folded inwardly about the electrode providing an end covering for the battery electrolyte, a non-absorbent electrical insulated sleeve around said electrode protecting the electrode from contact with the edges of the folded portion of said lining, and embedded within pitch sealing the end of the battery casing.



1,389,692. TRANSMISSION MECHANISM. GORDON R. PENNINGTON, Cleveland, and SAMUEL K. WELLMAN, Cleveland Heights, Ohio. Filed Dec. 5, 1919. Serial No. 342,625. 9 Claims. (Cl. 180—17.)

1. In transmission mechanism, the combination of a driving shaft, two parallel driven shafts, four gear sleeves which are loosely mounted, two on one driven shaft and two on the other driven shaft, and which are intergeared with one another whereby all must rotate when any one is rotated, means through which motion may be transmitted from the driving shaft to one of said gear sleeves, a clutch associated with each gear sleeve, and means for selectively operating said clutches to connect the driven shafts with either of the gear sleeves loosely mounted thereon.



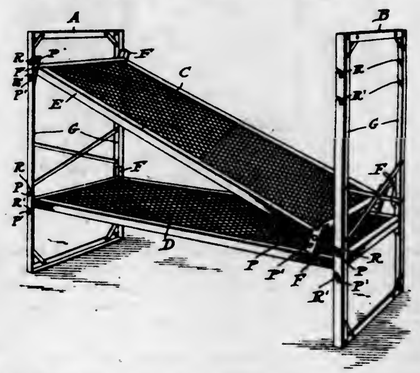
1,389,693. MUSIC-SHEET-GUIDING MECHANISM. CLAUS E. PETERSON, Worcester, Mass., assignor to Iverson Piano Player Company, Boston, Mass., a Corporation of Massachusetts. Filed Jan. 22, 1919. Serial No. 272,506. 9 Claims. (Cl. 84—137.)

1. In a mechanism of the class described, the combination with a rotatable delivery spool longitudinally adjustable in its bearings, a tracker bar and means for moving a music sheet from said delivery spool over the tracker bar, of a rocking shaft journaled transversely to the axis of said delivery spool, an arm carried by said rocking shaft bearing against said delivery spool to move it in one direction, a spring applied to the delivery spool to move it in the opposite direction, and a second spring applied to said arm to press it toward the delivery spool,

and means controlled by the lateral deflection of the music sheet from its normal path over the tracker bar for rocking said shaft.

1,389,694. PNEUMATIC PIANO-PLAYER. CLAUS E. PETERSON, Worcester, Mass., assignor to Iverson Piano Player Company, Boston, Mass., a Corporation of Massachusetts. Filed May 5, 1919. Serial No. 294,925. 4 Claims. (Cl. 84—68.)

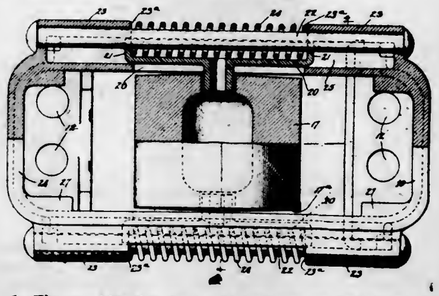
1. In a pneumatic piano player, a series of pneumatic motors each having a movable leaf, arms extending from said movable leaves, a series of levers pivoted to a fixed framework and extending beneath said arms, striker wires of uniform length connecting said arms and said levers, stops for limiting the upward movement of said striker wires, and means for operatively connecting the free ends of said levers with the sound producing mechanism of a piano.



1,389,695. ALLOY OF IRON ZIRCONIUM AND SILICON AND PROCESS FOR THE PRODUCTION THEREOF. NAPOLEON PETINOT, New York, N. Y., assignor to United States Ferro-Alloys Corporation, New York, N. Y., a Corporation of New York. Filed Aug. 18, 1919. Serial No. 318,322. 3 Claims. (Cl. 75—1.)

1. An alloy of iron, zirconium and silicon in which the ratio of zirconium to silicon is not less than 80 parts of zirconium to 20 parts of silicon and not more than 85 parts of zirconium to 15 parts of silicon.

1,389,696. ALLOY OF NICKEL AND IRON AND A PROCESS FOR THE PRODUCTION THEREOF. NAPOLEON PETINOT, New York, and ROBERT TURNBULL, Niagara Falls, N. Y. Filed Nov. 17, 1919. Serial No. 338,449. 3 Claims. (Cl. 75—1.)

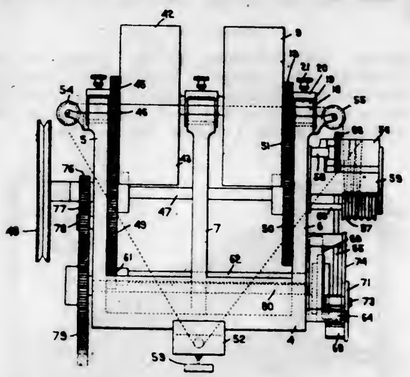


1. The method of making an alloy of iron and nickel comprising the charging into an electric furnace with a basic hearth, of a cold matte having an iron, nickel and sulfur content, then charging into the furnace lime and carbon in such quantities that the sulfur content of the matte will be removed as calcium sulfid, then melting the charge and then skimming off the slag, then adding a second slag composed of lime and carbon, then smelting the same and then strongly agitating the bath with a rod.

1,389,697. DOUBLE-DECK BUNK. ARTHUR PHIPPS, Baltimore, Md., assignor to Southern-Rome Company, branch of Rome Metallic Bedstead Company, Baltimore, Md., a Corporation of New York. Filed Aug. 14, 1919. Serial No. 317,505. 4 Claims. (Cl. 5—60.)

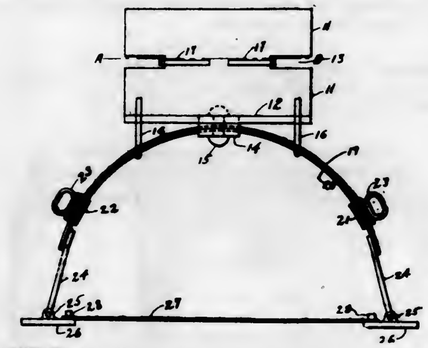
1. A bunk of the character described comprising spaced apart slotted end frames, a plurality of rectangular bed frames, and short vertical cross pieces bracing the corners of the respective bed frames, said cross pieces having pins engaging the slots of said end frame, whereby the bed frames may be supported.

1,389,698. SIDE BEARING FOR RAILWAY-CARS. EDWARD POSSON, Chicago, Ill. Filed Jan. 20, 1919. Serial No. 272,218. 8 Claims. (Cl. 64—64.)



1. The combination in a side bearing for railway cars, of a casing having a channel in its upper side, a rolling body adapted to travel in said channel, the walls of said channel having longitudinal slots therethrough, pinions extending through said slots and engaging said rolling body, supporting members connected to said pinions, guide rods, and means for resiliently mounting said supporting members on said guide rods.

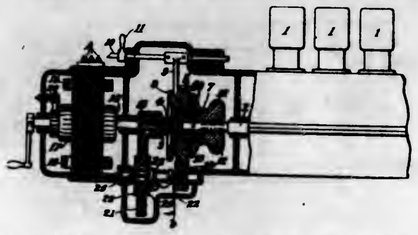
1,389,699. ENDLESS BELT OR CORD AND MACHINE AND PROCESS FOR MAKING THE SAME. EDWARD RIVETT, Hull, Mass. Filed June 22, 1918. Serial No. 241,318. 25 Claims. (Cl. 28—2.)



1. A machine for making an endless belt or cord comprising a pair of reversibly rotatable carriers provided

with hollow axles, means for simultaneously and reversely rotating said carriers, means for progressively feeding an endless core filament through said axles, a filament supply mounted in each carrier, means for guiding the filaments from both carriers into the hollow axles at ad-

jacent points whereby when each filament is led from its supply and secured to the endless core filament, the carrier filaments will be twisted in reverse directions about the core filament and then about themselves until an endless belt or cord of required size is formed.

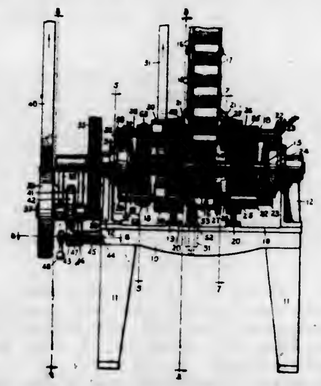


1,389,700. BOOK-SUPPORT. ABRAHAM RODOW, New York, N. Y. Filed July 23, 1920. Serial No. 398,448. 9 Claims. (Cl. 45—82.)

1. A book support for a person in a lounging position comprising a backing plate for a book, said backing plate having notches in its sides, a pair of clamps for the leaves of the book, said clamps passing through said notches and being connected to each other by means of an elastic medium, said notches being adapted to permit books of various sizes to be placed on said backing plate, and a means for supporting said backing plate over the body of said person.

1,389,701. SELF-STARTER OR THE LIKE. OSCAR A. ROSS, New York, N. Y. Filed Feb. 7, 1917. Serial No. 147,224. 7 Claims. (Cl. 290—31.)

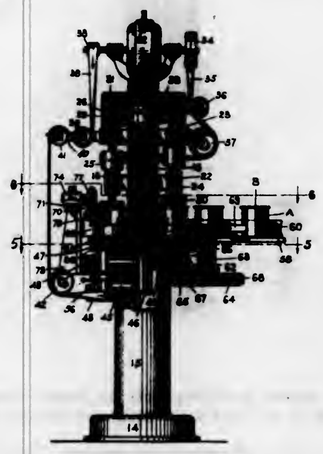
1. In a device of the kind described, an internal combustion engine, a dynamo connected therewith, a source of energy therefor, means controlling the relation of said source of energy to said dynamo, means including gearing for effecting a change of speed relation between said engine and said dynamo, and means affected by the speed of said engine for simultaneously controlling said means controlling the relation of said source of en-



ergy to said dynamo, and said means for affecting a speed relation between said engine and said motor-generator.

1,389,702. FLASHLIGHT-TORCH. LOUIS L. SCHACHT, New York, N. Y. Filed Mar. 17, 1920. Serial No. 366,602. 5 Claims. (Cl. 67—32.)

4. An improved flash light torch comprising a holder for powdered substance, a cap thereon, a post on the cap, a bracket fixed to the post and having upwardly disposed arms, a ring of non-combustible material supported in said arms, tubes projecting upwardly through said cap, and means to deliver a blast of air into the holder.

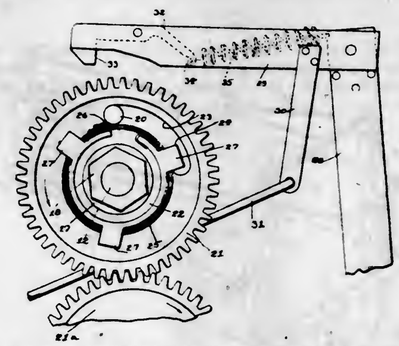


1,389,703. CAN HEADING AND FLANGING MACHINE. LEE C. SHARP, Plattsmouth, Nebr., assignor to American Can Company, New York, N. Y., a Corporation of New Jersey. Filed Apr. 22, 1916. Serial No. 92,941. 27 Claims. (Cl. 113—23.)

1. The combination of a can end chuck, a can body chuck, can ends formed with double flanges and adapted

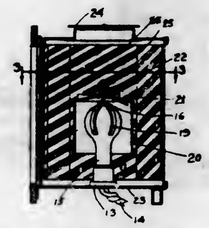
to form flanges on the edges of the can bodies, said double flanges having flange-limiting stops, means for placing said can ends and unflanged can bodies successively in alinement between said chucks, and means for decreasing the distance between said chucks until the edge of the can body is engaged with the flange of the can end, and for continuing to decrease said distance until the said edge of the can body is formed with a radially presented double seaming flange.

1,389,704. CAN-CLOSING MACHINE. LEE C. SHARP, Plattsmouth, Nebr., assignor to American Can Company, New York, N. Y., a Corporation of New Jersey. Filed July 3, 1916. Serial No. 107,219. 11 Claims. (Cl. 113—23.)



1. In a can-closing machine, a horizontal table rotatable about a vertical axis, a plurality of rotatable and vertically movable spindles spaced equally about the axis of the table, and mounted in bearings fixedly connected with the table, chucks disposed terminally upon the spindles, means for moving the spindles toward and away from the table to clamp cans and covers between the same and the chucks during a part of the movement about the table-axis, means for rotating the spindles during the clamping of the cans and covers, from which rotating means said spindles are periodically disconnected, and seaming-rollers mounted on fixed axes adjacent to the path of the cans and covers so as to be engaged thereby while the covers are clamped on the cans.

1,389,705. RAIL-FASTENER. HENRY C. SICKMANN, Marthasville, Mo. Filed May 27, 1921. Serial No. 472,945. 2 Claims. (Cl. 238—65.)

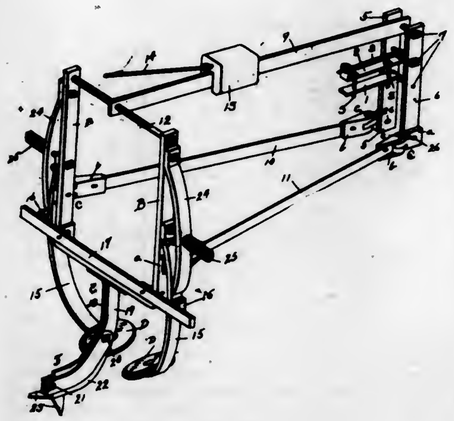


1. The combination with a tie having a recess, said recess being provided with upwardly and inwardly inclined side walls, and a rail section having its base arranged in said recess, of a reversible fastener comprising a plate adapted to be secured to the tie adjacent said recess, said plate being provided with oppositely disposed projections each of said projections being adapted to enter said recess and engage the base of the rail section to retain the rail section in position, said projections being of similar shape but varying in size.

1,389,706. OPERATING MECHANISM FOR THE IGNITION-GENERATORS OF INTERNAL-COMBUSTION ENGINES. GRAHAM SMITH, Savannah, Ga. Filed Oct. 9, 1920. Serial No. 415,780. 2 Claims. (Cl. 123—149.)

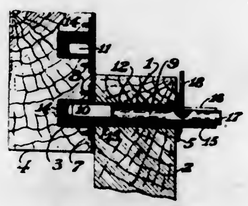
1. In a device of the type described, a generator shaft, a flange secured to the generator shaft and provided upon one face thereof with a lug, spaced lugs formed upon the opposite face of said flange, a driven element rotatably mounted coaxially with said shaft and provided with an arcuate slot slidably receiving the first-named lug, a suitable support adjacent said shaft, a lever pivotally connected at one end to said support and having the free end thereof overhanging the last-named lugs of said flange, a bell crank lever pivotally connected to said lever adjacent the free end thereof and provided upon one arm thereof with a jaw, and identical means for normally holding said jaw projecting beyond the surface of the lever next adjacent said last-named lugs and holding said lever out of engagement with said lugs.

1,389,707. ELECTRICAL DISPLAY-SIGN. HERMAN E. SMITH, Indianapolis, Ind., assignor to Smith-Hecht Company, Indianapolis, Ind., a Copartnership. Filed Feb. 14, 1921. Serial No. 444,837. 3 Claims. (Cl. 40—40.)



1. In combination with an illuminating sign having an incandescent lamp bulb mounted therein, a translucent face and a revolving drum adapted to be revolved by the heat rising from said illuminator, of means for supporting said drum thereon, comprising a vertically extending bearing support carried by the top of said bulb, an annular ring formed on the base of said support arranged to encircle the projecting tip of said bulb for holding it in position, and a plurality of resilient arms adapted to extend downwardly from said support and embrace the bulged portion of said bulb for removably securing said support thereon.

1,389,708. BEET-TOPPING APPARATUS. MARION A. SMITH, Salt Lake City, Utah. Filed Apr. 18, 1919. Serial No. 291,128. 2 Claims. (Cl. 55—107.)



2. A beet topper comprising a U-shaped frame to be drawn in front of a digging element and hinged thereto

and adapted to be shifted laterally and vertically; coacting guide wheels suspended from said frame and journaled at opposed angles and adapted to pass beets growing in the soil to shift said frame laterally; springs on the

standard of each guide wheel to allow it to yield outwardly to pass a major sized beet without injuring it, and a topping knife fastened to said frame and movable therewith in the rear of said guide wheels.

1,389,709. WINDOW AND DOOR LOCK. MORRIS SUBBIN, Philadelphia, Pa. Filed May 25, 1920. Serial No. 384,100. 4 Claims. (Cl. 292—60.)

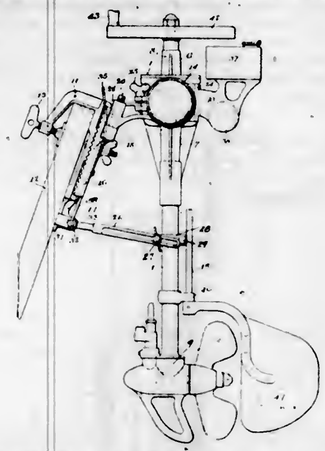
1. In a lock of the character stated, a slidable and rotatable bolt, a barrel adapted to freely contain the same, a socket which an end of said bolt is adapted to occupy, a finger piece on said bolt adapted to operate the same to remove it from said socket, and said barrel having therein a longitudinally extending slot in which said finger piece is movable, and a catch on a member to be locked adapted to have said finger piece engaged therewith.

1,389,710. DEVICE FOR UNSCREWING AND WITHDRAWING PIPE. WILLIAM C. THOMAS, JAMES C. DICKENS, and JESSE W. FOWLER, Goose Creek, Tex. Filed Feb. 19, 1921. Serial No. 446,495. 4 Claims. (Cl. 255—35.)

1. A device of the character described, including a driving member, a driven member, an anchor, means carried by the anchor whereby the device is fixed in a well casing, means carried by the anchor and operatively connected with the driving member and the driven member, through which the rotation of the driving member will be imparted, in a reverse direction, to the driven member, a

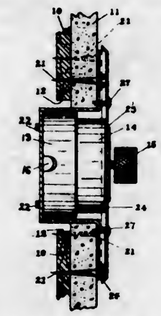
tubular member depending from the driven member and arranged to be clutched therewith and declutched therefrom.

1,389,711. COMBINED BADGE AND DETACHABLE WATCH-GUARD. LLOYD E. THOMAS, Detroit, Mich. Filed May 10, 1920. Serial No. 380,366. 2 Claims. (Cl. 40—1.5.)



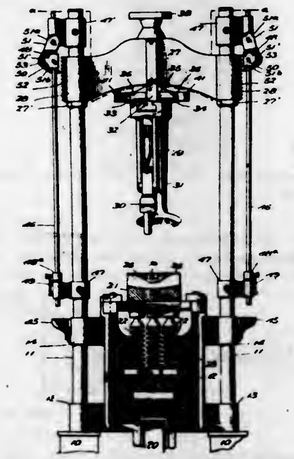
1. In a device of the character described, a button having a rearwardly projecting post adapted to extend through a coat lapel, a washer loosely sleeved upon said post, a chain secured to the washer, and means adapted to engage said post to secure the washer against dislodgment from the post.

1,389,712. MOTOR-PROPELLER FOR BOATS. ARTHUR N. THOMPSON, Milwaukee, and ALBERT P. KNAUBER, Wauwatosa, Wis., assignors to The Necedah Manufacturing Corporation, Necedah, Wis. Filed Aug. 7, 1920. Serial No. 401,875. 10 Claims. (Cl. 115—17.)



1. In a motor-propeller for boats the combination of an engine and mounting brackets each comprising a clamp

adapted to be detachably fastened to a boat and a member having a transverse pivot connection with the engine



and a quickly detachable pin and socket connection with the clamp.

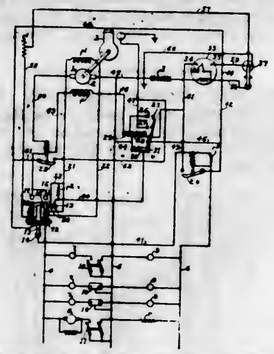
1,389,713. ELECTRICAL WALL-SWITCH. EMIL THOMPSON, Omaha, Nebr., assignor of one-half to Rangval Oleson, Omaha, Nebr. Filed Feb. 13, 1920. Serial No. 358,333. 1 Claim. (Cl. 200—166.)

In combination, a base plate of narrow construction adapted to extend diametrically across the base of a switch casing, narrow straps extending from said base plate and being bent at substantially right angles so as to lie along the upper and rear portions of the switch casing, said straps being made in one piece with the base plate and having their outer ends turned in opposite directions at right angles to the planes of the straps, wings made in one piece with the out-turned portions of said straps, said wings being extended to opposite sides of the straps and being provided with perforations therein, fastening means passing through the perforations and securing the wings to a support, said wings being provided at their lateral edges with forwardly over-turned flanges extending outwardly at substantially right angles to the planes of the body portions of the wings, the flanges of the upper and lower wings extending substantially in vertical alinement, and a cover plate fitted over and concealing the wings and straps and having its interior face adapted to come into contact only with said flanges, fastening means passing through said cover plate and engaged with the outwardly turned portions of said straps, said cover plate provided with marginal flanges bent rearwardly at an obtuse angle to the plane of the cover plate, the upper and lower flanges of the cover plate adapted respectively to engage the upper and lower ends of the flanges on said wings whereby to center the cover plate in a vertical direction and to guide the cover plate into place by the engagement of the obtuse flanges thereon with the upper and lower edges of the flanges on the wings, substantially as described.

1,389,714. SOLE-LAYING MACHINE. FELIX EMILE VALOIS, Haverhill, Mass., assignor to Hamel Shoe Machinery Company, a Corporation of Massachusetts. Filed May 6, 1918. Serial No. 232,739. 12 Claims. (Cl. 12—33.)

1. In a sole laying machine, in combination, a cross-head, a shoe-carrying jack provided with means for supporting the heel and toe portions of a shoe, and means for mounting said jack for pivotal adjustment upon said cross-head and about an axis adjacent the heel-supporting portion thereof on the opposite side of the cross head from said toe support portion.

1,389,715. MATTRESS. MOZES VAN GELDER, Chicago, Ill. Filed May 11, 1921. Serial No. 468,656. 4 Claims. (Cl. 5—13.)

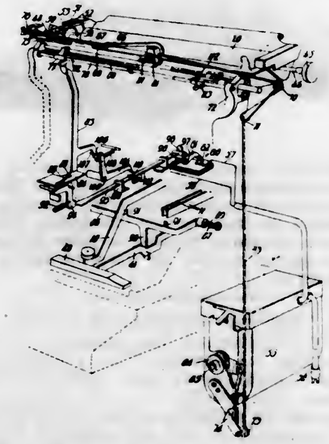


1. A mattress, comprising a suitable covering and a plurality of superposed layers of filling, the layers at both sides of the intermediate layers extending from end to end of the mattress, said intermediate layers extending from one end or the other to points between the respective opposite end and the transverse medial plane of the mattress.

1,389,716. ELECTRIC GENERATING SYSTEM. ROY M. VAN VLEET, Milwaukee, Wis., assignor to the Cutler-Hammer Mfg. Co., Milwaukee, Wis., a Corporation of Wisconsin. Filed June 14, 1920. Serial No. 388,731. 18 Claims. (Cl. 290—30.)

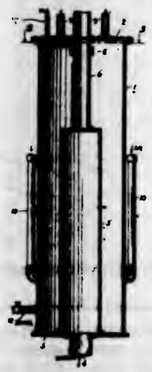
2. In an electric generating system, in combination, a generator, an engine to drive said generator, a storage battery of lower voltage than said generator, translating circuits to be supplied by said generator and battery respectively, and means responsive to variations in the load on the battery and the condition of the battery to

effect starting of said engine for operation of said generator to supply its translating circuit, said means



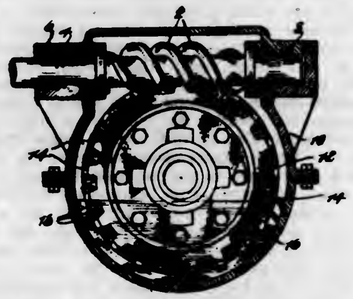
upon so responding also interrupting the battery translating circuit.

1,389,717. AUTOMOBILE ATTACHMENT. MAX VON BABO, Seattle, Wash. Filed Jan. 2, 1920. Serial No. 348,809. 3 Claims. (Cl. 188—16.)



1. In combination, an operating lever, a connecting rod attached to the operating lever, brake operating means provided for each rear vehicle wheel, means connecting the brake operating means with the connecting rod and means for positioning the connecting rod so as to actuate, upon movement of the operating lever, either of the brake operating means or both.

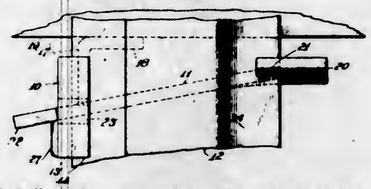
1,389,718. TYPEWRITING-MACHINE. JOHN WALDHEIM, Elizabeth, N. J., assignor to Underwood Typewriter Company, New York, N. Y., a Corporation of Delaware. Filed Sept. 18, 1919. Serial No. 324,617. 15 Claims. (Cl. 197—66.)



1. In a typewriting machine, the combination of a carriage, carriage-returning means, type-key-levers, a universal bar having projections thereon normally out of the path of actuation of said key-levers, means actuable by said carriage to render said universal bar effective by moving it laterally to bring the projections into the path of said key-levers, so that said universal bar may be actuated by said key-levers, and means whereby actuation of said universal bar will cause actuation of said carriage-returning means.

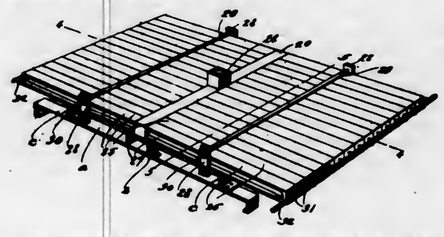
1,389,719. CARBURETER. SANDERS WALKER, Wichita Falls, Tex. Filed July 5, 1919. Serial No. 308,845. 1 Claim. (Cl. 257—58.)

A carbureter having an exterior casing, a substantially large tubular heater or vaporizer completely inclosed within said casing, an inlet pipe connected to said exterior casing and to the vaporizer to admit exhaust gases from an engine to the vaporizer, said vaporizer having its periphery smooth and extending from the bottom of the exterior casing to within a relatively short distance of the top thereof and connected to a tubular neck, said neck extending from the top of the vaporizer to and beyond the exterior casing and comprising an outlet for said exhaust gases, in combination with a collar on said neck, a feed pipe projecting within the exterior casing and disposed over said collar to admit liquid to be vaporized by its distribution over said collar, neck and vaporizer by the heat of said exhaust gases, means on the upper end of the exterior casing for carrying off the vapor formed, and annularly disposed pipes on the outside of the exterior casing in parallel relationship thereto for admission of air into the casing, and means for controlling the air.



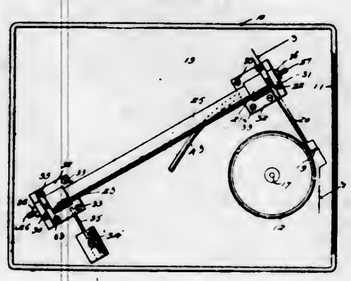
1,389,720. LUBRICATING MEANS AND PROCESS. CHARLES A. WARD, Mount Vernon, N. Y. Filed July 1, 1919. Serial No. 308,017. 7 Claims. (Cl. 74—36.)

1. The process of lubricating engaging or bearing surfaces, which consists in exposing at the engaging surface



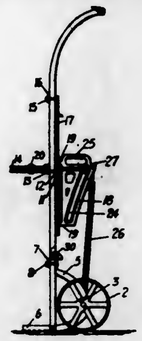
of one of the engaging parts individual masses of liquid lubricant otherwise confined, and overfilling the confining means between engaging operations.

1,389,721. RAIL-ANCHOR. HAROLD G. WARR, Park Ridge, Ill., assignor to the P & M Company, Chicago, Ill., a Corporation of Illinois. Filed Oct. 6, 1920. Serial No. 414,986. 29 Claims. (Cl. 238—329.)



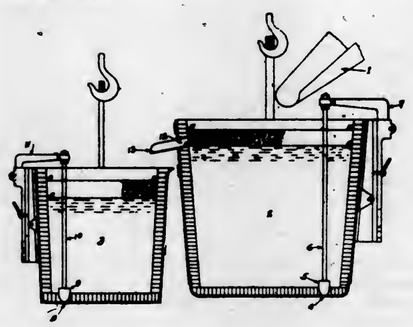
2. A rail anchor comprising a member having a jaw to engage the rail; said member being made of a piece of rolled metal having a configuration corresponding to the shape of said jaw.

1,389,722. MOLD FOR PLURAL CASTINGS. JOHN G. WEBB, Richmond, Va. Filed Jan. 5, 1920. Serial No. 349,386. 8 Claims. (Cl. 22—142.)



1. A composite mold comprising a runner brick having a plurality of outlet gates, and a plurality of mold members having each a plurality of like mold faces and associated with each gate and providing a mold form arranged to receive from that gate, the association of mold members at each gate including a like mold face of a mold member of another association.

1,389,723. MEASURING DEVICE. GEORGE L. WELLER, Elyria, Ohio. Filed Nov. 16, 1920. Serial No. 424,343. 8 Claims. (Cl. 234—20.)

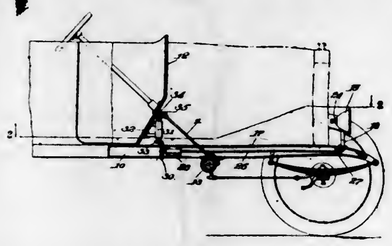


1. A meter including a rotating recording chart, a pen engaging the chart, a pen arm at one end of which the pen is supported, a counterweighted member oscillatably disposed in an inclined plane and to a portion of which said pen arm is connected, said member having spaced parallel mercury columns in communication at their lower ends, and pressure supply connections independently communicating with the upper ends of the mercury columns, as described.

1,389,724. TANK-TRUCK. BENEDICT E. WILLETT, nee Dayton, Ohio. Filed Apr. 23, 1920. Serial No. 375,958. 2 Claims. (Cl. 214—65.5.)

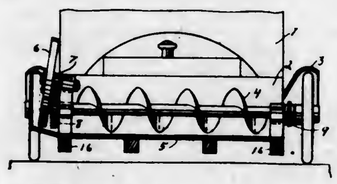
1. In a device of the type described, the combination with a hand truck body, of a pair of tongs pivotally secured to said body, a vertically movable handle member on the rear portion of said body, a cross piece loosely passing through a curved slot in said handle member, and links connecting said cross piece and said tongs, whereby when the handle member is moved in one direction, the tongs will be opened to receive the body portion of a tank, and when moved in the opposite direction, said tongs will be closed around the body portion of said tank.

1,389,725. METHOD OF POURING STEEL. ANDREW HUNTER WILLIS, Erie, Pa., assignor to National Foundry Company, Erie, Pa., a Corporation of Pennsylvania. Filed May 6, 1920. Serial No. 379,387. 5 Claims. (Cl. 22—209.)



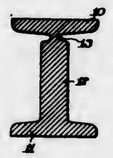
1. The method of pouring molten metal which consists in pouring the metal into one ladle and discharging a portion of the metal as it is poured from said ladle into a second ladle, retaining a portion of the slag in the first-mentioned ladle and delivering a portion of the slag to the second-mentioned ladle.

1,389,726. AUTOMOBILE-HEADLIGHT. CLARENCE G. WORLEY, Marietta, Ga. Filed Oct. 6, 1919. Serial No. 328,864. 2 Claims. (Cl. 240—62.)



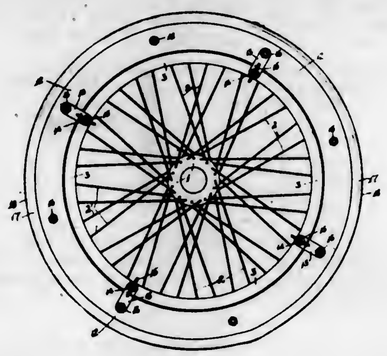
1. The combination with an automobile, of two headlights pivotally mounted on the frame of the automobile, a connection between the headlights whereby when one headlight is turned upon its pivot the other headlight will be turned, a shaft extending from each headlight through its post into the frame, means on one of said shafts for fastening the headlight in its post, means comprising a gear on the other shaft for fastening the head-

light in its post, a shaft mounted within the frame having a driving gear meshing with said first gear, a driven gear on the other end of said shaft, a shaft mounted in a bearing fastened to the dashboard having a driving gear



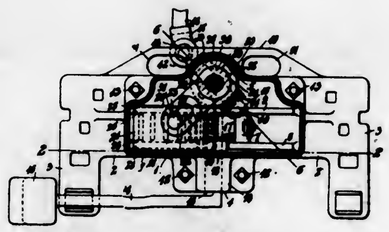
meshing with the last said gear and a driven gear meshing with a gear fastened on the steering post of the automobile whereby when the steering post is operated to turn the wheels the headlights will be correspondingly turned.

1,389,727. SNOWPLOW. CLARENCE W. YEITER, Alto, Mich. Filed Mar. 29, 1920. Serial No. 369,707. 2 Claims. (Cl. 37—57.)



1. In a snow plow for use upon auto vehicles, a shovel mounted ahead of the vehicle and arranged to slide snow upwardly and backwardly as the vehicle advances, a crib mounted at the rear of the shovel laterally of the vehicle, a horizontally disposed revoluble spiral mounted longitudinally in the crib, means for revolving the spiral from the power that propels the vehicle, a spiral exhaust fan mounted at the discharge end of the crib at an incline upwardly from the longitudinal plane of the floor of the crib, and means for propelling said fan for exhausting snow from the crib and elevating it as it passes through the fan.

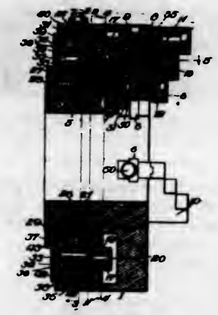
1,389,728. HINGE CONNECTION. NICHOLAS W. AKIMOFF, Wynnewood, Pa., assignor to General Machinery Foundations Company, Philadelphia, Pa., a Corporation of Delaware. Filed Aug. 12, 1920. Serial No. 403,120. 3 Claims. (Cl. 74—104.)



3. A new article of manufacture comprising a rolled metal shape having attaching members, and a web portion connecting said attaching members, said web portion being in the main relatively heavy, but having a reduced portion of small linear dimension forming a fulcrum for angular motion of parts to which the shape is attached.

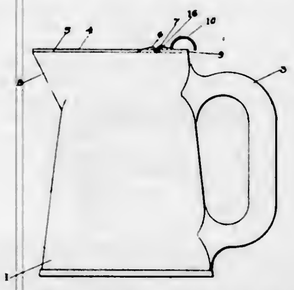
1,389,729. WHEEL AND RESILIENT TIRE FOR ROAD-VEHICLES. WILLIAM ALDERSON, Kimberly, Cape of Good Hope, South Africa. Filed Nov. 29, 1920. Serial No. 427,171. 2 Claims. (Cl. 152—10.)

1. In a wheel and a resilient tire therefor, the combination with a rim portion of the wheel of a retaining ring fixed to one side of the rim, clamping means detachably connected to the rim at the other side of said wheel, a second retaining ring detachably secured to the clamping means and the first-mentioned retaining ring, an inner resilient tube placed around the rim and between said retaining rings, and an outer and concentric compound resilient tube embodying curved reinforcing medial plates, said plates being staggered or so disposed that the gaps formed between their ends are placed at different points within and around the compound resilient outer tube, as set forth.



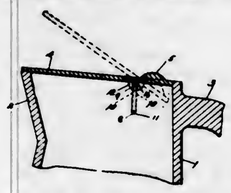
1,389,730. SWITCH-STAND. FRANK C. ANDERSON, Cincinnati, Ohio. Filed Mar. 3, 1921. Serial No. 449,401. 17 Claims. (Cl. 246—411.)

11. In a switch-stand, a base having a bearing for a crank on an upright axis, and having a projection past said bearing to retain connecting means in a crank mounted in said bearing.



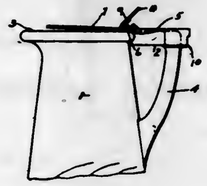
1,389,731. CHUCK. WENDELL A. BARKER, Elkhart, Ind. Filed July 5, 1919. Serial No. 308,888. 4 Claims. (Cl. 279—114.)

1. In a chuck, the combination of a rotatable chuck body, jaws movable radially therein, levers pivoted at one end on said chuck body and articulated intermediate their ends to said jaws, cam means concentric with said body and normally rotating at the same speed and in the same direction with the latter and operating on said levers at their other ends to swing said levers in both directions,



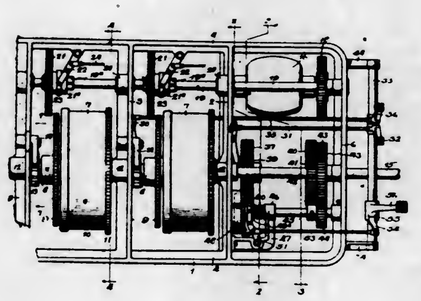
and means for rotating said cam means relatively to said chuck body while the latter is rotating, to effect actuation of said levers.

1,389,732. SANITARY PITCHER OR THE LIKE. CHARLES S. BARON, Tiffin, Ohio. Filed Apr. 16, 1917. Serial No. 162,344. 1 Claim. (Cl. 65—31.)



The combination with a receptacle provided upon opposite sides of its open end with bearings, and an upward elongation of the rear wall of the receptacle between said bearings, of a removable tilting lid provided with members for removably engaging said bearings and completely closing the open end of the receptacle by resting upon the forward edge of the open end and by an edgewise engagement of the lid with the elongated rear wall between said bearings, said lid having an upwardly and downwardly curved thumb piece projecting over the elongated edge of the receptacle thereby serving as a means both for actuating and limiting the tilting movement of the lid.

1,389,733. SANITARY PITCHER OR THE LIKE AND MEANS FOR CONNECTING THEIR COVERS THERETO. CHARLES S. BARON, Tiffin, Ohio. Filed May 25, 1918. Serial No. 236,480. 3 Claims. (Cl. 65—31.)

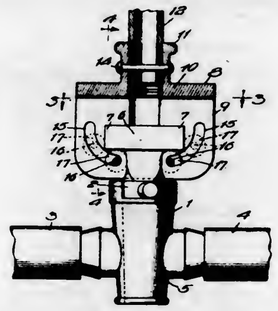


1. The combination with a receptacle provided upon opposite sides of its open end with bearings and with sockets below the same, respectively, of a lid provided with lugs working as hinge members in said bearings, and a resilient pintle, provided, with a back bone engaging said lid, with side pieces, and with terminals adapted to engage said sockets for the purpose specified.

1,389,734. LIQUID-CONTAINER HAVING SEPARABLE TOP. CHARLES S. BARON, Tiffin, Ohio. Filed May 31, 1919. Serial No. 301,050. 1 Claim. (Cl. 65—31.)

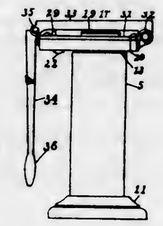
The combination with a container provided with a projecting member, of a removable top comprising a securing extension thereon detachably fitting over and slidable longitudinally of said member to form a slip-joint therewith, said extension tightly fitting said member and having portions depending from the top surface of said member and relatively rigid with relation thereto snugly engaging the same along not less than four planes of contact to thereby effectively resist strains tending to displace the top.

1,389,735. PROPELLING MECHANISM FOR VEHICLES. JOSEPH R. BROACH, Chicago, Ill. Filed Mar. 7, 1921. Serial No. 450,269. 7 Claims. (Cl. 185—40.)



1. A propelling mechanism comprising a plurality of spring actuated motors, each including a driven gear wheel, means for winding said motors, a drive shaft, gear wheels slidably mounted on said shaft, shifting mechanism for said sliding gear wheels, and means for locking the driven gear wheel of each motor when its associated gear wheel is shifted out of engagement therewith.

1,389,736. WRENCH FOR STOP AND WASTE COCKS. EDWARD C. BUEHLER, Chicago, Ill. Filed Apr. 15, 1921. Serial No. 461,736. 4 Claims. (Cl. 81—121.)



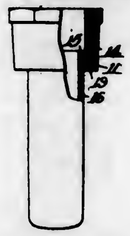
1. A socket wrench adapted to be placed upon a valve having a T-head, the socket being provided with slots at

each end, movable members in the slots adapted to be spread apart by the T-head as the wrench is applied and

adapted to drop inwardly beneath the ends of the T-head to prevent the free removal of the wrench.

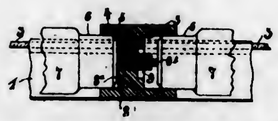
1,389,737. VEHICLE-JACK. WILLIAM E. BURROWS, St. Joseph, Mo. Filed Apr. 3, 1920. Serial No. 371,046. 2 Claims. (Cl. 254—102.)

1. In a three-section jack; an upper section a middle section and a lower section of tubular formation the last mentioned section having holding notches formed in its lower end said upper section having spline channels formed longitudinally in its inner surface, said upper section being telescoped into said middle section while the last mentioned section is telescoped into said lower section; a base in which the lower end of said lower section is secured, said base having a shoulder formed therein; a disk having a square aperture formed through the center thereof; a plurality of holding lugs formed on the periphery of said disk, said lugs being in said notches for holding said disk against rotation; a holding rod having a square portion formed thereon; rod securing means whereby said rod is secured on said disk with said square portion in said square aperture; a plurality of spline keys secured in the upper end portion of said rod extending therebeyond; a holding sleeve having a like plurality of spline channels formed longitudinally in its inner surface, the extended portions of said keys being in said channels; and a plurality of other spline keys secured in the upper end portion of said sleeve said other keys extending therefrom into the spline channels of said upper section of said jack; the whole forming slidably splined holding means whereby said upper section is held against rotation.



1,389,738. GRINDING-WHEEL CHUCK. CALVIN E. CADMAN, South Beloit, Wis. Filed July 19, 1920. Serial No. 397,193. 6 Claims. (Cl. 51—209.)

1. A grinding wheel chuck, comprising a body adapted to receive a grinding wheel, said body being provided with an internal groove, a split ring disposed in said groove, and means acting on said ring for forcing the same into

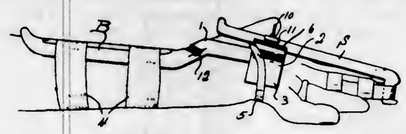


clamping relation with the perimeter of a grinding wheel disposed within said body.

1,389,739. METHOD OF FORMING A PRESSED METAL ARTICLE. HJALMAR G. CARLSON, Worcester, Mass., assignor, by mesne assignments, to Rockwood Sprinkler Company of Massachusetts, Worcester, Mass., a Corporation of Massachusetts. Filed Sept. 17, 1918. Serial No. 254,481. 7 Claims. (Cl. 29—156.)

1. The method of making an article having a hollow closed end and a double-walled open end, which consists in drawing out a flat blank of cold drawn sheet stock into an elongated tubular shape with one end closed and reduced in thickness and the other end having a circular flange surrounding it, then reducing and elongating the closed end only of the blank by a series of steps, and finally turning over the flange so as to envelop the adjacent wall of the blank.

1,389,740. SOCKET FOR TUBULAR LAMPS. MARC CHALIER, Paris, France. Filed July 10, 1914. Serial No. 850,186. 1 Claim. (Cl. 173—337.) (Granted under the provisions of the act of Mar. 3, 1921, 41 Stat. L., 1313.)

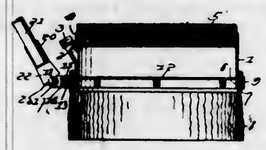


A solid socket made of one piece of insulating material adapted to be positioned in a channel forming foot-lights, said socket having recesses in its ends to support tubular lamps, a metallic bushing extending longitudinally through said socket and having a flat head located in one of said recesses and a yieldable plunger contained therein and extending into the other recess, a tightening nut located in a cavity of this recess and threaded on the bushing to fix the latter in position, an opening in said socket leading into said cavity of the recess containing said nut, which holds the end of one of the leads or electric wires intended to supply current and passing through said opening to said cavity of the recess, the other end of the wiring being connected to the conducting wire arranged in a groove at one edge of said channel.

1,389,741. SURGICAL SPLINT. ARTHUR LAMBERT COTTON, Sayre, Pa. Filed Sept. 25, 1920. Serial No. 412,680. 4 Claims. (Cl. 128—85.)

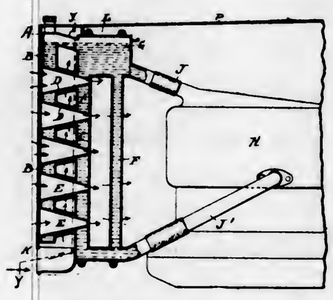
1. A device for imposing traction on a fractured digit comprising an elongated body adapted to snugly contact

with an extremity of the human body and provided with guides positioned adjacent the inner ends of the digits of an extremity of the human body to which the device is applied, and a splint adjustably connected with the body



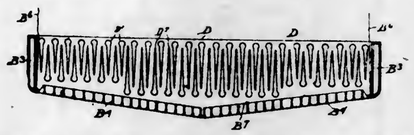
and extending lengthwise of and terminating in advance of the digit to be treated, the forward end portion of the splint being provided with a member overlying the tip of said digit.

1,389,742. COLORED IMAGE AND PROCESS OF PRODUCING THE SAME. JOHN I. CRABTREE, Rochester, N. Y., assignor to Eastman Kodak Company, Rochester, N. Y., a Corporation of New York. Filed May 2, 1919. Serial No. 294,343. 21 Claims. (Cl. 95—88.)



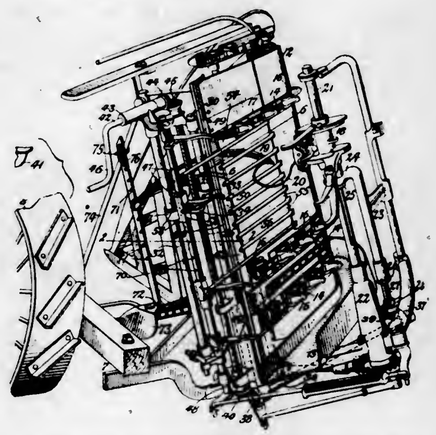
1. The process of producing a colored image from a photographic image, which consists in replacing at least a part of the original photographic image by an iron toned image and mordanting a suitable dye to the toned image.

1,389,743. FOUNTAIN FLOOR AND FURNITURE POLISHER. MARLIN CRONER, Klemme, Iowa. Filed Feb. 7, 1920. Serial No. 356,963. Renewed Feb. 12, 1921. Serial No. 444,540. 1 Claim. (Cl. 15—13.)



In a floor and furniture polisher, the combination with a head having a marginal flange on one face thereof, of a rub cloth engaging said flange, a clamping band engaging around said rub cloth, and means passing through the clamping band and the flange and through the mop to secure the parts together, said clamping band having opposed end parts, means passing through said parts to draw them together, said parts beyond the means terminating in ears, and a handle receiving socket pivotally mounted upon said ears.

1,389,744. RADIATOR. EDWARD T. CURRAN, Detroit, Mich. Filed Aug. 5, 1918. Serial No. 248,261. 2 Claims. (Cl. 257—125.)

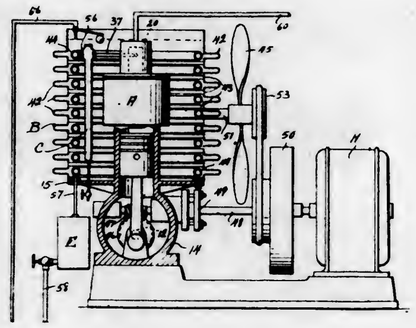


1. In a radiator, the combination of two water receptacles connected by forwardly directed conical air pipes, each having a circumferential water jacket forming a communication between said receptacles, in combination with a third receptacle located so as to present a surface in the line of travel of the jets of air passing from said pipes, substantially as described.

1,389,745. AIRPLANE-RADIATOR. EDWARD T. CURRAN, Detroit, Mich. Filed Nov. 18, 1918. Serial No. 262,951. 1 Claim. (Cl. 257—130.)

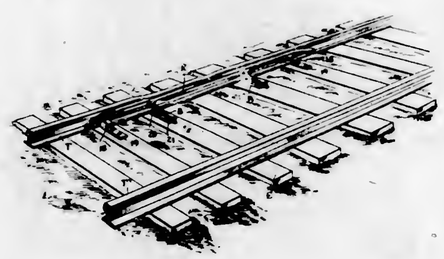
In a radiator, a series of water tubes formed with a beaded edge on one side thereof, the other edge being united by welding, the two plates being wider apart at the beaded edge than at the welded edge, the alternate tubes being arranged oversely so that the welded edge of one would be opposite the beaded edge of the adjacent one and the beaded edge opposite the welded edge, substantially as described.

1,389,746. HARVESTER. GEORGE A. FARRALL and CHRISTIAN MAUL, Batavia, N. Y., assignors to Massey-Harris Harvester Company, Inc., Batavia, N. Y., a Corporation of New York. Filed June 10, 1919. Serial No. 303,183. 9 Claims. (Cl. 56—70.)



1. A harvester comprising a binder deck the rear end or delivery portion of which has the form of a plurality of spaced longitudinal tines which are fixed only at their front ends while their rear ends are free, and a tying mechanism including a knotter arranged in front of said tines and a needle coöperating with said knotter and mounted in rear of said tines and movable transversely and perpendicular to the plane of said deck.

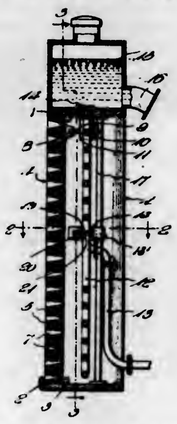
1,389,747. REFRIGERATING-MACHINE. PHILIP FISCHBACHER, Quincy, Ill., assignor to American Sanitary Refrigeration Co., Owensboro, Ky., a Corporation of Delaware. Original application filed July 30, 1919, Serial No. 314,222. Divided and this application filed July 12, 1920. Serial No. 395,490. 5 Claims. (Cl. 62—115.)



1. In a refrigerating compressor, a compression cylinder and means for condensing a refrigerating agent

ejected from the cylinder comprising a jacket surrounding the cylinder and adapted to contain cooling liquid, a cooling coil disposed within the jacket and into which the

refrigerating agent from the cylinder is discharged, said jacket having transversely extending pipes of relatively thin metal opening at their outer ends upon the outside of the jacket.



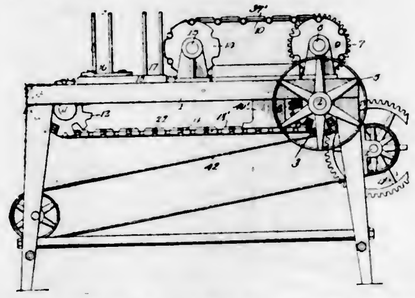
1,389,748. CIRCUIT-CONTROLLER FOR TRAIN-CONTROL APPARATUS. JOHN G. FISHER, Fairfax county, Va., assignor of one-half to Frank M. Fisher, Paducah, Ky. Filed May 27, 1921. Serial No. 473,068. 8 Claims. (Cl. 246—255.)

1. A circuit controller comprising a wheel adapted to be insulated from a car, and a contact rail supported for movement and yieldingly urged to a predetermined position, said rail being adapted to normally occupy such a spaced position with respect to a track rail so as to be engaged and held in contact with the flange of said wheel during movement of the latter over the track rail whereby the flange is caused to have rotating contact with the contact rail to provide a good electrical contact between the two and to remove foreign matter from the contact surfaces of the two.

1,389,749. AUTOMOBILE-RADIATOR. OLOF FROBERG, Benton Harbor, Mich. Filed Nov. 17, 1919. Serial No. 338,415. 2 Claims. (Cl. 257—125.)

1. In an automobile radiator, a frame, water conducting means in said frame, a screen in said frame in front of said water conducting means and having vertical and transverse strips providing passages of substantially an even diameter for the depth of the screen, and tubes

mounted in the air passages and tapering inwardly toward the water conducting means.

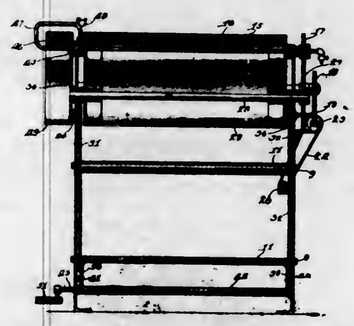


1,389,750. ELECTROLYTE FOR STORAGE BATTERIES. WILLIAM GARDINER, Chicago, Ill., assignor, by mesne assignments, to D-G Storage Battery Co., Chicago, Ill., a Corporation of Delaware. Filed Aug. 22, 1918. Serial No. 250,971. 1 Claim. (Cl. 204—29.)

An electrolyte for storage batteries including a mixture of powdered glass and an acid solution.

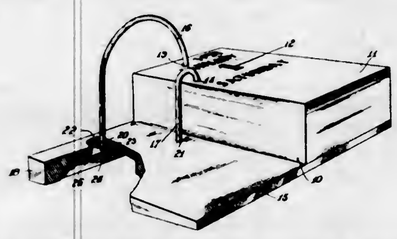
1,389,751. METHOD OF REMOVING ACCRETIONS. SAMUEL RICHARD GARR and RALPH F. BARKER, Garfield, Utah, assignors to American Smelting & Refining Company, a Corporation of New Jersey. Filed June 22, 1917, Serial No. 176,276. Renewed Jan. 15, 1920. Serial No. 351,555. 6 Claims. (Cl. 266—43.)

6. In the art of removing accumulations from metallurgical furnaces, the method which consists in introducing into the furnace while still hot a charge of crude oil as long as the accumulations absorb the oil and then restoring the furnace to its active normal operative condition.



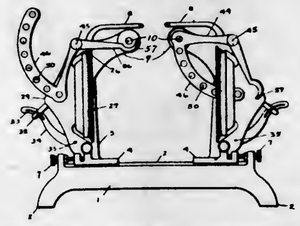
1,389,752. CAN-END-LINING MACHINE. CHARLES W. GRAHAM, Crestwood, N. Y., assignor to American Can Company, New York, N. Y., a Corporation of New Jersey. Filed Apr. 17, 1916. Serial No. 91,740. 27 Claims. (Cl. 113—80.)

1. In a machine for placing can end liners onto the flanges of shouldered can ends for forming interfolded



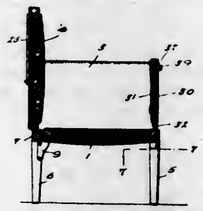
hermetic joints with flanged can bodies, in combination: a continuously movable hinged member adapted to receive a can end and a can end liner, and having means for holding same in spaced assembling relation, and continuously moving assembling mechanism mounted separately from said hinged member, whereby the said liner is passed along the shoulder of said can end onto the flange thereof; and means for discharging the lined can end.

1,389,753. IRONING-MACHINE. AXEL R. GUSTAFSON, Chicago, Ill. Filed July 10, 1920. Serial No. 395,267. 5 Claims. (Cl. 68—9.)



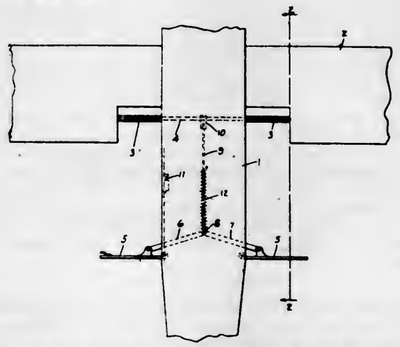
4. In an ironing machine, the combination of a stationary frame, a main heated member mounted within said frame, an auxiliary heated member rigidly connected to said main heated member and supported at one end only outside said frame, a pair of levers fulcrumed on said frame, a main padded roll carried by said levers within the frame, an auxiliary roll rigidly attached to said main padded roll and supported at one end only outside said frame in cooperative relation to said auxiliary heated member, a single power means for rotating the main heated member and its auxiliary heated member, and the main padded roll and its auxiliary roll, and means for actuating said levers to move said main and auxiliary rolls as a unit toward and from their respective heated members.

1,389,754. CALENDAR-PAD AND HOLDER THEREFOR. FRANK A. HALE, Chicago, Ill., assignor to Hale Specialty Company, Chicago, Ill., a Corporation of Illinois. Filed June 23, 1920. Serial No. 390,989. 4 Claims. (Cl. 40—120.)



1. A memorandum calendar pad comprising a series of separate relatively long and narrow leaves of uniform size each printed with calendar information adjacent one end and having a pair of filing apertures, one in a side marginal portion of the leaf at a substantial distance from the said printed end of the same but at a greater distance from the other end of the leaf, and the other filing aperture being in a marginal portion of the leaf at the said printed end of the same but at a substantial distance from the side edge of the leaf along which the first separately mentioned aperture is located whereby a major portion of the length of each leaf remote from the said printed end is clear for the entry of memoranda thereon.

1,389,755. EYE-TESTING INSTRUMENT. FREDERICK HAMILTON, Providence, R. I., assignor to American Optical Company, Southbridge, Mass., a voluntary association of Massachusetts. Filed Apr. 22, 1919. Serial No. 291,896. 16 Claims. (Cl. 88—22.)



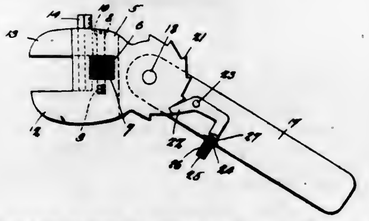
1. An eye testing instrument, including a rotatable carrier, a series of lens holding rings loosely supported within the carrier, and means for selectively ejecting the lens from the carrier as desired.

1,389,756. CONVERTIBLE FURNITURE. TIMOTHY HANLEY, East Norfolk, Mass. Filed Nov. 29, 1920. Serial No. 427,077. 5 Claims. (Cl. 5—47.)

2. A piece of convertible furniture comprising a frame, a reversible seat carried thereby, an extension hinged to the underside of said seat and including a pair of hingedly connected sections, means for securing said sections in an upright position to form one side of a crib and means to secure said sections at right angles to each other.

1,389,757. AIRPLANE-BRAKE. CALEB V. HAYNES, Indianapolis, Ind. Original application filed Sept. 20, 1919, Serial No. 325,222. Divided and this application filed Nov. 2, 1920. Serial No. 421,310. 4 Claims. (Cl. 244—29.)

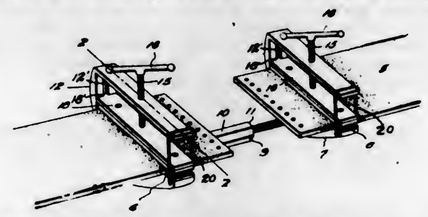
1. Means for retarding the flight of air ships comprising braking surfaces hinged to parts of the air ship, and



movable against the air pressure, pressure operated means also hinged to parts of the air ship in the rear of said braking surfaces, and movable with the air pressure, and links connecting said braking surfaces to said pressure operated parts, whereby when said pressure operated means moves to open position the braking surfaces will be automatically moved to braking position against the air pressure.

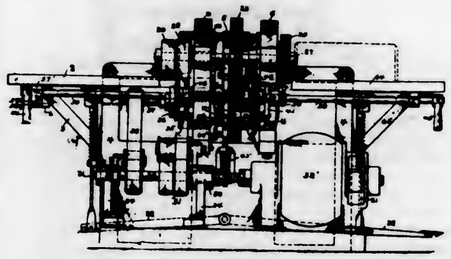
1,389,758. STUD FOR SNAP-FASTENERS. GEORGE A. HOLMES, Newton Center, Mass., assignor to United States Fastener Company, a Corporation of Maine. Filed July 1, 1920. Serial No. 393,356. 1 Claim. (Cl. 24—219.)

A stud member of a snap fastener, composed of a screw having a head which is approximately hemispherical on its upper surface and plane on its lower surface, and a base and filling piece secured on the shank of the screw, the base portion of which constitutes a flange projecting from the shank of the screw, and the filling portion of which extends from the inner edge of said flange to the outer edge of the screw head, and constitutes with said screw head an approximately spherical stud proper, which coöperates with a resilient socket member.



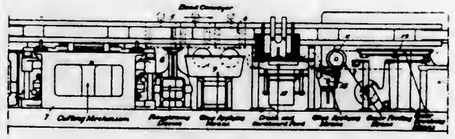
1,389,759. RATCHET-WRENCH. SIRENO E. HUFF, Greeley, Colo. Filed Apr. 13, 1920. Serial No. 373,468. 1 Claim. (Cl. 81—59.)

In a ratchet wrench, a head having concaved sides and an opening in the concaved portions of the sides forming a seat for a screw, a pin lying in the said head and extending through the opening on which the screw is rotatably mounted, a jaw formed integral with the said head, the said jaw having a way therein extending from one edge, a bar having a flat outer surface slidable in the said way and having teeth, the said way intersecting the opening in the head to permit the screw to engage the teeth of the bar, a movable jaw carried by the said bar, the said head having a bifurcated rear section, the edges of the said rear section having ratchet teeth thereon, a handle extending into the bifurcated section of the head, a pin on which the said handle is oscillatably mounted, a dog on each side of the handle, means for pivotally connecting the said dog to the handle whereby the noses of the dogs are in operative relation to the ratchet teeth, a device connecting the said dogs to form a yoke, and a spring for urging the noses of the dogs toward the ratchet teeth.



1,389,760. BELT TIGHTENER AND LACER. CLIFFORD S. HUMBERT, Scobey, Mont. Filed Mar. 1, 1920. Serial No. 362,290. 2 Claims. (Cl. 254—54.)

1. Two members including a fixed jaw on which a belt end is designed to rest, and means between the members for moving the same toward each other, the fixed jaw having an upstanding portion at one end thereof and a spring arm extending laterally therefrom and overlying

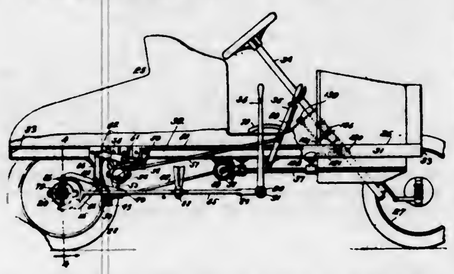


the said fixed jaw, a bail carried by the fixed jaw and designed to swing over the spring arm for forcing the same toward the jaw, a screw threaded through the arm, and a movable jaw swiveled to the screw.

1,389,761. PLATE FINISHING AND COOLING MACHINE. ROBERT T. JOHNSTON, Scotch Plains, N. J., assignor to R. Hoe and Co., New York, N. Y., a Corporation of New York. Filed Sept. 6, 1918. Serial No. 252,888. 11 Claims. (Cl. 29—21.)

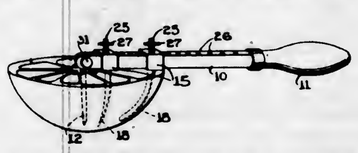
1. In a stereotype plate finishing machine, the combination of a finishing cylinder, means for driving the cylinder, means for disconnecting the driving means after a partial revolution, means for locking the cylinder against rotation, and manually operated means for breaking the lock and throwing the power operating means into operation.

1,389,762. BOOK COVERING AND BINDING MACHINE. CHARLES A. JUENGST, Croton Falls, N. Y., assignor to American Assembling Machine Company, Inc., Memphis, Tenn., a Corporation of Delaware. Filed Nov. 11, 1919. Serial No. 337,159. 14 Claims. (Cl. 11—4.)



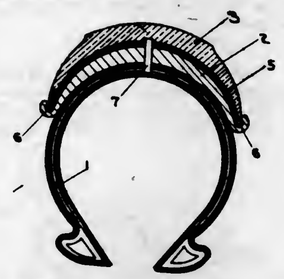
2. A binding and covering machine comprising: a book conveyer including a plurality of clamps for supporting books in an upright position, and binding and covering means located adjacent to the path of the book conveyer including: means for applying glue to the back of the book, means for applying a strip of crash and a cardboard blank to the glued back of the book, with the crash intermediate the book and cardboard, cover feeding and applying means for pressing a cover into contact with the cardboard on the book, means for applying glue to the cover before it reaches the cardboard on the book, and cover breaking means.

1,389,763. SPINNER. CHARLES H. KEWELL, San Francisco, Calif. Filed Sept. 10, 1919. Serial No. 323,014. 2 Claims. (Cl. 43—45.)



1. In a spinner a spoon, water-proofed material integrally formed to resemble a plurality of roundish eggs of various sizes, and having a central opening therethrough, and being within the wall of said spoon, a shaft extending through said central opening, and an outwardly tapered sleeve upon said shaft at each end of said material and secured thereto.

1,389,764. MOTOR-VEHICLE. SEYED KHALIL, Newark, N. J., assignor of forty-five per cent. to Isador Stern, Newark, N. J. Filed July 23, 1920. Serial No. 398,475. 9 Claims. (Cl. 180—18.)

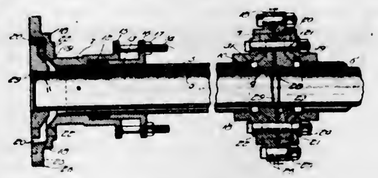


1. In a motor-driven vehicle having an engine shaft, a main supporting frame, front and rear wheels, a rear axle in sections for said rear wheels and a steering rod, in combination, for each axle section, an oscillatory link having an adjustable saddle, means for oscillating said link from the engine shaft, means for positioning said saddle along said link to vary the speed of the vehicle, oppositely disposed links pivotally connected at their forward ends with said saddle, sleeves on the rear axle section respectively pivotally connected with the read ends of said links and adapted for reverse oscillatory rotation therefrom, means for alternately engaging said sleeves with the axle-section for rotating the same, manually operative means for setting said engaging means to cause the movement of said sleeves to rotate said axle-section in either direction to vary the direction of travel of the vehicle, and means for adjusting said saddle to cause said link to impart a differential motion to the axle section when desired.

1,389,765. RIND CUTTER AND CORER FOR CITRUS FRUIT. MICHAEL KROTA, Holyoke, Mass. Filed Mar. 19, 1921. Serial No. 453,630. 5 Claims. (Cl. 146—6.)

1. A device of the class described, comprising a bar, a pivot pin on one end of said bar, a pair of knives carried by said bar, and means for securing said knives to said bar in adjusted positions longitudinally thereof, and means for varying the angular relation of said pivot pin with said bar.

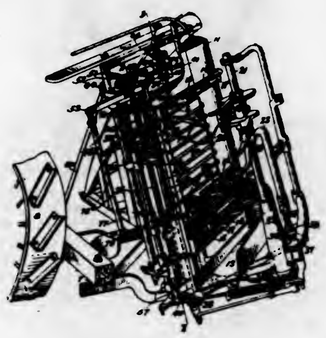
1,389,766. VEHICLE-TIRE. GEORGE W. C. LOMB, Covington, Ky. Filed June 16, 1919. Serial No. 304,564. 1 Claim. (Cl. 152—33.)



A tire protector for pneumatic tires comprising in combination with a pneumatic tire, a metal rim of arc-shape in cross section, and of a size to cover less than the half circle of said tire, said rim having rolled edges to form a channel protected at the sides, and a cushioned tread for said metal rim comprising a vulcanized fabric body and wire reinforcements at the edges of said body, said wire reinforced portions of the body being adapted to seat in and be protected by said channel and a solid rubber facing for the vulcanized fabric, said facing terminating short of the wire reinforced portion, whereby it does not extend into the channel.

1,389,767. ARCH-SUPPORTER. WALTER M. LUDWIG, Boston, Mass., assignor, by direct and mesne assignments, to Federal Arch-Lift Manufacturing Company, a Corporation of Massachusetts. Filed Aug. 4, 1920. Serial No. 401,199. 8 Claims. (Cl. 128—266.)

1. An arch support comprising a bandage of flexible material to embrace the arch and instep portion of the foot, means for adjusting said bandage and an adjustable supporting member connected to said bandage opposite the sides of the foot, and extending around the ankle to embrace the Achilles tendon.



1,389,768. FLANGED COUPLING FOR DOUBLE-PIPE CONDUITS. OWEN D. MCFARLAND, Chicago, Ill., assignor to Guyton and Cumfer Manufacturing Company, Chicago, Ill., a Corporation of Illinois. Filed May 9, 1919. Serial No. 295,823. 2 Claims. (Cl. 285—22.)

2. A flange coupling for a double pipe conduit, providing in combinative association, two like flange coupling members, each member having a pair of longitudinally extending openings for two different size pipes; a series of concentrically arranged bolt holes between said openings, and
